ENSURE REGISTRATION OF EVERY BIRTH AND DEATH

PREFACE

Birth and Deaths are the two most important vital events that define life of an individual. Not only do they describe the legal existence of an individual, registration of these events is a primary source of vital data of the population to which they belong. Civil Registration is a continuous, permanent, compulsory recording of the occurrence and characteristics of vital events, like births, deaths and still births. These vital statistics are invaluable for planning, monitoring and evaluating various programmes related to primary health care, family planning, maternal and child health, education etc. Information collected through the registration process about vital events provides useful and important statistics.

2. This issue of the Report on 'Vital Statistics of India based on the Civil Registration System' for the year 2023 provides an overview of the working of the Civil Registration System (CRS) in the country and presents a compilation of data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up and sex ratio at birth based on Civil Registration Records. Based on the Annual Reports of the States/UTs, the report for the year 2023 containing key information of events pertaining to the period 1st January 2023 to 31st December 2023 has been brought out for the convenience of users.

3. The publication is divided into two parts. Part-I provides a brief review of the Civil Registration System and contains a summary analysis of data on registered births, deaths, infant deaths and sex ratio at birth based on registered births at the State level. Part-II consists of the main tables which provide State and District-wise data on registered births, deaths, infant deaths and still births with rural-urban & sex-wise break-up.

4. The data source for the report is the statutory Annual Statistical Report prepared by the Chief Registrars of Births & Deaths of States/UTs. I take this opportunity to express my sincere gratitude to all the Chief Registrars of Births & Deaths of various States/UTs for their kind cooperation in providing the requisite information. I am thankful to each one of them for their invaluable and continuing cooperation.

5. I would like to take this opportunity to mention that the Registration of Births & Deaths Act (RBD Act), 1969 has been amended for the first time since its inception, through the Registration of Births & Deaths Act, 1969(Amended in 2023) (No. 20 of 2023) with a view to accommodate changes and new developments in the society during the last five decades. Various provisions of the Act have been suitably amended to enhance the convenience of general public in getting the events registered. I am hopeful that more dynamic implementation of the provisions of the RBD Act 1969(amended in 2023) shall help reduce the time gap and establish this as a reliable source of information on Birth and Death registration in the country.

6. The report has been prepared by the CRS Section of this office. I would like to place on record my appreciation for the efforts put in by all the officers and staff working in the CRS Section of the Office of the Registrar General and the Officers/Staff connected with the Civil Registration System in the States/UTs.

EXECUTIVE SUMMARY

Civil Registration System (CRS) in India is the unified process of continuous, permanent, compulsory, and universal recording of vital events (births, deaths, stillbirths) and characteristics thereof. The Registration of Births and Deaths Act, 1969 (as amended in 2023) provides for the compulsory registration of births and deaths. Civil Registration records are the best source of Vital Statistics. For the individual, records emanating from CRS provides her/his legal identity and access to the rights of a citizen including entitlements (social benefits provided by the Government). For the country, the requirement of a complete Civil Registration System is a must as it has important administrative and statistical uses. The data generated through a complete and up to date CRS is essential for socio-economic planning and to evaluate the effectiveness of various social sector programmes. They also serve as the cornerstone of the public health system. CIVIL REGISTRATION SYSTEM - AN INTRODUCTION

1.1 The requirement for a complete and up to date Vital Statistical System to yield reliable data on vital events hardly needs any emphasis. These data are essential for socio-economic planning and development and also to evaluate the effective implementation of various public schemes and programs. The main sources of data on vital events in India are Civil Registration System (CRS), Sample Registration System (SRS) and Population Census. Though the Population Census is the main source of information on population and its characteristics; however, being a decennial exercise, it does not provide the measure of changes in population from year to year. The measures of fertility and mortality derived from Census are centered on the midpoint of the decade and as such do not provide yearly change in the population. Of the other two sources of vital statistics for getting the vital rates on a regular basis, the SRS has been designed to provide reliable estimates at National and State level. Robust estimates of vital rates at District level on an annual basis through sample survey are difficult to obtain on account of prohibitively large sample size and variety of resultant factors such as controlling of non-sampling errors etc. CRS is thus the only source for providing vital rates at district level. Rather, a complete CRS can provide these rates at lower administrative levels as well.

1.2 The Civil Registration System (CRS) may be defined as a unified process of continuous, permanent, compulsory and universal recording of the vital events and characteristics thereof, as per legal requirements in the country. In India, the Civil Registration System covers registration of births and deaths. Registration of marriages and divorce are not covered under the CRS in India. Civil Registration System provides the best source of information on the vital rates at all levels. Ensuring cent percent coverage of vital events by registration machinery can help in getting the critical vital statistics at all administrative levels, important for planning and research. Therefore, emphasis should also be given to the proper monitoring of the activities under the system. Civil Registration System is considered to be complete if it covers 100 percent births and deaths taking place within a country or area and birth and death certificates are issued to all registered events.

1.3 The registration records are primarily useful for their value as legal documents and secondarily as the source of vital statistics. Civil registration as a source of vital statistics is relatively less expensive, as the statistics generated from the registration records are the by-products of an essential administrative process. The registration records can also generate current and continuous statistics, which can be more accurate than any other method of data collection apart from being a continuous source of such data. However, the accuracy of the vital statistics obtained through the registration system depends much on the completeness and promptness with which events are registered and the correctness of the information in the registration records. The improvement in the system of registration of births and deaths is critically dependent on the importance given by the respective States and District administrations to this work and regular monitoring by them. Besides, the level of awareness

among the general public about the utility of birth or death certificate is also equally and crucially important.

1.4 Vital statistics obtained through registration records at different administrative levels enable estimation of the size, demographic structure and geographical distribution of the population except for migration. Vital statistics also enables the projections for coming years on the basis of probable trends of fertility and mortality as derived from these vital statistics and their interactions with social, economic and other demographic factors. The vital statistics data generated through an effective Civil Registration System is of immense use for formulation of various development and welfare programmes/ schemes and increases their effectiveness at State and District level. The Civil Registration data acquires paramount importance in the wake of 73rd and 74th amendments to the constitution of India, as it can provide data at local level for micro level planning, monitoring and evaluation of schemes. At national level, the vital statistics data generated through Civil Registration is also quite useful for medical research and in the study of sex ratio, mortality rates and also in the study of causes of deaths.

Registration of births and deaths in India

1.5 In India, the registration of births and deaths is mandatory under provisions of the Registration of Births and Deaths (RBD) Act, 1969(18 of 1969. The Act is administered by the Office of the Registrar General of India (ORGI) and implemented by States/UTs. The Chief Registrar is the Chief executive authority in the State for carrying into execution the provisions of the Act and the rules and orders made thereunder.

1.6 Provision for registration of births and deaths and the mechanism thereof had been in existence in India for more than a century. Earlier, the work of registration of birth and death was carried out under various laws and byelaws existing at that time in different parts of the country. The need for improvement in the vital statistics system was felt for long and, therefore, after detailed deliberations at various levels, the Registration of Births & Deaths Act, 1969 was enacted providing compulsory registration of births and deaths in India. Since then, this Act has been enforced uniformly across all the States and Union Territories (UTs). This Act provides for mandatory registration of births and deaths and publication of statistical reports annually based on the civil registration data. The enactment of this Act has provided a common framework for putting in place an effective system of registration of births and deaths in the country.

1.7 In order to simplify and speed up the process of registration and to bring in uniformity in birth and death registration formats, the registration system was revamped in the year 2000. Under the revamped system, the procedure for registration of births and deaths was also modified to some extent and the forms were redesigned. The revamped system became operational in 2000 in all States/Union Territories except Assam, Arunachal Pradesh, Gujarat, Haryana, Himachal Pradesh, Jharkhand, Odisha, Punjab, Uttarakhand, and Uttar Pradesh. It was implemented in Assam, Arunachal Pradesh, and Odisha in 2001, Haryana in 2002, Himachal Pradesh, Uttarakhand, and Uttar Pradesh in 2003, Gujarat and Punjab in 2004, and Jharkhand in 2009.

1.8 The Registration of Births and Deaths Act, 1969 has been amended through the Registration of Births and Deaths (Amendment) Act, 2023 (No. 20 of 2023) and published in the Gazette of India on 11th August, 2023(Annexure-A). The provisions of the amended Act have come into force with effect from 1st day of October, 2023 (Gazette of India, No. 3896 dated 13th September, 2023) (Annexure -B). The highlights of amendment may be seen in the following box:

Major Highlights of Registration of Births and Deaths (Amendment) Act, 2023

Statistical Reports

1.9 System of registration of births and deaths is constantly generating statistical information at the local level. The information contained in the reporting forms is consolidated by the Registrar for onward transmission to the Chief Registrar of Births & Deaths or to any officer specified in the concerned State/UT. The Chief Registrar of the States/UTs, who are the chief executive authorities for the activities on registration of Births and Deaths in the State/UT, are mandated to submit to the State Government Annual Report on the Working of the Act in the State/UT along with the Statistical Report referred under section 19(2) on registered births and deaths for each year immediately following the year to which the report relates to. The Chief Registrars are also required to send a copy of these Reports to the Registrar General of India, Govt. of India.

1.10 Based on the Annual Reports prepared by the States/UTs, the Office of the Registrar General of India, brings out an annual comprehensive report entitled "Vital Statistics of India based on Civil Registration System". These reports have been brought out since 1958 (Before the enactment of the Act, only statistical reports were brought out). However, some of the States are not bringing out their Annual Statistical Reports in time, and this in turn, delays the publication of the corresponding national report. It has also been observed that some States also do not include all the prescribed tables in their reports thereby creating a limitation while bringing out the national report. However, notwithstanding all these constraints, this report provides vital indicators including the District-wise registered births and deaths along with infant deaths with the sex-wise and rural-urban break-up of registered events for the year 2023.

CHAPTER-II

ANNUAL REPORT FOR 2023 ON THE WORKING OF THE REGISTRATION OF BIRTHS AND DEATHS (RBD) ACT, 1969 (AMENDED IN 2023)

2.1. **Annual report on the working of the Registration of Births and Deaths (RBD) Act, 1969(Amended in 2023):** Under the provision of Section 4 (4) of the Act, the Chief Registrars are required to submit an Annual Report on the working of the RBD Act to the respective State Governments once approved, a copy of the same is sent to the Office of Registrar General of India (ORGI). The ORGI compiles the reports received from States/UTs and release the working of RBD Act report at National level. The aforesaid Annual Report for the year 2023 has been received from all the States/UTs.

2.2. **Registration Machinery:** Section 3 to 7 of the Registration of Births and Deaths (RBD)Act, 1969(amended in 2023) provides for the appointment of Civil Registration System functionaries at all administrative and Jurisdictional levels viz.: -

(i) National level:- Registrar General of India; (Section 3 of the RBD Act)

(ii) State level:- Chief Registrar; (Section 4 of the Act)

(iii) District level: - District Registrar/Additional District Registrar (Section 6 of the Act)

The Registrar General of India (RGI) at Central level takes steps to coordinate and unify the activities of Chief Registrars of all States/Union Territories and issues general directions regarding registration of births and deaths under section 3(3) of the Act. The work relating to Civil Registration in the office of the Registrar General of India is handled by the Vital Statistics Division.

The Chief Registrar, appointed by the State Government, is the chief executive authority in the respective States/ UTs for implementing the provisions of RBD Act and the Rules and orders made thereunder. The State Government also appoints District Registrar of births and deaths for each revenue district. The actual work of registration

of births and deaths in the field is carried out by the local Registrars, who are also appointed by the State Government

There is a wide variation in the registration machinery across the country, details of which are given below: -

- The Chief Registrars of births and deaths in 17 States (Andhra Pradesh, Assam, Gujarat, Haryana, Himachal Pradesh, Maharashtra, Manipur, Meghalaya, Odisha, Punjab, Sikkim, Tamil Nadu, Telangana, Tripura, Uttar Pradesh, Uttarakhand and West Bengal) and 4 Union Territories (A& N Islands, Chandigarh, Ladakh and Lakshadweep) are from the Health Department, in 10 States (Arunachal Pradesh, Bihar, Chhattisgarh, Goa, Jharkhand, Karnataka, Madhya Pradesh, Mizoram, Nagaland and Rajasthan) and 2 Union Territories (Delhi and Jammu & Kashmir) are from Planning, Economics & Statistics Department, in 1 State (Kerala) from Local Self Government Department, in UT of Dadra & Nagar Haveli & Daman & Diu, Finance Secretary/Secretary (Planning & Statistics) and in remaining 1 UT (Puducherry) it is with Local Administration Department.

2.3. Registration of Births and Deaths occurring to Indian Citizens abroad:

Under the provisions of Citizenship Act, 1955 the event of births and deaths to Indian Citizens occurring abroad are registered by the respective Indian Missions/Consulates. Under Rule 5 of Citizen's (Registration at Indian Consulates) Rules 1956, Consulates are statutorily required to send the annual returns of births and deaths of Indian Citizens to the office of the RGI. It has been observed that requisite returns are not furnished by all Indian Missions/Consulates; such returns for the year 2023 have been received from 196 missions located in 150 countries, covering 62182 births and 10531 deaths. As can be seen from the Statement 3 below, out of the total registered births at the various missions during 2023 Mission/Consulate of Dubai located in UAE registered 12770 i.e. about 20.5 per cent of the total births registered abroad, followed by Mission/Consulate of London which is at 10 per cent. In case of Deaths, Mission/Consulate of Dubai located in UAE registered 1687 i.e. 16 per cent of the total deaths registered abroad followed by Mission/Consulate of Riyadh located in Saudi Arabia which is at 13.5 per cent.

2.1. **Inter Departmental Coordination Committees (IDCC):** In order to resolve the operational problems and for proper implementation of the provisions of the RBD Act and corresponding State Rules, coordination among the implementing departments is essentially required. On the other hand, the work of registration of births and deaths in most of the States/UTs is being done through the officials drawn from more than one department of the State Government/Union Territory Administration. The need for coordination between the stake holder departments is a pre-condition for effective functioning of the system in each of the State. In view of above, the State level Inter-Departmental Coordination Committees (IDCCs) have been constituted in States and Union Territories. In most of the States / UTs, IDCC is chaired by the Principal Secretary/Secretary of the Department from which the Chief Registrar belongs.

In order to formulate the strategies for further improvements in Civil Registration System and effective implementation of the provisions of the RBD Act in

the respective State, it is desired to convene the meeting of such committee at least once in a year. However, it has been observed that despite persuasion of this office from time to time, such meetings have not been convened regularly by most of the States/ UTs.

During 2023, such meetings were held in only 18 States/UTs namely Arunachal Pradesh, Assam, Bihar, Gujarat, Himachal Pradesh, Karnataka, Kerala, Meghalaya, Mizoram, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh, West Bengal, Delhi, Lakshadweep and Puducherry. .

Such Coordination Committees have also been set up at District and below district level (i.e. at Mandal and Taluka level) in many States. However, the information on convening the regular meeting of District Level Coordination Committees (DLCCs) and below district level committee meetings has not been received from all the States/UTs. The following information regarding district level and below district level meetings during 2023 has been provided by the Chief Registrars in the respective annual report of State/UT:-

- **Andhra Pradesh**: During the year 2023, no IDCC was held. However, 3 meetings were held at Chief Secretary level on CRS during the year with all other line department officials. It gave a boost to CRS Programme in the state.
- **Arunachal Pradesh:** During the year 2023, one IDCC Meeting was conducted by the Chief Registrar of Births & Deaths in the State Headquarter, Itanagar, while no DLCC was conducted during the period.
- **Assam:** One IDCC Meeting was conducted during the year 2023.
- **Bihar:** One IDCC meeting for strengthening state level vital statistics was held under the chairmanship of Development Commissioner Bihar Patna. The meeting was attended by representatives of urban and housing department, health, Panchayati raj, social welfare, education and other related departments.
- **Chhattisgarh:** 10 DLCC meetings were conducted during the year 2023.
- **Goa:** As there were no major issues to be discussed, no IDCC meeting was conducted during the year 2023.
- **Gujarat:** During 2023, One State level IDCC meeting was conducted under the chairmanship of Chief Registrar (Birth and Death) to smoothen the registration process and co-ordinate the activities of the registration of births and deaths in the State.

- **Himachal Pradesh :** One IDCC was held under the chairmanship of Secretary, Health, during the year 2023. DLCC meetings were conducted at Districts of Solan and Kinnaur.
- **Karnataka:** One IDCC meeting was conducted under the chairmanship of Secretary to Government, Planning, Program Monitoring and Statistics Department during the year 2023. 46 District level and 424 Taluk level Coordination Committee meetings were convened during the year 2023.
- **Kerala:** During the year 2023, one state level meeting on vital statistics was held which was chaired by the Principal Secretary of local self Government Department, Kerala.
- **Madhya Pradesh:** 7 DLCC meetings were held in the year 2023.
- **Maharashtra:** No IDCC was conducted during the year 2023. However, reporting and registration activities were discussed in periodical meeting held via video conferencing conducted by higher officials.
- **Manipur:** a meeting was conducted regarding 100 percentage digitization of birth and death registration system in the state in presence of Director of Health services, Manipur, Joint Director (MAHUD), Deputy Secretary (Home), Deputy Director (RD & PR), Deputy Municipal Commissioner and all the District Registrar (CMOs) of 16 districts. 3.16 Still Births

3.16.1 The World Health Organization (WHO) defines a still birth as a baby born with no signs of life at or after 28 weeks' gestation. Still birth, also known as foetal death, has been defined as *'death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy and which is not an induced termination of pregnancy. The death is indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. Heartbeats are to be distinguished from transient cardiac contractions; stillbirths are to be distinguished from fleeting respiratory efforts or gasps.'*

3.16.2 Statement 22 presents stillbirths registered by place of occurrence (Rural /Urban) of the event for the year 2023. It may be observed that in total registered stillbirths, the share of rural registered stillbirths is only 35.7%, while this share is about 64.3% in Urban Areas. State/UT-wise registered stillbirths is depicted in Table 4 (Page No. 79).

Level of Registration (LOR)

3.17.1 The level of registration, defined as the percentage of registered births/deaths to the births/deaths estimated through SRS, determines the performance of a State / Union Territory in registration of births and deaths. In the absence of reliable estimates of number of births and deaths on a year to year basis from any other source, the estimated number of events as revealed from SRS is used to calculate the level of registration. The level of registration so calculated is very high for some of the smaller States/Union Territories either due to the lower estimates of vital events than the actual and due to the fact that SRS estimates of vital events are based on the place of usual residence while events are registered at the place of occurrence irrespective of the place of residence.

3.17.2 Under this section, level of registration of Births & Deaths is based on revised mid-year population projections based on census 2011. The levels of registration of births and deaths for India and States/UTs for the period 2011 to 2019 and 2023 are shown in Statements 23 and 24 respectively. The level of registration of births has increased to 98.4% in 2023 from 92.7% in 2019 i.e. in last 5 years an increase of about 5.7%. Similarly, the level of registration of deaths has also increased to 97.2% in 2023 from 92.0% in 2019, showing an increase of 5.2% over the last 5 years. Chart 16 depicts the trend in level of registration of births and deaths over the years. Due to continuous efforts of the States and UTs the gap between Levels of Birth and Death Registration is narrowing down with a difference of 1.2% observed in 2023.

3.17.3 Chart 17 gives the level of registration of births for India and States/UTs for the year 2023. There are 21 States/UTs namely Arunachal Pradesh, Goa, Haryana, Jharkhand, Madhya Pradesh, Maharashtra, Manipur, Meghalaya, Mizoram, Nagaland, Rajasthan, Telangana, Tripura, Uttarakhand, West Bengal, A& N Islands, Chandigarh, Delhi, Jammu & Kashmir, Ladakh and Puducherry which have shown cent percent level of registration of births in 2023.

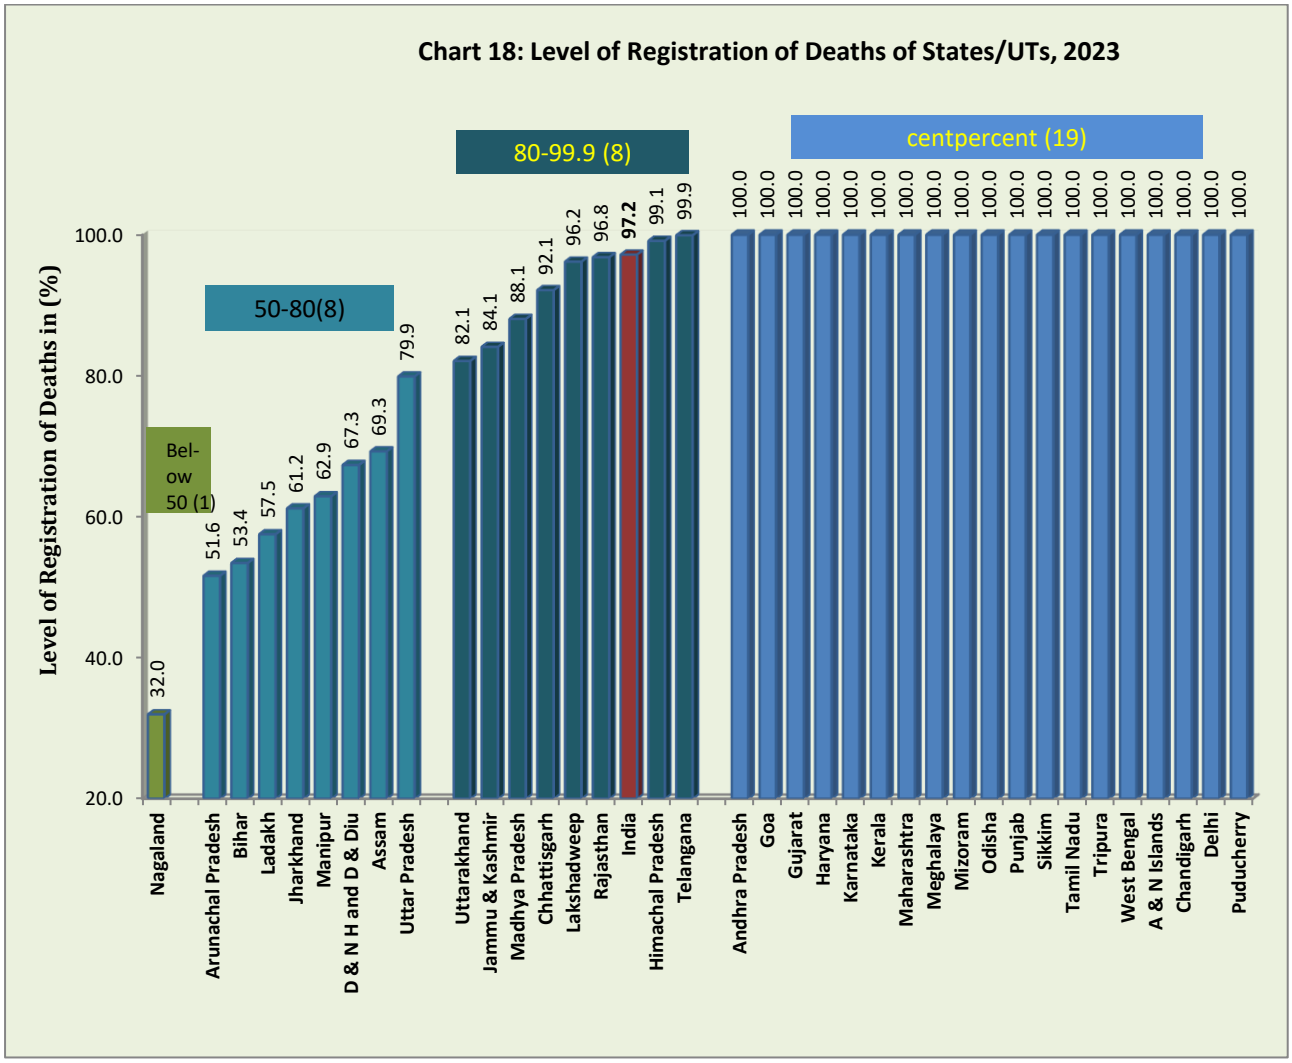

3.17.4 There are 22 States/UTs where level of Registration of Birth is above the All India level of 98.4%, including 9 major States namely Karnataka, Haryana, Jharkhand, Madhya Pradesh, Maharashtra, Rajasthan, Telangana, Uttarakhand and West Bengal. Remaining 10 Major States, namely, Assam, Chhattisgarh, Odisha, Uttar Pradesh, Kerala, Bihar, Gujarat, Andhra Pradesh, Punjab and Tamil Nadu but are below the All India Level but having the Level of Registration of Births above 80 Percent.

3.17.5 Statement 23 reveals that the States/UTs continue to function at different levels of registration of births during 2011-2019 and 2023
