Green Budget

2024-25

Government of Bihar
Finance Department

Preface

India's G20 priorities, under the theme "One Earth, One Family, One Future," reaffirm its commitment to achieving inclusive and resilient growth, specifically focusing on climate, finance, and sustainable development.[1] International commitments such as the Paris Agreement, Aichi Biodiversity Targets, and Sustainable Development Goals (SDG) highlight the critical need for a collective global shift towards a low-carbon future. Though climate benefits accrue globally, the costs accrue locally with vulnerable communities experiencing the most immediate and devastating impacts of climate change. In this regard, various governments at the sub-national level in developing countries such as India are prioritizing climate and environmental concerns, leading to "green budgeting" practices in policy-making.

As such, Bihar was the first state in India to initiate the process of green budgeting in2020-21, focusing on reorienting its resource allocation by weaving environmental priorities into developmental initiatives towards a greener future. This is essential as Bihar is highly vulnerable to the risks of natural disasters such as floods, droughts, earthquakes, cyclones, thunderstorms, and so on. Precisely, green budgeting helps track resources like funds, outlays and policies, fosters coordinated action, anticipates future finance needs, and ensures efficient allocation of resources. Governments can prioritize green investments, track sustainability progress, and ensure fiscal alignment with environmental commitments by integrating environmental considerations into various budget cycles.

Bihar is implementing various sustainability initiatives, including the Jal-Jeevan-Hariyali Abhiyan (JJHA), to address environmental issues, promote afforestation and water conservation. The State Action Plan on Climate Change (SAPCC) complements the green budgeting efforts by providing a roadmap for climate adaptation and mitigation strategies.[2] The state also plans to develop a 'Climate Resilient and Low Carbon Development Pathway' to achieve net-zero emissions by 2070, focusing on sectors like energy, industry, solid waste, transportation and construction.[3] In addition to monitoring ambient air quality in urban areas, the state has initiated the same at the block level in rural areas, demonstrating its commitment to addressing air pollution.

Thus, the tabling of Bihar's Green Budget in the State Legislative Assembly by the Finance Department, Government of Bihar marks a step towards integrating environmental considerations into government spending annually. Through this exercise, there has been a focus on identifying programs and policies that contribute to environmental sustainability across various sectors in the state. Over time, mapping the green initiatives to SDG goals would help translate policy goals into actionable financial plans by directing resources towards environmental sustainability, fostering collaboration across government departments, empowering stakeholders, and driving progress towards a sustainable future.

1. Introduction

Globally, there is a pressing need for environmental action due to rising emissions, biodiversity loss, and environmental degradation impacting societies in recent years. In line with the global climate pledges and the Sustainable Development Goals (SDGs), India also has a long-term plan for a sustainable and equitable future emphasizing clean energy, responsible consumption, resilient infrastructure, and overall environmental sustainability. The Climate Transparency Report 2022 outlines ambitious climate action targets for India, including net-zero emissions by 2070, 50 percent reliance on renewable energy, and a 45 percent reduction in emission intensity by 2030.[4] Achieving environmental targets while maintaining economic progress requires coordinated action at multiple levels, including the sub-national level.

In this regard, it is notable that Bihar took the lead in India by adopting green budgeting as early as 2020-21. Bihar achieved aneconomic growth of 10.6 percent at constant prices during 2022-23, making it one of the fastest-growing states in India.[5] However, this poses environmental risks, including increased resource consumption, pollution, deforestation and climate change, which can strain ecosystems, threaten species, and exacerbate extreme weather events. Infact, Bihar's reliance on climate-sensitive sectors like agriculture, fishing and tourism makes it highly susceptible to the effects of climate change. Erratic rainfall, rising temperatures, floods, and droughts threaten the state's tourism, food security, biodiversity, lives, and livelihoods making it a particularly vulnerable area. Addressing these challenges requires a comprehensive and long-term approach. By prioritizing coordinated action and investing in adaptation, mitigation, and community resilience, the state can build a more sustainable future for its people and the environment.

Given that Bihar's fertile land and abundant natural resources hold immense potential for sustainable development, various efforts are underway to address climate change issues, ranging from climate action to afforestation to water conservation to community engagement. Thus, the green budgeting exercise has given a roadmap to effectively use resources with well-defined goals and strategies to integrate environmental considerations into budget planning, enhance transparency and accountability, and promote policy coherence across the departments.

2. Bihar Environment: An Overview

Bihar, nested in the eastern part of India, stretches from 24°20'10" to 27°31'15"N latitude and 82°19'50" to 88°17'40"E longitude. It is situated at about 52.73 metersabove sea level. As a landlocked state, West Bengalsurrounds it in the east, Uttar Pradesh in the west, and Jharkhand in the south, and shares its boundary with Nepal in the North. Its area is 94,163 square kilometers, which is 2.9 percent of the country's total area. The state's population is about 104.10 million as per the Population Census (2011), with a population density of 1,106 people per square kilometer. [6]

The rainfall is distributed across four seasons, i.e., South-West monsoon (June-September), Winter rain (December-February), Hot-weather rain (March-May), and North-West monsoon (October-November). In 2022-23, Bihar received 849.1 mm of annual average rainfall, with 81.7 percent coming from the South-West monsoons.[7] Its sub-tropical climate features hot and humid summers, mild winters, and monsoons. The Meteorological Centre reported an annual mean land surface air temperature of 24.7^0 Celsius during 2022-23, with an average minimum of 7.1^0 Celsius and maximum of 42.3^0 Celsius for the state.[8]

Bihar's geography is diverse, with three main regions: the Northern Himalayan foothills, the Central plains supporting agriculture, and the Southern plateaus rich in mineral resources. The Gangetic Plain is divided into two parts –Northern and Southern, with the Northern part being flat and flood-prone, and South Bihar featuring hills and plateaus. The plains are mainly composed of clay, sand, or loamy soil.Bihar spans from the Himalayas to the Gangetic plains and is home to diverse ecosystems and biodiversity. The state has about 4526 wetlands with an extent of at least 2.25 hectares, underscoring their ecological significance in the state.[9]

The state has wildlife sanctuaries (Kaimur Wildlife Sanctuary, Udaipur Wildlife Sanctuary, Bhimbandh Wildlife Sanctuary, Gautam Buddha Wildlife Sanctuary, Rajgir Wildlife Sanctuary, Rajauli Wildlife Sanctuary) and bird sanctuaries (Kusheshwarasthan Bird Sanctuary, Baraila Jheel Bird Sanctuary, Nakti Dam Bird Sanctuary, Nagi Dam Bird Sanctuary, Kanwar Jheel Bird Sanctuary), a tiger sanctuary (Valmiki Tiger Reserve), a dolphin sanctuary (Vikramshila Gangetic Dolphin Sanctuary), conservation and community reserves (Gogabil Conservation Reserve, Gogabil Community Reserve, Bhaluni Dham Conservation Reserve). [10]

The India State of Forest Report for 2021 revealed a forest cover of 9722 square kilometres for Bihar, including natural forests and vegetation dominated by trees covering one hectare or more with a crown density of over 10 percent, regardless of their legal status.[11] Also, the state constitutes a

comprehensive forest cover of 13,896 square kilometres, representing 14.75 percent of its land area as per the Forest Survey of India estimates based on high-resolution satellite imagery (LISS-IV, 5.8m).[12] The estimated forest cover includes the tree cover inside and outside the forest area. It mainly consists of dry deciduous Sal forests and moist deciduous Sal forests, located predominantly in the districts of Kaimur, Rohtas, Gaya, Aurangabad, Jehanabad, Nawada, Nalanda, Banka and Munger in the southern part, and West Champaran in the northern part of the state.Forest carbon, primarily found in soil and dead tree and plant parts, stood at 56.88 million tonnes in 2021. Soil organic carbon (SOC) holds the maximum amount of carbon, accounting for 63.1 percent of Bihar's total forest carbon pool in 2021. [13]

Bihar is blessed with numerous rivers, including the Ganges and its tributaries like Gandak, Kosi, and Mahananda. These rivers provide water for irrigation, drinking, navigation, and fisheries. An extensive canal network distributes river water for irrigation and other purposes. Also, the abundant groundwater resources in the state are primarily due to the fertile Gangetic alluvial plains which cover most of the state. The state's annual groundwater recharge is 33.96 billion cubic meters, with a 44.76 percent extraction rate during 2023.[14] Bihar's location and hydro-meteorological system volatility make it susceptible to natural disasters, with recent decades witnessing an increase in the frequency and intensity of these disasters. Northern districts are highly susceptible to floods, causing significant damage to farm land, property, people, and infrastructure due to flash floods, river floods and water-logging.

Air pollution is primarily caused by road dust, human activities like agriculture, fossil fuel burning, industrial emissions and vehicle emissions. Urban areas are particularly affected as high concentrations of pollutants trap heat and create smog. Patna's air quality exceeded national standards, particularly for small particulate matter ($PM_{2.5}$), large particulate matter (PM_{10}), and Nitrogen Dioxide (NO_2) during 2022-23.[15] About 13 districts in the state were contaminated by fluoride, 10 by nitrate, 22 by arsenic, and 19 by iron in drinking water, exceeding the prescribed limits set by regulatory bodies in 2021.[16] The estimated sewage generation in Bihar was 2276 MLD in 2020. [17]

3. Green Budgeting in Bihar

The State government has been presenting the Green Budget in the Legislative Assembly since 2020-21. As such, the Green Budgeting processbeing followed in Bihar is a simple and inclusive approach that involves therole of different stakeholder departments in tagging environmental allocations and expenditures in government budgets. This collaborative approach ensures that stakeholders are involved from the very initial stage of the budgeting exercise, while providing their input and aligning with the state'sgreen objectives. This approach to green budgeting focuses on three key aspects: cohesive response, green methodology, and policy deliberation.

Firstly, the framework fosters inter-departmental coordination, ensuring a comprehensive and integrated approach to incorporate green considerations into existing budgetary allocations across different sectors such as agriculture and allied sectors, forest, energy, water resources, transport, rural and urban development, etc. Secondly, usingRiomarkermethodology and mapping with the SDGs allows for categorizing and tracking environmental expenditures to ensure benchmarking against the global standards.

Lastly, the policy deliberation process includes alignment with the national environmental policies and international commitments, fostering a long-term vision for environmental sustainabilityand ensuring consistency and coherence in policy direction for Bihar. Overall, the preparatory framework of green budgeting in Bihar has been structured to promote environmental progress by encouraging participation, transparency and accountability to achieve the desired environmental outcomes.

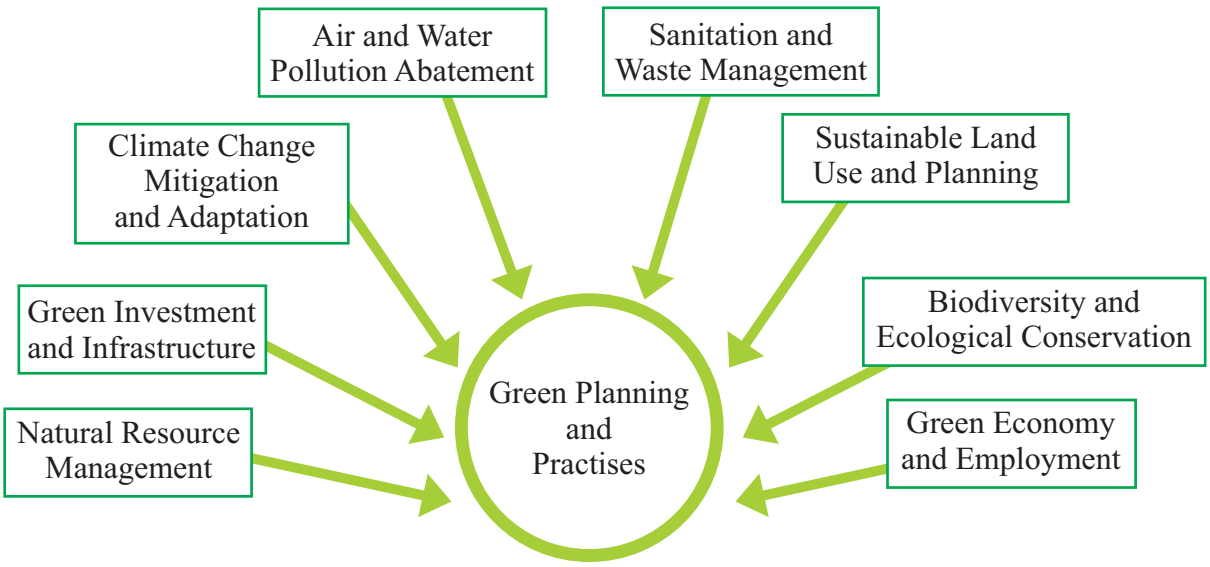

Figure 1: Green Budgeting Framework in Bihar

Green budgeting encompasses a wide range of thematic aspects, aiming to integrate environmental considerations into various aspects of government spending. The various thematic aspects include management and conservation of natural resources;building sustainable infrastructure like solar power plants, green buildings, and public transport; adapting and mitigatingclimate change; controlling air and water pollution; reducing, recycling, and responsible disposal of waste; sustainable use of land; protect endangered species and habitats, restore ecosystems, and promote

ecological balance; transition to green economy and provide sustainable livelihoods to all. The different themes of the green planning and practices used in the green budgeting process are depicted inFigure 2.

Figure 2: Thematic Aspects of Green Budgeting

Thus, green budgeting is a strategy that strengthens inter-departmental coordination and promotes a cohesive response to environmental sustainability. It helps policymakers assess and re-orient their resources within the fiscal space to achieve green targets. As green budgeting is still in its early stages, attempts are being made to improve it towards getting a comprehensive analysis of expenditures, reflecting sectoral outcomes and achievements. The following section outlines various steps involved in green budgeting methodology in the state.

- **Step 1:** The emphasis is on identifying specific programs within the existing annual schemes and budgets of various stakeholder departments. For this, program-specific guidelines and objectives are reviewed from various sources, providing a holistic understanding of potential green interventions. Both programs with direct environmental activities and those with indirect contributions to sustainability goals are considered, broadening the scope of the Green Budget.
- **Step 2:** Use of a standardized proforma ensures the collection of consistent information on relevant schemes' plans and budgetary provisions from stakeholder departments. The Finance Department provides technical support and discussions to streamline budget tracking and data management, promoting accuracy and transparency in the green budgeting process.
- **Step 3:** The process of green budgeting employs a robust tracking methodology, utilizing department-specific and program-level budget codes to ensure data integrity and transparency, aiming to reduce double-counting and streamline the identification of environment-focused programs. Also, the codes were tagged to specific Sustainable Development Goals (SDGs) and other sustainable development activities.

Table 2: Approach towards Green Budget

Estimating Budgetary Provisions and Expenditures	
Identification of stakeholder departments, aligned with green planning objectives	Review of departmental objectives through their annual progress reports
	Review of departmental policies and flagship initiatives, aligned with green objectives
Tracking of schemes and programs contributing towards green planning and practices.	Detailed demands for grants and review of budget documents
	Stakeholder consultation for tracking the departmental fiscal plan, its target, and achievements
Tagging of budgetary allocations and expenditures to the tracked schemes and programs.	Collection of department-wise and scheme-wise budgetary provisions from the fiscal budget outlay
	Collation of green budget provisions from the departmental budgetary allocation and expenditure
	Review of the green activity significance of tagged schemes and programs

Method

In order to tag environmental budget allocations, the Rio-marker methodology, a United Nations Environment Programme (UNEP) tool,was used in Bihar's green budgeting process. This method categorizes expenditures as Principal, Significant, or Non-significant based on their environmental impact. The state adopted the Rio-marker methodology and Sustainable Development Goals mapping, using department-specific budget codes to monitor sectoral programs.

Draft pro-forma was prepared and revised, incorporating themes and exercises to evaluate green initiatives. The departments were then required to submit pro-forma budgets with head-by-head justification. The SDG mapping and the Rio-marker standard framework was used for tracking and labelling various environmental schemes and programmes. Each scheme with its goals and constituent parts wasthoroughly examined to classify them into various significance ranges. The cumulative scheme score was calculated by tracking different components. The process was linked to capture standard frameworks like the National Action Plan on Climate Change (NAPCC), State Action Plan on Climate Change (SAPCC), National Biodiversity Strategy and Action Plan (NBSAP), and existing documents on green activity classification. The budget codes of various schemes were tagged as "Green" based on their scheme-wise scoring.

Figure 3: Green Component and Environmental Sustainability Significance

Fully Dedicated (90-100 percent)	National Afforestation Programme, Project Tiger, E-vehicle scheme, Energy efficiency, RE schemes, etc.
Very High Significance (75-90 percent)	National River Conservation Plan, Conservation, Development and Sustainable Management of Medicinal Plants, etc.
High Significance (50-75 Percent)	Groundwater Management and Regulation, National Groundwater Management Improvement Programme, etc.
Medium Significance (25-50 Percent)	National Horticulture Mission, National Mission on Agriculture Extension and Technology, National Mission on Sustainable Agriculture, Integrated Watershed Management Programme, etc.
Low Significance (5-25 Percent)	Pradhan Mantri Krishi Sinchayee Yojana, National Mission on Micro Irrigation, Paramparagat Krishi Vikas Yojana, etc.
Marginal Significance (Upto 5 Percent)	Training and Awareness Programmes, Environment Volunteering Programmes, Information, Education and Communication materials, etc.

Note: The list of schemes is only indicative and not exhaustive.

Note:

- The analysis of the budget estimates across various programmes/initiatives may not be sufficient to evaluate the compliance with national and international goals/commitments of environmental sustainability;
- The Green Budget has accounted only for gross budget estimates and actuals identified by selective department-wise schemes and programmes. Hence, the results may not provide complete estimates or expenditures.
- Environmental regulations are not included in the scope of the budget process. Also, the green budget does not evaluate the efficiency of environmental expenditures.
- The limitations, however, cannot take away the benefits of such an exercise as it has the scope to bring together important agendas such as climate change, biodiversity, environmental policy, public finance and budget, green economy, etc.

4. Green Budget in Bihar: A Summary

The State government acknowledges the urgent need to evaluate and mitigate environmental challenges in Bihar.Since 2020-21, the state has been preparing the green budget which has streamlined the monitoring of its environmental programs. The themes and activities serve as frameworks for the departments to analyze budgets and activities, aiding in budgetary planning and mapping them to SDG goals. The tagging exercise strengthens decision-making and resource allocation in the state. This objective-oriented approach provides, accountability, and a holistic view of environmental spending in Bihar. The current section discusses the green budget allocation for Bihar in the fiscal year 2024-25.

The summary of the budget allocation for green objectives are given in Table 3. The total allocation for the green budget in FY-2024-25is estimated to be Rs 13,823.39crore, indicating an increase of 39.34 percent from Rs 9,920.77crore in FY-2023-24. The share of green budget in state's GSDPis 1.42 percent, while the share of green budget in state'stotal budget was 4.96 percent is 2024-25.

Department-wise Green Budget

In total, twenty departments provided the scheme details as per the draft proforma circulated by the Finance Department. Annexure 1 provides details of identified schemes and programmes, along with their SDG tagging and themes. The budget allocation and green budget estimates for 2024-25 are given in Table 4.The Environment, Forest and Climate Change Department is an important part of the Green Budget from the perspective of expenditure and allocation of environment related schemes and programmes,

Significance of Environmental Schemes

Categorizing schemes based on their environmental impact, either fully or partially or marginally related, helps assess their potential contribution to sustainability goals. This year's green budget allocation primarily falls under Category A-Fully Dedicated (90-100%) and Category C-High Significance (50-75%)amounting to Rs. 6514.08 crore and Rs. 3759.62 crore, respectively (Table 6). A total of 90 schemes have been identified in the Fully-dedicated category. The Environment, Forest, and Climate ChangeDepartment has all its schemes as fully-dedicated. This was followed by the Minor Water Resources Department and Urban Development and Housing Department, which had a significant number of schemes under Category-A. Various initiatives such as the Jal-Jeevan-Hariyali Abhiyan, adopting a 'Climate Resilient and Low Carbon Development Pathway' to achievenet-zeroemissions by 2070, promotion of organic farming, e-vehicle policy, encouragement to greater use of renewable energy, and monitoring air quality at the block level in rural areas can pave a path towards a sustainable future in the state.

Department-wise SDG Mapping

The department-level SDG mapping of the environmental sustainability initiatives reveal a significant focus on schemes and programs towards SDGs 6 (Clean water and sanitation), 2 (Zero Hunger), 15 (Life on Land), 11 (Sustainable Cities and Communities), and 13 (Climate Action) (Table 8 and Figure 4).The focus on water, food, land, and urban development, alongside climate action, underscores a comprehensive understanding of inter-connected environmental issues.

Theme Mapping of Green Budget

The distribution of green budget allocations across various environmental sustainability themes is illustrated in Figure 5. The state's green budgeting in 2024-25 prioritizes Green Infrastructure(24.65%), Natural Resource Management (19.24%), Green Economy and Employment (14.83%), Sustainable Land Use (14.03%). Climate Change Mitigation and Adaptation (10.82%) reflect the ongoing efforts to combat climate change.The remaining budget is divided into themes like Sanitation and Waste management (6.61%), Air and Water Pollution Abatement (6.01%), and Biodiversity and Ecological Conservation (3.81%), emphasizing the need for comprehensive action across various domains.

Way Forward

Meeting the targets set by United Nations' Sustainable Development Goals require innovative budgetary approaches like green budgeting for economies like Bihar. By considering the wider environmental implications of spending decisions, green budgets encourage investments in sustainable infrastructure and resource managementso as to balance economic growth and sustainability in the long-run.Thus, the current iteration of the green budgeting process in Bihar is expected to enhance efficiency, transparency, accountability, and broader stakeholder engagement, ultimately leading to more streamlined achievementof environmental goals.

Table 3: Details of Overall Green Budget Summary

(Rs. in crore)

Particulars	Actual			Budget Estimate	
	2020-21	2021-22	2022-23	2023-24	2024-25
State's Budget Outlay	165696.51	193122.98	231903.88	261885.40	278725.72
State's Total Receipts (Revenue Receipts + Capital Receipts)	164903.84	199270.15	221013.04	262085.40	278925.72

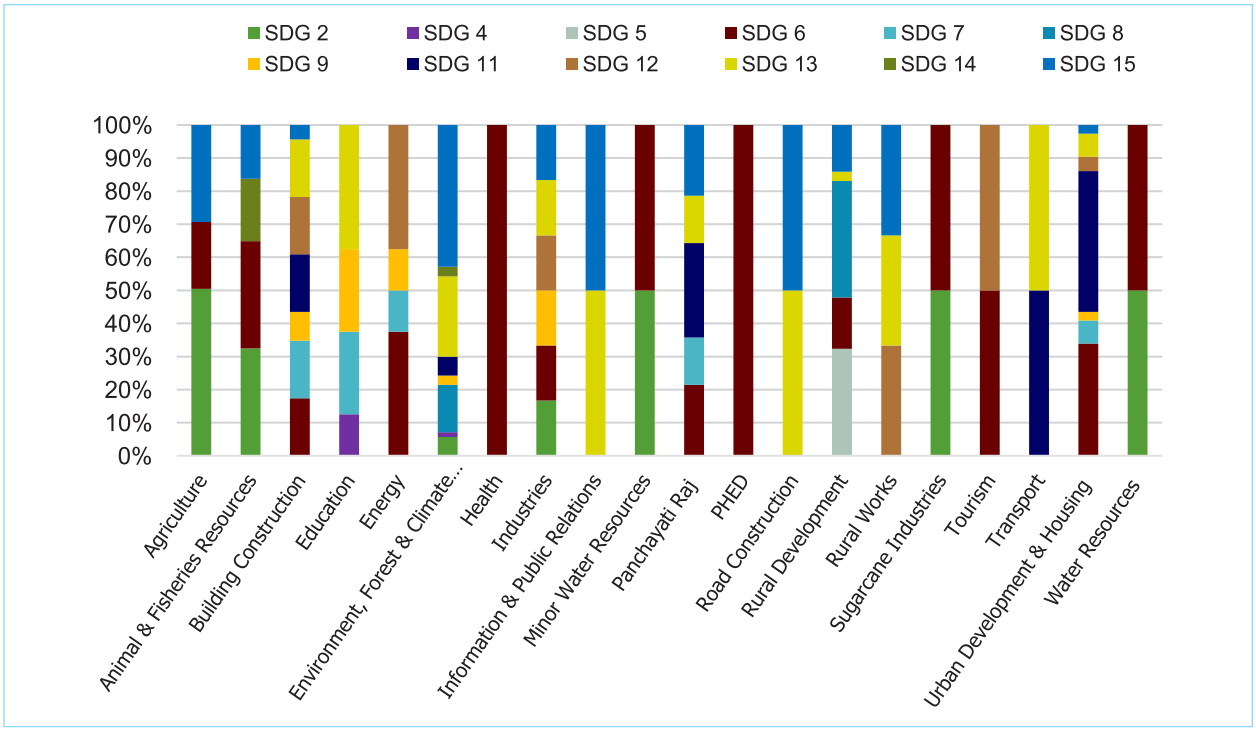

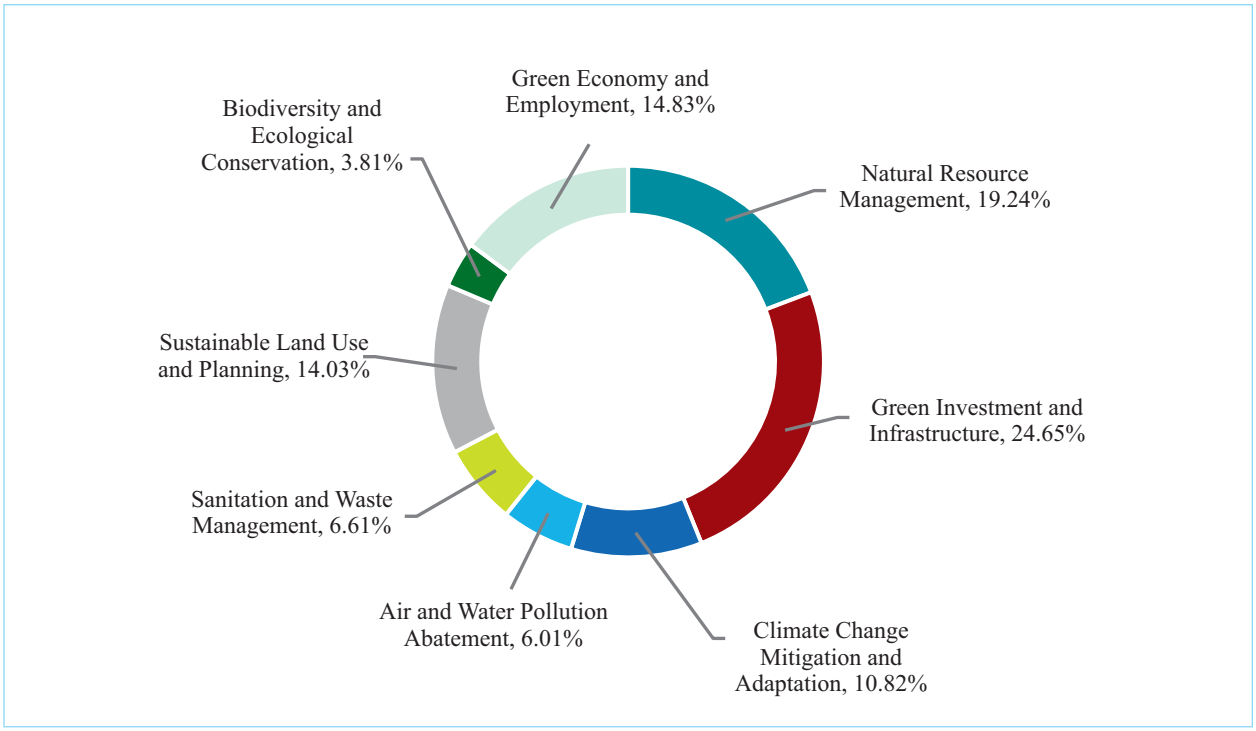

Figure 5: Department-wise Distribution across Themes

5. Key Green Initiatives in the State

The Government of Bihar has announced various initiatives across various departments to achieve its environmental sustainability and climate change goals. This section discusses the key green initiatives in the state.

1. Agriculture Department

- **Fourth Agriculture Roadmap (2023-28):** Launched in October 2023, the Fourth Agricultural Roadmap has vision for sustainable agricultural growth with key green initiatives such as soil health improvement, water conservation, climate resilience and agroforestry. These initiatives improve resource utilization, protect soil health, and promote micro-irrigation systems, rainwater harvesting, and integrated water management practices which can conserve the environment, ensure food security and improve farmer's livelihood.

- **Promotion of Green Schemes:** A major part of the Department's budgetis spent on green initiatives. As such, the focus in on crop production schemes, such as cultivation of paddy, wheat, pulses, coarse grains,oilseeds, sugarcane and jute, and other commercial crops. This also comprises various components such as paddy cultivation using the System of Rice Intensification (SRI), zero tillage for paddy and wheat cultivation, and paddy transplantation using a paddy transplanter. Also, emphasis is being placed on the cultivation of medicinal and aromatic plants, using drip irrigation.

- **Organic Corridor:** The Jaivik Corridor Scheme aims to convert 20,000 acres along the Ganges into organic zones.The scheme encourages sustainable farming practices, providing financial aid and infrastructure support to farmers to improve soil health, conserve resources, and enhance income and food quality in the long-run. There are also plans for area expansion of one-year and multi-year crops under horticulture.

- **Land Conservation:** The project involves construction of various structures for land and water conservation, plantation education, formation of self-help groups, and production systems for landless farmers, including "sprinkler" schemes, check dams, canal renovation embankments, statue guard trenches, and plantations.

- **Integrated Watershed Management Programme:** The Integrated Watershed Management Programme is being implemented by the Bihar Watershed Development Society (BWDS)with an aim toconserve and improve natural resources within the watersheds.This involves ensuring rainwater availability for irrigation, recharging groundwater, improving soil health, enhancing crop yields, promoting ecological balance, and enhancing community livelihoods. The scheme is being implemented in various districts such as Banka, Munger, Jamui, Nawada, Gaya, Aurangabad, Rohtas, Kaimur, Lakhisarai, Sheikhpura, Nalanda, Patna, Jehanabad, Arwal, Bhojpur, Bhagalpur, Buxar and Begusarai.

2. Animal and Fisheries ResourcesDepartment

- **Improving Water Quality and Ecosystem Health through Fisheries Development:** The significant schemes includeconstruction of new ponds, renovation of old ones, developing pond fisheries, integrated pond development, reservoir fisheries development, installation of pens and cages in wetlands, etc. There is also plan to develop ponds in non-usable and unused lands and also in wetlands, which will help in increasing the groundwater levels, help in maintaining environmental balance and promoting fisheries activity. The development of fisheries helps in maintaining water quality, thereby increasing bio-diversity and strengthening the ecosystem. Farmers are being trained to become aware ofthe technical details of these initiatives for their effective implementation.

- **Mukhyamantri Samekit Chaur Vikas Yojana:** This scheme aims to promote the integrated development of private and government Chaur (wetland) areas in the state. For this, it adopts an integrated approach to Chaur development, encompassing fish production, agriculture, horticulture, and agroforestry.It is estimated to result in an additional fish production of 50,000 tonnes along with other agricultural products.The integration of modern technology will offer newer prospects to fish farmers, thereby boosting their employment and income. In 2022-23, the scheme developed 346.41 hectares of chaur areas with a financial outlay of Rs. 873.19 lakh.

3. Building Construction Department

- **Eco-friendly Construction Practices:** Various initiatives are being undertaken to promote eco-friendly construction practices in the state, such as use of fly ash bricks over traditional ones, encouraging the use of solar panels and sewage treatment plants. The planting of new trees while responsibly relocating those impacted by construction is part of the afforestation efforts in the state.

- **Promotion of Rainwater Harvesting:** Rainwater harvesting is being implemented in under-construction and government buildings to replenish groundwater levels. During 2019-20 to 2021-22, about 6790 rooftop units were completed in government residential and non-residential buildings, meeting the set target.

- **Use of Energy-SavingMeasures:** Towards reducing energy consumption, use of LED bulbs and air conditioners with high efficiency ratingsalong withtimely switching-off ofelectrical appliances/bulbs is being encouraged in the state.Solar panels are being installed on rooftops of government buildings and offices in Patna, with Bihar Renewable Energy Development Agency (BREDA) providing provision and a 'no-objection certificate' for other government buildings. Over the last few years, the Department is incorporating green concepts into their iconic and state-of-the-art building projects to minimize dependency on conventional sources of lighting and air conditioning. Bihar Museum, Patna has been awarded a four-stars under Green Rating for Integrated Habitat Assessment (GRIHA) for its construction using the green building concept.Dr. A.P.J. Abdul Kalam Science City in Patna is set to achieve five stars in GRIHA. Bihar Sadan in Dwarka, New Delhi, has been built on a

Green Concept with a vertical air circulation system for energy conservation and solar heater for hot water supply.

- **Net Zero Waste Discharge System:** Some buildings have implemented a net-zero waste discharge system, allowing reuse ofwaste-water after treatment for toilet flushing and gardening. Government buildings and offices are installing sensors in bathrooms and toilets to reduce water wastage for sanitation and other purposes, while alternative boring arrangements are being made to bring groundwater under control.

4. Energy Department

- **Bihar Renewable Energy Development Agency (BREDA):** The oil shocks of the 1970s felt in the country emphasized the need for attaining energy self-sufficiency and clean environment as drivers for renewable energy to achieve energy security. BREDA collaborates with the State government to create and execute renewable energy policies, encompassing setting targets, offering subsidies and streamlining regulations. The programmes initiated for FY 2024-25 are as follows:

- **Grid-Connected Rooftop Solar Power Plants:** The state has allocated Rs. 127 crores for 25-MWp grid-connected solar rooftops on government buildings under the Jal-Jeevan-Hariyali Abhiyan.

- **Conversion of Off-Grid Rooftop Solar Power Plant to Grid-Connected/Hybrid:** A 3.08-MWp off-grid rooftop solar power plant would be converted to a grid-connected/hybrid system as part of this proposed project, which would cost the state Rs. 2.70 crores in total. The maintenance and repair work of the solar power plant with a 5-year Comprehensive Maintenance Contract (CMC) and net-metering is also included.

- **Installation of Solar Street Lights:** The state funding towards installation of 500 solar street lights in the state stands at Rs. 1.95 crore.

- **Installation of Off-grid Solar Power Plant:** The proposal involves the installation of a 1-MWp off-grid solar power plant with a state share of Rs. 1.60 crore for emergency purposes.

- **Bihar State Jal Vidyut Nigam:** The Bihar State Hydroelectric Power Corporation (BSHPC) is overseeing the expansion of hydroelectric power projects in the state, to utilize its hydel potential. At present, 13 mini and small hydel projects are operational in the state, with a total installed capacity of 54.3 MW. BSHPC is constructing 11 more mini hydel power projects, with a total capacity of 9.3 MW, in the districts of Arwal, Aurangabad, Rohtas, Supaul and West Champaran.

5. Environment, Forest and Climate Change Department

The State governmentis dedicated to promoting environmental balance, mitigating climate change's negative impacts, controlling pollution, and protecting water sources, wildlife, and

biodiversity. The focus is on strengthening the green economy by providing employment and self-reliance opportunities to its stakeholders through forestry-dedicated livelihoods, private nurseries, technology use, eco-tourism, and park development. Mainly, the green budget funds will be used for natural forest development, urban forestry, eco-tourism, tree plantation, wildlife conservation, soil and water conservation, and garland trenching.

- **Jal-Jeevan-Hariyali Abhiyan:** Launched in 2019, the Jal-Jeevan-Hariyali Abhiyan (JJHA) is a comprehensive program aimed at achieving water conservation, environmental restoration and overall sustainable development. The Department is actively pursuing systematic efforts in afforestation, environment conservation, wildlife conservation and eco-tourism. The department's large-scale afforestation efforts under Agriculture Roadmap and Jal-Jeevan-Hariyali Abhiyan involve stakeholders to boost green cover and environmental health.

- **Afforestation Efforts outside the Natural Forest Areas**

  - Besides the JJHA, the state is promoting tree plantation along canals/rivers, roadsides, urban forestry, and district/sub-division/block headquarters. Under agroforestry, tree plantation work isbeing carried out by farmers on tenants' land and nurseries on farmers' land. The department is also nurturing the plants in nurseries. Planting of bamboo isbeing encouraged under the National Bamboo Mission, with stakeholders receiving training on manufacturing bamboo products like furniture and incense sticks.

  - C**ompensatory Afforestation Fund Management Planning Authority (CAMPA):** This aims to compensate for ecological loss due to forest land diversion for non-forestry purposes. It is decided to use at least 80 percent of the funds for afforestation and wildlife habitat improvement, with the remaining for infrastructure and capacity building. A total of 1.53 lakh plants was planted in 2022-23, against the target of 1.59 lakh, and 18.89 lakh plants have been planted so farin 2023-24.

- **Garland Trenching:** The scheme on Garland Trenching has been initiatedin Bihar's forests in the southern districts to conserve water and biodiversity. Over 6.69 lakh cubic meters of rainwater has been collected, contributing to the conservation of these vital ecosystems.

- **Development of Natural Forests:** On recommended forest lands, the maintenance of existing plantations, along with soil and water conservation efforts and garland trenching are being undertaken.

- **Plant Tissue Culture Lab:** Through the establishment and development of the lab, the plan is to produce quality plants which can be further used in tree plantation work.

- **State Action Plan on Climate Change (SAPCC):** Global warming has significant negative impacts on natural resources and biodiversity worldwide. The Paris Agreement aims to limit average temperature rise to 1.5°C. The SAPCCis being prepared following the guidelines

from the Ministry of Environment, Forest and Climate Change and envisages climate profiling and vulnerability assessment to tackle climate challenges.

- **Climate Resilient and Low Carbon Development Pathway:** The Bihar State Pollution Control Board has signed a MoU with the United Nations Environment Programme (UNEP) to make the state carbon-neutral by the year 2070 as per the country's international commitment. The strategy focuses on sectors like energy, industry, solid waste, transportation, and construction, and develop vulnerability profiles for social and economic sectors.

- **Climate Change Learning Lab:** The Climate Change Learning Lab, launched in 2022, is an interactive platform supported by the German development agency, GIZ, and is aimed at raising awareness and understanding about specific climate change issues in Bihar.

- **Wetland Conservation and Development:** The National Wetlands Decadal Change Atlas (2021) lists 4526 wetlands in Bihar, covering 2.25 hectares. The Climate Change and Wetland Wing of the Environment, Forest and Climate Change Department and the State Wetland Authority work with local, national and international partners to identify and manage wetlands, including the RAMSAR sites. In the first phase, 133 wetlands larger than 100 hectares are prioritized, with brief documents and health cards of 60 wetlands prepared and uploaded to the Wetland India Portal, aligning with the Wetlands (Conservation and Management) 2017 Rules.

- **Ban on Single-use Plastic:** The state has enacted a comprehensive ban on plastic carry bags and single-use plastic items, aiming to combat pollution and protect the environment. With a statewide coverage, this applies to all urban local bodies and gram panchayats since 2018. This aligns with the Plastic Waste Management Rules 2016 (amended in 2022) and the Union Ministry of Environment, Forest, and Climate Change's notification of 2021.

- **Development of Eco-tourism and Parks:** Various initiatives such as identifying and developing tourist spots in all districts, and development of parks in all districts to improve the overall ambient air quality isbeing undertaken. Also, Rajgir's Nature Safari and Rajgir Zoo Safari, covering 250 acres and 480 acres, respectively, are the state's first safari parks, showcasing the potential of eco-tourism.

- **Pollution Control:** Various types of works related to pollution control are being carried out in the state.

    - **Ambient Air Quality Monitoring:** The Bihar State Pollution Control Board monitors ambient air quality through 35 Continuous Ambient Air Quality Monitoring Stations (CAAQMS) in 23 districts of the state. Bihar is the first state in the country to monitor ambient air quality at the block level in rural areas of the state, using indigenous technology, in collaboration with IIT Kanpur. The state has installed 534 low-cost sensors in all the blocks across 38 districts. The low-cost sensors, coupled with satellite data, are being used for this purpose. Additional

sensor sets have been installed at the Bihar State Pollution Control Board (BSPCB) headquarters in Patna.This project is part of a three-year Research and Development programme.

- **Noise Monitoring:** The monitoring of ambient noise level in cities is being undertaken to address noise pollution from various sources, which includes loud speakers, transport vehicles, construction activities, generator sets, industries, and firecrackers, to help ensure a healthy sound level during both day and night.

♦ **Wildlife Protection, Conservation and Management**

- **Wildlife Habitat Development Scheme:** This has been sponsored by the Central government, focuses on protecting, conserving and managing sanctuaries, wildlife in outer areas, and preventing human-wildlife conflicts in the state.
- **Vikramshila Gangetic Dolphin Sanctuary:** The Bhagalpur district in Bihar houses the only dolphin sanctuary in the country, with 1464 dolphins discovered in a 2018-19 survey conducted in Ganga, Gandak, Kosi, Parmar, Mechi, and Mahananda rivers.The sanctuary is a 60-kilometer stretch along Ganga, extending from Sultanganj to Kahalgaon in the district of Bhagalpur.
- **Valmiki Tiger Reserve:** This project is a multi-faceted initiative aimed at protecting the forests, wildlife, and local communities. The district of West Champaran houses the Valmiki National Park and Valmiki Wildlife Sanctuary. During 2023-24, the state share in the programme amounts to Rs. 371.10 lakh with a central share of Rs 1112.00 lakh. The project aims to protect forests, manage reserve area, raise awareness about wildlife conservation among local communities, prevent poaching and forest offenders, and foster eco-tourism in the Tiger Reserve.
- **Gaj Project:** Under this, an elephant rescue and rehabilitationcentre has been established in West Champaran district to protect the habitat of elephants. This aims to create a conducive environment for elephant migration within forests, with annual action plans for protection, conservation and control of human-elephant conflicts arising from wild elephants straying from bordering states. In the financial year of 2023-24, the Government of India has implemented a single scheme called the Project Tiger and Project Elephant.

6. Health Department

♦ **Greening of Health Centres:** Bihar's Jal-Jeevan-Hariyali Abhiyan brings rainwater harvesting to health centres/hospitals, promoting water security and sustainability in the state.

♦ **Building Green with Green Rating for Integrated Habitat Assessment (GRIHA):** The Bihar Medical Services and Infrastructure Corporation Limited (BMSICL) is leading the green building initiative by utilizing GRIHA technology, a green rating system, to construct eco-friendly and sustainable healthcare facilities in the state.

7. Department of Industries

Bihar Biofuels Production Promotion Policy (2023)

- The Bihar Ethanol Production Promotion Policy 2021 has been swapped with the Bihar Biofuels Production Promotion Policy 2023, which mandates the establishment of 17 ethanol production units in the state.
- The policy aims to develop green-field standalone ethanol and compressed bio gas/ Bio Compressed Natural Gas (CNG) production units in Bihar, focusing on the development of investors, farmers and stakeholders. The units must produce 100 percent ethanol and compressed bio gas, approved under the National Bio-Fuel Policy 2018 and the National Bio-Fuel Coordination Committee.
- The policy envisages provisioning of facilities and financial assistance to fuel grade standalone new greenfield ethanol and compressed biogas/bio-CNG units for establishment in Bihar along with the benefits of grants given under the policy.
- The main aim is to boost farmers' income by providing raw materials and feed-stock for ethanol and compressed biogas production and to create local employment opportunities by promoting fuel-grade standalone New Greenfield Ethanol and Compressed Biogas production units.

8. Minor Water Resources Department

- **Revitalizing large ponds and Ahar-pynes:** Under the Jal-Jeevan-Hariyali Abhiyan, renovation work on Ahar-pynescovering over one acre and ponds covering five acres is going on in the entire state.Also, the construction of check dams/weirs on small rivers and drains isbeing carried out.The construction of large water bodies on public land and garland trenches at mountain foothills isbeing proposed, which would enable the provisioning of irrigation facilities, water harvesting, and recharging of groundwater in the state.
- **Irrigation Facilities:** Ensuring reliable water access for increased crop yields and farmers' income is one of the priorities of the Department. Under the Jal-Jeevan-Hariyali Abhiyan and 'Har Khet Ko Sichai Ka Pani' initiatives, so far, about 2143 Ahar-Pyne/Weir/Lift Irrigation/Garland Trench and Pond schemes have been completed, with work continuing on288 schemes. These schemes have helped in restoring irrigation facilities in 2,41,501 hectares and restoration ofabout 992 lakh cubic meter water storage capacity. In 2023-24, nearly 729 Ahar-Pyne/Talab/Check Dam and Lift Irrigation schemes have received administrative approval so far.
- **Other Activities:** Besides irrigation, implementing water harvesting during lean periods of irrigation, recharge of groundwater and facilitating fish farming through water harvesting in water bodies of the state.

9. Public Health Engineering Department (PHED)

- **Eco-friendly construction:** The Public Health Engineering Department is promoting the use of eco-friendly construction materials in various schemes, including in the Har Ghar Nal Ka Jal scheme and the Jal-Jeevan- HariyaliAbhiyan. This helps in reducing deforestation and carbon footprint of infrastructure projects.

- **Groundwater Conservation:** The Department encourages tree plantation for carbon sequestration and environmental restoration, while public wells and soak pits promote rainwater harvesting and groundwater recharge, enhancing water conservation.

- **Community Engagement:** Under the Jal-Jeevan-Hariyali Abhiyan, organizing monthly Jal Chaupal meetings at the ward level on the first Thursday of every month fosters awareness about water issues and encourages responsible water usage, leading to reduced waste and appreciation for clean water.

10. Road Construction Department

Bihar is a rapidly developing state in terms of infrastructure development, specifically in the road construction sector. It is facing social and environmental changes due to rapid urbanization, land-use changes, water quality degradation, biodiversity loss, pollution, and consequently impacting human health. The high population density and increasing demand for land for road construction have increased environmental risks. The Bihar State Road Development Corporation (BSRDCL) has implemented the following measures to prevent negative environmental impacts from road construction projects.

- **Prioritizing Tree Conservation:** The focus is on aligning roads to prevent tree cutting or have minimum cuts with approval based on rules and compensatory afforestation payments to the Environment, Forest and Climate Change Department. Trees are not cut outside the proposed route and design changes are made to minimize damage. Tree translocation work is also being done, demonstrating commitment to responsible development to preserve biodiversity and ecosystem services.

- **Monitoring Air and Water Quality:** The tender/contract documents are incorporating guidelines for quality control of air, noise and water, binding contractors to adhere to these standards, along with monitoring by the Project Implementation Unit. Also, dedicated systems to track both groundwater irrigation quality and ambient air quality during road construction are being implemented in the state.

- **Prevention of Noise Pollution:** "No Horn" notice boards and sound blocking boards are being installed in sensitive areas like residential areas, schools, health institutions, and religious and cultural places to prevent noise pollution.

- **Management of dust during road construction:** To keep check on dust generated during road construction, water sprinklers and Green Mesh are being used to prevent dust from flying. Also, a sprinkler system is installed, while using a crusher to prevent dust from flying.

11. Rural Development Department

- **Lohiya Swachh Bihar Abhiyan:** This public awareness campaign integrates 'Swachh Bharat Mission' and Lohiya Sanitation Scheme whichhave provided toilet access to 122.15 lakh families in the first phase.In its second phase, the campaign aims to achieve "ODF-Plus (Open-Defecation Free-Plus)" status for Gram Panchayats during 2020-21 to 2024-25 through sustainable solid and liquid waste management, focusing on creating "completely clean" villages.

  The main goal of this campaign is to ensure that all families have access to individual toilet facilities, with 13.25 lakh beneficiaries (as of November 2023) having self-constructed a toilet under its second phase. In the second phase of the campaign, there is a plan to construct 6 lakh toilets, 533 community sanitation units, a campus and sewage sludge management plants, and conduct public awareness campaigns during 2020-21 to 2024-25. The plan also includes construction of individual toilets, community sanitation complexes, solid waste management and plastic waste management. The project will require an expenditure of Rs. 1,506 crore for management, gray water management, sludge management, information education, and communication.

- **Solid and Liquid Waste Management:** This mainly includes collectionand disposal of solid waste from house to house and cleaning of drains. At present, door-to-door collection and disposal of solid waste is being carried out in 67,592 wards, indicating a comprehensive approach to waste management. Also, 5,337 e-rickshaws and 73,147 pedal rickshaws are being used for collection anddisposal of garbage at the Gram Panchayat level. Also, setting up of Waste Processing Units (WPUs) in 3,325 Gram Panchayats promotes localized waste management and reduces reliance on distant landfills. About 1.12 lakh community soak pits have been constructed for management of liquid waste.

- **Gobardhan Yojana:** The disposal of cow dung and agricultural waste arebeing carried out under this scheme. The construction of 14 Gobar Dhan units for production of bio-gas at the district level has facilitated conversion of agricultural and animal waste intoclean and renewable energy.

- **Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS):** This has been instrumental in conserving natural resources, enhancing their productive capacity, and creating wage employment through various interventions such as:

  - **Water Conservation:** The rejuvenation and maintenance of traditional water bodies like Ahars and Pynes has led to efficacious water management, increase in water table, enhancement in agricultural productivity while also arresting the process of desertification. Similarly, the rejuvenation of ponds belonging to both community commons and individual beneficiaries has contributed to water conservation, efficiency in use of water, increase in water table and promotion of livelihood activities like fishery. Dredging, cleaning and inter-linking of water channels with local rivers in Supaul and Rohtas are templates which MGNREGS intends to

replicate elsewhere as well. This has been helpful in tackling the problem of water-logging which has been responsible for adversely affecting agriculture, livelihood and rural mobility. Also, MGNREGS has undertaken the construction of check-dams on a big scale, which prevents the run-off of surface water ensuring storage of water and its use for irrigation. Similarly, the construction of soak pits around hand pumps has been a very successful program under MGNREGS.

- **Increasing Green Cover through Plantations:** A major activity under MGNREGS involves increasing the green coverage through plantation. Trees are selected on the basis of local suitability and care is taken to ensure their survival through fencing and dedicated 'Van Poshaks'. The saplings are sourced from Jeevika's 'Didi ki Nursery', which contribute to livelihood promotion as well.
- **Pollution Mitigation:** Many Waste Processing Units (WPUs) have been constructed for effective waste processing, reuse of reusables and safe disposal of waste.
- **Futuristic Interventions:** MGNREGS is open to new ideas and possibilities as long as they contribute to a better environment while creating wage employment for unskilled workers in the process. In order to ensure standardization of works related to natural resource management, Geographic Information System (GIS) is used in a systemic and comprehensive manner.

12. Rural Works Department

♦ **Bihar Rural Road Maintenance Policy 2018:** This policy has been implemented for regular and systematic repair and maintenance of rural roads in the state. The policy allows for tree plantations on roadside land, with payment for trees at 30 percent of the rate per tree, and after five years of maintenance, with the remaining 70 percent of the amount tobe paid, reducing the number of dead trees. This would ensure effective tree plantation in the state. In 2023-24, about 26514.93 kms. of roads have been renovated with tree plantations on both sides, and at present, 12,175 roads (33429.06 kms.) are approved for tree planting. The Department aims to plant trees on approximately 9000 kms. stretch of road during 2024-25.

♦ **Use of Waste Plastic in Road Construction:** The use of waste plastic (6-8% of the weight of bitumen) in construction of tarred roads is being encouraged in the state. Under the Pradhan Mantri Gram Sadak Yojana (PMGSY-I, PMGSY-II, PMGSY-III), a total of 1040 roads (total length 4160.97 kms.) are approved, out of which 819roads (total length 2708.80 kms.) have been completed so far.

13. Sugarcane Industries Department

♦ **Seed Grant:** The Mukhyamantri Ganna Vikas Yojana aims to increase sugarcane production, productivity, and recovery percentage in the state by distributing subsidized certified sugarcane seeds to farmers through sugar mills for a total of 10 strains of sugarcane varieties. A subsidy of Rs. 210per quintal and Rs. 240 per quintal is being given to General category farmers and Scheduled Caste/Scheduled Tribe categories of farmers, respectively,

to enable purchase of certified sugarcane seeds of the 10 selected varieties.

14. Tourism Department

- **Eco-Tourism Potential:** The Valmikinagar Tiger Reserve (VTR) in Bihar, home to over 50 tigers, is being promoted for eco-tourism through river routes, lakes and ponds. The southern districts of Kaimur and Rohtas and the reservoirs, waterfalls and forests of the districts of Munger, Jamui and Banka feature picturesque landscapes. The Department is collaborating with the Environment, Forest and Climate Change Department to promote various activities such as water sports, boating, trekking, cycling routes, night camping and motorcycle trips.

- **Establishment of New Buildings in Rajgir:** The Environment, Forest and Climate Change Department is implementing a scheme to demolish old structures and construction of a new integrated building near a ropeway for eco-tourism and wildlife refuge preservation with an outlay of Rs. 16,38,73,000.

- **Development of Tourist Structure in Ghoda-Katora in Rajgir:** A sum of Rs. 11,43,15,000 has been approved for the development of tourist structures in Ghoda-Katora, Rajgir for 2023-24, including a parking area, boom barrier, waiting shed, pavilion, main entrance, watch tower, and Rajgir Zoo Safari entrance wall.

- **Development of Tourism at Gurpa Mountain:** The plan for development of facilities, for 2023-24, at Gurpa mountain, which lies in the Fatehpur block of the Gaya district includes construction of a pilgrim rest house, toilet, signage, high mast light, approach pathway, culvert and waiting room with a sum of Rs. 9,17,52,000.

- **Eco-Tourism Schemes:** Proposals for eco-tourism schemes are being developed, including the development and beautification of Rohtasgarh Fort, Dhua Kund and Manjhar Kund in Rohtas, tourist development work near Shergarh Fort in Rohtas, creation of tourist facilities near Tutla Bhavani Temple in Rohtas, installation of a giant Buddha statue on Dungeshwari mountain in Gaya, and construction and renovation of tourist structures at Guptadham in Rohtas.

15. Transport Department

- **Bihar Clean Fuel Scheme**

  - **Ban on Diesel-powered Three-wheelers:** Since March 31, 2022, implementing a ban on diesel-powered three-wheelers within the limits of Patna Municipal Corporation (PMC) and surrounding municipalities such as Danapur, Khagaul and Phulwari Sharif Nagar Parishad demonstrates a strong commitment to reducing air pollution. Also, diesel-powered three-wheelers are not allowed to operate within the municipal limits of Gaya and Muzaffarpur since September 30, 2023.

  - **Encouragement to Cleaner Vehicles:** The scheme offers grants for replacing diesel/petrol three-wheelers with CNG or battery-powered ones in restricted areas and for retrofitting with CNG kits in petrol-powered three-wheelers/motor

cabs/maxi cabs. A sum of Rs. 4,01,20,000 has been disbursed to 1505 beneficiaries, indicating a significant uptake of the scheme.

- **Ban on Diesel-powered city buses in Patna:** There has been a ban on the operation of diesel-powered city buses in the urban areas of Patna from September 30, 2023. As part of this initiative, 121 diesel buses will be replaced with CNG buses. For this purpose, the bus owners will receive a grant of Rs 7.50 lakh per bus to incentivize the switch under the Bihar Clean Fuel Scheme.

♦ **Minimizing Vehicular Emissions**

- **Imposition of Green Tax on Vehicles older than 12 years:** The Bihar Vehicles Taxation Act, 1994 amendment introduces a 10 percent "green tax", including an additional tax, for registered transport vehicles that are older than 12 years, except in the case of three-wheelers, tractors and trailers.
- **Ban on Operation of all Government Vehicles older than 15 years:** Since 2019, the State government has banned the operation of all government vehicles older than 15 years, focusing on public interest and addressing air pollution caused by vehicular emissions.
- **Ban on Operation of Commercial Vehicles older than 15 years:** The Patna Municipal Corporation, Danapur Nagar Parishad, Khagaul Nagar Parishad, and Phulwari Sharif Nagar Parishad have banned the operation of commercial vehicles older than 15 years to prohibit the commercial vehicles from emitting more polluting gases.
- **Vehicle Scrappage Policy:**The policy aims to reduce vehicle-borne pollution in the state. It provides relief in tax and penalty for registered vehicles in dilapidated condition, destroyed, sold for scrap, or unfit for operation, and for vehicles, both private or commercial, which are over 15 years old.

♦ **Conversion of BSRTC Diesel Buses to CNG and Purchase of New CNG Buses:** To combat air pollution in the state, the Department has converted 41 diesel buses into CNG during 2019-20 and 2021-22. During 2020-21 to 2021-22, a total of 100 Non-AC CNG and 25 AC CNG buses were purchased. At present, 166 CNG buses are operational in the fleet.

♦ **Operation of Electric Buses:** BSRTC has been operating 25 electric buses in Patna's urban areas (FAME-II) since 2020-21. A seven-year agreement with M/S Ashok Leyland is in place, with a total cost of Rs. 104.58 crore. All 25 electric buses are powered by Green Fuel, a sustainable method of transportation that aims to maintain the ambient air quality. Further, under the PM e-Bus Seva Scheme of the Ministry of Housing and Urban Affairs a total of 400 electric buses will be procured on Gross Cost Contract (GCC) for six cities in Bihar, namely Patna, Muzaffarpur, Gaya, Bhagalpur, Darbhanga and Purnea. The PM e-Bus Seva Scheme, which was proposed to the Government of India, has been granted consent in-principleat the state level.

- **Use of Electric Car:** The Department has initiated the first phase of encouraging the use of electric cars and has provided a 50 percent rebate in road tax towards registration of electric vehicles to combat environmental pollution from vehicular emissions.

- **Mukhyamantri Gram Parivahan Yojana:** Launched in 2018, this scheme provides passenger transport facilities in rural areas and employment opportunities, specially for the deprived sections. The scheme provides a 50 percent grant of up to Rs. 1 lakh to selected beneficiaries per Panchayat for purchase of vehicles.

  The Department has approved the purchase of e-rickshaws with provisions for 50 percent grant to selected beneficiaries for purchase of e-rickshaws, with a maximum of Rs. 70,000.

- **Establishment of Pollution Checking Centers:** The establishment of pollution checking centers to reduce vehicle-generated pollution is being undertaken under the provisions of the Motor Vehicles Act. The District Transport Officer has been delegated the power to grant licenses, and so far, 1488 pollution testing centers have been opened in the state. Pollution check certificates are being issued online, ensuring the safety of data on pollution-checked vehicles and making it easier to check defaulter vehicles.

- **Establishment of CNG Filling Stations:** Gas Authority of India Limited (GAIL)has established 27 CNG stations in Patna, with a total of 106 stations currently operational in the state. This enables the supply of Compressed Natural Gas (CNG) to CNG cars and autos. Additional stations are under construction, and a CNG filling station has been started in Begusarai.

- **Exemption in Road Tax:** There is a provision for 50 percent exemption in road tax for all types of battery-operated vehicles.

16. Urban Development and Housing Department

- **Drain construction, Sewerage and Sanitation Works:** Work on construction of drains, sewerage and other sanitation facilities is being undertaken in all municipal areas of the state.

- **Storm Water Drainage System (Saat Nishchay-2):** To solve the problem of water-logging, a drainage system will be developed in municipal bodies to drain water and keeping the environment clean. To solve the problem of water-logging in Patna city and its surrounding areas. Projects from Catchment-1 to 9 have been approved at an estimated expenditure of Rs 957.51 crore. The renovation plan of Saidpur Nala has been approved at an estimated expenditure of Rs 259.81 crore.Apart from this, a storm water drainage scheme worth Rs. 1034.67 crore has been approved for 7 Municipal Corporations (Darbhanga, Samastipur, Arrah, Purnea, Sitamarhi, Bettiah and Chhapra) and 4 Municipal Councils (Madhepura, Sheohar, Jehanabad and Bodh Gaya).

- **Jal-Jeevan-Hariyali Abhiyan (JJHA):**

  - **Restoration of Ponds:** Against the target of 318 ponds/wells identified in the urban areas of the state, the restoration work on 104 ponds/wells have been completed so far.

  - **Installation of Rainwater Harvesting Facilities:** The work of rainwater harvesting has been completed in all the 429 buildings owned by the Urban Development and Housing Department.

  - **Construction of Soakage and Well renovation:** Under this, rainwater harvesting, construction of drainage near 9174 handpumps, construction of drainage near 3336 wells and the renovation of 3744 wells have been completed.

- **Swachh Bharat Mission (SBM):** Under this scheme, the work of construction of toilets and solid waste management is being undertaken. The construction work of 4,07,570 toilets has been completed. The implementation of 100 percent door-to-door waste collection and source segregation in 141 municipal bodies is a significant step towards sustainable waste management. Out of the total 5467 TPD (Ton per day) collected, about 1385 TPD waste (25 percent) waste has been processed. A total of 51 Material Recovery Facilities (MRF) are being operated in 35 municipal bodies towards the management of dry waste. About 185 Waste-to-Compost Centres are being operated in 87 municipal bodies towards management of wet waste. Also, a MRF Centre with a capacity of 5 TPD (Ton per day) has been established in Patna for processing of plastic waste in collaboration with United Nations Development Programme (UNDP).A publicity campaign is underway to reduce and eliminate the use of single-use plastic carry bags and plastic carry bags, as per the provisions in the Bihar Municipal Plastic Waste Management (Amended) Model Bye-laws 2022.

- **Atal Mission for Rejuvenation and Urban Transformation (AMRUT):** Under this centrally sponsored scheme, park construction in 20 municipal bodies of the state, storm water drainage scheme in 3 municipal bodies and water supply schemes in 21 municipal bodies are being implemented. Towards construction of parks, work of plantation and development of green space is being done, out of which the work of 24 parks has been completed. The work of rainwater harvesting is being done under the Storm Water Drainage Scheme. This scheme has been completed in two municipal bodies and work is in progress in one. Under the water supply scheme, underground water harvesting and recharge pit is also being made. Stand posts will also be installed, there is also a provision for making recharge pitin these areas.

- **Patna Metro Rail Corporation:** Under the proposed project, two corridors have been selected in Patna; one corridor starts from Danapur and goes to Khemnichakvia Jawaharlal Nehru Marg (Bailely Road) and Patna Railway Station, Mithapur, totalling 17.93 kms. The second corridor starts from Patna Railway Station and goes upto Patliputra Bus Terminal via Akashvani, Gandhi Maidan, Ashok Rajpath, Moinulhaq Stadium, MalahiPakri Bypass, Khemni Chak, and Zero Mile, and spans 14.57 kms. With the implementation of the Patna

Metro Rail Project, it is expected to reduce operation of public vehicles, traffic load, and air and noise pollution in the state.

- **Smart City Mission:** Under this scheme, there is a provision to promote the use of solar energy in the state in the interest of environment.
  - **Patna Smart City Scheme:** Under this, the beautification and plantation work is being undertaken along the flyover. Under this, the beautification/redevelopment work of a 7-kilometer area from the entry point of Gandhi Maidan to Digha Golambar on the northern side of Ganga Path. Also, a total of 25 e-buses are being operated to keep Patna city clean and pollution-free. Solar power plants are being installed at 20 government buildings/sites so that 908 KWH electrical power can be obtained.
  - **Bihar Sharif Smart City Scheme:** Under this, solar power plants have been installed at 37 building sites, so that 320 KWH electrical power can be obtained.
  - **Bhagalpur Smart City Scheme:** Under this, solar power plants are being installed on 7 buildings, so that 336 KWH of electrical power can be obtained.
  - **Muzaffarpur Smart City Scheme:** Under this, a solar power plant has been installed at one building/site, so that 25 KWH electrical power can be obtained.
- **City Development Building Construction Scheme:** There is a provision for installation of rainwater harvesting/solar lights under this scheme. Also, green space is to be developed on the building premises.

17. Water Resources Department

- Under the Water Resources Department, the work of management of water resources for irrigation, flood protection, command area development and water management is done under large and medium projects. During 2023-24, irrigation facility was provided in 25.04 lakh hectares of area through major and medium irrigation schemes which include Kharif, Rabi and Garma irrigation. Against the target of 22.00 lakh hectares for Kharif irrigation in 2023-24, irrigation has been provided in 19.75 lakh hectares of area.
- **Har Khet Tak Sinchai Ka Paani (Saat Nishchay-2):** Under Saat Nishchay-2, the State government has set a target of providing 'irrigation water to every farm'. The objective of this initiative is to provide irrigation to unirrigated fields in all villages.Suitable schemes have been identified after field survey visits and consultation with farmers. So far, administrative approval has been given for 1165 schemes, out of which 619 schemes have been completed and work on 546 schemes are in progress.
- **Ganga Jal Apurti Yojana:** Changes in the nature of rainfall, changes in the intensity and quantity of rainfall and decline in groundwater levels due to climate change have led to an increase in the frequency of drought and floods in the state of Bihar. Along with this, drinking

water crisis has also arisen due to falling groundwater level in many areas of Southern parts of the Bihar. As such, to limit climate change effects and establish ecological balance, the Ganga Jal Apurti Yojana is being implemented under the Jal-Jeevan-Hariyali Abhiyan.The supply of water to areas such as Gaya, Bodh Gaya, Rajgir and Nawada will help in addressing water shortage and reduce groundwater exploitation in these areas. This scheme is the first of its kind in the state.During the rainy season, the surplus water from Ganga will be lifted and stored in Rajgir and Tetar reservoirs, which will recharge the groundwater in these areas. Along with drinking water for the common people, water will also be available in zoo safaris and nature safaris.

- **Gayaji Dam (Rubber Dam) on Falgu River:** India's longest rubber dam, the Gaya Ji Dam, has been constructed to ensure water availability in the Falgu river near Vishnupad Temple. The modern technology-based scheme, costing Rs. 386.85 crore, will provide at least 2 feet of water throughout the year for 500 meters in front of the temple. Under IIT Roorkee's supervision, this first-of-its-kind facility in the state was completed in 2022. The scheme is beneficial to devotees who are performing religious rituals. The Sitapul built over Falgu has made it easier for devotees to reach Sita Kund and thousands of tourists visit the site daily.

- **Western Kosi Canal Project:** Under this, the desilting of canals, along with restoration and residual work of their dams and structures is being done. Currently, the project has created 18,461 hectares of additional irrigation potential and restored 70,777 hectares of lost irrigation potential, providing water to the Madhubani and Darbhanga districts. The scheme aims to increase irrigation potential by 64,240 hectares and restore the lost potential by 1,41,025 hectares, benefiting farmers in 19 blocks of Madhubani and5 blocks of Darbhanga districts.

- **Sindhvarani Reservoir Scheme:** This scheme is being completed in Haveli Kharagpur block of the Munger district at a cost of Rs. 125.82 crore, creating additional irrigation capacity of 1,660 hectares. Farmers in Kharagpur, TettiyaBambar, and Sangrampur blocks will specifically benefit from this. The Dakranala Pump Canal Scheme, at a cost of Rs. 145.43 crore, will create additional irrigation capacity of 3284 hectares, benefiting farmers in the blocks of Suryagarha, Munger Sadar, Jamalpur and Dhanhara.

- **Kundghat Reservoir Scheme:** The Kundghat Reservoir Scheme, worth Rs. 185.21 crore, is being constructed to provide irrigation facilities in the drought-hit Bahuar river area in Sikandra block of the Jamui district. The scheme will provide irrigation cover for 2035 hectares and includes a 300-metre long earthen dam, gated spillway, and discharge distribution systems. The project aims to increase green cover and provide water for the area.

- **Restoration of Saran Main Canal:** Restoration work is being undertaken on the Saran Main Canal from 0.00 kms.to 17.00 kms.at a cost of Rs. 333.49 crore, while the Aurangabad district is undergoing restoration and lining work on the Eastern Link Canal from 0.00 kms.to 10.20 kms.ata cost of Rs. 235.24 crore.

- **River Inter-linking Schemes:** Various schemes of interlinking of rivers is being planned with an objective of reviving dead rivers in the state.

  - **Bagmati-Budhi Gandak (Belwadhar) River Inter-linking Scheme:** This scheme is being undertaken in the districts of East Champaran, Muzaffarpur, Sitamarhi and Sheohar with a cost of Rs. 130.88 crore.

  - **Bagmati-Budhi Gandak (Shantidhar) River Inter-linking Scheme:** This scheme is being undertaken at a cost of Rs. 120.96 crore in Samastipur district.

  - **Gandak-Akali Nala (Chaadi)- Gandak-Mahi-Ganga River Inter-linking Scheme:** This scheme is being undertaken in the districts of Gopalganj, Siwan and Saran with a cost of Rs. 69.89 crore. The state plans to achieve flood control, irrigation facility development and groundwater recharge through these river interlinking schemes.

18. Information and Public Relations Department

- **Publicity Efforts:** The Department is actively disseminating information about the Jal-Jeevan-Hariyali Abhiyan to the public through various means such as hoardings, newspaper advertisements, street plays and social media. This campaign aims to promote environmental conservation and make it a people's campaign by utilizing various media for continuous dissemination of information.
