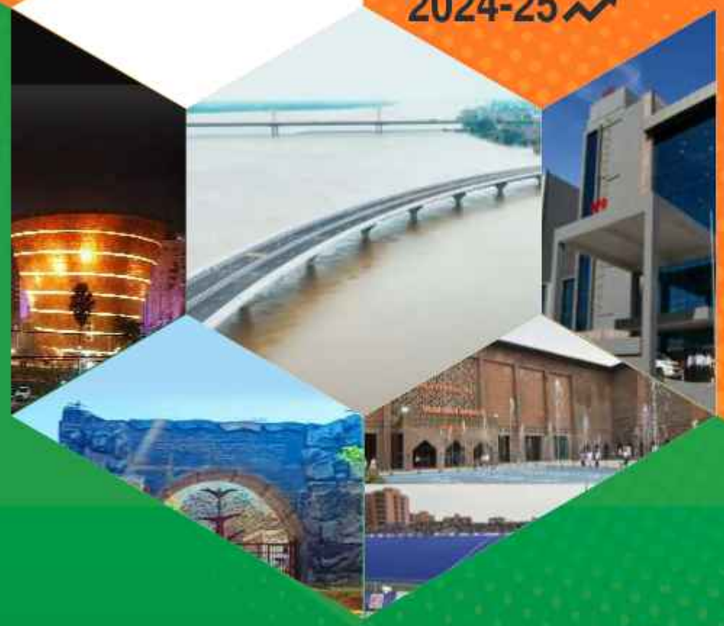
BIHAR
ECONOMIC SURVEY
2024-25



Finance Department, Govt. of Bihar

Government of Bihar

Finance Department

Economic Survey 2024 - 25

CHIEF MINISTER
BIHAR

Message

Bihar has made significant achievements in its journey of development with justice in the last two decades. Development with justice means development of all areas and upliftment of every section of the society. This edition of the Economic Survey (2024-25) captures our consistent performance on growth and development parameters over these two decades.

Bihar, today, is being known for its achievements in the fields of infrastructure, power, education, public health, good governance, employment and especially women empowerment. Now Bihar has also taken important steps towards development of sports and we have started preparing such sportspersons who will earn prestige and glory for our state as well as our country. We have continued to provide employment to youth at large scale so that the standard of living of the people continues to improve. The positive impact of the government's efforts is visible in all the spheres. Now women are exercising their right to secure, regulate and control their lives in every area, inside and outside the home.

I am confident that this Economic Survey will prove useful to policy makers, economists, educationists and other readers.

(Nitish Kumar)

Deputy Chief Minister-
cum-Finance Minister

Bihar

Message

Bihar continues to step forward on the path of economic prosperity with great achievements. Our commitment is to lead every citizen of the state in the journey of 'Development with Justice'. The growth rate of Bihar's economy is 9.2 percent in the year 2023-24, which places Bihar at third place among all the states of the country.

In the recent years, due to combined efforts of the state and the central governments, there has been a significant increase in the size of the state budget, especially on development expenditure. As a result of the prudent economic and fiscal policy implementation of the state government, remarkable changes have been recorded in the socio-economic sector of the state.

The state is setting new records in terms of development in road, rail and air transports including other infrastructure. By using e-governance in the state, the services for the people is being made easy, accessible and transparent.

The life of farmers has become prosperous due to the strengthening of agriculture and rural economy. Along with the focus on human development, child development and the participation of women in the development process, the state government is also vigilant about climate change and is taking measures to improve it.

These aspects have been described in depth in the Bihar Economic Survey, 2024-25. I am confident that this document will serve as a valuable resource for all stakeholders interested in the sustainable development and progress of the state.

(Samrat Choudhary)

CONTENTS

Chapter	Title	
	Glossary of Abbreviations	i-x
	Index of Tables and Appendices	xi-xxvii
	Index of Departments	xxviii-xxix
	Executive Summary	xxx-xlv
Chapter - I :	**Bihar Economy : An Overview**	**1-27**
	1.1 Macroeconomic Overview	1-5
	1.2 Structure of the Bihar Economy	6-7
	1.3 Per Capita GSDP	8-10
	1.4 Gross Fixed Capital Formation	10-11
	1.5 Sector-wise share in GSVA and Employment (At Constant Prices)	11-13
	1.6 Prices and Inflation	14
	1.7 Regional Disparity	15
	1.8 Outline of Bihar Economic Survey 2024-25	16-18
	1.9 State Profile	18-19
	Appendices	20-27
Chapter - II :	**State Finances**	**28-72**
	2.1 Overview of Financial Position	30-35
	2.2 Fiscal Performance	35-39
	2.3 Deficit Management	39-43
	2.4 Cash Management and Guarantees	43-44
	2.5 Debt Management	45-49
	2.6 Resource Management	49-60
	2.7 Expenditure Management	60-72
Chapter - III :	**Agriculture and Allied Sectors**	**73-139**
	3.1 Land-use Pattern	75-76
	3.2 Crop Production	77-80
	3.3 Promotion of Horticulture in Bihar	81-87
	3.4 Animal Husbandry, Dairy Farming, and Fisheries	87-95
	3.5 Agricultural Inputs	95-108
	3.6 Other Important Initiatives for Agriculture and Related Activities	108-122
	Appendices	123-139
Chapter - IV :	**Enterprises Sector**	**140-176**
	4.1 Status of Industries	142-146
	4.2 Informal Enterprises in Bihar	147-156
	4.3 Agro-based Industries	157-163
	4.4 Non-Agro Based Industries	163-165
	4.5 Industrial Promotion in Bihar	165-169

	4.6	Udyog Mitra	170
	4.7	Chief Minister's Schemes to Promote Entrepreneurship	170-171
	4.8	Status of Start-ups under the Bihar Start-up Policy 2022	172
	4.9	Mines and Geology	173
	4.10	Tourism	174-176
Chapter - V :	**Labour, Employment and Skill**		**177-214**
	5.1	Status of Employment and Unemployment	178-189
	5.2	Social Security Measures for Workers of Unorganised Sector	190-194
	5.3	Employment Generated by the State Government and Other Organisations	195-200
	5.4	Skill Development	201-207
	5.5	Issuance of Passport	207-209
	Appendices		210-214
Chapter - VI :	**Physical Infrastructure**		**215-252**
	6.1	Growth of Transport, Storage and Communication Sector	215-216
	6.2	Public Expenditure on Creation of Roads and Bridges	217
	6.3	Road Network	217-221
	6.4	Bihar State Road Development Corporation Limited (BSRDCL)	221-223
	6.5	Sulabh Samparkata under Saat Nishchay – II	223
	6.6	Bridge Sector in Bihar	223-225
	6.7	Rural Roads Network	225-227
	6.8	Road Transport Sector	228-231
	6.9	Road Safety	231-234
	6.10	Bihar State Road Transport Corporation (BSRTC)	234-235
	6.11	Railway Network	235-237
	6.12	Air Transportation	237-239
	6.13	Building Construction	239-241
	6.14	Bihar State Building Construction Corporation Limited (BSBCCL)	242
	6.15	Bihar Police Building Construction Corporation Limited (BPBCCL)	242-243
	6.16	Postal Infrastructure	243-244
	Appendices		245-252
Chapter - VII :	**E-Governance**		**253-283**
	7.1	ICT Infrastructure: Foundation for E-Governance	253-256
	7.2	Enforcement of Law and Administration	256-265
	7.3	Promotion of Economic Development	265-271
	7.4	Enabling Fiscal Governance	271-274
	7.5	Ease of Public Service Delivery Mechanism	274-277
	7.6	Emergency e-Services	277-281
	7.7	Green Initiatives	281-283

Chapter - VIII :	**Power Sector**	**284-315**
	8.1 Overview of Power Sector in Bihar	284-286
	8.2 Institutional Structure of Power Sector	286-288
	8.3 Demand and Supply of Power	289-292
	8.4 Generation	293-301
	8.5 Distribution Companies (DISCOMs)	301-303
	8.6 Operational and Financial Status of DISCOMs	303-304
	8.7 Transmission	304-306
	8.8 Power Sector Schemes	306-310
	8.9 Citizen-friendly Services	311-312
	Appendices	313-315
Chapter - IX :	**Rural Development**	**316-350**
	9.1 JEEVIKA	317-326
	9.2 Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS)	327-330
	9.3 Pradhan Mantri Awas Yojana-Gramin (PMAY-G) and Homestead Land Distribution Scheme	330-333
	9.4 Public Distribution System (PDS)	334-336
	9.5 Panchayati Raj Institutions (PRI)	336-342
	9.6 Shyama Prasad Mukherji Rurban Mission (SPMRM)	342-343
	Appendices	344-350
Chapter - X :	**Urban Development**	**351-377**
	10.1 Reorganization of Urban Local Bodies	352-353
	10.2 Atmanirbhar Bihar Saat Nishchay-2	354-360
	10.3 Centre and State-specific Urban Development Programmes	360-369
	10.4 Patna Metro Rail Project	370
	10.5 Expenditure on Urban Development	370-371
	10.6 Municipal Finance	371-373
	Appendices	374-377
Chapter - XI :	**Financial Institutions**	**378-407**
	11.1 Banking Infrastructure	379-388
	11.2 Deposits, Credits and Credit-Deposit Ratio	388-398
	11.3 Achievements under Annual Credit Plan (ACP)	398-400
	11.4 Kisan Credit Card (KCC)	400-401
	11.5 Non-Performing Assets of Banks	401-402
	11.6 National Bank for Agriculture and Rural Development (NABARD)	403-404
	11.7 Other Development Funds	404-405
	Appendices	406-407

Chapter - XII : Human Development **408-502**
12.1 Demographic Status 410-413
12.2 Health Status 414-423
12.3 Drinking Water Supply and Sanitation 423-428
12.4 Education and Youth 428-451
12.5 Social Welfare 452-462
12.6 Women Development 462-470
12.7 Social Security for Old, Widow and Disabled 470-474
Appendices 475-502

Chapter – XIII : Child Development **503-535**
13.1 Demography 504-506
13.2 Expenditure on Children 506-507
13.3 Sustainable Development Goals 508
13.4 Survival, Health and Nutrition Layout 508-511
13.5 Development Programme for Children 511-519
13.6 Drinking Water and Sanitation 520-521
13.7 Educational Programme for Young Children 521-527
13.8 Child Protection 527-529
13.9 Child Participation 529-531
Appendices 532-535

Chapter – XIV : Environment, Climate Change and Disaster Management **536-579**
14.1 Climate Change 537-538
14.2 Growth of Forestry and Logging 538-539
14.3 Public Expenditure on Climate Change-related Issues 539
14.4 Forest Resources 539-548
14.5 Wetland Conservation and Development in Bihar 548-549
14.6 Biodiversity and Wildlife 549-553
14.7 Environmental Pollution 553-558
14.8 Plastic Waste Management 558
14.9 Water Resources 558-567
14.10 Disaster Management 567-572
Appendices 573-579

GLOSSARY OF ABBREVIATIONS

AAI	Airports Authority of India

VLE	Village-level Entrepreneur
VTR	Valmiki Tiger Reserve
WASH	Water, Sanitation and Hygiene
WBM	Water-bound Macadam
WCDC	Women and Child Development Corporation
WFPC	Women Farmer Producer Companies
WHO	World Health Organisation
WIF	Warehouse Infrastructure Fund
WMA	Ways and Means Advances
WPI	Wholesale Price Index
WPR	Worker Population Ratio
WPU	Waste Processing Units
WSA	Wayside Amenities
WTP	Water Treatment Plant
WTTC	World Travel and Tourism Council

INDEX OF TABLES

Table No.	Title	Page No.
Chapter - I : Bihar Economy : An Overview		
1.1	GSDP and NSDP of Bihar (2011-12 to 2023-24)	2
1.2	Percentage Growth rate of India's GDP and Bihar's GSDP (2012-13 to 2023-24)	4
1.3	Sector-wise Percentage Growth rate in GSVA and GSDP at constant (2011-12) prices for major states (2021-22 to 2023-24)	5
1.4	Sectoral Composition of GSVA in Bihar at Constant (2011-12) Prices (2019-20 to 2023-24)	7
1.5	Per capita GDP of India and Per capita GSDP of Bihar (2011-12 to 2023-24)	9
1.6	Per Capita Net State Domestic Product (NSDP) at constant (2011-12) Prices of Major Indian States (2011-12 to 2023-24Q)	10
1.7	Gross Fixed Capital Formation and GSDP at Current Prices (2019-20 to 2023-24)	11
1.8	Sector-wise Share in Gross Value Added and Employment in Bihar and India (2017-18 & 2023-24)	13
1.9	State-wise CPI (Base : 2012=100) and Inflation Rate (Sept, 2023 and Sept, 2024)	14
1.10	Relatively Prosperous and Impoverished Districts of Bihar (2022-23 and 2023-24)	15
Chapter - II : State Finances		
2.1	Receipts and Expenditures (2019-20 to 2024-25 BE)	31
2.2	Fiscal Performance Indicators for Bihar (2019-20 to 2024-25 BE)	39
2.3	Components of Gross Fiscal Deficit of Bihar (2019-20 to 2024-25 BE)	40
2.4	Financing of Gross Fiscal Deficit in Bihar (2019-20 to 2024-25 BE)	40
2.5	Gross Fiscal Deficit of Different States (2021-22 to 2024-25 BE)	41
2.6	Gross Fiscal Deficit of States as a Percentage of GSDP (2021-22 to 2024-25 BE)	42
2.7	Deficit/Surplus in Revenue Account of States (2021-22 to 2024-25 BE)	43
2.8	Outstanding Liabilities by the State Government in Bihar (2019-20 to 2024-25 BE)	45
2.9	Composition of Public Debt by the State Government in Bihar (2022-23 and 2023-24)	47
2.10	Net Public Debt Received (2019-20 to 2024-25 BE)	48
2.11	Repayment of Outstanding Liabilities (2020-21 to 2024-25 BE)	49
2.12	Components of Receipt in Revenue Account of the State Government (2019-20 to 2024-25 BE)	50

2.13	Components of State's Tax Revenue from own sources (2019-20 to 2024-25 BE)	52
2.14	Percentage Share of Components of State's Tax Revenue from Own Sources (2019-20 to 2024-25 BE)	52
2.15	Major Non-Tax Revenues (2019-20 to 2024-25 BE)	53
2.16	Tax and Non-Tax Revenue from Own Sources of State Government as a Percentage of GSDP (2019-20 to 2024-25 BE)	54
2.17	Act-wise Commercial Tax Collection (2019-20 to 2023-24)	55
2.18	Collection against State GST and Integrated GST (2019-20 to 2023-24)	55
2.19	Monthly Collection against SGST and IGST (April, 2023 to September, 2024)	56
2.20	Revenue from Stamp Duty and Registration Fees (2019-20 to 2023-24)	57
2.21	District-wise Revenue from Stamp Duty and Registration Fees (2023-24)	58
2.22	Cost of Collection of Taxes (2019-20 to 2023-24)	59
2.23	Variation between the Estimated and Actual Realisation of Tax and Non-Tax Revenue (2023-24)	60
2.24	Expenditure Pattern of State Government (2019-20 to 2024-25 BE)	61
2.25	Percentage Change in Expenditure of the State Government (2019-20 to 2023-24)	62
2.26	Revenue and Capital Expenditure (2019-20 to 2024-25 BE)	63
2.27	Development and Non-development Expenditure in Revenue Account (2019-20 to 2024-25 BE)	64
2.28	Distribution of Expenditure from Revenue and Capital Account (2019-20 to 2024-25 BE)	64
2.29	Gross and Net Interest Payment (2019-20 to 2024-25 BE)	64
2.30	Expenditure on Salaries and Pensions (2019-20 to 2023-24)	65
2.31	Expenditure on Social Services (2019-20 to 2024-25 BE)	66
2.32	Expenditure on Economic Services (2019-20 to 2024-25 BE)	68
2.33	Per Capita Expenditure on Social, Economic and General Services (2019-20 to 2024-25 BE)	69
2.34	Quality Parameters of Expenditure (2019-20 to 2024-25 BE)	71
2.35	Distribution of Consolidated Fund – Receipt & Expenditure (2022-23 to 2024-25 BE)	72
Chapter - III : Agriculture and Allied Sectors		
3.1	Annual Growth Rate of Agriculture, Forestry, and Fishing Sector in Bihar, at constant (2011-12) prices (2019-20 to 2023-24)	74
3.2	Share of Agriculture Sector in GSVA in Bihar (2019-20 to 2023-24)	74
3.3	Land-use Pattern in Bihar (2019-20 to 2022-23)	75
3.4	Distribution of Operational Land Holdings by Land Size Class and Gender (2010-11 and 2015-16)	76
3.5	Cropping Pattern in Bihar (2020-21 to 2023-24)	77

3.6	Production of Major Crops in Bihar (2020-21 to 2023-24)	79
3.7	Yield of Major Crops in Bihar (2020-21 to 2023-24)	80
3.8	Area and Production of Fruits in Bihar (2021-22 to 2023-24)	82
3.9	Area and Production of Vegetables in Bihar (2021-22 to 2023-24)	84
3.10	Area and Production of Flowers in Bihar (2021-22 to 2023-24)	85
3.11	Physical, Financial Targets, and Achievement under Different Schemes for Horticulture in Bihar (2021-22 to 2023-24)	86
3.12	Details of Size of Animal Resources in Bihar (2003, 2007, 2012 and 2019)	88
3.13	Livestock and Fish Production in Bihar (2018-19 to 2023-24)	88
3.14	Services for Livestock in Bihar (2019-20 to 2023-24)	89
3.15	Details of Physical and Financial Achievements of Goat Rearing in Bihar (2019-20 to 2023-24)	90
3.16	Details of Physical and Financial Achievements for Poultry Sector (2019-20 to 2023-24)	91
3.17	Physical, Financial Target and Achievements of Mukhyamantri Samekit Chaur Vikas Yojana (2022-23 and 2023-24)	91
3.18	Physical and Financial Targets and Achievements of Mukhyamantri Talab Matsyki Vikas Yojana (2022-23 and 2023-24)	92
3.19	Physical and Financial Targets and Achievements of Scheme for Pond Construction in Plateau area for Fish Farming (2022-23 and 2023-24)	92
3.20	Physical and Financial Targets and Achievements of Renovation of Private Pond Scheme (2022-23 and 2023-24)	93
3.21	Physical and Financial Targets and Achievements of Jalashaya Matsyki Vikas Yojana (2022-23 and 2023-24)	94
3.22	Physical and Financial Targets and Achievements of Talab Matsyaki Vishesh Sahayta Yojana (2023-24)	94
3.23	Physical and Financial Targets and Achievements of River Ranching Programme (2022-23 to 2024-25)	94
3.24	Physical and Financial Targets and Achievements of Pradhan Mantri Matsya Sampada Yojana (2020-21 to 2023-24)	94
3.25	Physical and Financial Targets and Achievements of Fisheries Training Scheme (2023-24)	95
3.26	Distribution of Certified Seeds and Seed Replacement Rate (SRR) in Bihar (2021-22 to 2023-24)	97
3.27	Progress of Chief Minister Crash Seed Programme in Bihar (2019-20 to 2023-24)	97
3.28	Fertilizer Consumption for Agriculture in Bihar (2021-22 to 2023-24)	98
3.29	Number of Farm Implements Bought through Subsidy Scheme in Bihar (2019-20 to 2023-24)	99
3.30	Power Use for Agricultural Purposes in Bihar (2019-20 to 2023-24)	100
3.31	Details of Agriculture Connections Given in Bihar (As of 2023-24)	100

3.32	Electricity Subsidy for Agricultural Sector under Mukhyamantri Krishi Vidyut Sambandh Yojana (MKVSY) in Bihar (2019-20 to 2023-24)	100
3.33	Achievement of Agriculture loan (KCC and Procurement) (2019-20 to 2023-24)	101
3.34	Status of Progress of Bihar Rajya Fasal Sahayata Yojana (2019-20 to 2024-25, Kharif season)	102
3.35	Source-wise Gross Irrigated Area in Bihar (2018-19 to 2022-23)	102
3.36	Status of Irrigation Potential in Bihar (2021-22 to 2023-24)	103
3.37	Water-use Efficiency under Major and Medium Irrigation Schemes in Bihar (2019-20 to 2023-24)	103
3.38	Area Brought under Irrigation through Minor Irrigation Sources (2020-21 to 2023-24)	104
3.39	Status of Farmers' Societies in Bihar (As of March 2024)	104
3.40	Public Expenditure on Irrigation in Bihar (2019-20 to 2023-24)	104
3.41	Irrigation Potential Created under Major and Medium Irrigation Schemes in Bihar (2023-24)	105
3.42	Targets and Achievement under Hari Khaad Yojana in Bihar (2024-25)	109
3.43	Details of Progress of the Organic Corridor Scheme in Bihar (2022-23 to 2024-25)	110
3.44	Details of Progress of Paramparagat Krishi Vikas Yojana in Bihar (PKVY) (2023-24 to 2024-25, up to September 2024)	110
3.45	Details of Progress of Biofertilizer and Biopesticide in Bihar (2021-22 to 2024-25, up to September, 2024)	111
3.46	Details of Target and Achievement of NFSM Scheme in Bihar (2021-22 to 2023-24)	113
3.47	Target and Achievement of NFSM-Oilseeds Scheme in Bihar (2021-22 to 2023-24)	114
3.48	Details of Progress of Diesel Subsidy Scheme in Bihar (2022-23 to 2024-25, up to September, 2024)	114
3.49	Details of Contingent Crop Scheme in Bihar (2022-23 and 2023-24)	115
3.50	Details of Implementation of Climate-resilient Agriculture in Bihar (2019-20 to 2024-25)	116
3.51	Details of Physical and Financial Target and Achievement of Soil Testing in Bihar (2023-24 to 2024-25, up to September, 2024)	117
3.52	Details of Physical and Financial Target and Achievement of BSDM in Bihar (2019-20 to 2023-24)	118
3.53	Details of Training Programmes under BSDM in Bihar (2024-25, up to January 15, 2025)	118
3.54	Progress of ATMA Scheme in Bihar (2022-23 and 2023-24)	119
3.55	Details of Physical and Financial Target and Achievement of Kisan Chaupal in Bihar (2021-22 to 2023-24)	120
3.56	Status of Warehouse in Bihar (2019-20 to 2023-24)	121
3.57	Depositor-wise Utilization of Storage Capacity in Bihar (2019-20 to 2023-24)	121
3.58	Details on Procurement of Rice and Wheat in Bihar (2019-20 to 2023-24)	121

Chapter - IV : Enterprises Sector		
4.1	Annual Growth Rate of Secondary Sector in Bihar at Constant (2011-12) Prices (2018-19 to 2023-24)	141
4.2	Contribution of Secondary Sector in GSVA in Selected States (2019-20 to 2023-24)	142
4.3	Number of Factories and Operational Factories in Bihar and India (2013-14 to 2022-23)	143
4.4	Different Aspects of Industries in India and Bihar (2013-14 to 2022-23)	144
4.5	Structural Ratios of Industries in India and Bihar (2018-19 to 2022-23)	145
4.6	Comparison of Various Aspects of Industries in Selected States (2022-23)	146
4.7	Share of Estimated Number of Establishments by Sector and Establishment Type in Selected States/UTs (2022-23)	148
4.8	Distribution of Number of Establishments by Ownership Type in Selected States/UTs (2022-23)	149
4.9	Share of Estimated Number of Workers by Sector and Establishment Type in Selected States/UTs (2022-23)	150
4.10	Share of Estimated Number of Female Workers by Sector and Establishment Type in Selected States/UTs (2022-23)	151
4.11	Share of Estimated GVA for Market Establishments by Sector and Establishment Type in Selected States/UTs (2022-23)	152
4.12	Estimated Annual GVA per Establishment (Rs. '000) for Market Establishments by Establishment Type in Selected States/UTs (2022-23)	154
4.13	Estimated Annual GVA per Worker (Rs.'000) for Market Establishments by Establishment Type in Selected States/UTs (2022-23)	155
4.14	Estimated Annual Emoluments (Rs. '000) per hired worker in Selected States/UTs (2022-23)	156
4.15	Performance of Sugar Mills in terms of Sugar Production and Recovery Rate (2021-22 to 2023-24)	157
4.16	Performance of Sugar Mills in terms of Distillery Capacity and Power Generation (2021-22 to 2023-24)	158
4.17	Duration of Operation of Sugar Mills (2021-22 to 2023-24)	158
4.18	Performance of Chief Minister Sugarcane Development Programme (Seed Development) (2023-24)	159
4.19	Performance of Chief Minister Sugarcane Development Programme (Training) (2023-24)	160
4.20	Number of Dairy Cooperative Societies under Different Milk Unions/Projects (2022-23 and 2023-24)	161
4.21	Daily Milk Collection by Different Unions/Projects (2019-20 to 2023-24)	162
4.22	Expansion of COMFED, Marketing of Products, and Other Services Provided by COMFED (2019-20 to 2023-24)	162
4.23	Concentration of Handloom Products in Different Districts in Bihar	163
4.24	Details of Silk Production in Bihar (2019-20 to 2023-24)	164

4.25	Ongoing Schemes for Handloom and Powerloom (2023-24)	164
4.26	Details of Distribution of Charkha, Loom and Working Capital by KVIB (2022-23 to 2024-25, up to September, 2024)	165
4.27	Details of Investment under the Bihar Industrial Investment Promotion Policy 2016(2016-17 to 2024-25, up to September 2024)	166
4.28	Status of Industrial Units in Bihar as of September, 2024	167
4.29	Details of Acquisition and Allotment of Land and Sheds for Industrialisation in Different Clusters by BIADA (September 30, 2024)	168
4.30	Details of the Number of Units, Investment and Employment by Type of Enterprises (2022-23 and 2023-24)	169
4.31	Details of Number of Units of Investment and Employment in Different Sectors (2022-23 and 2023-24)	169
4.32	Physical and Financial Achievements of Udyog Mitra (2019-20 to 2023-24)	170
4.33	Number of Applications Received and Entrepreneurs Selected for Different Entrepreneurship Schemes (2022-23 and 2023-24)	171
4.34	Information of Implementation of Different Entrepreneurship Schemes (2022-23 and 2023-24)	171
4.35	Current Status of Start-ups under the Bihar Start-up Policy 2022 (2022-23 and 2023-24)	172
4.36	Revenue Collection from Minerals in Bihar (2019-20 to 2023-24)	173
4.37	Number of Domestic and Foreign Tourist Arrivals (2019 to 2023)	174
4.38	Statement of Budget Allocation and Expenditure of Department of Tourism (2019-20 to 2023-24)	175
4.39	Number of Visitors at Different Ecotourism Sites (2021-22 to 2023-24)	176
Chapter - V : Labour, Employment and Skill		
5.1	Labour Force Participation Rates (LFPRs) of Selected States (2023-24)	179
5.2	Worker Population Ratios (WPRs) of Selected States (2023-24)	180
5.3	Unemployment Rates of Selected States (2023-24)	181
5.4	Percentage Distribution of Male Workers by Employment Status in Selected States (2023-24)	182
5.5	Percentage Distribution of Female Workers by Employment Status in Selected States (2023-24)	183
5.6	Percentage Distribution of Workers by Broad Sectors in Selected States (2023-24)	184
5.7	Percentage distribution of usually working persons (ps+ss) by industry of work (industry sections of NIC-2008) for Bihar and India (2023-24)	185
5.8	Percentage of persons engaged in non-agriculture by enterprise in Bihar and India (2023-24)	186
5.9	Employment Conditions of Regular Wage/Salaried employees in usual status (ps+ss) in non-agriculture sector for Bihar and India (2023-24)	187

5.10	Average Gross Monthly Earnings from Self-employment and Regular wage/salaried Employment in Rural Areas in Selected States (2023-24)	188
5.11	Average Gross Monthly Earnings from Self-employment and Regular wage/salaried Employment in Urban Areas in Selected States (2023-24)	189
5.12	Average per day Earnings of Casual Labour in Selected States (2023-24)	189
5.13	Grants Provided under Bihar Shatabdi Asangathit Karyakshetra Kamgar Evam Shilpkar Samajik Surakhsha Yojana (2019-20 to 2023-24)	190
5.14	Amount Spent for Dependents of Deceased Migrant Workers (2019-20 to 2023-24)	191
5.15	Numbers of Registered Construction Workers, Beneficiaries, and Fund Utilization (2019-20 to 2023-24)	192
5.16	Number of Insured and Treated People under Employees' State Insurance (2019-20 to 2023-24)	193
5.17	Sector-wise Minimum Wage in Bihar (2020 to 2024)	194
5.18	Social Category-wise Number of Vacancies Advertised by the Bihar Public Service Commission (BPSC) (2020-21 to 2024-25, up to September 30, 2024)	195
5.19	Social Category-wise Number of Selected Candidates by the Bihar Public Service Commission (BPSC) (2023-24 to 2024-25, up to September 30, 2024)	196
5.20	Social Category-wise Vacancies Advertised by the Bihar Technical Service Commission (BTSC) (2019-20 to 2023-24)	196
5.21	Social Category-wise Number of Selected Candidates by the Bihar Technical Service Commission (BTSC) (2019-20 to 2024-25, up to September 30, 2024)	197
5.22	Budget Allocation and Expenditure of Bihar Technical Service Commission (2019-20 to 2024-25, up to September 30, 2024)	197
5.23	Gender-wise Recruitment of Police personnel through the Bihar Police Sub-Ordinate Services Commission (2021-22 to 2024-25, up to September, 2024)	198
5.24	Social category-wise Distribution of Police Personnel Appointed through the Bihar Police Sub-Ordinate Services Commission (2021-22 to 2024-25, up to September, 2024)	198
5.25	Gender-wise Recruitment of Police and Equivalent Personnel in Different Posts (2021-22 to 2023-24)	199
5.26	Social category-wise Distribution of Police and Equivalent Personnel Appointed (2021-22 to 2023-24)	199
5.27	Details of Manpower Deployed to Different Departments by BSEDC (2021-22 and 2023-24)	199
5.28	Achievement of Employment Exchanges, 2023-24	200
5.29	Physical Progress under Bihar Skill Development Mission till date (BSDM) (2023-24)	202
5.30	Department-wise Budget for Skilling Programmes (2019-20 to 2023-24)	204

5.31	Financial Allocation and Expenditure under Different schemes for Training (2023-24)	205
5.32	Number of Training Programmes, Candidates Trained by RSETIs and Trainees who Received Employment (2019-20 to 2024-25, up to Sep. 30, 2024)	206
5.33	Training and Placement Status under DDU-GKY (Up to September, 2024)	207
5.34	Financial Status of RSETI and DDU-GKY (2023-24)	207
5.35	Application Received and Passport Issued (2019-20 to 2023-24)	208
5.36	Year-wise Percentage of Police Verification Completed within 21 Days and Average Number of Days Taken for Police Verification (2019 to 2023)	209
Chapter - VI : Physical Infrastructure		
6.1	Summary of Public Investment on Roads and Bridges in Bihar	217
6.2	Expressways in Bihar	219
6.3	Major New National Highways in Bihar	220
6.4	Overview of Widening of State Highways (as of September, 2024)	221
6.5	Status of Financial Management of BSRDCL	222
6.6	Summary of workings of Bihar Rajya Pul Nirman Nigam Limited (Rs. in crore)	224
6.7	Status of Rural Road Network by Scheme (as of September, 2024)	227
6.8	State-wise Motor Vehicle Registration in India (Jan. to Dec. 2023)	229
6.9	Number of Registered Vehicles and Revenue Collection (in '000)	229
6.10	Revenue Collection and Number of Passengers Carried by BSRTC	234
6.11	Progress of Business at Patna Airport	239
6.12	Overview of Physical and Financial Progress of BSBCCL	242
6.13	Overview of Working Conditions of BPBCCL	243
6.14	Summary of financial services of the Department of Posts in Bihar (at the end of March 2023)	244
Chapter - VII : E-Governance		
7.1	Coverage of Basic ICT Infrastructure in Bihar and India (as of March, 2024)	254
7.2	Challan Payment Collection Summary through e-Detection as of September, 2024	263
7.3	Achievement of Transport Sector in Bihar through E-Governance	278
Chapter - VIII : Power Sector		
8.1	Allocation of Funds under BSPHCL (2016-17 to 2023-24)	288
8.2	Annual Energy and Peak Demand Requirement at State Periphery	291
8.3	Source-wise Proposed Capacity Expansion (Figures in MW)	291
8.4	Projected Surplus/ Deficit in Power	292
8.5	Existing Tied-up Capacity (2023 and 2024)	294

8.6	Total Installed Capacity of Mini and Small Hydel Projects	300
8.7	Mini Hydel Projects Under Construction (September 2023)	300
8.8	Site and Capacity of Gandak, Burhi Gandak and Mahananda River Basin Projects	301
8.9	Category-wise Number of Effective Consumers	302
8.10	Financial Status of Distribution Companies (2020-21 to 2023-24)	303
8.11	Projected Required Capacity for Power	304
8.12	Details of Work under Mukhyamantri Krishi Vidyut Sambandh Yojana (MKVSY) as on December 2024	310
Chapter - IX : Rural Development		
9.1	Trends of Rural Development Expenditure in Bihar and India (2019-20 to 2024-25, BE)	317
9.2	Progress under JEEVIKA (2020-21 to 2024-25)	318
9.3	Details of Off-farm Livelihood-related Activities by SHGs under JEEVIKA	318
9.4	Livelihood-related Activities, including skilling and vulnerability reduction by SHGs Under JEEVIKA	320
9.5	Progress on Agri-Entrepreneurs intervention	322
9.6	Linkages and compliances under Incubation	323
9.7	Performance of MGNREGS (2019-20 to 2023-24)	327
9.8	Category-wise Completed Work under MGNREGS (2019-20 to 2023-24)	330
9.9	Budget Allocation and Expenditure for Distribution of Homestead Land (2021-22 to 2023-24)	331
9.10	Category–wise Eligible Households and Beneficiaries of Abhiyan Basera (2019-20 to 2023-24)	332
9.11	Land Revenue and Area distributed to the beneficiaries by the State Government for Homestead Land (2019-20 to 2023-24)	333
9.12	Social Background of PDS Dealers (2022 to 2024)	335
9.13	Allotment and Lifting of Wheat and Rice under PHH+AAY (2019-20 to 2023-24)	335
9.14	Overview of Panchayati Raj Institutions in Bihar (2024-25, up to Sept. 2024)	337
9.15	Level of Expenditure in PRIs at Different Levels (2019-20 to 2023-24)	338
9.16	Details of Expenditure in PRIs at Gram Panchayat Level (2019-20 to 2023-24)	339
9.17	Details of Expenditure in PRIs at Panchayat Samiti Level (2019-20 to 2023-24)	339
9.18	Details of Expenditure in PRIs at Zila Parishad Level (2019-20 to 2023-24)	340
9.19	Physical and Financial Progress of Rurban Mission in Bihar (2020-21 to 2024-25, up to September 2024)	343

Chapter - X : Urban Development		
10.1	Number and Population of Gram Panchayats Upgraded to New Area Council or Included in Existing Notified Area Councils (2023-24)	353
10.2	Number and Population of Nagar Panchayat, Nagar Parishad Upgraded to New Area Council or Included in Existing Notified Area Councils (2023-24)	353
10.3	Details of the Stormwater Drainage Scheme for Water Drainage from Patna and nearby areas under the Atmanirbhar Bihar Saat Nishchay-2 (2023-24)	355
10.4	Some Features of Mukhyamantri Shahri Peyajal Nishchay Yojana (2020-21 to 2024-25, up to September 30, 2024)	357

10.17	Municipal Finances for 35 Towns in Bihar (2019-20 to 2023-24)	372
Chapter - XI : Financial Institutions		
11.1	Banking Infrastructure in Bihar (2020 to 2024)	380
11.2	Bank category-wise distribution of bank branches and fixed CSPs engaged in Bihar	381
11.3	Distribution of Branches of Commercial Banks by States (2020 to 2024)	385
11.4	ATMs per Bank Branch in Bihar (September 2020 to September 2024)	386
11.5	Summary of the Loans by MFI Lenders in Bihar and India (March 31, 2022 to March 31, 2024)	387
11.6	State-wise Deposits and Credit of Scheduled Commercial Banks (March 31, 2024)	389

11.7	Deposit, Advance and CD Ratio of Bank-groups in Bihar (as on September 2024)	389
11.8	Deposit, Advance and CD Ratio of Public Sector Banks in Bihar (September 2023 and September 2024)	391
11.9	Credit-Deposit (CD) Ratio of Public Sector Banks in Bihar (2019-20 to 2024-25, up to September 2024)	392
11.10	Deposits, Advances and CD Ratio of Private Banks in Bihar (September 2023 and September 2024)	394
11.11	Deposit, Advance and CD Ratio of the Regional Rural Banks in Bihar (September 2023 and September 2024)	394
11.12	Deposit, Advance and CD Ratio of the Small Finance Banks in Bihar (September 2023 to September 2024)	395
11.13	Credit-Deposit (CD) Ratio of Banks in Bihar by Areas (September 2023 and September 2024)	395
11.14	Credit-Deposit Ratio in Bihar by Bank-Group and Area (2023-24)	396
11.15	District-wise Credit-Deposit (CD) Ratio (2022-23 to 2024-25, up to September 2024)	397
11.16	Sectoral Share of Advances under Annual Credit Plans (2022-23 to 2023-24)	399
11.17	Bank Group-wise ACP Target and Achievement in Bihar (2022-23 to 2023-24)	399
11.18	Number of New Kisan Credit Cards Issued by Banks (2019-20 to 2023-24)	401
11.19	Sector-wise Refinancing by NABARD (2019-20 to 2023-24)	403
11.20	Sanctions and Disbursement in Bihar under RIDF till March 2024 – NABARD	404
Chapter - XII : Human Development		
12.1	Trend of Expenditure on Social Services	409
12.2	Life Expectancy at Birth (2006-10 and 2016-20)	414
12.3	Selected Health Indicators for Bihar and India (Percentage)	415
12.4	Overall Status of Health Infrastructure	417
12.5	Number of Health Personnel in Bihar	419
12.6	Financial Assistance under JSY (Rs.)	420
12.7	Antigen-wise Immunisation Coverage in Bihar	421
12.8	Prevalence of Main Diseases in Bihar	422
12.9	Funds Disbursed to Health Societies	423
12.10	Physical and Financial Achievement	425
12.11	Progress of Sanitation	427
12.12	Physical Achievement of State Plan Schemes for Water Supply	428
12.13	Total Enrolment in Primary and Upper Primary Levels	430
12.14	Drop-out Rates for Primary, Upper Primary and Secondary Levels	431

12.15	Drop-out Rates (SC&ST) in Primary, Upper Primary and Secondary Levels	431
12.16	Status of Fund Received and Expenditure under PM Poshan Scheme	433
12.17	Coverage of PM-POSHAN	433
12.18	Types of KGBV with Enrolment	434
12.19	Status of Funds Received under Samagra Shiksha	435
12.20	Institutions of Higher Education	438
12.21	Grade-wise Distribution of Accredited Institutions of Bihar	438
12.22	New Courses in Government Engineering Colleges	440
12.23	New Courses in Government Polytechnic Institutes	441
12.24	Progress of Student Credit Card Yojana	446
12.25	Beneficiaries of Khel Samman Yojana	448
12.26	Status of Player Welfare Fund	449
12.27	Overview of Annual Scheme Expenditure for SC and ST	455

14.26	Funds allotted for Floods and Cyclones in Bihar	570
14.27	Progress of different activities under Disaster Management	571

INDEX OF APPENDICES

Appendix	Title	Page No.
Chapter - I : Bihar Economy : An Overview		
Table A 1.1	Gross State Domestic Product (GSDP) and Net State Domestic Product (NSDP) of Bihar at Constant (2011-12) Prices (2011-12 to 2023-24)	20
Table A 1.2	Gross State Domestic Product (GSDP) of Bihar at Current Prices (2018-19 to 2023-24)	21
Table A 1.3	Gross State Domestic Product (GSDP) of Bihar at Constant (2011-12) Prices (2018-19 to 2023-24)	22
Table A 1.4	Net State Domestic Product (NSDP) of Bihar at Current Prices (2018-19 to 2023-24)	23
Table A 1.5	Net State Domestic Product (NSDP) of Bihar at Constant (2011-12) Prices (2018-19 to 2023-24)	24
Table A 1.6	District-wise GDDP/NDDP/Per Capita at Constant (2011-12) Prices (2022-23)	25
Table A 1.7	District-wise Per Capita Gross District Domestic Product at Constant (2011-12) Prices (2018-19 to 2022-23)	26
Table A 1.8	District-wise Consumption of Petroleum Products (2014-15 to 2023-24)	27
Chapter - III : Agriculture and Allied Sectors		
Table A 3.1	District-wise Land Use Pattern in Bihar (2022-23)	123-124
Table A 3.2	District-wise Area, Production and Yield of Rice (2022-23 and 2023-24)	125
Table A 3.3	District-wise Area, Production and Yield of Wheat (2022-23 and 2023-24)	126
Table A 3.4	District-wise Area, Production and Yield of Maize (2022-23 and 2023-24)	127
Table A 3.5	District-wise Area, Production and Yield of Pulses in Bihar (2022-23 and 2023-24)	128
Table A 3.6	District-wise Area, Production and Yield of Sugarcane in Bihar (2022-23 and 2023-24)	129
Table A 3.7	District-wise Area and Production of Selected Fruits in Bihar (2023-24)	130
Table A 3.8	District-wise Area and Production of Selected Vegetables in Bihar (2023-24)	131
Table A 3.9	District-wise Achievement for Livestock-related Services in Bihar (2022-23 and 2023-24)	132
Table A 3.10	District-wise Production of Fish and Fish Seeds in Bihar (2021-22 to 2023-24)	133
Table A 3.11	District-wise Consumption of Fertilizers in Bihar (2023-24)	134

Table A 3.12	District-wise Number of Farm Implements in Bihar (2023-24)	135
Table A 3.13	District-wise Gross Irrigated Area in Bihar (2022-23)	136
Table A 3.14	District-wise Net Irrigated Area in Bihar (2023-24)	137
Table A 3.15	Programme-wise Physical and Financial Progress of Rashtriya Krishi Vikash Yojana (DPR-based Scheme) (Rice) (2023-24)	138
Table A 3.16	Programme-wise Physical and Financial Progress of Rashtriya Krishi Vikash Yojana (DPR-based Scheme) (Wheat) (2023-24)	139
Table A 3.17	Physical and Financial Progress of Composite/Hybrid Maize Production Programme in Non-traditional Region under Rashtriya Krishi Vikash Yojana (DPR-based Scheme) (2023-24)	139
Chapter - V : Labour, Employment and Skill		
Table A 5.1	District-wise Death of Migrant Worker and Fund Allotment to the Family of the Deceased (2021-22 to 2023-24)	210
Table A 5.2	Rescued and Rehabilitated Child Labour under Chief Minister's Relief Fund (2021-22 to 2023-24)	211
Table A 5.3	Financial Allocation under Different Schemes for Training (2019-20 to 2023-24)	212
Table A 5.4	Bank-wise RSETI in Districts of Bihar	213
Table A 5.5	District-wise Applications for Passport Received and Issued in Bihar (2021-22 to 2023-24)	214
Chapter - VI : Physical Infrastructure		
Table A 6.1	District-wise NH Network in Bihar (in km) as end of March	245
Table A 6.2	District-wise State Highway Network in Bihar (in km) as end of March	246
Table A 6.3	District-wise Major District Road Network in Bihar (in km) as end of March	247
Table A 6.4	Overview of Bharatmala Project in Bihar as end of September, 2024	248
Table A 6.5	Summary of Project under Sulabh Samparkata (Saat Nishchay) as end of September, 2024	249
Table A 6.6	District-wise Rural Road Network in Bihar (in km) as end of March	250
Table A 6.7	District-wise Registered Vehicles in Bihar During 2023-24 (in No.)	251
Table A 6.8	Details of Projects Undertaken by Building Construction Department	252
Chapter - VIII : Power Sector		
Table A 8.1	District-wise Energy Consumption (in MU)	313
Table A 8.2	Details of Existing and Planned Generation Units	314
Table A 8.3	District-wise installation of Grid-Connected Rooftop Solar Plants	315

Chapter - IX : Rural Development		
Table A 9.1	District-wise Progress of MGNREGS (2021-22 to 2023-24)	344
Table A 9.2	District-wise Progress of MGNREGS (2021-22 to 2023-24)	345
Table A 9.3	District-wise Financial Progress under MGNREGS (2021-22 to 2023-24)	346
Table A 9.4	District-wise Distribution of PDS Dealers by Social Background in Bihar (2023-24)	347
Table A 9.5	District-Wise Allotment and Lifting of Wheat and Rice under NFSA (2023-24)	348
Table A 9.6	Progress of Ghar Tak Pakki Gali Naliyan (Gramin) 2024-25 (till Sept., 2024)	349
Table A 9.7	Status of Panchayat Sarkar Bhawan (till Sept., 2024)	350
Chapter - X : Urban Development		
Table A 10.1	City-wise Urban Population in 2024 Projected from Census 2011	374
Table A 10.2	Establishment of New 120 Nagar Panchayats and Parishads (2024)	375
Table A 10.3	Details of the Scheme under State Plan for Implementation of Mokshdham under Atmanirbhar Bihar Saat Nishchay 2	376
Table A 10.4	Details of Water Supply Schemes, Parks Development and Storm Water Drainage Scheme (Up to September, 2024)	377
Chapter - XI : Financial Institutions		
Table A 11.1	District-wise Annual Credit Plan for the Priority Sectors (March, 2024)	406
Table A 11.2	District-wise ACP for the Non-Priority Sectors and All Sectors Combined (March, 2024)	407
Chapter - XII : Human Development		
Table A 12.1	Decadal Variation in the Population of Bihar	475
Table A 12.2	District-wise Demographic Profile of Bihar (2001 and 2011)	476
Table A 12.3	District-wise Projected Population of Bihar	477
Table A 12.4	District-wise Projected Population of Bihar by Age Structure (in percent)	478
Table A 12.5	Number of Health Institutions in Bihar (As on September, 2024)	479
Table A 12.6	Outpatients Visiting per Day and In-patient Bed Occupancy Rate	480
Table A 12.7	District-wise Employment of Regular and Contractual Doctors	481
Table A 12.8	District-wise Employment of Grade A Nurses	482
Table A 12.9	District-wise Employment of ANM	483
Table A 12.10	District-wise Employment of ASHA Worker	484
Table A 12.11	District-wise Coverage of Institutional Deliveries under Janani Suraksha Yojana (JSY)	485
Table A 12.12	Prevalence of Diseases (2023-24)	486
Table A 12.13	District-wise Fund Disbursed to Health Societies	487

Table A 12.14	Details of Left out Tolas under Har Ghar Nal Ka Jal	488-489
Table A 12.15	District-wise Coverage of Har Ghar Nal Ka Jal	490
Table A 12.16	District-wise Achievement in Individual Household Latrine under SBM-G/ LSBA Sanitation Programme	491
Table A 12.17	Total Enrolment in Primary and Upper Primary Levels (All)	492
Table A 12.18	Total Enrolment in Primary and Upper Primary Levels (SC)	493
Table A 12.19	Total Enrolment in Primary and Upper Primary Levels (ST)	494
Table A 12.20	District-wise Number of Primary and Upper Primary Teachers in Bihar	495
Table A 12.21	District-wise Number of Primary and Upper Primary Schools in Bihar	496
Table A 12.22	District-wise Coverage of PM-POSHAN (Class I-V)	497
Table A 12.23	District-wise Coverage of PM-POSHAN (Class VI-VIII)	498
Table A 12.24	District-wise Number of Colleges in Bihar	499
Table A 12.25	List of Government Engineering College (2024-25)	500
Table A 12.26	List of Government Polytechnics (2024-25)	501
Table A 12.27	District Wise Overview of SC/ST Welfare	502
Chapter - XIII : Child Development		
Table A 13.1	District-wise Child Population in Bihar (2011)	532
Table A 13.2	District-wise and age-wise Sex Ratios of Population in Bihar (2011)	533
Table A 13.3	District-wise Adolescent Population in Bihar (2011)	534
Table A 13.4	District-wise Percentage of Children under Five Years of Age Suffering from Malnutrition and Anaemia in Bihar	535
Chapter - XIV : Environment, Climate Change and Disaster Management		
Table A 14.1	Season-wise Annual Rainfall across the Districts (2023-24 & 2024-25 (Sept))	573
Table A 14.2	District-wise Forest Area in Bihar (Area in sq. km)	574
Table A 14.3	Details of Financial and Physical Targets and Achievement (2022-23 & 2023-24)	575
Table A 14.4	Wildlife Sanctuaries in Bihar (2022-23)	576
Table A 14.5	City-wise Annual Average of Main Pollutants & BTX Parameters (2023-24)	577
Table A 14.6	District-wise Status of Groundwater Resource in Bihar (2021 and 2022)	578
Table A 14.7	District-wise Incidence of Deaths due to Thunderstorms	579

INDEX OF DEPARTMENTS

Name of the Department	Page No.
Airports Authority	237-239
Animal and Fisheries Resources Department	87-95, 133
Art, Culture and Youth Department	271, 451
BC and EBC Welfare Department	93, 456-459
Bihar Education Project Council (BEPC)	523-527, 529-531
Bihar Industrial Area Development Authority (BIADA)	167-169

EXECUTIVE SUMMARY

CHAPTER-I : BIHAR ECONOMY : AN OVERVIEW

1. Bihar has witnessed significant economic growth over the last two decades, resulting in notable improvements in several socio-economic indicators. The State government's initiatives during this period have contributed to advancements in education, health, and other social indicators, along with a general increase in the per capita income. As per the latest available Gross State Domestic Product (GSDP) figures, calculated from the base year of 2011-12, the size of Bihar's economy at current prices has increased 3.5 times, rising from Rs. 2.47 lakh crore in 2011-12 to Rs. 8.54 lakh crore in 2023-24.

2. According to the latest available estimates, the Gross State Domestic Product (GSDP) of Bihar for the year 2023-24 is estimated to be Rs. 8,54,429 crore at current prices and Rs. 4,64,540 crore at constant (2011-12) prices. The contribution of the tertiary sector to the Gross State Value Added (GSVA) in Bihar at constant (2011-12) prices is estimated to be 58.6 percent, followed by 21.5 percent from the secondary sector and 19.9 percent from the primary sector.

3. In the tertiary sector, Trade and Repair Services are estimated to be the most significant contributor to the state's Gross State Value Added (GSVA) at constant (2011-12) prices in 2023-24, making up 14.8 percent. This is followed by Transport, Storage, Communication, and Broadcasting Services at 10.2 percent, and Real Estate, Ownership of Dwellings, and Professional Services at 9.5 percent. Road Transport is estimated to contribute 5.4 percent, while Financial Services are projected to contribute 4.6 percent of the state's Gross State Value Added (GSVA) at constant (2011-12) prices in 2023-24.

4. In the secondary sector, manufacturing is estimated to contribute 7.6 percent and construction 11.3 percent to the state's Gross State Value Added (GSVA) at constant (2011-12) prices for 2023-24. Additionally, electricity, gas, water supply, and other utility services are estimated to account for 2.7 percent of the GSVA. In the primary sector, crops and livestock are estimated to have contributed 9.9 percent and 6.3 percent, respectively, to the GSVA for 2023-24.

5. The GSDP in 2023-24 is estimated to have increased by 14.5 percent at current prices and 9.2 percent at constant (2011-12) prices, respectively, compared to the previous year. The per capita GSDP in Bihar at current and constant (2011-12) prices is estimated to have increased by 12.8 percent to Rs. 66,828 and by 7.6 percent to Rs. 36,333, respectively, in 2023-24 over the previous year.

6. The estimated Gross Fixed Capital Formation (GFCF) at current prices in Bihar has grown significantly, increasing from Rs. 9,346 crore in 2019-20 to Rs. 38,986 crore in 2023-24. Furthermore, the GFCF as a percentage of the Gross State Domestic Product (GSDP) at current prices has seen a notable increase, rising from 1.6 percent in 2019-20 to 4.6 percent in 2023-24.

7. The Bihar Economic Survey 2024-25 highlights positive trends in the state's economic activities, showing significant improvements in socio-economic indicators. Ongoing policy initiatives and a focus on optimising fiscal capacity offer hope for further development. A detailed analysis is provided in various chapters of the Economic Survey.

CHAPTER-II : STATE FINANCES

1. The State government's budget has significantly increased over the years, and this increase has been effectively utilised to improve the infrastructure necessary for economic growth in Bihar. Increased government expenditure has led to notable improvements in achieving developmental goals while maintaining fiscal sustainability. The State government's prudent and flexible financial management has also helped mitigate vulnerabilities.
2. In the fiscal year 2023-24, the total expenditure by the State government amounted to Rs. 2,52,082 crore. Within the overall expenditure in 2023-24, scheme expenditure accounted for Rs. 1,01,835 crore, while establishment and committed expenditures totalled Rs. 1,50,247 crore.
3. In 2023-24, the State government's total expenditure comprised revenue expenditure amounting to Rs. 1,90,514 crore and capital expenditure of Rs. 61,568 crore. The receipt in revenue account was Rs. 1,93,347 crore, resulting in a surplus of Rs. 2,833 crore. Additionally, the receipts in the capital account for the State government totalled Rs. 60,313 crore in 2023-24.
4. Both the Revenue and the Capital Accounts of the State government expanded from 2019-20 to 2023-24, with a notably swift increase in capital expenditure. During this period, revenue expenditure grew by 1.5 times, while capital expenditure surged by 3.1 times. As a result, the share of capital expenditure as a percentage of total expenditure by the State government increased from 14 percent in 2019-20 to 24 percent in 2023-24.
5. In the fiscal year 2023-24, tax revenue amounted to Rs. 1,61,965 crore, making it the most significant component of revenue receipts. The share of tax revenue in total receipt increased from 75.3 percent in 2019-20 to 83.8 percent in 2023-24. In 2023-24, grants-in-aid represented 13.5 percent of total receipts, totalling Rs. 26,125 crore, while non-tax sources contributed 2.7 percent, amounting to Rs. 5,257 crore.
6. In 2023-24, the state's total borrowing was Rs. 60,218 crore and the public debt repayment was Rs. 22,979 crore. By the end of the fiscal year 2023-24, the outstanding debt of the State government was Rs. 3,32,741 crore. Additionally, the State government made interest payments of Rs. 17,606 crore during 2023-24.
7. Between 2019-20 and 2023-24, the State government's revenue expenditure on Social services rose from Rs. 57,816 crore to Rs. 83,225 crore. Spending on General services increased from Rs. 41,628 crore to Rs. 59,218 crore, and expenditure on Economic services grew from Rs. 26,571 crore to Rs. 48,071 crore. Additionally, interest payments within General services rose from Rs. 10,991 crore to Rs. 17,606 crore during this period.

8. In the 2023-24 fiscal year, 27.7 percent of the total revenue received by the State government originated from its own tax and non-tax sources. Revenue from the State's own tax sources increased by 9.9 percent, rising from Rs. 44,018 crore in 2022-23 to Rs. 48,361 crore in 2023-24. Additionally, revenue from non-tax sources experienced a significant boost of 27.1 percent, growing from Rs. 4,135 crore in 2022-23 to Rs. 5,257 crore in 2023-24.

9. Fiscal indicators suggest that Bihar's state finances are sustainable, flexible, and not at risk, considering the current level of expenditure. Overall, the allocation of receipts and expenditures by the State government for 2023-24 demonstrates prudent fiscal management, highlighting support for the state's long-term economic growth.

CHAPTER-III : AGRICULTURE AND ALLIED SECTORS

1. The agriculture, forestry, and fishing sector contributes approximately one-fifth of the gross state value added (GSVA) annually.

2. Rice in Kharif and wheat in Rabi constitute the primary crop cycles in Bihar. Between 2022-23 and 2023-24, rice and wheat production have increased by 21.0 percent and 10.7 percent, respectively. Furthermore, between 2020-21 and 2023-24, maize production has increased by 66.6 percent.

3. In horticulture, between 2022-23 and 2023-24, the total mango production has increased by 9.7 percent. The area under litchi has been continuously expanding in Bihar. Between 2022-23 and 2023-24, the area of litchi orchards has increased by 6.0 percent, whereas the total production has increased by 11.7 percent. In 2023-24, 27.8 thousand hectares of land were cultivated with makhana, and the total production was 56.4 thousand tonnes, accounting for 85 percent of the total makhana production of India.

4. The production of milk, eggs, and fish has been rising continuously. Between 2018-19 and 2022-23, milk production has increased by 27.3 percent, egg production has increased by 85.7 percent. Between 2018-19 and 2023-24, fish production has increased by 45.0 percent.

5. Under the Samagra Gavya Vikas Yojana, 5,873 units (2, 4, 15, and 20) of high-breed milk cattle/heifers were set up against the physical target of 7,194 units, and Rs. 102.56 crore was disbursed by the State government out of the target of Rs. 106.98 crore between 2021-22 and 2023-24.

6. The State government has implemented various schemes for fish farming and aquaculture practices, namely, the Mukhyamantri Samekit Chaur Vikas Yojana, the Mukhyamantri Talab Matsyki Vikas Yojana, the Scheme for Pond Construction in Plateau Area for Fish Farming, to name a few.

7. The Bihar Rajya Beej Nigam Ltd. supplies seeds to implement various schemes like the state plan, the National Food Security Mission, and the National Agricultural Development Plan. In 2023, for summer crops, 38,857 quintals of seeds were distributed to 5,48,984 farmers. For kharif 2023, the corporation has distributed 70,605 quintals of seeds to 2,86,055 farmers. Furthermore, for rabi 2023-24, 4,65,594 quintals of seeds were distributed to 11,18,667 farmers.

8. The State government has approved Rs. 11,900.00 lakh for agricultural mechanisation in 2023-24. For the Sub Mission on Agricultural Mechanization, the Government of India allocated Rs. 3866.23 lakh (60 percent) and the State government Rs. 2577.48 lakh (40 percent), aggregating to Rs. 6443.71 lakh in 2023-24.

9. The share of power consumption in agriculture in the total power consumption has increased from 4.3 percent in 2019-20 to 17.6 percent in 2023-24. Due to the increase in electricity connections for agriculture, the amount of subsidies has increased from Rs. 486.93 crore in 2019-20 to Rs. 3856.8 crore in 2023-24, representing eight-fold increase.

10. In Bihar, the access to the KCC scheme has expanded over the years. The total disbursement of KCC loans in 2019-20 was Rs. 3204.51 crore, which has increased to Rs. 7080.07 crore in 2023-24.

11. The State government has invested heavily in creating irrigation infrastructure in Bihar. In 2023-24, the total expenditure on irrigation was Rs. 1674.2 crore, registering an increase of 9.7 percent over 2022-23. Of the total expenditure on irrigation, around 90 percent was capital expenditure.

12. Under the Jal-Jeevan-Hariyali Abhiyan, 2,377 schemes had been approved by 2023-24, of which 2,182 have been completed, restoring 2,22,639 hectares of irrigation capacity and 992 lakh cubic meters of water storage. The State government has spent Rs. 269.66 crore on these schemes in 2023-24.

13. Under the 'Har Khet Tak Sinchai ka Pani' programme of Saat Nishchay-2, 707 schemes have been completed by 2023-24, restoring irrigation facilities in 1,02,957 hectares of land by spending Rs. 308.73 crore. In 2024-25, approval has been granted for 1,528 schemes worth Rs. 2339.10 crore, which is expected to restore irrigation facilities in 1,87,194 hectares of land.

14. In the second phase of the Jaivik Corridor Yojana, 20,000 acres of land were distributed among the interested farmers who were not a part of the first phase of the scheme. This scheme has nearly achieved its physical target in 2023-24. The State government has allocated Rs. 3,192.62 lakh for 2023-24.

15. Under the Diesel Subsidy Scheme, 6.3 lakh farmers benefited from the subsidy, and the total amount of the subsidy was Rs. 102.93 crore in 2023-24. Under the Krishi Input Subsidy Scheme, in 2023-24, 87.12 lakh farmers who were affected due to hailstorms and unseasonal rains were provided financial support of the amount of Rs. 55.05 crore.

16. The Climate-resilient Agriculture Programme, with an allocation of Rs. 238.49 crore, is implemented in 30 districts of Bihar for the period 2020-21 to 2024-25.

CHAPTER-IV : ENTERPRISES SECTOR

1. The secondary sector consists of mining and quarrying; manufacturing; electricity, gas, water supply, and other services; and construction. Over the years, construction has been the most important activity in Bihar. Construction activities grew at the rate of 22 percent between 2021-22 and 2022-23. It contributed 50.2 percent of the GSDP of the secondary sector, followed by manufacturing. In 2022-23, the manufacturing sector contributed 37.0 percent of the GSDP of the secondary sector.

2. Numerically the most important industry in Bihar was that of the manufacturing of other non-metallic mineral products (1234 units), followed by that of food products (905 units).

3. In case of industries in Bihar, the quantum of fixed capital has increased significantly. For instance, in 2022-23, the amount of fixed capital in the factories of Bihar was Rs. 31.95 thousand crore, reflecting an increase of 60 percent in a year. The value of output has grown by 53 percent in Bihar between 2021-22 and 2022-23. All these factors indicate a steady growth of the industrial output in Bihar. The fixed capital per factory has registered a growth rate of 59.1 percent between 2021-22 and 2022-23.

4. In 2023-24, 677.20 lakh quintals of sugarcane was crushed in nine sugar mills of Bihar. The total sugar production was 68.77 lakh quintals. In 2023-24, the distillery capacity and power generation of sugar mills have been 530 Kilo Litre Per Day and 88.5 MW, respectively.

5. Under the Bihar Jaggery Industry Promotion Programme, the State government has allocated a subsidy of Rs. 12.40 crore to 81 jaggery-producing units in 2024-25. The scheme offers a 50 percent capital subsidy for various sizes of jaggery production units.

6. The daily milk collection from the 13 unions or projects has been increasing over the years. The total daily milk collection has increased from 1,662.0 thousand kg in 2022-23 to 2,305.1 thousand kg in 2023-24, representing an increase of 38.7 percent in one year.

7. As of September 2024, the State Investment Promotion Board (SIPB) has received 3,752 investment proposals amounting to Rs. 75,293.76 crore. In 2023-24, the total amount of proposed investments was Rs. 5,642.57 crore from 706 projects. The total investment in 769 functioning units was Rs. 8,464.35 crore, and they generated employment for 31,749 workers.

8. As of September 2024, the food processing sector is the largest, with a total investment of Rs. 3,517.09 crore in 353 operational units in Bihar. The proposed investment for ethanol production was Rs. 30,747.55 crore, representing 41 percent of the total proposed investment. The renewable energy sector has also attracted 75 investment proposals worth Rs. 10,613.20 crore.

9. According to BIADA, the total investment in industries increased by 3.5 times between 2022-23 and 2024-25 (up to September 2024). Micro enterprises have attracted six times more investment in 2023-24 than that in 2022-23. On the employment generation front, micro and small enterprises had created 66.0 percent of the total employment created by enterprises in 2023-24. Between 2022-23 and 2023-24, the total employment generation across enterprises increased by 2.6 times.

10. The Bihar Small Entrepreneurship Yojana was launched to uplift the economic status of a large number of poor families/households. Under the Scheme, 2,02,014 applications were received in 2023-24. Out of this, the Department of Industries has approved 40,102 applications. To provide financial support to 40,099 small entrepreneurs, the State government has spent Rs. 200.47 lakh in 2023-24.

11. In 2023-24, 297 of 1706 applications for Startups have received certification. For this, the State government has spent Rs. 15.08 crore to provide seed funding to the certified Startups.

12. In 2023-24, the State government earned Rs. 3,114.79 crore from all sources of minerals, which was 14 percent more than the revenue collection of the previous year.

13. The tourist footfall has significantly increased in 2023, with 821.33 lakh people visiting Bihar. The number of both domestic and foreign tourists in 2023 returned to its pre-Covid-19 pandemic levels. The budget allocation for the Department of Tourism in 2023-24 was Rs. 339.15 crore. Of the total allocation, Rs. 328.03 crore was spent in 2023-24. Furthermore, in 2023-24, the State government has approved Rs. 494.71 crore to implement various projects across the state.

14. In 2023-24, the total outlay for eco-tourism and park development was Rs. 100.00 crore, constituting 21.6 percent of the total outlay of the Department of Environment, Forest, and Climate Change. In 2023-24, the financial allocation for park development was Rs. 87.2 crore.

CHAPTER-V : LABOUR, EMPLOYMENT AND SKILL

1. The Periodic Labour Force Survey (PLFS) reports that in Bihar, labour force participation rate (LFPR) was 50.9 percent in 2022-23 which increased to 55.0 percent in 2023-24. Similarly, the worker-population ratio (WPR) was 48.7 percent in 2022-23 which reached 53.2 percent in 2023-24.

2. The Bihar Shatabdi Unorganized Sector Workers and Artisans Social Security Scheme provides financial assistance to unorganized sector workers and their dependents. In 2023-24, the number of claims reached 2563, representing a 146 percent increase over the previous year. The total grant amounted to Rs. 14.99 crore, reflecting a 144.1 percent increase from 2022-23 to 2023-24.

3. Under the Bihar Building and Other Construction Workers Welfare Board, over the past five years between 2019-20 and 2023-24, the cumulative number of registered construction workers has reached 1772.01 thousand. In 2023-24, the number of beneficiaries was 109.63 thousand. The total sanctioned amount for that year was Rs. 694.80 crore, reflecting a 50 percent increase over the previous year. The total amount of funds utilised was Rs. 622.70 crore, with a utilisation rate of 90 percent.

4. In 2023-24, 1403 child labours were rescued. An upgraded version of the Child Labour Tracking System (CLTS) software has been introduced to monitor and facilitate the rehabilitation of rescued child labourers. The State government has distributed Rs. 6.64 crore to 2,658 rescued children at the rate of Rs. 25,000 per child.

5. In 2023-24, the Bihar Public Service Commission (BPSC) advertised vacancies for 4,29,015 posts. In 2023-24, after the selection process of multiple stages, recommendations were submitted to the government for appointment of 2,23,153 candidates.

6. The Bihar Technical Service Commission (BTSC) advertised vacancies for 3,913 posts and 2,961 candidates were recommended for appointment in 2023-24.

7. The Rural Self-Employment Training Institutes (RSETI) have organized 973 training programmes and 30,434 candidates were trained in such programmes in 2023-24. The total expenditure to run these programmes was Rs. 10.91 crore in 2023-24.

8. The Deen Dayal Upadhyaya – Grameen Kaushalya Yojana (DDU-GKY) aims to provide livelihood by imparting skills to the rural poor youth. The scheme is implemented through JEEVIKA in Bihar. Till September 2024, 83,806 youths got benefitted from the training programmes conducted under DDU-GKY. Of all the trained candidates, 54 percent obtained employment. In 2023-24, the total expenditure to conduct skill training programmes was Rs. 28.04 crore.

9. Between 2019-20 and 2023-24, 1703.9 thousand people applied for passports, and of them, 1683.1 thousand have received the same. Under the Government of India initiative, 'Passport Aapke Dwar', Bihar has two new passport service centers and 35 post office passport service centers. This project aims to make passport service more accessible to the residents of Bihar.

CHAPTER-VI : PHYSICAL INFRASTRUCTURE

1. Bihar registered the third highest growth (7.6 percent) in the transport and communication sector during 2011-24, after Uttar Pradesh (10.1 percent) and Karnataka (7.7 percent) among the major states of India. As a result of high growth recorded in this sector, the contribution of this sector has gradually increased and reached Rs. 47,313 crore in 2023-24 from Rs. 17,545 crore in 2011-12. The contribution of this sector in the overall GSVA has also gone up by 3.0 percentage points from 7.3 percent to 10.2 percent in the same period.

2. Bihar is the third largest state in terms of population, having 8.6 percent of the country's population in 2011. The state is the 12th largest in the country on account of area holding, which is 2.86 percent of the national area. In terms of road network, Bihar is placed at the 8th position among all Indian states, as of 2019. The expenditure on creation and maintenance of road infrastructure has been steady during the last two decades (2005-25). A significant budget of Rs. 1.13 lakh crore has been spent on roads and bridges during the last two decades to spread their length and breadth across the state.

3. Road network has widened in a substantial manner. Nearly 90 percent of NHs and around 85 percent of SHs are double or more lane; however, 48 percent MDRs are of intermediate type and 32 percent single lane. The state is progressing fast to have four expressways (Varanasi – Ranchi – Kolkata Expressway, Gorakhpur – Siliguri Expressway, Patna – Purnea Expressway, and Raxaul – Haldia Expressway) and some additional NHs in the near future that will change the face of traffic in the state.

4. In order to boost the rural economy and provide hassle-free traffic movement, the State government has strategically invested in creation and maintenance of rural roads. A sum of Rs. 60,000 crore has been spent to achieve the last mile connectivity in rural habitats, and rural paved road increased from 835 kms to 1.17 lakh kms during 2005-25.

5. The road transport sector emerged as one of the growth drivers of Bihar's economy and grew by three times to Rs. 25,100 crore from Rs. 8400 crore during the last two decades. Bihar is placed at the fifth position in transport motor vehicles registration and seventh in non-transport motor vehicles registration among major Indian states. The Transport Department has launched two new schemes - Mukhya Mantri Vahan Chalak Kalyan Yojana, 2024 and Mukhya Mantri Prakhand Parivahan Yojana (MMPPY), 2024.

6. Since 2014, Indian Railways has constructed 624 kms of New Lines, has undertaken 739 kms of multi-tracking, 519 kms of Gauge Conversion, 1927 kms of Electrification, 63 Road Over Bridges and 214 Road Under Bridges in Bihar. During the same period, 115 new trains were introduced for the convenience of passengers. Also, additional stoppages were introduced at many stations for more than 300 pairs of trains. The Patna airport has served nearly 3 crore passengers, carried around 83 thousand tonnes of freight, and registered 24,026 average aircraft movements annually (on an average) during 2014-15 to 2023-24.

7. The scheme expenditure of the Building Construction Department grew by more than 332 times, while the committed and establishment expenditure went up by 4 times only between 2008-09 and 2024-25 (BE). The scheme expenditure surpassed the committed expenditure in 2011-12. A sum of Rs. 4008 crore is to be spent under the scheme expenditure and Rs. 1005 crore under the committed and establishment expenditure during 2024-25 (BE).

CHAPTER-VII : E-GOVERNANCE

1. The State government has been continuously strengthening the ICT infrastructure. On an average, two persons in each family have internet access and almost all panchayats have been onboarded for digital access. The Department of IT has focused on new technologies like Artificial Intelligence Markup Language, Internet of Things, Block Chain, Data Analytics, Cyber Security and Forensics for skilling of youths and for R&D purposes.

2. These technological advancements are being applied for maintenance of law and order in the state. More than 3 crore station diaries have been recorded through Crime and Criminal Tracking Network and System (CCTNS). A criminal database prepared on the basis of face recognition, gang analysis and such advanced features is used for criminal identification, criminal history, speedy arrest, effective crime prevention, detection and control. During the last five years, nearly 10 lakh criminals' data have been uploaded to the system.

3. The Emergency Response Support System (ERSS), through Dial 112, attends 68,000 calls per day and provides prompt response in 15 minutes to the needy person. Surakshit Safar Suvidha application was launched under ERSS 2.0 in September, 2024 for safe journey of women travellers. A total of 70,057 complaints of financial frauds were registered till November 2024. After verifying these frauds, 3668 FIRs were lodged. Cyber cells in different districts and cyber police stations received 15.72 lakh calls regarding cybercrime. A total of 560 cybercriminals have been arrested.

4. To enforce traffic rule, Rs. 120 crore has been collected through e-challans issued to 19 lakh traffic violators till September, 2024. Through the Integrated Mining Management Information System, 43.19 lakh e-Challans have been generated, and 9.13 crore MT sand and 1.08 crore MT stones have been dispatched. 82,112 mineral-carrying vehicles with GPS have been registered, 410 weighbridges integrated and 247 Ghats have been geo-fenced till September, 2024.

5. Under the Land Settlement and Record Modernisation Programme, the Revenue and Land Reforms Department took many ICT initiatives to enhance transparency in automated processes further and to intervene in the untouched sectors in Revenue where IT and ICT penetration can change the game, like Land Acquisition, Consolidation and also in the ongoing Bihar Special Land Survey in 2024.

6. CFMS-2.0, VATMIS, GST Single Sign-on, GAIN Portal, e-stamping, e-registration, e-Property Tax System, etc. have proven to be the game-changer in the area of fiscal governance. The State government proactively implemented technological innovations to improve disaster management and e-green initiatives for sustainable environment.

7. E-Shikshakosh has integrated several independent systems like Shaala Siddhi, BEST, UDISE+, Online Medha Soft, etc. to ensure a robust governance of schools and effective service delivery. It serves as a single centralized dynamic platform for monitoring all key parameters to ensure effective delivery of quality education by the schools in the state.

8. The Bihar Health Application Visionary Yojana for All (BHAVYA) is providing a one-stop digital platform that supports everyday functions at the government health facilities of Bihar and streamlines the OPD and IPD functionalities, right from a patient's registration till discharge. Additionally, the technology under Poshan Tracker is being leveraged for dynamic identification of stunting, wasting, under-weight prevalence among children and last-mile tracking of nutrition service delivery.

CHAPTER-VIII : POWER SECTOR

1. Demand for power in Bihar has increased substantially in the last decade. In order to meet the power demand, the State government has ensured almost cent-percent power supply and thus the energy deficit has been continuously declining. In fact, the state recorded an energy surplus of 4034 MU in 2022-23. The peak demand increased by almost 1.4 times during 2017-18 to 2023-24, while power supply also increased by 1.5 times during the same period.

2. The estimated demand for power for the domestic consumers is substantial and it is projected to constitute 41 percent of the total power consumption. In addition, agriculture connections are estimated to account for 13 percent of energy consumption, while the rest 46 percent is provided to the non-domestic consumers (such as industrial, commercial, etc).

3. The Per Capita Consumption of energy in the state has almost tripled from 134 kwh in 2012 to 363 kwh in 2024. It has registered an increase of 229 kwh in the last 12 years. Financially, Bihar has made substantial progress, with the aggregate technical and commercial (AT & C) losses declining from 45.0 percent in 2012-13 to 21.7 percent in 2023-24.

4. The state's commitment to providing sustainable power is evident from continuous infrastructural development in the power transmission network. The number of grid substations increased from 45 in 2005 to 179 in October 2024, while the length of transmission lines expanded from 5000 circuit kilometres (ckm) in 2005 to 20393 ckm in 2024. These developments have laid a strong foundation for providing reliable, quality and sustainable power to meet the growing demands of the population and industries.

5. The generation and purchase of power (net of central transmission loss) in Bihar increased from 32,071 MU in 2020-21 to 47,295 MU in 2023-24, implying an increase of 15,224 MU in three years. With the increase in power consumption, the revenue realization has also increased. The cost coverage was 88.1 percent in 2020-21, which increased to 95.1 percent in 2023-24.

6. In the power generation segment, in line with the Central government's targets, the state is focusing on increasing the share of renewable energy. Meanwhile, the transmission infrastructure is being developed to cater to the additional generation capacity, especially in renewable energy. It is planned to produce around 1 Gigawatt (GW) of renewable power in the coming years.

CHAPTER-IX : RURAL DEVELOPMENT

1. JEEVIKA is instrumental in enhancing the socio-economic status of the marginalised communities in Bihar. As of September 2024, 1,063.5 thousand Self-Help Groups (SHGs) and 71.1 thousand Village Organizations (VOs) have been formed. Additionally, through 2,198.4 thousand SHGs' credit linkages (inclusive of 1st, 2nd, 3rd and 4th credit linkage), a cumulative amount of Rs. 46.9 thousand crore has been extended as bank credit to SHGs.

2. To encourage women's entrepreneurship, JEEVIKA initiated a pilot project in 2023-24 to promote individual financing for women-led enterprises. This intervention is critical for enabling SHG members to access the funds needed to expand their businesses. The pilot project was initiated in Patna, Vaishali, and Nalanda and extended to 70 blocks across 14 districts. By September 2024, the banks have sanctioned loans to 4,846 enterprises.

3. Under the Satat Jeevikoparjan Yojana, 2,01,218 households have been identified and trained to undertake income-generating activities. The initiative aims to build confidence and develop enterprise skills among the identified households. Upon completion of training, a Livelihood Investment Fund of Rs. 2 lakh (maximum) is allocated to each targeted household for asset creation.

4. Even though the number of job cards under MGNREGS issued to households has decreased from 171.6 lakh in 2019-20 to 136.0 lakh in 2023-24, the number of households provided with employment has increased from 33.7 lakh in 2019-20 to 48.2 lakh in 2023-24. Moreover, the number of days of employment generated has also increased from 1416.2 lakh person-days in 2019-20 to 2205.3 lakh person-days in 2023-24, an increase of 55.7 percent.

5. Under the Pradhan Mantri Awas Yojana-Gramin (PMAY-G) and Homestead Land Distribution Scheme, 18,297 homeless families from the EBC and 10,058 from the BC categories were surveyed. Among them, 14,617 EBC and 7,789 BC families have been provided with land. In 2023-24, Rs. 204.56 lakh was allocated for the Scheduled Caste Sub Plan (SCSP). Moreover, 15,075 SC and 69,658 Mahadalit homeless families were surveyed. Of these, 11,436 and 59,003 families, respectively, were provided with land.

6. The number of PDS outlets increased from 48,512 in 2021 to 49,400 in 2024. The share of SC and BC-owned PDS outlets has risen between 2022 and 2024. In 2023-24, 1086.7 thousand tonnes of wheat and 3924.9 thousand tonnes of rice have been allotted, out of which, 1079.9 thousand tonnes of wheat and 3911.5 thousand tonnes of rice have been lifted.

7. For construction of Panchayat Sarkar Bhawans (PSBs), Rs. 1000.00 crore was provided to the Local Area Engineering Organization (LAEO) from the state plan head in 2023-24. Additionally, Rs. 636.00 crore has been made available from the state plan head in 2024-25. As of September 2024, 1,474 PSBs have been completed, and 1,463 have been handed over to the respective Panchayats.

8. Under the Shyama Prasad Mukherji Rurban Mission (SPMRM), the number of proposed works surged from 579 to 2,623, between 2020-21 and 2024-25 (up to September 2024). A complementary funding of Rs. 52.3 crore has been provided through the Critical Gap Fund (CGF) in 2024-25. Till September 2024, 827 projects were completed, reflecting significant progress in the mission.

CHAPTER-X : URBAN DEVELOPMENT

1. The budget of the Department of Urban Development and Housing has substantially increased by 227 percent, rising from Rs. 3587.6 crore in 2019-20 to Rs. 11742.6 crore in 2023-24. Over the last five years, the percentage of expenditure has also shown significant improvement, increasing from 34.3 percent in 2019-20 to 77.4 percent in 2023-24.

2. As of September 2024, 18.47 lakh households have received water connections within their premises under the Mukhyamantri Shahri Peyajal Nishchay Yojana. Moreover, ULBs and BUIDCO have executed the scheme in 3158 wards out of 3398, providing piped water connections to 14.58 lakh households.

3. Under the National Mission for Clean Ganga, the total expenditure for 2023-24 amounted to Rs. 473.77 crore. Specifically, the expenditures for the sewerage network and the interception and diversion drainage (including STP) work were Rs. 279.95 crore and Rs. 190.74 crore, respectively.

4. The State government has implemented the Storm Water Drainage Scheme for 25 projects, with the total cost of Rs. 2646.37 crore in 2023-24, of which Rs. 1218.11 crore has been disbursed.

5. The number of SHGs formed under the Deendayal Antyodaya Yojana – National Urban Livelihoods Mission (DAY-NULM) was 5,154, with 48,296 new members added in 2023-24. Furthermore, during the same period, 181 Area-Level Federations (ALFs) and four City-Level Federations were established. Moreover, 3,653 SHGs have received a Revolving Fund (RF).

6. For the Patna Metro Rail Project, Rs. 3402.09 crore has been allocated, comprising Rs. 872.50 crore from the Central government and Rs. 2529.59 crore from the State government. For 2024-25, a provision of Rs. 380.00 crore has been made for the project.

7. For municipal bodies, self-generated income and income from external sources are two major sources of revenue. In 2023-24, holding taxes accounted for 70.9 percent of the total self-generated income of Rs. 14031.7 lakh. The most significant external source of revenue was revenue grants, which contributed 76.8 percent to the total income from external sources in 2023-24.

CHAPTER - XI : FINANCIAL INSTITUTIONS

1. Financial institutions play a crucial role in the economy, acting as the backbone that supports various financial activities. They provide essential capital at lower costs, promote investment across various sectors, and stimulate economic growth. Besides lending money, these institutions offer services that ensure safe and regulated financial transactions.

2. Financial institutions are shifting from traditional brick-and-mortar locations to digital infrastructure, allowing them to reach more consumers, including those in remote areas, while reducing costs. A prime example is India's rapid growth of the Unified Payments Interface (UPI) and the widespread use of Internet and Mobile banking.

3. The banking landscape in the state has changed significantly, with a notable rise in Customer Service Points (CSPs), or Bank Mitras, compared to traditional full-service bank branches. From March 31, 2020 to March 31, 2024, the number of CSPs in Bihar increased from 20,994 to 57,589, marking a growth rate of 174.3 percent. In contrast, full-service bank branches grew by only 6.0 percent, rising from 7,589 to 8,045. This shift highlights CSPs as the primary avenue for expanding access to financial services in the state.

4. As of March 31, 2024, the state has 8,045 Bank branches. Notably, 46.9 percent of these branches are located in rural areas, 31.7 percent are in semi-urban areas, and 21.4 percent are in urban areas. Public Sector Banks have the largest network in the state, comprising 3,979 branches. This is followed by Regional Rural Banks (RRBs) with 2,105 branches, and Private Sector Banks with 1,329 branches. Co-operative and Small Finance Banks (SFBs) have 290 and 342 branches, respectively.

5. As of September 2024, banks in Bihar had collected deposits amounting to Rs. 5.27 lakh crore, while advances made by these institutions reached Rs. 2.97 lakh crore, resulting in a Credit-Deposit (CD) ratio of 56.3 percent. Furthermore, the Credit-to-Gross State Domestic Product (GSDP) ratio in Bihar has consistently increased over the past five years, rising from 27.5 percent in 2019-20 to 39.9 percent in 2023-24.

6. For the 2023-24 financial year, banks in Bihar set a target for the Annual Credit Plan (ACP) at Rs. 2.6 lakh crore, and the achievement was 96.3 percent. As of March 31, 2024, the percentage Non-Performing Asset ratios for the two largest bank groups in Bihar, Commercial Banks and Regional Rural Banks (RRBs), stood at 5.9 percent and 23.8 percent, respectively.

CHAPTER-XII : HUMAN DEVELOPMENT

1. Investments in the social sector leads to broader benefits for the economy. In the last 18 years, the expenditure on social services in the state has increased by 13 times between 2005-06 and 2023-24. Following the same pattern, expenditure on health increased by 13 times and that on education increased by 10 times. Also, the share of social services in the total expenditure between 2005-06 and 2023-24 recorded an increase of 4.5 percentage points.

2. Life Expectancy at Birth (LEB) is a proxy indicator for improvements in nutrition, education, sanitation, and knowledge of diseases. The LEB for Bihar has undergone a significant change from 65.8 in 2006-10 to 69.5 years in 2016-20, registering an increase of 3.7 years in a decade. The LEB of Bihar in 2016-20 has increased by 3.5 years in the rural and 4.0 years in the urban areas as compared to 2006-10.

3. The performance of health care systems in Bihar is reflected in the average monthly patient visits to government hospitals. In 2023, the number of patients visiting hospitals per month was 10,914, denoting an increase of 92.01 percent over 5684 in 2020. Moreover, it is remarkable to note that between April and September 2024, the average number of patients visiting hospitals each month was even higher at 11705.

4. Increase in institutional deliveries mean reduction in maternal and neonatal mortality. In Bihar, between 2018-19 and 2023-24, the number of institutional deliveries increased considerably from 16.02 lakh to 16.52 lakh, registering an increase of 3.12 percent. A well-implemented immunization programme that targets everyone significantly helps in decreasing the prevalence of vaccine-preventable diseases. The proportion of children aged 12-23 months in Bihar who are fully immunized has risen significantly from 11.6 percent (NFHS-2, 1998-99) to 71.0 percent in 2019-20 (NFHS-5), reflecting an increase of 59.4 percentage points.

5. Education is an essential component of the social sector which is in the concurrent list. The total expenditure on education in Bihar has increased from Rs. 23618 crore in 2018-19 to Rs. 43224 crore in 2023-24. The annual growth rate of total expenditure on education has been as high as 13.9 percent during this period. In all these years, elementary education has the highest share of the total expenditure, compared to the other two categories.

6. The Bihar Student Credit Card Yojana is a transformative initiative designed to enhance educational accessibility and equity in Bihar. The scheme emphasizes gender equity and supports marginalized groups like differently-abled and transgender students with significantly lower interest rates. It directly contributes to improving the Gross Enrolment Ratio in higher education and aligns with the state's broader socio-economic development goals. Till September, 2024-25, loans amounting to Rs. 527.42 crore were sanctioned to male students and those amounting to Rs. 236.0 crore sanctioned to female students.

7. With the aim of women empowerment, the total expenditure on women increased by 90 percent between 2018-19 and 2022-23. In the same period, the expenditure under Category-I increased by 2.3 times and under Category-II increased by 1.7 times. On an average, the share of women in the total budget in these five years has been around 18.1 percent and the total outlays for women was around 5.6 percent of GSDP.

8. To enhance the safety of women and instill a sense of security among those travelling in Bihar, the "Surakhsit Safar Suvidha" initiative was launched by the Police (Home Department). Bihar is the third state to implement such a scheme, following Telangana and Haryana. As of December 2024, the initiative has successfully assisted in all 70 requests received since its launch.

CHAPTER-XIII : CHILD DEVELOPMENT

1. Bihar has 4.98 crore children, of which 4.47 crore (89.9 percent) live in rural areas and 0.50 crore (10.1 percent) in urban areas. As per gender particulars, 2.35 crore children are female and 2.62 crore are male (in the age bracket of 0-18 years). The distribution of the child population across different age-groups is — 0-6 years (38.4 percent), 7-14 years (45.4 percent) and 15-18 years (16.2 percent).

2. There has been a consistent rise in the child budget allocation in Bihar during the last six years. Between 2016-17 and 2022-23, the expenditure for children has increased at an annual rate of 19.4 percent. In the same period, the per capita expenditure increased by 2.8 times from Rs. 3275 in 2016-17 to Rs. 9131 in 2022-23. The average share of expenditure on child development in the total state budget lies at around 18 percent, with some year-to-year variation. Likewise, the share of expenditure as percentage of GSDP is around 5 percent.

3. On comparing NFHS 4 and 5, it is seen that the stunting of children under 5 years in Bihar has come down from 48.3 percent to 42.9 percent, registering a decline of 5.4 percentage points. Also, in the case of underweight children, the figures have come down from 43.9 percent to 41.0 percent, indicating a decrease of 2.9 percentage points.

4. The Integrated Child Development Scheme (ICDS) now known as Anganwadi Services is a holistic programme for early childhood. The overall budget for ICDS in Bihar, including state initiatives, rose from Rs. 3800.18 crore in 2019-20 to Rs. 4611.53 crore in 2023-24, indicating an increase at the rate of 4.3 percent annually. Likewise, the budget allocated for nutrition under ICDS grew at an annual rate of 1.3 percent, increasing from Rs. 1791.89 crore in 2019-20 to Rs. 2064.72 crore in 2023-24.

5. To encourage sports and to promote infrastructure for sports for youths and especially school children and girls in the rural areas of the state, it has been decided to develop playgrounds under the Mahatma Gandhi National Rural Employment Guarantee Scheme. With the development of sports facilities in the rural areas, children and youths will get an opportunity to showcase their talent at the national and international levels.

CHAPTER-XIV : ENVIRONMENT, CLIMATE CHANGE AND DISASTER MANAGEMENT

1. Considering climatic risks and their intended consequences, the state has focused on adaptation and mitigation of climate change issues and has been bringing a Green Budget since 2021. Preparation of the State Action Plan on Climate Change (SAPCC) is in an advance stage. Along with sustainable environmental initiatives, the green cover in the state is gradually increasing.

2. The contribution of the forestry and logging sector in the Gross State Value Added (GSVA) at current (2011-12) prices grew by 10.7 percent from Rs. 4187 crore in 2011-12 to Rs. 13,549 crore in 2023-24. The expenditures on climate-related issues have increased more than four times from Rs. 3308 crore in 2020-21 to Rs. 13,823 crore in 2024-25 (BE).

3. As per the India State of Forest Report (2023), the forest cover in Bihar has increased by 687 sq. km. during 2011-2023. Between 2011 and 2023, open forests grew by 527 sq km, followed by very dense forest area, which has increased by 156 sq km. Open forests constitute more than half of the forests, while moderately dense forests contribute 44 percent. The carbon stock for 2023 has been estimated to be 58451 thousand tonnes. There is an increase of 1570 thousand tonnes of carbon stock between 2021 and 2023.

4. Under the Jal-Jeevan-Hariyali Mission, the State government has planted 1573 lakh saplings during 2019-24, which boost green cover, minimize pollution, increase public participation, generate farmers' income, and balance environment and development.

5. The State government has been protecting wildlife and biodiversity, including the establishment of tiger reserves, animal and bird sanctuaries, and community reserves in the state. In 2023-24, a total of Rs. 1428 crore has been spent under the Centrally sponsored scheme of Integrated Development of Wildlife Habitats (IDWH), including Project Elephant, of which the state share is Rs. 626 crore. Apart from this, the State government has spent Rs. 716 crore through the state scheme for Biodiversity and Wildlife Protection.

6. The Bihar State Pollution Control Board (BSPCB) consistently oversees the quality of ambient air by utilizing 35 Continuous Ambient Air Quality Monitoring Stations that are set up across 23 districts within the state. The Board is also looking to establish Real-Time Monitoring Stations in the remaining 15 districts of Bihar. The BSPCB monitors the water quality of Ganga at 34 locations fortnightly, in addition to its tributaries and ponds at 70 locations on a monthly basis. The BSPCB is monitoring the noise levels in a number of neighbourhoods in Patna to reduce noise pollution.

7. Bihar has ample surface water and groundwater resources, which are regularly replenished by various rivers and their tributaries, as well as by rainfall, particularly during the southwest monsoon. The condition of surface water infrastructure in the state as of 2023 shows that there are 968 canals, 4819 tubewells, 464 tanks (including Ahar pynes, ponds, and check dams), and 26 reservoirs. Also, to check water quality, a Water Quality Monitoring Protocol and an effective surveillance system has been established. It has been mandated to conduct the testing of water sample once in two months for arsenic and fluoride in the areas impacted, once in four months in wards affected by iron, and assessment is done at least twice in a year in wards not affected by quality issues.

8. The prevention, mitigation, preparedness and response measures for disasters are very important to develop a comprehensive and effective plan which helps in reducing the loss of life and property. The State government allocated Rs. 4237.33 crore for management of floods and cyclones in the state during 2021-22 to 2023-24. Also, in 2024-25, till September, Rs. 112.8 crore was allocated for management of disasters. To enhance public awareness and safeguard communities from disasters, a total of 30,132 Jeevika cadres were trained in Natural Disaster Management.

CHAPTER - I

BIHAR ECONOMY : AN OVERVIEW

Abstract

Bihar has witnessed significant economic growth over the last two decades, resulting in notable improvements in several socio-economic indicators. The State government's initiatives during this period have contributed to advancements in education, health, and other social indicators, along with a general increase in the per capita income. According to the latest available estimates, the Gross State Domestic Product (GSDP) of Bihar for the year 2023-24 is estimated to be Rs. 8,54,429 crore at current prices and Rs. 4,64,540 crore at constant (2011-12) prices. The GSDP in 2023-24 is estimated to have increased by 14.5 percent at current prices and 9.2 percent at constant prices, respectively, compared to the previous year. The per capita GSDP in Bihar at current and constant (2011-12) prices is estimated to have increased by 12.8 percent to Rs. 66,828 and by 7.6 percent to Rs. 36,333, respectively, in 2023-24 over the previous year. The share of the tertiary sector in the Gross State Value Added (GSVA) at constant (2011-12) prices is estimated to be 58.6 percent, followed by 21.5 percent from the secondary sector and 19.9 percent from the primary sector. The Gross Fixed Capital Formation (GFCF) at current prices in the state is estimated to be Rs. 38,986 crore in 2023-24, which is 4.6 percent of the GSDP. The analysis of economic activities in the state, as outlined in the Bihar Economic Survey 2024-25, presents an encouraging picture for further development in the state.

1.1 Macroeconomic Overview

Bihar has experienced significant economic growth over the last two decades, leading to advancements in various areas of development. As per the latest available Gross State Domestic Product (GSDP) figures, series calculated from the base year of 2011-12, the size of Bihar's economy at current prices has increased 3.5 times, rising from Rs. 2.47 lakh crore in 2011-12 to Rs. 8.54 lakh crore in 2023-24 (Table 1.1). This surge in economic activity has been accompanied by notable improvements in various socio-economic indicators. The State government's initiatives during these years have contributed to overall advancements in education, health, and other social indicators, along with a general increase in the per capita income of the population.

While the progress made in the past two decades is commendable, the government's efforts get constrained due to limited opportunities for large-scale expansion of its fiscal capacity. Nevertheless, the State government has managed its finances wisely, ensuring that available fiscal

resources are utilised optimally for the welfare of citizens without putting its financial stability at risk. The annual Bihar Economic Survey has documented these developments for the current year and has analysed trends emerging from recent years. Additionally, the latest data related to various sectors of the state has also been reported.

The Gross State Domestic Product (GSDP) and Net State Domestic Product (NSDP) of Bihar, measured at both current prices and constant (2011-12) prices from 2011-12 to 2023-24, are presented in Table 1.1. This data is from the new series of estimates for the GSDP using the base year of 2011-12. The most recent available data includes the quick estimate (Q) for 2023-24 and the provisional estimate (P) for 2022-23; these estimated figures are subject to revision within a timeframe of one to two years. Final figures are available up to 2021-22. The quick and provisional estimates, along with actual numbers from recent years, are utilised in the Economic Survey to analyse trends and changes in economic activities. Additional data on various components of the GSDP and NSDP at current prices and constant (2011-12) prices for Bihar, from 2018-19 to 2023-24 (Q), can be found in the appendix of this chapter.

Table 1.1 : GSDP and NSDP of Bihar (2011-12 to 2023-24)

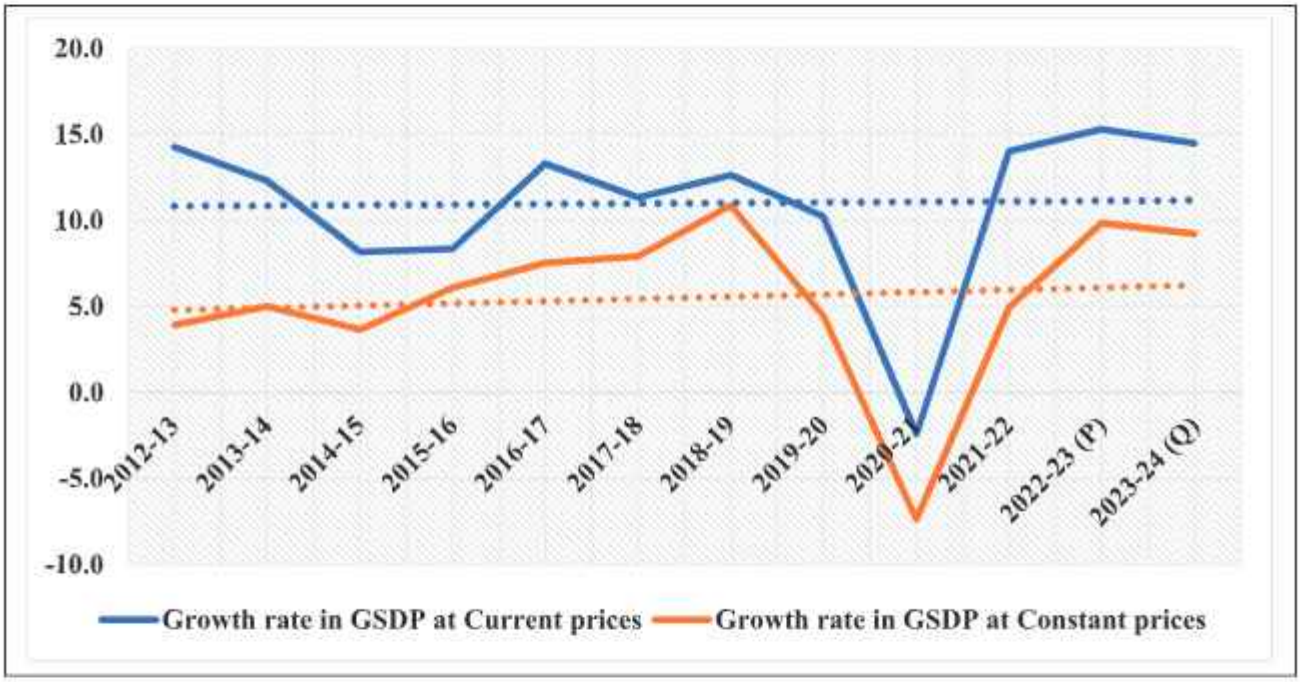
(Rs. crore)

Year	GSDP		NSDP	
	Current Prices	Constant (2011-12) Prices	Current Prices	Constant (2011-12) Prices
2011-12	247144	247144	228497	228497
2012-13	282368	256851	261327	236933
2013-14	317101	269650	292143	246915
2014-15	342951	279482	315732	255739
2015-16	371602	296488	340119	269200
2016-17	421051	318797	386879	289265
2017-18	468746	344028	431128	312605
2018-19	527976	381383	483604	345545
2019-20	581855	398329	532573	359241
2020-21	567814	368970	515397	328354
2021-22	647394	387256	587205	343583
2022-23 (P)	746417	425384	673777	376823
2023-24 (Q)	854429	464540	771435	411359
CAGR (%)	10.9	5.4	10.7	5.0

Note : For 2022-23, the figures are Provisional estimates (P) and for 2023-24 Quick estimates (Q). Data is from the new GSDP series estimate using the base year 2011-12.
Source : Directorate of Economics and Statistics, GoB

As per the latest available quick estimates at the time of preparing this report, the Gross State Domestic Product (GSDP) of Bihar for the year 2023-24 is estimated to be Rs. 8,54,429 crore at current prices and Rs. 4,64,540 crore at constant (2011-12) prices. Between 2011-12 and 2023-24, the GSDP at current prices experienced an average annual growth rate of 10.9 percent. When adjusted for inflation, the GSDP at constant prices has increased at an average annual rate of 5.4 percent. The Net State Domestic Product (NSDP) at current and constant (2011-12) prices has grown at average annual rates of 10.7 percent and 5.0 percent, respectively. The year-on-year percentage growth in the State's GSDP at both current and constant (2011-12) prices, along with the fitted linear trend line from 2012-13 to 2023-24, is depicted in Chart 1.1. Following a V-shaped recovery in 2021-22, the State's economy has continued to expand at a double-digit growth rate.

Chart 1.1 : Percentage growth in GSDP in Bihar (2012-13 to 2023-24 Q)



Note : For 2022-23, the figures are Provisional estimates (P) and for 2023-24 Quick estimates (Q).
Data is from the new GSDP series estimate using the base year 2011-12
Source : Directorate of Economics and Statistics, GoB

The year-on-year percentage change in India's GDP and Bihar's GSDP is presented in Table 1.2. The GSDP of Bihar is estimated to have increased by 14.5 percent at current prices and 9.2 percent at constant (2011-12) prices in 2023-24 compared to the previous year. It is observed that, on many occasions, Bihar's GSDP has grown at a rate that is higher than the growth rate of all-India GDP, both at current and constant prices. Between 2011-12 and 2023-24, the State's GSDP at current prices has increased at an average annual growth rate of 10.9 percent, slightly ahead of India's GDP growth rate of 10.7 percent. As per the provisional estimates for 2022-23, Bihar's GSDP at current prices is estimated to have grown at a rate that is 1.1 percentage points higher than that of India's GDP. Meanwhile, the GSDP of the State at constant (2011-12) prices is

estimated to have grown at a rate that is 2.8 percentage points higher than the country's GDP growth rate. Based on the quick estimates for 2023-24, Bihar's GSDP is estimated to have grown by 4.9 percentage points and 1.0 percentage point more than India's GDP at current prices and constant (2011-12) prices, respectively.

Table 1.2 : Percentage Growth rate of India's GDP and Bihar's GSDP (2012-13 to 2023-24)

Year	Year-on-year percentage change in GDP/GSDP			
	Current Prices		Constant (2011-12) Prices	
	India (GDP)	Bihar (GSDP)	India (GDP)	Bihar (GSDP)
2012-13	13.8	14.3	5.5	3.9
2013-14	13.0	12.3	6.4	5.0
2014-15	11.0	8.2	7.4	3.6

A comparison of the sector-wise growth rates of GSVA (Gross State Value Added) and GSDP (Gross State Domestic Product) at constant prices (2011-12) for select states from 2021-22 to 2023-24 is presented in Table 1.3. Economic activities across all three sectors — Primary, Secondary, and Tertiary — in Bihar have expanded at a pace that positions the state among the fastest-growing in the country. The growth rate of Bihar's GSDP at constant prices is estimated to be 9.2 percent in 2023-24, putting Bihar among the states that are growing at a high rate. Furthermore, the tertiary sector, which contributes significantly to the gross value added in the economy, is projected to grow at a rate of 10.8 percent in 2023-24 in Bihar, ranking it among the fastest-growing states in the country for this sector.

Table 1.3 : Sector-wise Percentage Growth rate in GSVA and GSDP at constant (2011-12) prices for major states (2021-22 to 2023-24)

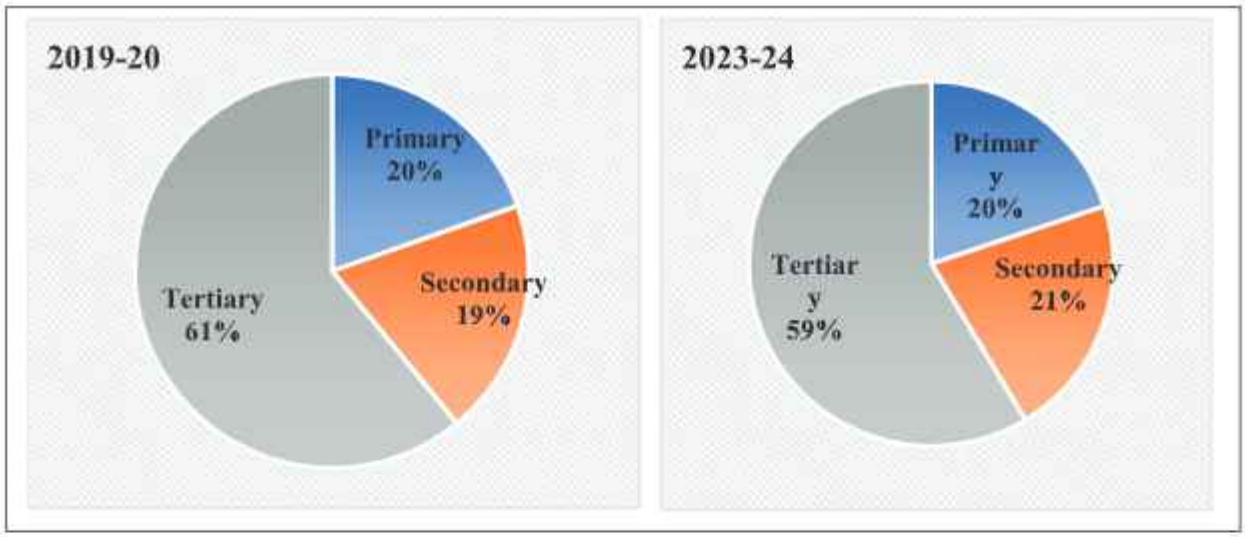
1.2 Structure of the Bihar Economy

The size of economic activity in a state during a specific period can be estimated by measuring the total value added from those economic activities. The Gross State Value Added (GSVA) reflects the overall value added to the state economy, calculated by subtracting the intermediate costs incurred in producing output from the total value of that output. Table 1.4 presents the sectoral composition of GSVA at constant prices (2011-12) in Bihar for the years 2019-20 to 2023-24. The figures for 2023-24 are quick estimates, while those for 2022-23 are provisional estimates.

The share of primary, secondary and tertiary sectors in the GSVA at constant (2011-12) prices in Bihar for 2019-20 and 2023-24 is shown in Chart 1.2. The share of the tertiary sector is estimated to have declined from 61 percent of the Gross State Value Added (GSVA) in 2019-20 to 59 percent in 2023-24. Despite this decrease, it remains the most significant contributor to value addition through economic activities in the state. Conversely, the share of the secondary sector is estimated to have increased from 19 percent to 21 percent during the same period. Meanwhile, the share of the primary sector in the state's GSVA is estimated to remain at 20 percent in 2023-24, unchanged from its share in 2019-20.

Chart 1.2 : Sectoral composition of GSVA at constant (2011-12) prices (2019-20 and 2023-24)



Note : For 2023-24, the figures are Quick estimates.
Source : Directorate of Economics and Statistics, GoB

In the tertiary sector, Trade and Repair Services are estimated to be the most significant contributor to the state's Gross State Value Added (GSVA) in 2023-24, accounting for 14.8 percent. This is followed by a 10.2 percent contribution from Transport, Storage, Communication, and Broadcasting Services, as well as a 9.5 percent contribution from the Real Estate, Ownership of Dwelling & Professional Services. The share of Road Transport in the GSVA of the State is estimated at 5.4 percent in 2023-24. Additionally, the Financial Services are estimated to contribute 4.6 percent to the GSVA.

In the secondary sector, the estimated share of manufacturing in the state's total Gross State Value Added (GSVA) for 2023-24 is 7.6 percent. Additionally, construction activities related to manufacturing are estimated to have contributed 11.3 percent to the state's GSVA. The economic activities in Electricity, Gas, Water Supply, and Other Utility Services are estimated to account for 2.7 percent of the GSVA in 2023-24. In the primary sector, Crops and livestock are the two major contributors to the state's GSVA, with their contributions estimated to be 9.9 percent and 6.3 percent, respectively in 2023-24.

1.3 Per Capita GSDP

The data on the per capita Gross State Domestic Product (GSDP) in Bihar and the per capita Gross Domestic Product (GDP) in India, both at current and constant (2011-12) prices, is presented in Table 1.5. Chart 1.3 illustrates the per capita GSDP in Bihar at these price levels. In Bihar, the per capita GSDP at current prices has risen from Rs. 23,525 in 2011-12 to Rs. 66,828 in 2023-24. At constant (2011-12) prices, the per capita GSDP has increased from Rs. 23,525 in 2011-12 to Rs. 36,333 in 2023-24. The per capita GSDP in Bihar is estimated to have increased by 12.8 percent at current prices and by 7.6 percent at constant (2011-12) prices compared to the previous year. For India, the estimated per capita GDP at current prices is Rs. 1,84,205, while at constant (2011-12) prices, it is Rs. 1,06,744 for the year 2023-24.

Between 2011-12 and 2023-24, the per capita Gross State Domestic Product (GSDP) at current prices in Bihar grew at an average annual rate of 9.1 percent. In contrast, the per capita GSDP at constant prices experienced an average annual growth rate of 3.7 percent. Following the economic contraction caused by the Covid-19 pandemic in 2020-21, Bihar's per capita GSDP at current prices demonstrated consistent double-digit growth rates. It increased by 12.4 percent in 2021-22, 13.6 percent in 2022-23, and 12.8 percent in 2023-24. The per capita GSDP at constant (2011-12) prices in Bihar grew by 8.2 percent in 2022-23 and 7.6 percent in 2023-24.

Chart 1.3 : Per capita GSDP in Bihar (2011-12 to 2023-24)

Note : For 2022-23, the figures are Provisional estimates (P) and for 2023-24 Quick estimates (Q). Data is from the new GSDP series estimate using the base year 2011-12

The triennial average per capita Net State Domestic Product (NSDP) at constant prices (2011-12) for select major states in India from 2011-12 to 2023-24 is presented in Table 1.6. It also includes the per capita NSDP values for the years 2022-23 and 2023-24. For the year 2023-24, Bihar's per capita NSDP is estimated to be Rs. 32,174, which is 30.1 percent of the all-India average NSDP for the state. Among the major states, the highest per capita NSDP is recorded for Karnataka at Rs. 1,86,038, followed closely by Haryana at Rs. 1,85,490 and Telangana at Rs. 1,83,854. The per capita NSDP of Bihar is estimated to have increased by 7.6 percent in 2023-24 over the previous year, which places it among the fastest growing states in the country.

1.4 Gross Fixed Capital Formation

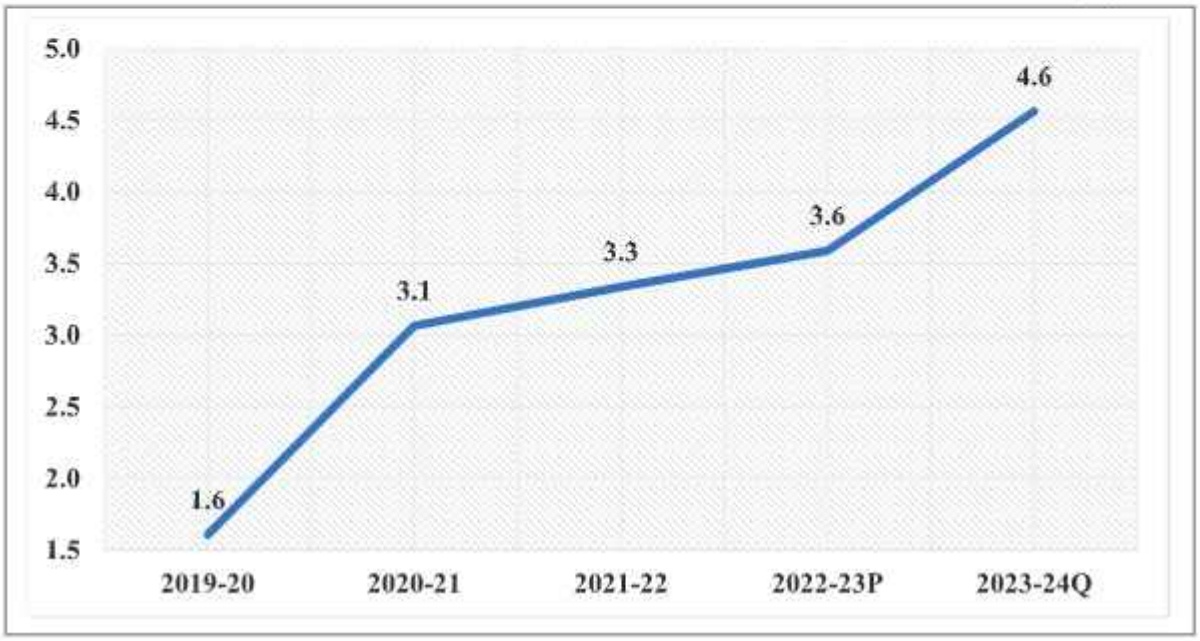
Gross Fixed Capital Formation (GFCF) refers to the portion of the net value added in a state that is invested rather than consumed in a given year. Table 1.7 presents the GFCF at current prices for Bihar, along with its share as a percentage of the state's Gross State Domestic Product (GSDP) for the years 2019-20 to 2023-24. The GFCF figure for 2023-24 is a revised estimate, while the GSDP values for 2022-23 and 2023-24 are provisional and quick estimates, respectively. Additionally, Chart 1.4 illustrates the GFCF as a percentage of the state GSDP for the same period.

The Gross Fixed Capital Formation (GFCF) at current prices in the state is estimated to have risen from Rs. 9,346 crore in 2019-20 to Rs. 38,986 crore in 2023-24. The GFCF as a percentage of Gross State Domestic Product (GSDP) at current prices has also increased significantly from 1.6 percent in 2019-20 to 4.6 percent in 2023-24. Notably, there was a significant jump of 86.3 percent

in the GFCF during 2020-21 compared to the previous year. This figure continued to rise, with increases of 24.1 percent in 2021-22 and 24.0 percent in 2022-23. An estimated 45.5 percent rise in GFCF is estimated for 2023-24.

Chart 1.4 : Gross Fixed Capital Formation as a percentage of GSDP at Current Prices (2019-20 to 2023-24)

(in percent)



Note : GSDP Data of 2022-23 is Provisional estimate (P) and for 2023-24 is Quick estimate (Q).
GFCF figure for 2023-24 is Revised estimate (RE).

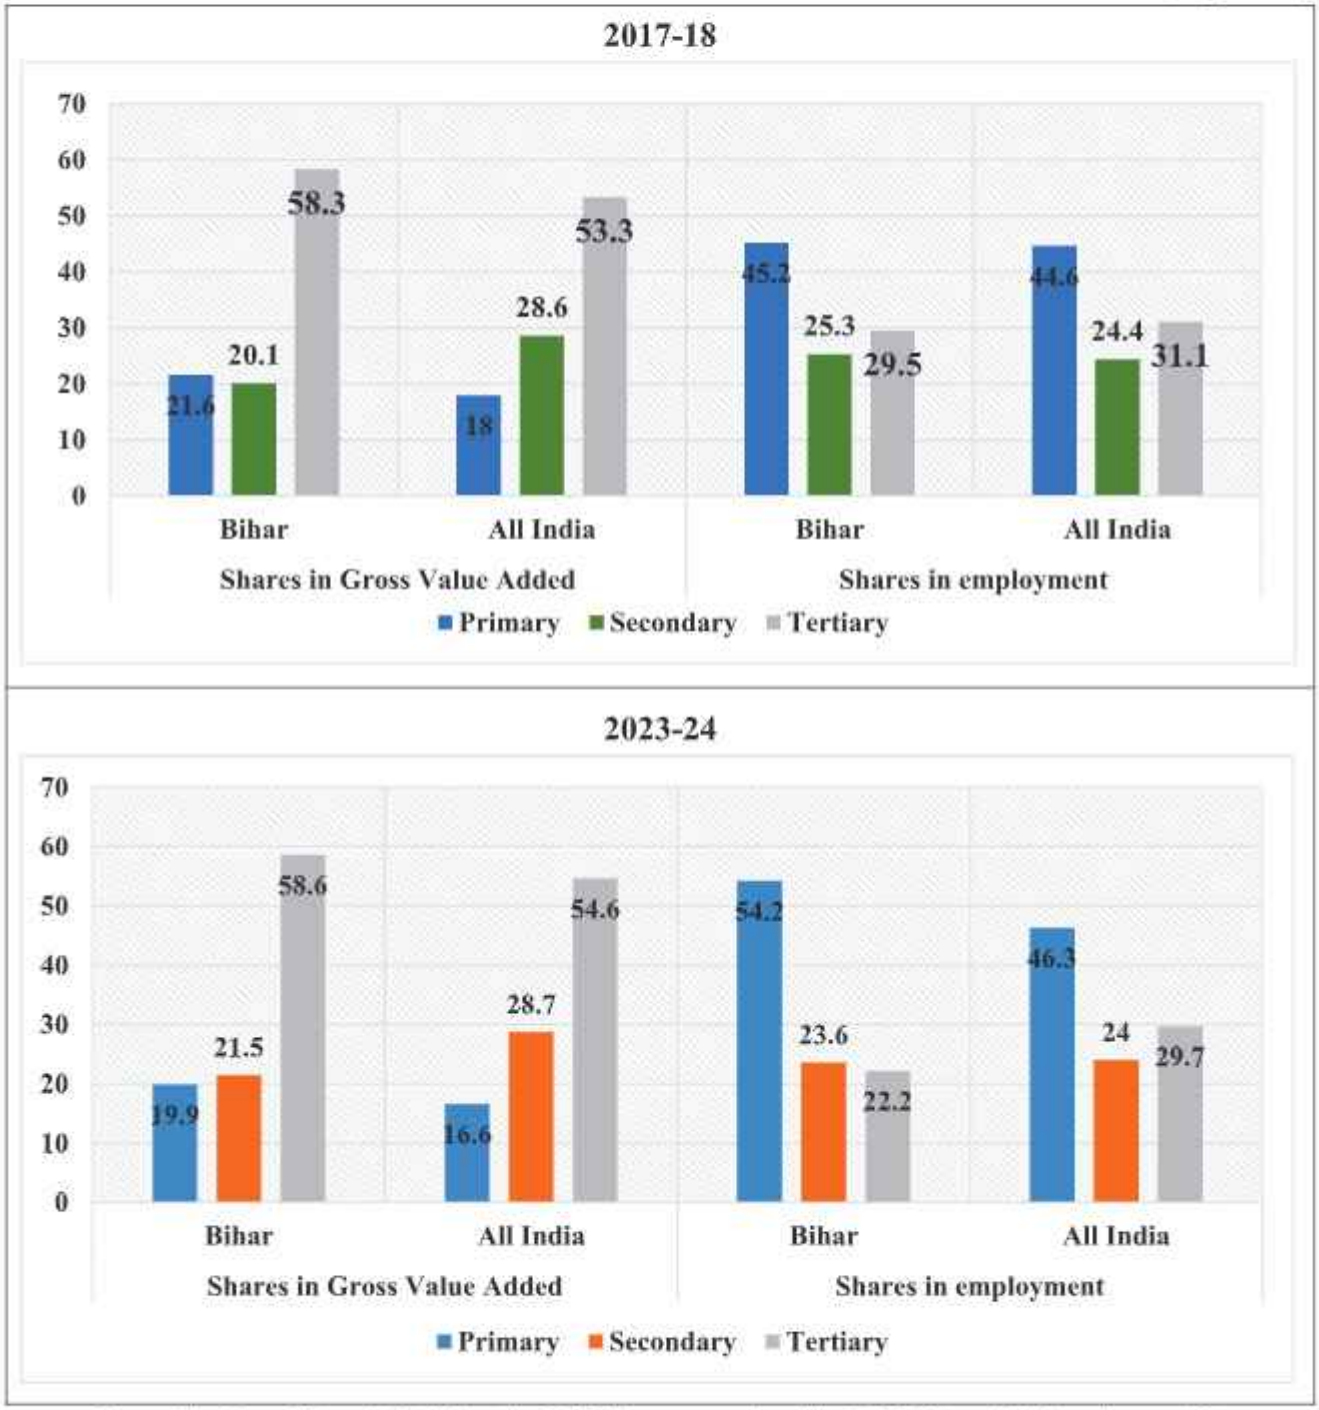
1.5 Sector-wise share in GSVA and Employment (At Constant Prices)

The sector-wise distribution of Gross Value Added (GVA) for Bihar and India, along with workforce participation rates, is compared for the years 2017-18 and 2023-24 in Chart 1.5 and Table 1.8. The primary sector has the largest share of employment but the lowest contribution to GVA in both Bihar and India. This sector's share of GVA has been noticeably lower over the years. However, the contributions from these sectors exhibit varying patterns between Bihar and India.

At the national level, the primary sector contributed 16.6 percent to the GVA in 2023-24, while in Bihar, it accounted for 19.9 percent. The secondary sector comprised 28.7 percent of the GVA at the all-India level and 21.5 percent in Bihar for the same year. Bihar's share of the secondary sector in GVA increased by 1.4 percentage points from 2017-18 to 2023-24, at a higher rate compared to 0.1 percentage point increase at the national level. The tertiary sector contributed 58.6 percent to Bihar's GVA in 2023-24, more than the 54.6 percent contribution at the all-India level.

Chart 1.5 : Sector-wise Share in GSVA/GVA and Employment in Bihar and India (2017-18 and 2023-24)

(in percent)



Note : The Gross Value Added data for 2017-18 are actual and for 2023-24 are Quick estimates (Q).
Source : Periodic Labour Force Survey 2017-18 and 2023-24, and MOSPI, GoI website

Table 1.8 also presents the pattern of workforce participation across different sectors in Bihar. More than half of the workforce in Bihar is involved in economic activities within the primary sector, which includes agriculture, livestock, forestry, and fishing. From 2017-18 to 2023-24, workforce participation in the primary sector has increased both in Bihar and at the all-India level. However, the increase has been more pronounced in Bihar, where the share of this sector in total workforce participation rose from 45.2 percent in 2017-18 to 54.2 percent in 2023-24. In contrast, the all-India share increased from 44.6 percent to 46.3 percent during the same period. Meanwhile, the contributions of the secondary and tertiary sectors to workforce participation have declined. By 2023-24, the secondary sector accounted for 23.6 percent and the tertiary sector for 22.2 percent of workforce participation in Bihar.

1.6 Prices and Inflation

Price changes significantly impact economic activities, influencing decisions related to consumption, saving, and investment. The Central Statistical Office (CSO) tracks the evolution of prices in the country through the Consumer Price Index (CPI). The CSO provides data both at the all-India level and for individual states, and it regularly publishes price indices for rural and urban areas. The percentage increase in the prices of commodities and services over a specific period is referred to as the inflation rate.

Table 1.9 presents the state-wise Consumer Price Index (CPI) for September 2023 and September 2024, along with the year-on-year percentage changes in the price index over this period. In Bihar, the year-on-year percentage change in prices was 7.6 percent in rural areas and 7.1 percent in urban areas, resulting in an overall increase of 7.5 percent in general prices across the state during this period. Compared to the base year price of 2012, the CPI for Bihar as of September 2024 remains lower than that of many other states in the country for both rural and urban areas.

Table 1.9 : State-wise CPI (Base : 2012=100) and Inflation Rate (Sept, 2023 and Sept, 2024)

Name of the State/UT	Rural			Urban			Combined		
	Sept. 2023	Sept. 2024	Inflation Rate (%)	Sept. 2023	Sept. 2024	Inflation Rate (%)	Sept. 2023	Sept. 2024	Inflation Rate (%)

1.7 Regional Disparity

Economic activities in the state have significantly increased in recent decades, as evidenced by the rapid growth of the state's Gross State Domestic Product (GSDP). The regional pattern of economic development within the state could be assessed through district-level data on the Gross District Domestic Product (GDDP) and the Net District Domestic Product (NDDP). The district-wise data for GDDP and NDDP in Bihar, adjusted to constant prices from the year 2011-12, along with their per capita values for the year 2022-23, is presented in the Appendix. The per capita GDDP at constant prices for the five years from 2018-19 to 2022-23 is also included in the Appendix. Furthermore, the data on district-wise consumption of petroleum products (including petrol, diesel, and LPG) is presented in the Appendix. Table 1.10 presents a list of the three most prosperous and the three most impoverished districts in the state based on various indicators.

Table 1.10 : Relatively Prosperous and Impoverished Districts of Bihar (2022-23 and 2023-24)

Criteria/ Year	Most Prosperous Districts	Most Impoverished Districts
Per Capita GDDP (in Rs.)		
2022-23	Patna (121396), Begusarai (49064), Munger (46795)	Sheohar (19561), Sitamarhi (21931), Araria (22204)
Consumption of Petrol per 1000 persons in a year (in MT)		
2023-24	Patna (17.7), Muzaffarpur (11.8) Purnea (10.9)	Lakhisarai (4.9), Banka (5.1), Jehanabad (5.6)
Consumption of Diesel per 1000 persons in a year (in MT)		
2023-24	Patna (35.9), Sheikhpura (34.9), Aurangabad (27.7)	Sheohar (8.9), Siwan (11.2), Gopalganj (11.7)
Consumption of LPG per 1000 persons in a year (in MT)		
2023-24	Patna (24.9), Begusarai (16.5), Muzaffarpur (15.7), Gopalganj (15.7)	Araria (7.5), Banka (8.0), Kishanganj (8.2)

Source : Directorate of Economics and Statistics, GoB and Indian Oil Corporation, Patna Office

There is a significant variation in the per capita Gross District Domestic Product (GDDP) at constant prices (2011-12), an indicator often used to proxy average per capita income across the district. For 2022-23, Patna's estimated per capita GDDP is Rs. 1,21,396, followed by Rs. 49,064 for Begusarai and Rs. 46,795 for Munger. In contrast, the estimated per capita GDDP for Sheohar is Rs. 19,561, Rs. 21,931 for Sitamarhi and Rs. 22,204 for Araria. Similarly, there is considerable variation in the per capita annual consumption of petroleum products across the state. In 2023-24, the yearly petrol consumption per 1,000 persons ranged from 4.9 metric tonnes (MT) in Lakhisarai to 17.7 MT in Patna. The diesel consumption per 1,000 persons was highest in Patna at 35.9 MT and lowest in Sheohar at 8.9 MT. Additionally, Liquefied Petroleum Gas (LPG) consumption was also highest in Patna at 24.9 MT, while it was 7.5 MT in Araria for the year 2022-23. These patterns indicate that Patna is the most prosperous district in the state, based on these indicators.

1.8 Outline of Bihar Economic Survey 2024-25

The Bihar Economic Survey 2024-25 offers a detailed picture of numerous facets of the state's economy, providing a detailed continuation of the introduction regarding the current status of economic activities in Bihar outlined in this chapter. This comprehensive Economic Survey relies on a robust set of data derived from secondary sources, meticulously compiled by an array of government departments. Furthermore, it incorporates data and insights from various publications by both State and Central government institutions, ensuring a well-rounded perspective on the economic landscape.

In addition to statistical data, the survey includes brief reports that highlight recent policy interventions enacted by the State government. These initiatives are critical in steering Bihar toward its overarching development objectives. The Economic Survey strongly emphasises granularity by presenting relevant data in disaggregated form whenever possible, allowing for a thorough understanding of economic trends not just at the state level but extending to the districts.

The current Economic Survey (2024-25) is organized into 14 chapters, each focusing on different aspects of the Bihar economy. Chapter-I, titled 'Bihar Economy: An Overview,' comprehensively summarises the entire survey. The remaining 13 chapters examine the status and growth patterns of various elements of Bihar's socio-economic development. These chapters include: State Finances (Chapter-II); Agriculture and Allied Sectors (Chapter-III); Enterprises Sector (Chapter-IV); Labour, Employment and Skill (Chapter-V); Physical Infrastructure (Chapter-VI); E-Governance (Chapter-VII); Power Sector (Chapter-VIII); Rural Development (Chapter-IX); Urban Development (Chapter-X); Financial Institutions (Chapter-XI); Human Development (Chapter-XII); Child Development (Chapter-XIII); and, Environment, Climate Change and Disaster Management (Chapter-XIV). This structure provides a detailed insight into the various challenges and opportunities within the Bihar economy.

The overview of the Bihar economy, based on recent aggregate data on economic activities throughout the state, is presented in Chapter-I. This chapter also presents disaggregated data up to the district level that is relevant to its themes, wherever available. Chapter-II provides a detailed discussion of the State government's finances. The State government has consistently increased its spending on improving essential infrastructure to boost economic activities and various aspects of the social sector. Despite this growth in expenditure, the management of state finances has remained sustainable.

Chapter-III addresses the state's current status and recent developments in agriculture and related sectors. These sectors are essential for the inclusive development of Bihar, as a significant portion

of the rural population relies on them for their livelihood. In addition, the economic activities in these sectors make a significant contribution to the state's gross value added. The growth in these sectors, due to their substantial forward and backward linkages within the state's economy, significantly influences overall economic development. This chapter also highlights the initiatives taken by the State government that positively impact these sectors.

Chapter-IV provides a comprehensive overview of the enterprises sector in the state. It highlights the policy initiatives of the State government in recent years to promote industrial growth, tourism, and entrepreneurial activities. The State government has made significant strides in generating employment and enhancing the skill levels of its working-age population. Chapter-V focuses on various aspects of workforce engagement within the state. It details government initiatives aimed at skill development for young individuals and efforts to enhance their employment opportunities.

The State government has consistently prioritised improving essential infrastructure to support economic activities and improve the overall quality of life for its citizens. This commitment is evident in several initiatives to upgrade physical and digital infrastructure across the state. In Chapter-VI, the Economic Survey delves into the current status and recent advancements in physical infrastructure in the state. This includes improvements in transportation networks such as roads, bridges, and public transit systems that facilitate ease of movement for people and goods. Chapter-VII focuses on digital infrastructure, emphasising the importance of using technological advancements in improving service delivery across the state. Access to electricity is essential for modern life and economic development. State government initiatives have significantly improved the energy sector. Chapter-VIII outlines the sector's institutional structure, details on power demand and supply, the transmission network, the financial status of distribution companies, and government schemes aimed at benefiting citizens.

A significant portion of the population in the state resides in rural areas, making it essential to improve their standard of living for the overall socio-economic development of the state. Chapter-IX outlines various government initiatives aimed at rural development. At the same time, the growing urbanization in the state necessitates enhanced policy efforts toward sustainable urban development. Chapter-X examines the current state of urbanization and documents the government's various policy initiatives for the development of the urban sector. Additionally, credit from formal financial institutions is vital for the growth of economic activities in the state. To maintain steady economic growth, there a need of greater access to credit from banks and other financial institutions. Chapter-XI discusses the current status and recent developments in banking infrastructure and credit facilitation provided by the financial institutions.

The state has achieved significant improvements in various social development indicators. The State government's efforts to enhance health facilities and school infrastructure have played a crucial role in these positive outcomes. Furthermore, the government has consistently prioritised the well-being of vulnerable and marginalized groups in society. Details regarding various aspects of social sector development and the government's policy initiatives is presented in Chapters-XII and XIII. While achieving economic growth is vital for overall development, it is equally important to pursue this growth in an environmentally sustainable manner. The State government has implemented several initiatives aimed at the sustainable use of natural resources, conservation of wildlife and biodiversity, and reduction of environmental pollution. Issues related to the environment, climate change, and disaster management in the state, along with various policy initiatives, are discussed in Chapter-XIV.

1.9 State Profile

While analysing the state's economic scenario, including sector-specific activities, it is helpful to consider the demographic structure, as it significantly influences individual economic outcomes. Additionally, information from the various administrative divisions of the state helps in understanding the spatial aspects of economic activities. A brief profile of the state is outlined in this section.

Geographically, Bihar is a land-locked state located in the eastern part of the country, between the longitude 83°-19'-50" to 88°-17'-40" E and latitude 24°-20'-10" to 27°-31'-15" N. The state's geographical area is 94,163 square kms, with the 12th rank in terms of area among the states in the country. The Ganga river divides the state into two (unequal) parts, North and South Bihar. The state also shares an international boundary with Nepal to its North. Many rivers flowing through the state, especially in its northern part, originate in the neighbouring country. The state's climate is sub-tropical with four seasons: Spring, Summer, Rainy, and Winter. The state is administratively divided into nine divisions - Patna, Magadh, Saran, Tirhut, Darbhanga, Kosi, Purnea, Bhagalpur and Munger; 38 Districts, 101 Sub-divisions and 534 Community Development Blocks. The legislature in the state is bicameral, with 75 members in the legislative council and 243 in the legislative assembly.

The state's population is estimated to be 13,07,25,310 in 2023, as per the latest available data from Bihar caste-based survey. The population of the state is 25.6 percent higher than the population as per Census 2011 (10,40,99,452). The population growth in the state remained higher than the all-India average, as it had increased by 25.1 percent during the decade 2001-2011, compared to the decadal growth of 17.6 percent for all-India during the same period. However, there is a decline in

the population growth in the state in recent decade. In terms of ranking, Bihar was the third highest among states in terms of population, behind Uttar Pradesh and Maharashtra as per Census 2011.

The latest all-India data related to population has not been available in recent years because of delay in the scheduled Census 2021. Therefore, the all-India population numbers used for recent years in the Economic Survey are that projected by the National Commission on Population. As per these estimates, the share of Bihar in the total population of India has increased from 8.6 percent in Census 2011 to 9.4 percent in the year 2023. The population density in the state has increased from 1106 people per square km in Census 2011 to 1388 as per the estimated population in 2023. The sex-ratio of the state is reported to be 953 females per 1000 males in 2023, which is higher than 918 in Census 2011, suggesting an improvement in the recent decade.

The analysis of economic activities in the state, as outlined in the Bihar Economic Survey 2024-25, presents an encouraging picture. The state has shown significant improvement in various socio-economic indicators over time. These advancements, along with various past and present policy initiatives, provide hope for further development. It is important to note that, to achieve success across different areas, the state has consistently focused on optimising its fiscal capacity. A detailed examination of economic activities in the state is presented in the following 13 chapters of the Economic Survey 2024-25.

APPENDIX

Table A 1.1 : Gross State Domestic Product (GSDP) and Net State Domestic Product (NSDP) of Bihar at Constant (2011-12) Prices (2011-12 to 2023-24)

CHAPTER - II

STATE FINANCES

Abstract

The State government's budget has significantly increased over the years, and this increase has been effectively utilised to improve the infrastructure necessary for economic growth in Bihar. Furthermore, the government has allocated more funds to achieve various developmental goals, resulting in notable improvements across indicators. At the same time, the government has managed its finances prudently, ensuring that the rise in expenditure remains fiscally sustainable. Additionally, its fiscal management has been flexible enough to avoid vulnerabilities. In 2023-24, the total expenditure of the State government was Rs. 2,52,082 crore, which comprised a revenue expenditure of Rs. 1,90,514 crore and a capital expenditure of Rs. 61,568 crore. The receipts in the revenue account were Rs. 1,93,347 crore, resulting in a surplus of Rs. 2,833 crore. The receipts in the capital account for the State government amounted to Rs. 60,313 crore in 2023-24. Within the total expenditure for 2023-24, Scheme expenditure accounted for Rs. 1,01,835 crore, while Establishment and Committed expenditures totalled Rs. 1,50,247 crore. During this period, the state's total borrowing was Rs. 60,218 crore, with a public debt repayment of Rs. 22,979 crore. Interest payments made by the State government in 2023-24 were Rs. 17,606 crore, and the outstanding debt stood at Rs. 3,32,741 crore. Overall, the state's distribution of receipts and expenditures in 2023-24 reflects prudent fiscal management, highlighting its commitment to long-term economic growth.

The State government's budget has significantly increased over the past two decades. The government has effectively utilised these additional fiscal resources to improve the infrastructure necessary for economic growth. Furthermore, it has allocated more funds to achieve various developmental goals, resulting in marked improvements across indicators. The total expenditure by the State government has grown by 1.7 times, rising from Rs. 1.46 lakh crore in 2019-20 to Rs. 2.52 lakh crore in 2023-24 (Chart 2.1). The government has managed its finances prudently, ensuring that this increase in expenditure remains fiscally sustainable. Additionally, its fiscal management has been flexible enough to avoid vulnerabilities in these years.

Both Revenue and Capital Accounts of the State government expanded during 2019-20 to 2023-24, with a remarkably rapid increase in capital expenditure; revenue expenditure increased by 1.5 times, while capital expenditure surged by 3.1 times. Specifically, revenue expenditure grew

from Rs. 1.26 lakh crore in 2019-20 to Rs. 1.91 lakh crore in 2023-24. In contrast, capital expenditure rose from Rs. 0.20 lakh crore in 2019-20 to Rs. 0.62 lakh crore in 2023-24. As a result, the share of capital expenditure as a percentage of total expenditure increased from 14 percent in 2019-20 to 24 percent in 2023-24 (Chart 2.2).

2.1 Overview of Financial Position

The financial position of the State government over the past five years is summarised in Table 2.1. This table presents key fiscal indicators and their ratios as a percentage of Gross State Domestic Product (GSDP) for 2019-20 through 2023-24, along with the budgeted estimates for 2024-25. Out of the total expenditure of Rs. 2,52,082 crore in 2023-24, the revenue expenditure was Rs. 1,90,514 crore and Rs. 61,568 crore was the capital expenditure. The expenditure in revenue and capital accounts has increased by 3.6 percent and 28.5 percent, respectively, in 2023-24 over 2022-23.

The receipt in the revenue account was Rs. 1,93,347 crore in 2023-24, 12.0 percent higher than the previous year. As a result, there was a surplus of Rs. 2,833 crore in the revenue account in 2023-24. This surplus was used as the capital expenditure. Receipt in the capital account of the State government was Rs. 60,313 crore in 2023-24, 24.8 percent higher than that in 2022-23. The pattern of receipt and expenditure in the revenue and capital accounts of the State government in recent five years, from 2019-20 to 2023-24, is illustrated in Chart 2.3. As a result of the efforts to increase capital expenditure, the gap between receipts and expenditures in the capital account has decreased over the years. Similarly, the difference between receipts and expenditures in the revenue account has not only reduced, but there has also been a surplus in 2023-24 which could be utilised in the capital account.

The Gross Fiscal Deficit (GFD) of the State government in 2023-24 was Rs. 35,660 crore, which is 20.4 percent less than the GFD of Rs. 44,823 crore in 2022-23. The Primary deficit also decreased by 39.1 percent to Rs. 18,054 crore in 2023-24 from Rs. 29,640 crore in 2022-23. The total borrowing of the State government was Rs. 60,218 crore in 2023-24. The State government made a repayment of Public Debt amounting to Rs. 22,979 crore in 2023-24, which is 60.1 percent higher than the previous year. The outstanding debt of the State government was Rs. 3,32,741 crore in 2023-24.

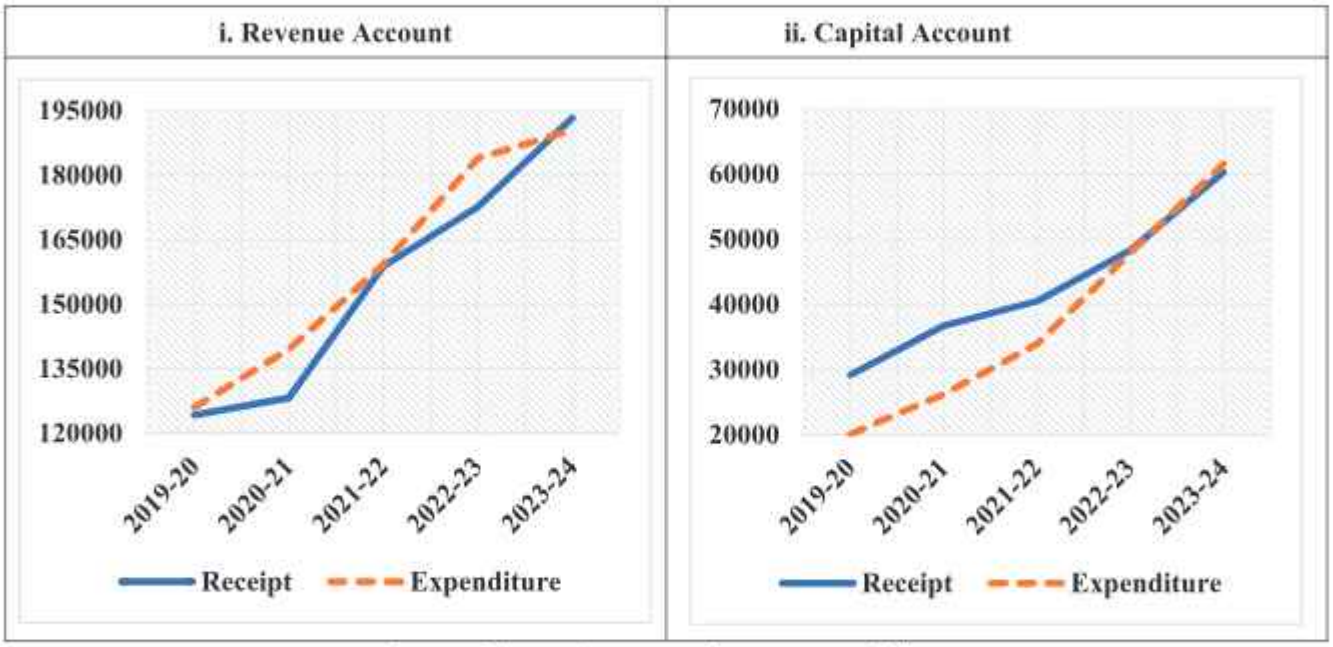
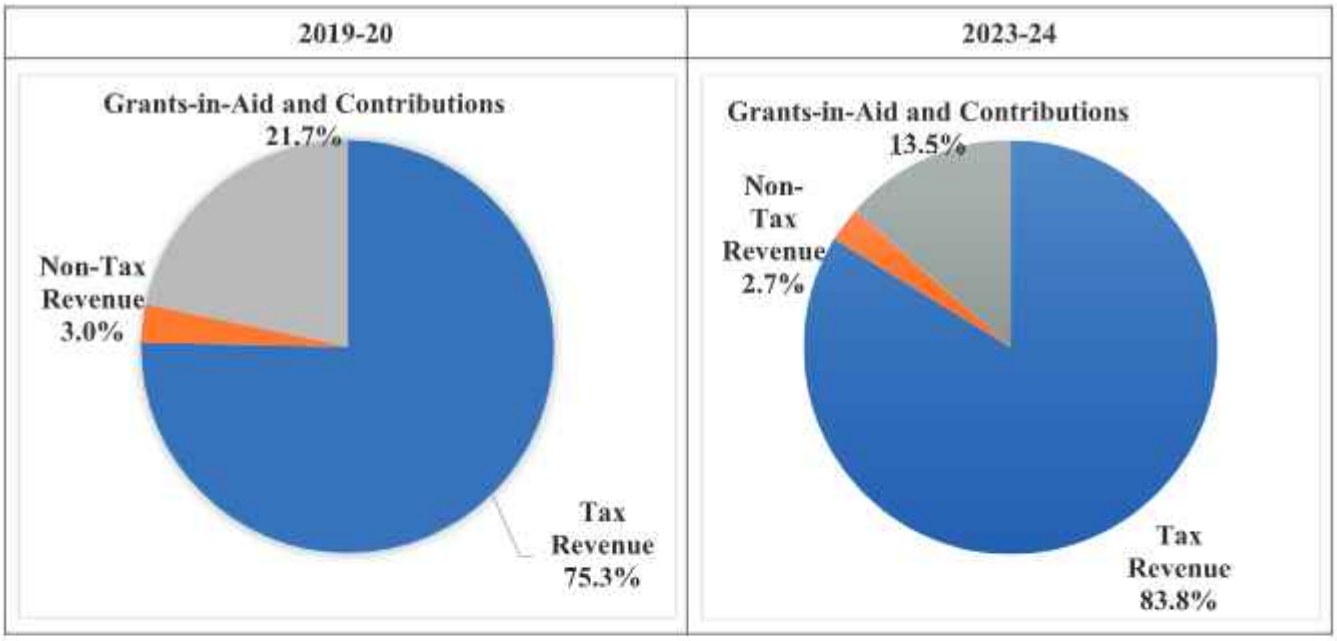
Chart 2.3 : Revenue and Capital Accounts of Bihar Government (2019-20 to 2023-24)

(Rs. crore)



Source : Finance Accounts, Government of Bihar.

Chart 2.4 : Composition of the Receipts in Revenue Account of Bihar Government (2019-20 and 2023-24)



Source : Finance Accounts, Government of Bihar.

The changes in the composition of the receipts in the revenue account of the Bihar government from 2019-20 to 2023-24 are illustrated in Chart 2.4. The largest share of revenue receipts comes from tax revenue, followed by grants-in-aid and non-tax revenue. Tax revenue has increased significantly, from Rs. 93,564 crore in 2019-20 to Rs. 1,61,965 crore in 2023-24. As a result, the share of tax revenue in total receipts has grown from 75.3 percent to 83.8 percent during this period. Consequently, the shares of the other two components have also changed. In 2023-24,

grants-in-aid accounted for 13.5 percent of total receipts, while non-tax sources comprised 2.7 percent. By 2023-24, receipts from grants-in-aid have risen to Rs. 26,125 crore, and that from non-tax sources increased to Rs. 5,257 crore.

Chart 2.5 displays the share of expenditure on three major categories -- General Services, Social Services, and Economic Services, from the revenue account of the State government for the fiscal years 2019-20 to 2023-24. It should be noted that Grants-in-Aid by the State government has been minimal and is, therefore, not represented in the chart. Social Services account for the most considerable portion of the revenue expenditure, followed by General Services and Economic Services. In 2023-24, the shares for these components were 43.7 percent, 31.1 percent, and 25.2 percent, respectively.

From 2019-20 to 2023-24, the State government's revenue expenditure on Social Services rose significantly from Rs. 57,816 crore to Rs. 83,225 crore. The revenue expenditure on General Services increased from Rs. 41,628 crore to Rs. 59,218 crore, while spending on Economic Services from the revenue account went up from Rs. 26,571 crore to Rs. 48,071 crore during the same period. Additionally, interest payments — part of the revenue expenditure on General Services— grew from Rs. 10,991 crore in 2019-20 to Rs. 17,606 crore in 2023-24. This trend in interest payments from the revenue account is illustrated in Chart 2.6.

Chart 2.5 : Composition of the Expenditure in Revenue Account of Bihar Government (2019-20 to 2023-24)

(in percent)

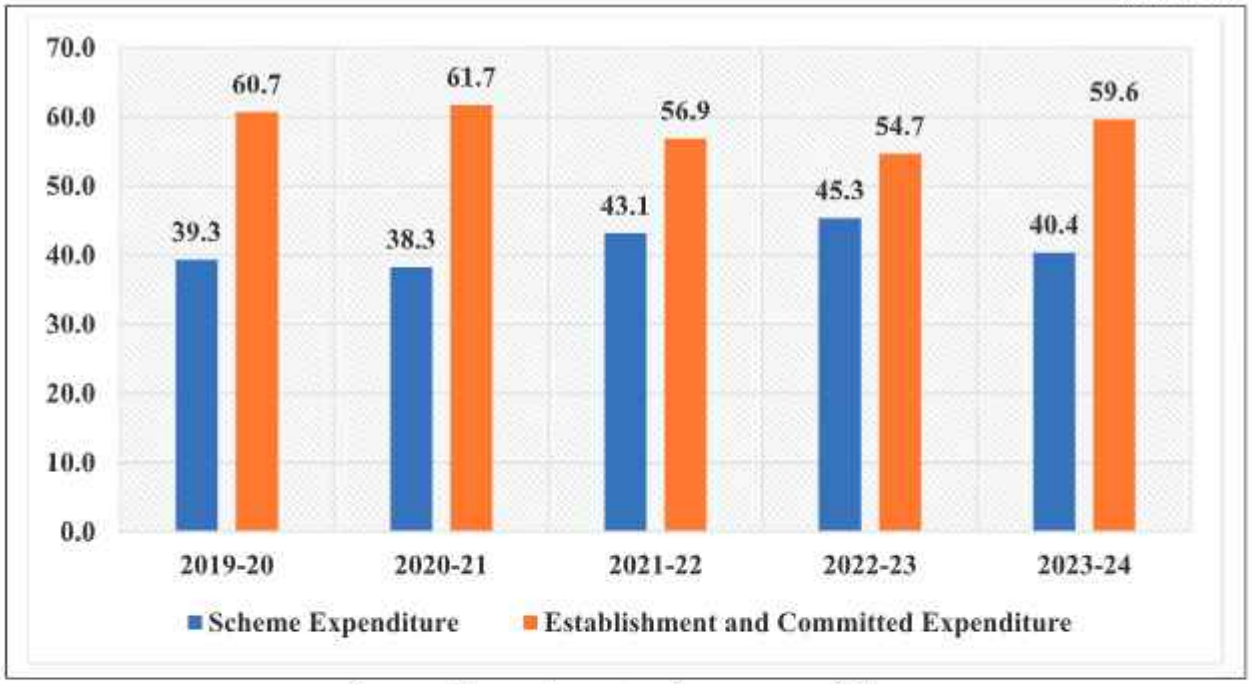
Chart 2.7 : Percentage Share of Scheme and Establishment & Committed Expenditure in Total Expenditure of Bihar Government (2019-20 to 2023-24)

(in percent)



Source : Finance Accounts, Government of Bihar.

The share of Scheme expenditure and Establishment and Committed expenditure in the total expenditure by the State government from 2019-20 to 2023-24 is illustrated in Chart 2.7. The share of Scheme expenditure has increased from 39.3 percent in 2019-20 to 40.4 percent in 2023-24. Consequently, the share of Establishment and Committed expenditure has decreased from 60.7 percent in 2019-20 to 59.6 percent in 2023-24. Over these five years, Scheme expenditure has risen

by 77.3 percent, while Establishment and Committed expenditure has increased by 69.5 percent. In the total expenditure of Rs. 2,52,082 crore for 2023-24, Scheme expenditure amounted to Rs. 1,01,835 crore, whereas Establishment and Committed expenditure was Rs. 1,50,247 crore.

The summary of the State government's various components of receipts and expenditures, expressed as a percentage of Gross State Domestic Product (GSDP) from 2019-20 to 2023-24, along with the budgeted estimate for 2024-25, is also presented in Table 2.1. The increase in economic activity has led to the expansion of the GSDP, which grew from Rs. 6.2 lakh crore in 2019-20 to Rs. 8.5 lakh crore in 2023-24.

The State government's commitment to development is evident in the rise of total expenditure, which increased from 23.7 percent of GSDP in 2019-20 to 29.5 percent in 2023-24. Notably, capital expenditure significantly increased, rising from 3.3 percent of GSDP in 2019-20 to 7.2 percent in 2023-24. The total capital outlay also increased commendably, rising by 2.3 percentage points from 2.0 percent of GSDP in 2019-20 to 4.3 percent in 2023-24.

Regarding receipts, the revenue account of the State government increased from 20.1 percent of GSDP in 2019-20 to 22.6 percent in 2023-24. Tax revenue contributions rose by 3.8 percentage points, from 15.2 percent of GSDP in 2019-20 to 19.0 percent in 2023-24, while non-tax revenue receipts remained almost stable at 0.6 percent of GSDP, with the exception of a higher level of 1.0 percent of GSDP in 2020-21. Additionally, receipts in the Capital account increased from 4.7 percent in 2019-20 to 7.1 percent in 2023-24. In 2023-24, Scheme expenditure constituted 11.9 percent of GSDP, while Establishment and Committed expenses accounted for 17.6 percent of GSDP.

The Revenue account recorded a surplus of 0.3 percent of GSDP in 2023-24, thanks to the State government's prudent financial management. The primary deficit stood at 2.1 percent of GSDP, and total borrowing by the State government was 7.0 percent of GSDP, with public debt repayment at 2.7 percent of GSDP. Consequently, the outstanding debt of the State government was 38.9 percent, which has remained within the limit recommended for Bihar by the Fifteenth Finance Commission. Overall, the government has achieved fiscally sustainable socio-economic development at the current level of expenditure, and its financial management has been sufficiently flexible to mitigate vulnerabilities that could affect its borrowing capacity.

2.2 Fiscal Performance

The fiscal performance of the State government could be evaluated using three key indicators: sustainability, flexibility, and vulnerability. A state's finances are deemed sustainable if it can meet its expenditures without a sudden increase in outstanding debt. Important indicators for assessing

sustainability include the Balance from Current Revenue (BCR), interest ratio, growth rates of outstanding debt, total revenue receipts, and state' own revenue receipts.

Financial flexibility refers to a state's ability to increase revenue through various sources or by taking additional borrowing. Key indicators for measuring this flexibility include: the percentage of capital repayment compared to capital borrowing, the percentage of capital outlay compared to capital receipts, total tax receipts as a percentage of Gross State Domestic Product (GSDP), state's own tax receipts as a percentage of GSDP, state's own non-tax receipts as a percentage of GSDP, and outstanding debt as a percentage of GSDP.

Vulnerability indicators assess whether a state's finances are at risk, potentially hindering its ability to borrow from various lending sources. By analyzing a range of deficit-related metrics, these indicators provide valuable insights into the potential risks to the state's financial health.

A. Sustainability

Part A of Table 2.2 presents data on selected indicators used to assess the sustainability of the State government's expenditure from 2019-20 to 2023-24.

(i) **Balance from Current Revenue (BCR)** : A positive balance from the current revenue of the state finances in a year indicates that the State government has surplus funds from its revenues to meet the development expenditure. The State government in Bihar has consistently maintained a positive balance from current revenue over the years. The balance from current revenue was Rs. 38,333 crore in 2022-23 and Rs. 48,235 crore in 2023-24. The indicator suggests that state finances are presently sustainable.

(ii) **Interest Ratio** : The interest ratio is calculated by taking the net interest payments and dividing them by total revenue receipts, excluding interest receipts, grants-in-aid, and contributions. A sudden and significant increase in the interest ratio indicates a diminished ability of the State government to service new debt while still covering its revenue expenditures with its revenue receipts. The ratio has gradually risen from 10.0 percent in 2019-20 to 11.6 percent in 2024-25, suggesting that the State government's finances are currently sustainable.

(iii) **Growth in Outstanding Debt** : The State government's debt at the end of the year reflects its liabilities. A rapid increase in outstanding debt can challenge the sustainability of state finances. In 2023-24, the state's outstanding debt rose by 13.4 percent, which is lower than the 13.9 percent growth observed in 2022-23. Moreover, there has not been any sudden spike in the annual growth rate in the outstanding debt in recent years, indicating that the State government's finances are sustainable.

(iv) **Growth in Total Revenue Receipt** : The consistent growth in revenue receipts helps the State government meet its expenditure needs and reduce outstanding debt through higher repayments. In 2023-24, revenue receipts increased by 12.0 percent, following the rises of 8.7 percent in 2022-23 and 23.9 percent in 2021-22. These figures indicate that the State government's finances are currently sustainable.

(v) **Growth in State's Own Revenue Receipts** : An increase in revenue from the State's own sources enhances the fiscal capacity of the State government. It also reduces its dependence on central transfers and borrowings to meet expenditure needs. In the 2023-24 fiscal year, revenue from the State government's own sources rose by 11.3 percent, after a significant increase of 24.0 percent in 2022-23. The pattern of growth in revenue from the State's own sources indicate sustainability of the state finances.

B. Flexibility

Part B of Table 2.2 presents data on select indicators used to assess the sustainability of the State government expenditure from 2019-20 to 2023-24.

(i) **Capital Repayment / Capital Borrowings Ratio :** Capital repayment as a percentage of total borrowings reflects the portion of borrowed funds allocated to repayment each year, which means these funds cannot be used for asset creation by the State government. This ratio has steadily increased in recent years, reaching 41.7 percent in 2023-24.

(ii) **Capital Outlay / Capital Receipts Ratio :** The capital outlay as a percentage of total capital receipts reflects how much of these receipts is allocated to capital outlay in the state. For Bihar, this ratio has steadily increased, from 42.2 percent in 2019-20 to 60.4 percent in 2023-24. This upward trend indicates that the State government has prioritized spending a significant part of its capital receipts to promote long-term economic development through the increased capital outlay. The recent patterns also suggest that the State government's finances have remained flexible.

(iii) **Total tax receipt/ GSDP Ratio** : The revenue from tax constitutes a significant portion of the receipt in the State government's revenue account. An increase in this ratio gives the State government greater flexibility in managing its finances. Notably, the ratio has risen from 15.2 percent in 2019-20 to 19.0 percent in 2023-24. This trend indicates that the State government's financial situation has remained flexible.

(iv) **State's own Tax Receipts/ GSDP Ratio** : The State's own tax to GSDP ratio indicates the extent of revenue generated through its own tax sources for the given size of the economic

activities in the state. The increase in the ratio suggests that the State government has the flexibility to increase its expenditure. In addition, it also indicates a lower requirement for borrowing at the current level of expenditure. The ratio has consistently improved in recent years, from 4.9 percent in 2019-20 to 5.7 percent 2023-24, indicating that the State government's finances are flexible.

(v) **Debt Outstanding/ GSDP Ratio** : The outstanding debt of the State government as a proportion of the GSDP indicates the liability accumulated by the State government with respect to the value addition in the economy. The sudden and significant jump in the ratio suggests that the government's finances are under stress to meet the expenditure requirements. The outstanding debt as a percentage of its GSDP has come down from 39.0 percent in 2022-23 to 38.9 percent in 2023-24.

C. Vulnerability

Part C of Table 2.2 presents data on select indicators used to assess the sustainability of the State government's expenditure from 2019-20 to 2023-24.

(i) **Primary Deficit** : The Primary Deficit, defined as the gross fiscal deficit minus interest payments, is a crucial indicator for assessing the vulnerability of state finances. Interest payments made by the State government are related to liabilities incurred in the past. Therefore, the Primary Deficit helps evaluate the impact of the current policies of the State government on its finances. In the fiscal year 2023-24, the Primary Deficit of the State government decreased by 39.1 percent, dropping to Rs. 18,054 crore from Rs. 29,640 crore in 2022-23, indicating a positive development in the management of state finances.

(ii) **Revenue Deficit** : The deficit in the revenue account of the State government is calculated as the difference between receipt and expenditure in the revenue account. Due to prudent financial management, the State government achieved a revenue surplus of Rs. 2,833 crore in 2023-24, in contrast to a revenue deficit of Rs. 11,288 crore in the 2022-23.

(iii) **Fiscal Deficit** : The gross fiscal deficit of the State government shows the difference between the total revenue received and the total expenditure incurred during a financial year. The gross fiscal deficit of the State government has declined by 20.4 percent to Rs. 35,660 crore in 2023-24 from Rs. 44,823 crore in 2022-23.

The financial indicators suggest that the state finances in Bihar are sustainable, flexible, and not vulnerable, given the current level of expenditure.

Table 2.2 : Fiscal Performance Indicators for Bihar (2019-20 to 2024-25 BE)

2.3 Deficit Management

The gross fiscal deficit reflects the extent of the resource gap in fiscal management by the State government. It represents the total financing the State government needs, primarily obtained from its cash and investment balances with the Reserve Bank of India (RBI) and through borrowing. This financing is necessary to cover the excess of revenue and capital expenditures (including loans and advances) over revenue and non-debt receipts.

Table 2.3 presents the composition of the Gross Fiscal Deficit (GFD) for Bihar from 2019-20 to 2023-24, along with the budgeted figures for 2024-25. The data for the components of the fiscal deficit, namely revenue deficit or surplus, capital outlay, and net lending, are indicated in the table. The GFD of the State government was Rs. 35,660 crore in 2023-24, reflecting a 20.4 percent decrease compared to the previous year. In the fiscal year 2023-24, the revenue account recorded a surplus of Rs. 2,833 crore, while capital outlay reached Rs. 36,453 crore, and net lending amounted to Rs. 2,040 crore.

Notably, capital outlay constituted 102.2 percent of the GFD, indicating that a significant portion of the deficit financing in 2023-24 was allocated for creating essential infrastructure to support the long-term development of the state's economy.

Table 2.3 : Components of Gross Fiscal Deficit of Bihar (2019-20 to 2024-25 BE)

(Rs. crore)

Composition	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25 BE
Revenue Deficit	1784	11325	422	11288	-2833	-1121

Source : Finance Accounts and State Government Budget, Government of Bihar

The financing pattern of the fiscal deficit for the State government from 2019-20 to 2023-24, along with the budgeted figures for 2024-25, is presented in Table 2.4. The fiscal deficit in the consolidated account of the State government is financed through net borrowing, net public account activities, and changes in the cash balance. In 2023-24, the fiscal deficit was primarily financed through net borrowing, including loans from the Government of India and Financial Institutions, along with a small portion derived from utilising the cash balance. The net borrowing of the State government in 2023-24 amounted to Rs. 37,238 crore.

Table 2.4 : Financing of Gross Fiscal Deficit in Bihar (2019-20 to 2024-25 BE)

(Rs. crore)

Amounts (Rs crore)	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25 BE

Table 2.5 displays the Gross Fiscal Deficit (GFD) figures for the major states in India from 2021-22 to 2023-24. The figures for 2023-24 are based on Revised Estimates (RE), except for Bihar, for which actual numbers are available when preparing this document and included in the table. The data for 2024-25 are the Budget Estimates (BE). It is observed that Bihar's GFD has significantly decreased from Rs. 44,823 crore in 2022-23 to Rs. 35,660 crore in 2023-24. In contrast, the GFD figures have increased for most of the major states in India during this period, with the exceptions of Bihar, Punjab, and Haryana. Among these states, the reductions in GFD were 20.4 percent for Bihar, 10.7 percent for Punjab, and 1.2 percent for Haryana in 2023-24 over the previous year.

The Gross Fiscal Deficit (GFD) as a percentage of Gross State Domestic Product (GSDP) for major states in India from 2021-22 to 2023-24 is presented in Table 2.6. The figures for 2023-24

are based on Revised Estimates (RE), except for Bihar, for which actual numbers are available when preparing this document and included in the table. Data for 2024-25 represents the Budget Estimates (BE). Despite limited fiscal resources and increased expenditure demands, the GFD as a percentage of the state's GSDP for 2023-24 stands at 4.2 percent, lower than the 7.3 percent for Chhattisgarh, 6.1 percent for Himachal Pradesh and 4.4 percent for Andhra Pradesh.

Table 2.6 : Gross Fiscal Deficit of States as a Percentage of GSDP (2021-22 to 2024-25 BE)

State	2021-22	2022-23	2023-24 RE	2024-25 BE

The deficit or surplus in the revenue accounts of the major state governments in India from 2021-22 to 2023-24 is illustrated in Table 2.7. The figures for 2023-24 are based on Revised Estimates (RE), except for Bihar, where actual numbers were available at the time of drafting this report and are included in the table. The data for 2024-25 are from the Budget Estimates (BE). In 2023-24, the revenue account of the Bihar government reported a surplus of Rs. 2,833 crore. In contrast, several major states reported a deficit in their revenue accounts, including Jharkhand, Gujarat, Madhya Pradesh, Uttar Pradesh, Telangana and Odisha.

Table 2.7 : Deficit/Surplus in Revenue Account of States (2021-22 to 2024-25 BE)

(Rs. crore)

State	Revenue Deficit (+)/ Surplus (-)

2.4 Cash Management and Guarantees

The overall cash balance of the State government in a fiscal year consists of the following components: deposits with the Reserve Bank of India (RBI), investments held in a cash balance investment account, cash held by departmental officers, permanent advances for contingent expenditure with departmental officers, and investments of earmarked funds.

As of the end of the fiscal year 2023-24, the total cash balance and investments of the State government in Bihar amounted to Rs. 36,982.2 crore. A significant portion of this, Rs. 27,488.8 crore, was available as the General Cash balance. This included Deposits with the RBI totalling Rs. 726.7 crore and Rs. 26,762.1 crore as investment in the Cash Balance Investment account. Out

of the investments held in this account, Rs. 26,757.4 crore was invested in the securities of the Government of India, while Rs. 4.65 crore was invested in the securities of other State governments, as of March 31, 2024. The investments in the cash balance investment account generated an interest of Rs. 264.3 crore in 2023-24.

Additionally, the other cash balances and investments amounted to Rs. 9,493.4 crore. This figure includes Rs. 233.2 crore held as cash with departmental officers, Rs. 765.5 crore as permanent advances for contingent expenditure with departmental officers, and Rs. 8,494.7 crore as investments of earmarked funds.

The State government is required to maintain a minimum cash balance of Rs. 1.73 crore with the Reserve Bank of India (RBI). The government can finance the gap by obtaining Ordinary and Special Ways and Means Advances or Overdrafts if the balance falls below this minimum on any given day. The limit for Ordinary Ways and Means Advances to the State government is Rs. 425 crore, effective April 1, 2006. The RBI occasionally revises the limit for Special Ways and Means Advances. As a result of effective cash management, the State government has successfully maintained its minimum daily balance requirement with the RBI throughout the year and did not need to utilise any Ordinary or Special Ways and Means Advances.

The State government extends guarantees on principal repayment and interest payments on loans raised by Statutory Corporations, Government Companies, Local Bodies and Other Institutions. During the year 2023-24, the State issued guarantees of Rs. 26,359.34 crore and Rs. 7.75 crore were receivable towards guarantee commission from the Bihar State Food and Civil Supplies Corporation Limited. As a result, the amount of total outstanding guarantee was Rs. 28,040.95 crore (Principal: Rs. 26,715.26 crore and Interest: Rs. 1,325.69 crore) as on 31 March 2024. There were outstanding guarantees of Rs. 25,939.25 crore (Principal: Rs. 25,256.75 crore and Interest: Rs. 682.50 crore) as on April 1, 2023. During the year 2023-24, the State government issued guarantee of Rs. 26,359.34 crore.

The power sector in Bihar, which includes the Bihar State Power Transmission Company Ltd., South Bihar Power Distribution Company Ltd., and North Bihar Power Distribution Company Ltd., accounts for the largest share of outstanding guarantees provided by the State government in Bihar. By the end of the financial year 2023-24, the total outstanding guarantees to the power sector, comprising both capital and interest, increased by 33.9 percent, thus rising to Rs. 18,164.7 crore from Rs. 13,569.9 crore at the end of 2022-23. Additionally, the outstanding guarantees extended by the State government to the Bihar State Food and Civil Supplies Corporation also saw an increase, rising by 8.8 percent from Rs. 8,653.0 crore at the end of 2022-23 to Rs. 9,417.6 crore by the end of 2023-24.

2.5 Debt Management

This section provides an overview of the debt dynamics of the State government, focusing on borrowings and outstanding liabilities over the past five years. Table 2.8 presents the total outstanding liabilities of the State government, excluding guarantees, and details the composition of these liabilities for the period from 2019-20 to 2023-24. The budgeted estimate for 2024-25 is also included in the table. As of March 31, 2024, the outstanding debt of the State government amounted to Rs. 3,32,741 crore, which is 38.9 percent of the State's Gross State Domestic Product (GSDP).

Of the total outstanding debt at the end of the 2023-24 fiscal year, 84.2 percent was as public debt, which includes internal debt and loans and advances from the Government of India. Within the public debt, 84.3 percent came from the sources of internal debt, while 15.7 percent was from loans and advances from the Central government. The two major components of internal debt are market loans and loans from financial institutions. As of 2023-24, the outstanding liability from internal debt was Rs. 2,80,084 crore, which is 32.8 percent of the State's GSDP. Chart 2.8 illustrates the outstanding liabilities of the State government from 2019-20 to 2023-24.

Table 2.8 : Outstanding Liabilities by the State Government in Bihar (2019-20 to 2024-25 BE)

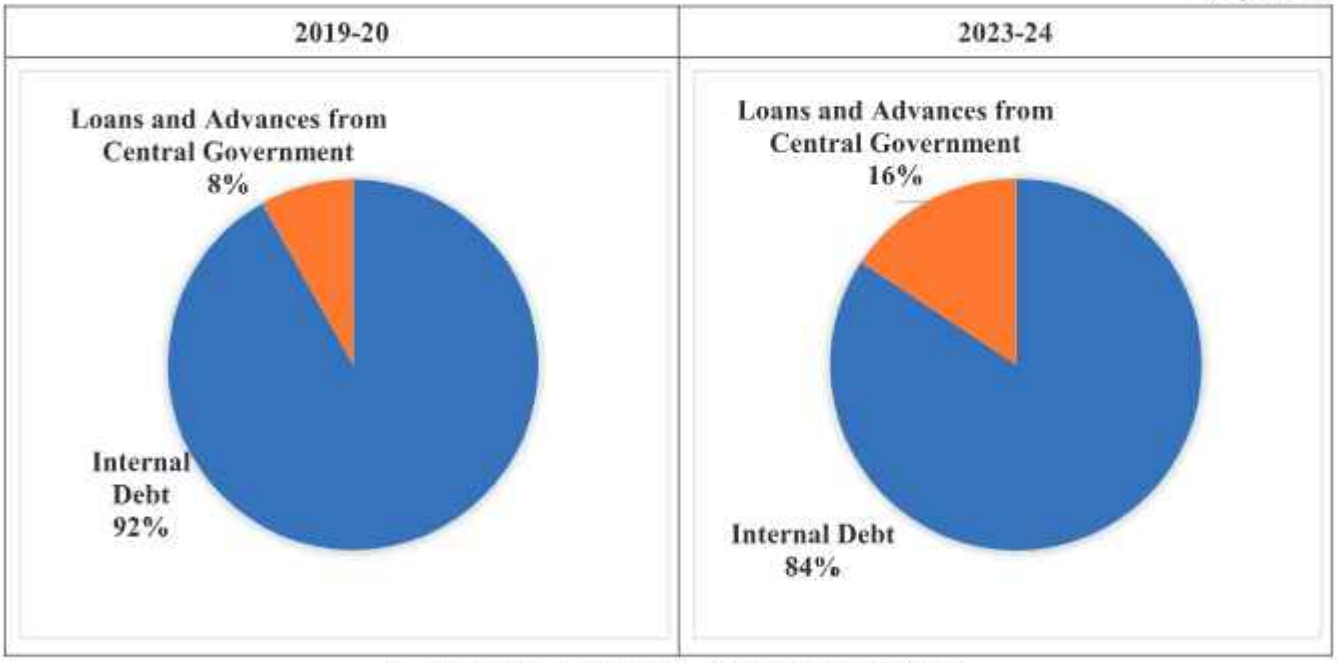
The Chart 2.9 illustrates the changes in the distribution of public debt between two major components: Internal Debt and Loans and Advances from the Central government, for the years 2019-20 and 2023-24. The share of Internal Debt in the total public debt of the State government decreased from 92 percent in 2019-20 to 84 percent in 2023-24. Consequently, the share of Loans and Advances from the Central government increased from 8 percent in 2019-20 to 16 percent in 2023-24.

Chart 2.9 : Components of Public Debt by the State Government (2019-20 and 2023-24)

(in percent)



Source : Finance Accounts, Government of Bihar

The composition of fresh borrowings under different public debt sub-heads for the fiscal years 2022-23 and 2023-24 is detailed in Table 2.9. The updated outstanding liabilities of the public debt at the end of these two fiscal years are also presented in the table.

The State government borrowed under only two categories of internal debt: market loans and loans from financial institutions. Borrowings through market loans reached Rs. 36,800 crore in 2022-23 and increased to Rs. 47,612 crore in 2023-24. Consequently, the outstanding liability from market loans rose from Rs. 1,84,275 crore on March 31, 2023 to Rs. 2,14,418 crore on March 31, 2024. Notably, the State government did not need to use any financing through Ways and Means Advances (WMA) from the Reserve Bank of India during these years.

The other significant source of borrowing was loans from financial institutions, which accounted for Rs. 1,329 crore in 2022-23 and Rs. 1,934 crore in 2023-24. As a result of these new borrowings and repayments, the outstanding liability from loans from financial institutions increased from Rs. 9,776 crore on March 31, 2023 to Rs. 9,862 crore on March 31, 2024. Additionally, fresh borrowings under the category loans and advances from the Central government totalled Rs. 10,155 crore in 2022-23 and increased to Rs. 10,672 crore in 2023-24.

The State government is obligated to pay interest on a part of its outstanding debt each year, and some of these liabilities are repaid over time. Additionally, the government earns interest from certain advances and investments. Table 2.10 shows the net public debt received by the State government during 2019-20 to 2023-24 after adjusting for interest payments, interest earnings, and debt repayments. The table also includes the budget estimate for 2024-25.

Chart 2.10 illustrates the interest payments and public debt repayments made by the State government over the last five years, from 2019-20 to 2023-24. The interest payments on the State government's outstanding liabilities increased from Rs. 10,991 crore in 2019-20 to Rs. 17,606 crore in 2023-24. However, since 2021-22, the State government has significantly raised its repayment of public debt, rising from Rs. 8,746 crore in 2021-22 to Rs. 22,979 crore in 2023-24. The state's repayment of public debt has increased by 223.2 percent between 2019-20 and 2023-24.

The summary of the State government's repayment of outstanding liabilities from 2020-21 to 2023-24, along with the budgeted estimate for 2024-25, is presented in Table 2.11. The discharge of internal debt has increased significantly, from Rs. 5,937 crore in 2020-21 to Rs. 21,439 crore in 2023-24. Similarly, the repayment of loans and advances from the Central government has grown from Rs. 944 crore in 2020-21 to Rs. 1,541 crore in 2023-24.

2.6 Resource Management

This section provides an overview of the resources available in the accounts of the State government, detailing various sources of revenue in recent years. The State government generates income from both tax and non-tax sources, and it also receives funds through transfers and grants-in-aid from the Central government.

Tax revenue includes funds collected from various taxes and duties imposed by the State government, such as the State Goods and Services Tax (SGST) and the State's share of the divisible pool of taxes and duties collected by the Central government. Non-tax revenues consist of the State government's own non-tax income and grants from the Central government.

Since July 2017, the Goods and Services Tax (GST) system has replaced many traditionally levied taxes. The GST framework has three components: State Goods and Services Tax (SGST), Central Goods and Services Tax (CGST), and Integrated Goods and Services Tax (IGST). The GST Council is responsible for determining the tax bases and rates for these components.

Individual states collect SGST, while IGST applies to taxes on interstate purchases and the supply of taxable goods and services, including imports. IGST revenue is collected by the Central government before being distributed to the respective states. CGST is part of the central pool of tax revenues, a portion of which is shared with the states based on the transfer formula recommended by the Union Finance Commission.

The receipt by the State government in its revenue account from the different sources for the years 2019-20 to 2023-24, along with the budgeted estimate for 2024-25, is summarised in Table 2.12. The two major components of receipt in the Revenue account are: State's Own Revenue and Receipts from Centre. Receipt from own sources of the State government includes tax and non-tax revenue. The receipt from the Central government in the Revenue account includes the State's share in the divisible pool of tax revenue collected by the Central government and the Grants-in-Aid received from the Central government.

In the fiscal year 2023-24, the total revenue receipt of the State government amounted to Rs. 1,93,347 crore, reflecting a 12.0 percent increase compared to the previous year. Of this total, 27.7 percent came from the State's own tax and non-tax sources. Revenue from the State's own tax sources rose by 9.9 percent, increasing from Rs. 44,018 crore in 2022-23 to Rs. 48,361 crore in 2023-24. Meanwhile, revenue from non-tax sources saw a significant increase of 27.1 percent, growing from Rs. 4,135 crore in 2022-23 to Rs. 5,257 crore in 2023-24. Additionally, out of the total revenue receipt of Rs. 1,39,729 crore for 2023-24 from the Central government, Rs. 1,13,604 crore was derived from the State's share of the Central government's divisible pool of tax revenue, while Rs. 26,125 crore came in the form of Grants-in-Aid from the Central government.

Table 2.12 : Components of Receipt in Revenue Account of the State Government (2019-20 to 2024-25 BE)

(Rs. crore)

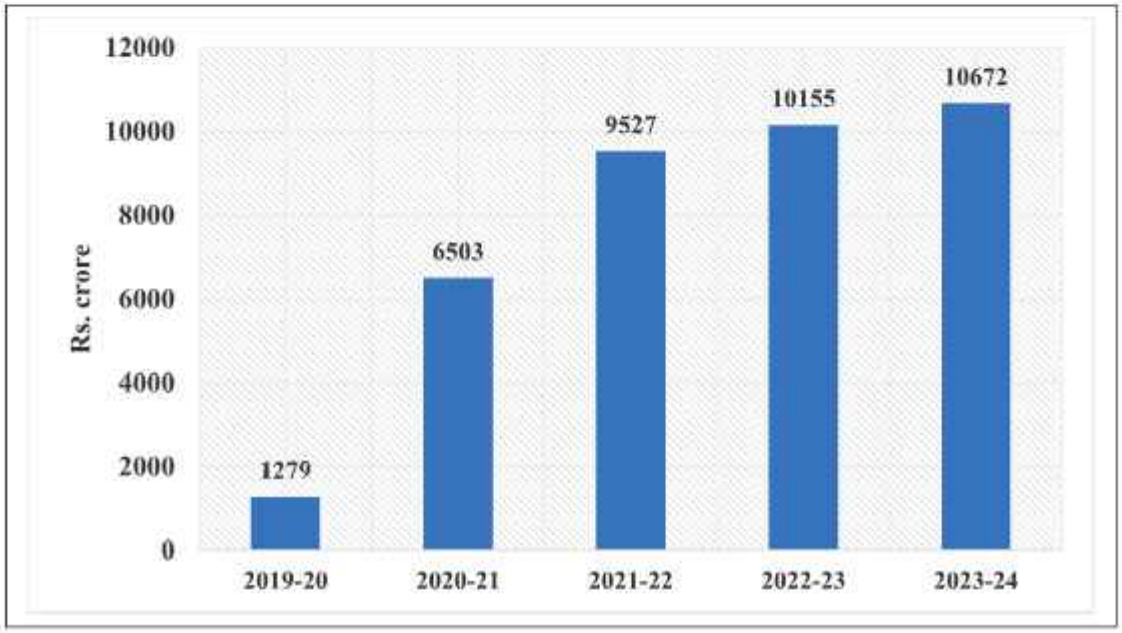
Source : Finance Accounts and State Government Budget, Government of Bihar

In addition to the sources of receipt in the revenue account, the State government also receives loans and advances from the Central government. Chart 2.11 illustrates the gross loans and advances to Bihar from the Central government from 2019-20 to 2023-24. There was a significant increase in these loans in 2020-21 to address the expenditure requirements of the State government, which were impacted by the Covid-19 pandemic. The loans jumped by 408.4 percent, rising from Rs. 1,279 crore in 2019-20 to Rs. 6,503 crore in 2020-21. This amount further increased by 46.5 percent to Rs. 9,527 crore in 2021-22. The loan from the Central government to Bihar was Rs. 10,672 crore in 2023-24.

Chart 2.11 : Gross Loan and Advances from the Central Government (2019-20 to 2023-24)



Source : Finance Accounts, Government of Bihar

The tax revenue collected by the State government from various sources for the years 2019-20 to 2023-24, along with the budgeted estimate for 2024-25, is presented in Table 2.13. Table 2.14 shows the percentage share of the components of the state's tax revenue from its own sources for these years, including the budget estimates for 2024-25. The primary source of tax revenue for the State government is the State Goods and Services Tax (SGST), which has made up over half of the tax revenue from its own sources in the past five years. Its share has notably increased from 52.4 percent in 2019-20 to 57.2 percent in 2023-24. Other significant sources of tax revenue include Taxes on Sales and Trade, which contributed 19.4 percent; Stamp and Registration Fees, accounting for 13.1 percent; and Taxes on Vehicles, which made up 6.9 percent in 2023-24. Additionally, there are two smaller components: land revenue, with a share of 1.2 percent, and taxes and duties on electricity, contributing 1.8 percent.

The State government's SGST (State Goods and Services Tax) receipts have seen a significant increase over the past four years, rising from Rs. 16,050 crore in 2020-21 to Rs. 27,678 crore in 2023-24 (Chart 2.12). In 2023-24, the second largest source of revenue from the State

government's own sources came from taxes on sales and trade, amounting to Rs. 9,371 crore. This was followed by Rs. 6,348 crore collected from stamp duty and registration fees. Additionally, the revenue from taxes on vehicles was Rs. 3,358 crore for the same period. The receipts from land revenue, and taxes and duties on electricity were Rs. 580 crore and Rs. 846 crore, respectively, in 2023-24.

Table 2.15 presents the State government's non-tax revenue from various sources from 2019-20 to 2023-24, along with the budgeted estimate for 2024-25. A significant portion of the non-tax revenue comes from the Non-Ferrous Mining and Metallurgical Industries and Interest Receipts. In the last two years, revenue collection from this segment has grown substantially. It increased by 54.6 percent, reaching Rs. 2,730 crore in 2022-23, followed by a further rise of 14.1 percent to Rs. 3,115 crore in 2023-24. The percentage share of revenue from the Non-Ferrous Mining and Metallurgical Industries in the state's total non-tax revenue from its own sources has risen from 42.5 percent in 2019-20 to 59.2 percent in 2023-24. In contrast, revenue from Interest Receipts has declined from Rs. 1,416 crore to Rs. 897 crore over the same period. However, there was a notable increase of 39.7 percent in Interest Receipts in 2023-24 compared to the previous fiscal year.

The revenue generated from tax and non-tax sources by the State government, expressed as a percentage of the state's Gross State Domestic Product (GSDP) for the years 2019-20 to 2023-24, along with the budget estimate for 2024-25, is presented in Table 2.16. The table also outlines the buoyancy of total receipts from own sources in the revenue account of the State government relative to the GSDP. Furthermore, it includes the buoyancy of the State government's own tax revenue in relation to the GSDP. Tax revenue from the State government's own sources has increased from 4.9 percent of the state's GSDP in 2019-20 to 5.7 percent in 2023-24. Meanwhile, revenue from non-tax sources has remained steady at 0.6 percent during these years, with an exception of 1.0 percent in 2020-21. The revenue from the state's own tax sources has positively changed with changes in the state's GSDP, demonstrating a buoyancy ratio of 1.2 in 2023-24. Additionally, the buoyancy of total revenue from the State's own sources was 1.4 in 2023-24.

Table 2.16 : Tax and Non-Tax Revenue from Own Sources of State Government as a Percentage of GSDP (2019-20 to 2024-25 BE)

Indicators	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25 BE
Own Tax Revenue as % of GSDP	4.9	4.9	5.2	5.9	5.7	5.6
Own Non-Tax Revenue as % of GSDP	0.6	1.0	0.6	0.6	0.6	0.8
Buoyancy of Total Revenue from own sources w.r.t. GSDP (Ratio)	-0.4	13.3	2.6	0.8	1.4	1.2
Buoyancy of State's Own Taxes w.r.t. GSDP (Ratio)	0.1	2.5	1.7	2.4	1.2	0.8

Table 2.17 presents the revenue collected by the Commercial Tax Department of the State government from 2019-20 to 2023-24, covering various tax categories that are not included under the Goods and Services Tax (GST). The total revenue collected by the Commercial Tax Department under these heads rose significantly, from Rs. 6,820 crore in 2019-20 to Rs. 10,437.3 crore in 2023-24. A substantial portion of this revenue comes from the value-added tax imposed by the State government, which increased from Rs. 6,188.5 crore in 2019-20 to Rs. 9,392.7 crore in 2023-24. Other significant contributors to the tax revenue include the Electricity Duty and Professional Tax, with contributions of Rs. 845.7 crore and Rs. 187.4 crore, respectively, in 2023-24. The collection from Professional Tax has demonstrated impressive growth over the past four years, with a notable increase of 15.8 percent in 2023-24 and 13.7 percent in 2022-23 compared to the previous year.

Table 2.18 displays the revenue received by the State government from collections of SGST (State Goods and Services Tax) and IGST (Integrated Goods and Services Tax) from 2019-20 to 2023-24. Additionally, it reports the GST compensation received by the State government during these years. When GST was implemented in the country, State governments were promised compensation for any shortfall in revenue, guaranteeing a 14 percent annual growth in their GST revenues for the first five years of implementation. The compensation for these shortfalls was provided from the collections in the GST compensation cess fund. This guarantee period for compensation ended on June 30, 2022. The total revenue from SGST, IGST, and the compensation has increased from Rs. 19,345.6 crore in 2019-20 to Rs. 28,171.5 crore in 2023-24. In 2023-24, the IGST collection accounted for Rs. 19,238.0 crore, representing 68.3 percent of the total revenue from these sources. The SGST collection, amounting to Rs. 8,535.4 crore, constituted 30.3 percent of the total receipts under these heads in 2023-24.

Table 2.19 presents the monthly revenue receipts from the SGST and IGST from April 2023 to September 2024. There is a notable month-to-month variation in the revenue generated through SGST and IGST. The collections for SGST and IGST were highest in March during the fiscal year 2023-24, amounting to Rs. 1,066.7 crore and Rs. 2,333.9 crore, respectively. Consequently, the total revenue from both SGST and IGST in March 2024 reached Rs. 3,400.6 crore, which accounted for 12.1 percent of the total collection in 2023-24. The remaining SGST compensation of Rs. 398.2 crore for the past financial years was received in September 2023.

The revenue generated from Stamp Duty and Registration Fees by the State government from 2019-20 to 2023-24 is detailed in Table 2.20. The most considerable portion of this revenue comes

from Non-Judicial Stamp Duty collected through bank challans, followed by fees collected for the registration of instruments. Overall, the total revenue from different forms of Stamp Duty increased from Rs. 3,590 crore in 2019-20 to Rs. 5,213 crore in 2023-24, representing a growth of 45.2 percent over these five years. Specifically, revenue from Non-Judicial Stamp Duty via bank challans was Rs. 4,363 crore in 2023-24. Additionally, the collection from fees on the registration of instruments rose from Rs. 1,052 crore in 2019-20 to Rs. 1,255 crore in 2023-24.

The district-wise revenue collection from Stamp Duty and Registration Fees, along with the target and achievement rates for 2023-24, are reported in Table 2.21. In this period, the State government collected Rs. 6,170.9 crore from Stamp Duty and Registration Fees based on 14,09,237 documents. This revenue was collected against a target of Rs. 7,000.0 crore, resulting in an achievement rate of 88.2 percent of the set target for the year. There is a significant variation in the average revenue collection per document across different districts. Overall, the average revenue receipt per document in the state for 2023-24 was Rs. 43,789. Patna recorded the highest average revenue per document at Rs. 1,08,936.0, while Kishanganj had the lowest at Rs. 22,745.8.

Table 2.21 : District-wise Revenue from Stamp Duty and Registration Fees (2023-24)

The State government incurs expenses for tax collection. An efficient tax system minimizes these costs while maximizing revenue collection. The costs associated with collecting revenue from State Goods and Services Tax (SGST) and Integrated Goods and Services Tax (IGST) have been minimal for State governments, as they do not need to invest significantly in managing the GST infrastructure. The cost of collecting revenue from two other major tax categories in the state: vehicle taxes and stamp duty and registration fees, covering the period from 2019-20 to 2023-24 is illustrated in Table 2.22. The percentage cost of collecting revenue from vehicle taxes has risen from 2.7 percent of total collections in 2019-20 to 4.7 percent in 2023-24. Conversely, the cost of collecting revenue from stamp duty and registration fees has decreased from 1.9 percent of total collections in 2019-20 to 1.6 percent in 2023-24.

Table 2.22 : Cost of Collection of Taxes (2019-20 to 2023-24)

Year	Collection (Rs. crore)	Expenditure on collection (Rs. crore)	Cost as a Percentage of Collection	Collection (Rs. crore)	Expenditure on collection (Rs. crore)	Cost as a Percentage of Collection

A comparison of the budget estimates for revenue receipts from both tax and non-tax sources of the State government for 2023-24, alongside the actual revenue collection for that year, is presented in Table 2.23. The total revenue from the State government's own tax and non-tax sources amounted to Rs. 53,618 crore, slightly below the budgeted estimate of Rs. 56,212 crore for 2023-24. This shortfall was primarily due to lower collections from the State Goods and Services Tax (SGST), non-tax revenue from non-ferrous mining and metallurgical industries, and interest receipts that did not meet the estimated targets. However, collections from stamp duties and registration fees exceeded the target by Rs. 48 crore. Additionally, taxes and duties on electricity were 61 percent higher than the budgeted target.

Table 2.23 : Variation between the Estimated and Actual Realisation of Tax and Non-Tax Revenue (2023-24)

2.7 Expenditure Management

The consolidated account of the State government is organised into two main categories: revenue accounts and capital accounts. Expenditures from these accounts are classified as revenue expenditure and capital expenditure. Furthermore, expenditures are organised into three primary functional categories: General Services, Social Services, and Economic Services. In addition to these categories, other types of expenditures include Capital Outlay, Repayment of Loans, and Grants to Local Bodies and Autonomous Institutions.

A summary of the State government's spending across the key broad categories from 2019-20 to 2023-24, including the budgeted estimates for these expenditures in 2024-25, is presented in Table 2.24. Additionally, Table 2.25 shows the year-on-year percentage change in expenditures by the State government across these categories during the same period.

Table 2.24 : Expenditure Pattern of State Government (2019-20 to 2024-25 BE)

(Rs. crore)

	Expenditure Head	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25 BE

Source : Finance Accounts and State Government Budget, Government of Bihar

The total expenditure by the State government has risen by 1.7 times over the five years from 2019-20 to 2023-24. It rose from Rs. 1,46,097 crore in 2019-20 to Rs. 2,52,082 crore in 2023-24. The growth rates for the past three years were 8.7 percent in 2023-24, 20.1 percent in 2022-23, and 16.6 percent in 2021-22. During this period, expenditure on social services accounted for the largest share of the total expenditure, representing 33.0 percent in 2023-24. This was followed by general services at 23.5 percent and economic services at 19.1 percent. The expenditure on Economic Services and General Services increased by 21.4 percent and 5.7 percent, respectively, in 2023-24. Chart 2.13 compares the percentage composition of government expenditure across various categories for the years 2019-20 and 2023-24. The allocation of expenditure by the State government has changed during this period. However, the largest portion of this expenditure continues to be directed towards Social Services, followed by allocations for General Services and Economic Services.

The capital outlay has steadily increased over the last five years, rising from 8.4 percent of total expenditure in 2019-20 to 14.5 percent in 2023-24. There has also been a notable rise in the portion of expenditure allocated for the repayment of public debt, increasing from 4.9 percent in 2019-20 to 9.1 percent in 2023-24. The amount spent on repayment of public debt rose by 64.1 percent in 2022-23 and 60.1 percent in 2023-24. Loans and advances extended by the State government accounted for 0.8 percent of the total expenditure in 2023-24.

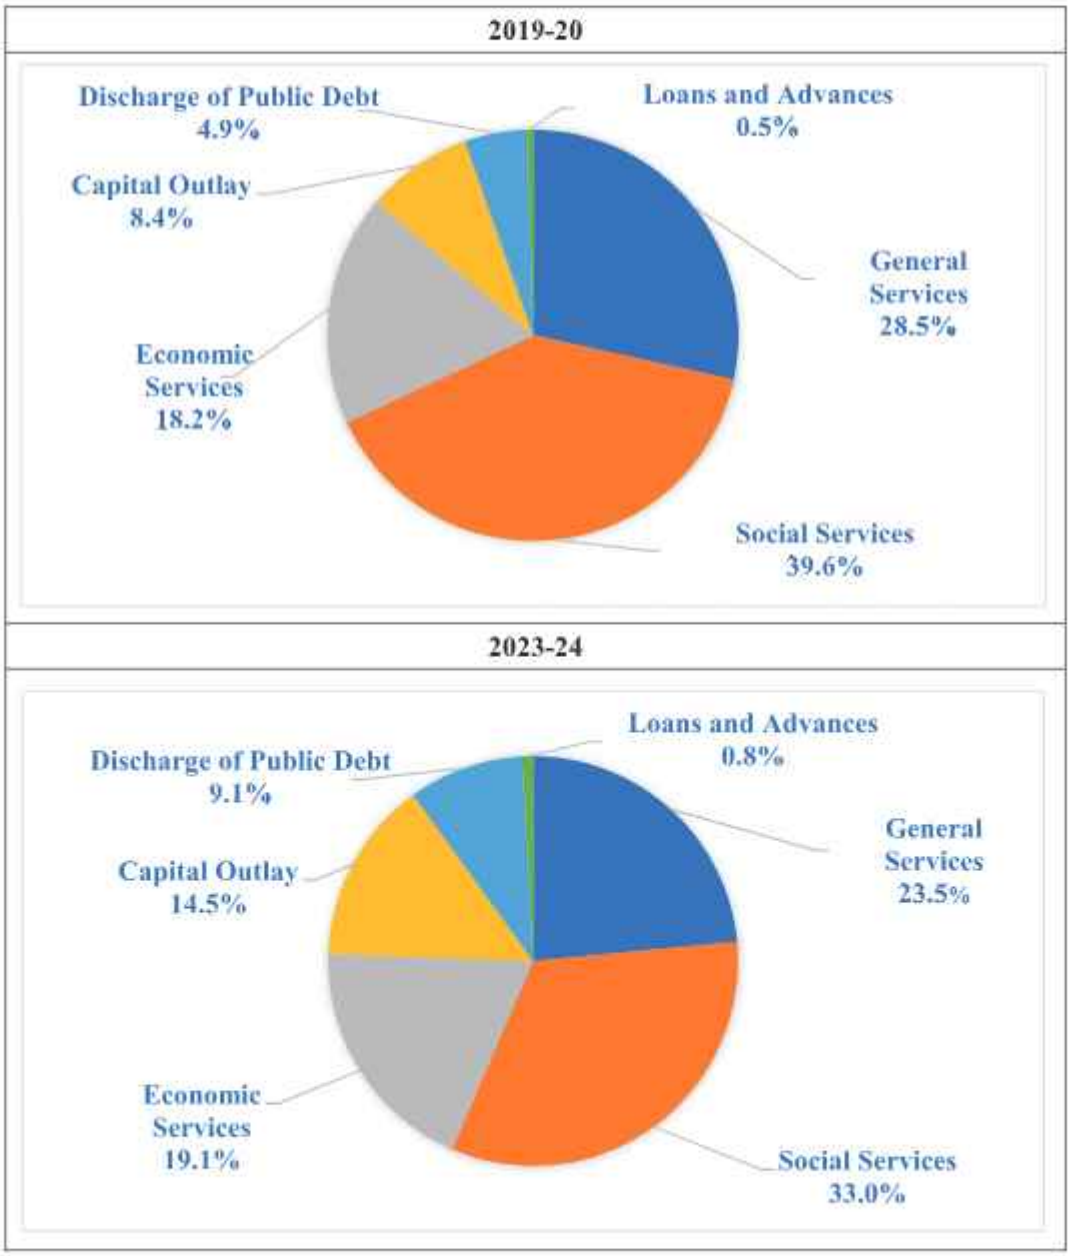
Chart 2.13 : Percentage Distribution of Government Expenditure (2019-20 and 2023-24)



Source : Finance Accounts, Government of Bihar

The allocation of total expenditure between revenue and capital expenditure is a part of expenditure management by the State government. Additionally, the expenditures made by the State government are also classified into Developmental and Non-Developmental categories. Table 2.26 presents the pattern of revenue and capital expenditure in Bihar from 2019-20 to 2023-24, along with the budget estimates for 2024-25. It also includes the year-on-year growth rates of these expenditures and their ratios as a percentage of the Gross State Domestic Product (GSDP).

From 2019-20 to 2023-24, the expenditure from the revenue account of the State government increased from Rs. 1,26,017 crore to Rs. 1,90,514 crore. Meanwhile, capital expenditure rose from Rs. 20,080 crore to Rs. 61,568 crore during the same period. In 2023-24, revenue receipts accounted for 76.7 percent of total expenditure, while revenue expenditure comprised 75.6 percent of total expenditure, resulting in a surplus in the revenue account.

In the fiscal year 2023-24, 66.8 percent of the total expenditure were allocated to development expenditure and 33.2 percent to non-development expenditure. Specifically, Rs. 1.69 lakh crore was categorised as Development expenditure, while Rs. 0.83 lakh crore as Non-development expenditure (Table 2.27). The distribution of expenditure between Revenue and Capital Accounts, classified as Development and Non-development expenditure, is presented in Table 2.28.

A portion of the State government's expenditure is allocated to interest payments on outstanding debt. At the same time, the State government generates interest income from the debt it issues and from its investments. Table 2.29 presents the State government's gross and net interest payments from 2019-20 to 2023-24, along with the budgeted estimate for 2024-25. In 2023-24, the gross interest payment by the State government was Rs. 17,606 crores, while the net interest payment amounted to Rs. 16,709 crores. The gross interest payment has increased significantly from Rs. 10,991 crores in 2019-20 to Rs. 17,606 crores in 2023-24.

A significant portion of the State government's expenditure is allocated to salaries for its employees and pensions for retired employees. Table 2.30 illustrates the expenditure on salaries

and pensions by the State government from 2019-20 to 2023-24. In recent years, these expenditures have consistently increased. Specifically, spending on salaries rose from Rs. 20,418 crore in 2019-20 to Rs. 28,386 crore in 2023-24. Concurrently, pension expenditures increased from Rs. 17,110 crore to Rs. 24,291 crore during the same period.

In 2023-24, salary expenditure experienced a notable jump of 14.4 percent compared to the previous year, while pension expenditure saw a more modest increase of 5.1 percent. In 2023-24, the combined expenditure on salaries and pensions accounted for 27.2 percent of the State government's total revenue receipts and 27.7 percent of its total revenue expenditures.

Expenditure on Social Services

The expenditure by the State government on Social Services focuses on sectors essential for the overall welfare of the people. The key areas included in Social Services expenditure are Education, Sports, Arts and Culture, Health and Family Welfare, Water Supply, Sanitation, Housing, and Urban Development. The most significant portion of the expenditure from the revenue account is allocated to these Social Services sectors. Table 2.31 illustrates the spending patterns by the State government on these major categories within Social Services during the years 2019-20 and 2023-24, along with the budget estimates for 2024-25.

Table 2.31 : Expenditure on Social Services (2019-20 to 2024-25 BE)

Within Social Services, expenditure on Education, Sports, and Arts and Culture constitutes the largest share. The expenditure on these heads has increased from Rs. 26,353 crore in 2019-20 to Rs. 45,481 crore in 2023-24. Salary expenditure accounted for 16.7 percent of the revenue expenditure, which was Rs. 40,890 crore in 2023-24. Additionally, the capital outlay for this sector rose from 0.8 percent of the total expenditure in 2019-20 to 6.6 percent in 2023-24.

The State government allocates a significant portion of its fiscal resources to water supply, sanitation, housing, and urban development. Expenditure on these heads has increased from Rs. 11,949 crore in 2019-20 to Rs. 18,908 crore in 2023-24. The salary component in these sectors remains lower compared to other categories of social services expenditure by the State government. In 2023-24, it accounted for only 1.4 percent of the total revenue expenditure of Rs. 17,228 crore. Additionally, the share of capital outlay in the total expenditure for these areas was 8.9 percent in 2023-24.

Expenditure on Economic Services

The State government prioritises expenditure in several key Economic Services sectors, which include Agriculture and Allied Activities, Irrigation and Flood Control, Energy and Power, Industry and Minerals, and Transport. The Energy and Power sector is vital for providing reliable electricity and supporting sustainable energy initiatives. The Industry and Minerals sector promotes economic development through industrial growth and responsible mineral resource extraction. The Transport sector is essential for enhancing connectivity and facilitating the movement of goods and people. In particular, the government's support for Agriculture and Allied Activities focuses on supporting farmers and boosting agricultural productivity. Irrigation and Flood Control initiatives are designed to effectively manage water resources, preventing flooding and ensuring adequate crop irrigation. Table 2.32 offers a comprehensive overview of the state government's expenditures in these sectors over five years, from 2019-20 to 2023-24, and includes budget estimates for the fiscal year 2024-25.

In the fiscal year 2023-24, the total expenditure on Economic Services reached Rs. 23,788 crore, reflecting a 16.9 percent increase from the previous year. Before this, there was a marked rise of 25.8 percent in 2022-23 and 23.2 percent in the year before that. Within Economic Services, the highest share of expenditure was allocated to Energy and Power, followed by the Transport sector. These two sectors are essential components of economic activities; consequently, the State government has allocated significant fiscal resources. In 2023-24, the State government spent Rs. 15,979 crore on Energy and Power and Rs. 13,935 crore on the Transport sector. Notably, the share of capital outlay in the total expenditure for the Transport sector has also increased from 37.8 percent in 2019-20 to 54.5 percent in 2023-24.

The State faces recurring challenges from floods, primarily caused by rivers originating in the neighbouring countries. To assist residents in mitigating these challenges, the State government allocates a substantial portion of its fiscal resources. In 2023-24, expenditure on irrigation and flood control increased by 87.1 percent over the previous fiscal year, totalling Rs. 7,382 crore. Of that amount, Rs. 5,876 crore was as capital outlay. The share of capital outlay in this sector has consistently risen over time, increasing from 38.9 percent in 2019-20 to 79.6 percent in 2023-24.

Source : Finance Accounts and State Government Budget, Government of Bihar

Agriculture and Allied Activities play a vital role in the state, as a large portion of the population relies on these activities for livelihood. Acknowledging the importance of this sector, the State government allocates significant fiscal resources to support individuals engaged in related economic activities. Expenditure in this sector has increased from Rs. 4,066 crore in 2019-20 to Rs. 5,171 crore in 2023-24, with the share of capital outlay at 2.7 percent in 2023-24. Meanwhile, expenditure on the Industry and Minerals sector has increased from Rs. 813 crore in 2019-20 to Rs. 2,872 crore in 2023-24, with capital outlay constituting 25.1 percent of this expenditure in 2023-24.

Table 2.33 presents the per capita expenditure by the State government across various categories, including Social Services, Economic Services, and General Services, from the fiscal year 2019-20 to 2023-24, along with the budgeted estimates for 2024-25. The population figures used in these analyses are projections based on the 2011 census. In 2023-24, the per capita expenditure for Social Services, Economic Services, and General Services was Rs. 7,010, Rs. 5,525, and Rs. 4,954, respectively.

Table 2.33 : Per Capita Expenditure on Social, Economic and General Services (2019-20 to 2024-25 BE)

Source : Finance Accounts and State Government Budget, Government of Bihar

Specifically, per capita spending by the State government on Education, Sports, Arts, and Culture rose significantly from Rs. 2,108 in 2019-20 to Rs. 3,472 in 2023-24, marking a 65 percent increase over five years. Similarly, per capita Medical and Public Health spending also grew by 62 percent during this period, increasing from Rs. 614 in 2019-20 to Rs. 993 in 2023-24. The per capita expenditure on Water Supply and Sanitation saw a 45 percent rise, from Rs. 956 in 2019-20 to Rs. 1,443 in 2023-24. The per capita capital outlay by the State government jumped by 183 percent, increasing from Rs. 984 in 2019-20 to Rs. 2,783 in 2023-24.

Quality Parameters of Expenditure

An assessment of the quality of expenditure made by the State government could be done using some of the fiscal parameters. The select quality of expenditure parameters include: Ratio of capital outlay to total expenditure; Ratio of capital outlay to GSDP; Ratio of revenue expenditure on Social and Economic Services to GSDP; and Ratio of non-salary expenditure incurred on Social and Economic Services. The values of these parameters for the period 2019-20 to 2023-24 and the budget estimate for 2024-25 are presented in Table 2.34.

An increased proportion of capital outlay within government expenditure suggests a prioritisation of funds to support long-term growth. The pattern of capital outlay as a percentage of total expenditure and Gross State Domestic Product (GSDP) is illustrated in Chart 2.14. The share of capital outlay in the State government's total expenditure rose from 8.4 percent in 2019-20 to 14.5 percent in 2023-24. Additionally, capital outlay increased from 2.0 percent of the state's GSDP in 2019-20 to 4.3 percent of GSDP in 2023-24. A significant improvement in these quality measures of expenditure has been observed over the past five years.

Revenue expenditure on social and economic services has grown from Rs. 84,387 crore in 2019-20 to Rs. 1,64,208 crore in 2023-24. There is a notable increase of 5.5 percentage points in the ratio of revenue expenditure on social and economic services as a percentage of state's GSDP during this period (Chart 2.15). The expenditure as a percentage of GSDP climbed from 13.7 percent in 2019-20 to 22.3 percent in 2023-24, with a substantial jump in 2021-22, reaching 23.6 percent compared to 15.1 percent in 2020-21. Furthermore, the non-salary component of revenue expenditure on social and economic services rose from 86.4 percent in 2019-20 to 90.5 percent in 2023-24. Conversely, salary expenditure as a percentage of revenue expenditure on social and economic services consistently decreased from 13.6 percent in 2019-20 to 9.5 percent in 2023-24. Overall, these patterns illustrate an improvement in the quality of expenditure by the State government in recent years.

Table 2.34 : Quality Parameters of Expenditure (2019-20 to 2024-25 BE)

Expenditure Head	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25 BE

A summary of the percentage distribution of the receipt and expenditure in the consolidated fund of the State government for the years 2022-23 and 2023-24, along with the budgeted figures for 2024-25, is presented in Table 2.35. In 2023-24, the total receipts comprised 23.7 percent as capital receipts and 76.3 percent as revenue receipts. Of these total receipts, 63.9 percent came from tax revenue, 10.3 percent from grants-in-aid and contributions, 2.1 percent from non-tax revenue, and 23.7 percent from public debt. Notably, the share of both receipts and expenditures in the capital account has increased over these years.

On the expenditure side, the allocations to General Services, Social Services, and Economic Services represented 23.5 percent, 33.0 percent, and 19.1 percent of the total State government expenditure in 2023-24, respectively. Additionally, the share of capital outlay in total expenditure rose from 13.6 percent in 2022-23 to 14.5 percent in 2023-24. Likewise, the share of public debt discharge increased from 6.2 percent to 9.1 percent during the same period. Overall, the State government's distribution of receipts and expenditures in 2023-24 reflects prudent fiscal management, emphasising support for the state's long-term economic growth.

CHAPTER - III

AGRICULTURE AND ALLIED SECTORS

Abstract

Agriculture remains the backbone of Bihar's economy, employing over 75 percent of the population and making significant contributions to the state's GDP. With its fertile soil, abundant water resources, and favourable climate, Bihar produces a variety of crops, such as rice, wheat, maize, pulses, sugarcane, jute, and oilseeds. The state is also a leading producer of horticultural products such as mango, makhana, and litchi. To enhance agricultural production and yield, the State government adopted the Fourth Agriculture Road Map (2023-2028), which focuses on modern infrastructure and allied activities. In 2022-23, the crop sector grew by 6.7 percent, fishing and aquaculture by 11.1 percent, and livestock by 2.7 percent. The agriculture, forestry, and fishing sector contributed 20.2 percent to the gross state value added (GSVA). To improve irrigation infrastructure, the State government has increased investment in agriculture with Rs. 1674.2 crore was allocated for 2023-24. Under the 'Har Khet Tak Sinchai ka Pani' programme, 707 schemes worth Rs. 308.73 crore were approved in 2023-24, restoring irrigation to 1,02,957 hectares of land. The state has also prioritized mechanization, by allocating Rs. 11900.0 lakh for subsidies on 108 types of agricultural equipment in 2023-24. Electricity subsidies for agriculture rose eight-fold between 2019-20 and 2023-24, and the amount of KCC loan disbursed was Rs. 7080.07 crore for farming in 2023-24. The Jaivik Corridor Yojana, aimed at promoting organic farming, has nearly achieved its target for 2023-24. In 13 districts, 20,000 acres of land were distributed to farmers under the second phase of the Jaivik Corridor Yojana and the State government allocated Rs. 3192.62 lakh for the purpose. The agriculture sector is steadily evolving, supported by government initiatives, to improve yield, infrastructure, and farmer welfare.

Introduction

The economic progress of a society cannot be achieved without a robust and prosperous agricultural sector. This sector provides the primary commodities necessary for economic development. Although the contribution of agriculture to national income has shown a declining trend over the years, it continues to support the livelihoods of a large section of the population in India, particularly in Bihar. The economy of Bihar remains agrarian and possesses immense untapped potential for growth. Recognising this potential, the State government is focused on the overall growth of the agricultural sector through long-term policy interventions. The most prominent among them has been the introduction of Agriculture Road Maps. Currently, the State

government has adopted the Fourth Agriculture Road Map for the period of 2023-2028, aiming to enhance production and productivity by creating modern infrastructure for agriculture and allied activities.

The annual growth rate of the crops, livestock, forestry and logging, fishing, and aquaculture sector, as presented in Table 3.1, indicates that crop sector has been the focal point of this growth. According to provisional estimates for 2022-23, the crop sector recorded a growth rate of 6.7 percent. Additionally, the fishing and aquaculture sector has experienced a growth rate of 11.1 percent during the same period. Although the growth rate for fishing and aquaculture has been consistently high over the years, it is important to note that this sector remains smaller. The growth rate of the livestock sector has fluctuated over time. According to provisional estimates for 2022-23, this sector grew by 2.7 percent. Table 3.2 indicates that the agriculture, forestry, and fishing sector contributes approximately one-fifth of the gross state value added (GSVA) annually. For 2022-23, this sector accounted for 20.2 percent of the GSVA. The crop production contributed 6.4 percent of the GSVA. While fishing and aquaculture exhibited high growth rates over the period, they accounted for only 1.9 percent of the GSVA produced in this sector.

Table 3.1 : Annual Growth Rate of Agriculture, Forestry, and Fishing Sector in Bihar, at constant (2011-12) prices (2019-20 to 2023-24)

(in percent)

Sector	2019-20	2020-21	2021-22	2022-23 (P)	2023-24 (Q)

3.1 Land-use Pattern

In Bihar, 54.6 percent of the land was utilised for crop production in 2022-23. Over the years, the net sown area has fluctuated within a narrow range. In 2022-23, the net sown area was 5112.8 thousand hectares, the largest extent of land under cultivation in the last four years (between 2019-20 and 2022-23). In 2022-23, the gross sown area was 7268.2 thousand hectares, registering a marginal fall from 7328.6 thousand hectares in 2021-22. Cropping intensity indicates the use of land for multiple crop production cycles within a single production year; a higher cropping intensity signifies more number of crops cultivated during a production year. In Bihar, over the past four years (2019-20 to 2022-23), cropping intensity has not changed much. District-wise disaggregation suggests that, in Buxar and Bhojpur districts, more than 80 percent of the geographical area was utilised for crop production. The cropping intensity was highest in Supaul at 1.82, followed by Jehanabad at 1.75 in 2022-23 (for details see Table A 3.1).

Table 3.3 : Land-use Pattern in Bihar (2019-20 to 2022-23)

(Area in '000 hectares)

Sl. No.	Land Use	2019-20	2020-21	2021-22	2022-23
1	Geographical Area	9359.6	9359.6	9359.6	9359.6
2	Area under Forest	621.6	621.6	621.6	621.6
3	Land not available for cultivation				
	(a) Barren and Unculturable Land	431.7	431.7	431.7	431.7
	(b) Land put to Non-agricultural use	1734.1	1750.7	1749.4	1746.4

	Cropping Intensity	1.44	1.44	1.45	1.42

Source : Directorate of Economics and Statistics, GoB

Land is the most crucial factor of production and has historically been controlled by men in Indian society, with Bihar being no exception. In 2015-16, out of 16,412 thousand holdings in Bihar, women controlled only 2,297 thousand holdings, which constituted 14 percent of the total. In terms of area, women controlled only 892 thousand hectares out of 6,457 thousand hectares in 2015-16. Nevertheless, between 2010-11 and 2015-16, the area of operational holdings under female control increased by 5.1 percent. Another significant characteristic of the distribution of operational holdings in Bihar is the predominance of marginal (less than one hectare) holdings. Out of 16412 thousand holdings, 14,970 thousand holdings belonged to the size class of marginal land holdings (less than one hectare) in 2015-16. In terms of area, 3,727 thousand hectares out of 6,457 thousand hectares were distributed in the size class of marginal land holdings. In fact, larger landholdings have been subdivided and reduced to marginal and small landholdings over the years.

Table 3.4 : Distribution of Operational Land Holdings by Land Size Class and Gender (2010-11 and 2015-16)

Size class	Gender	Number of Operational Holdings ('000)			Area of Operational Holdings ('000 hectares)		
		2010-11	2015-16	Percentage change	2010-11	2015-16	Percentage change
Marginal (<1 ha)	Male	12623	12835	1.68	3128	3165	1.18
	Female	2101	2116	0.71	533	555	4.13
	Total	14744	14970	1.53	3668	3727	1.61
Small (1-2 ha)	Male	824	820	-0.49	1029	1024	-0.49
	Female	120	119	-0.83	151	149	-1.32
	Total	948	943	-0.53	1185	1178	-0.59
Semi-Medium (2-4 ha)	Male	365	359	-1.64	945	933	-1.27

3.2 Crop Production

Cereal production continues to dominate the cropping pattern in the state. In 2023-24 agricultural year, 6357.9 thousand hectares of land were cultivated with cereals. Between 2022-23 and 2023-24 agricultural years, the area dedicated to cereals increased by 7.1 percent. Additionally, the area under pulses and oilseeds has seen significant growth. The area allocated to fibre crops, especially jute, rose substantially by 10.6 percent between 2022-23 and 2023-24. However, in 2023-24, the area under sugarcane cultivation has declined. Overall, the area under crop production has increased significantly.

Rice in Kharif and wheat in Rabi constitute the primary crop cycles in Bihar. In 2023-24, the total rice production was 9,522.9 thousand tonnes, with 90.1 percent being rice (aghani). Between 2022-23 and 2023-24, rice production has increased by 21.0 percent. Wheat is the main rabi crop in Bihar, with its total production in the state being 7,306.7 thousand tonnes in 2023-24, reflecting an increase of 10.7 percent over 2022-23.

In recent years, maize cultivation has attracted significant interest due to its high demand for various industrial uses. Between 2020-21 and 2023-24, maize production rose from 3,521.4 thousand tonnes to 5,864.9 thousand tonnes, an increase of 66.6 percent.

In contrast to rice, wheat, and maize, the production levels of other crops, such as oilseeds and pulses, were small and primarily produced for subsistence. Among the fibre crops, jute is the major crop produced in Bihar. Between 2022-23 and 2023-24, jute production has increased by 24.6 percent. The sugarcane production has declined marginally between 2022-23 and 2023-24.

Table 3.5 : Cropping Pattern in Bihar (2020-21 to 2023-24)

(Area in '000 hectares)

Crop	2020-21		2021-22		2022-23		2023-24	
	Area	Percent	Area	Percent	Area	Percent	Area	Percent
Foodgrains	6383.6	94.2	6443.8	94.3	6368.4	94.3	6825.8	94.5

The levels of crop production and productivity are determined by various factors. Rice yield has declined between 2022-23 and 2023-24. As for the area under cultivation, Aghani rice was predominantly grown in Bihar. In 2023-24, the yield level of Aghani rice has declined significantly from 4,199 kg per hectare in 2022-23 to 3,182 kg per hectare in 2023-24. However, the variability in rice yield across districts has declined between 2022-23 and 2023-24, as observed from the coefficient of variation across districts which decreased from 28 percent in 2022-23 to 22 percent in 2023-24. Among all the districts of Bihar, the contribution of Rohtas to total rice production was 9.5 percent, with the highest yield of 4,649 kgs per hectare in the state. Of the total land cultivated with rice in Bihar, 193.7 thousand hectares (or 6.2 percent) of land was operated in Rohtas (see Table A 3.2).

In Bihar, the yield of wheat has increased by 8.8 percent between 2022-23 and 2023-24 (see Table A 3.3). Furthermore, the variation in yields of wheat has been low across the districts. The coefficient of variation of wheat yield across districts was 18 percent in 2022-23 and that has further declined to 11 percent in 2023-24. Wheat yield was highest in Begusarai, at 4,012 kgs per hectare.

In Bihar, the majority of maize cultivation takes place in the rabi season. The yield of maize in Bihar has been at par with the all-India average. The maize produced in the rabi season yielded 7,541 kg per hectare in 2023-24, which is 9.0 percent less than the yield of maize in 2022-23. The variability in yield of maize across districts was higher compared to that of rice and wheat. Except for Rohtas and Aurangabad, maize was cultivated in all the districts. However, the four districts — Purnea, Araria, Katihar, and Kishanganj – contributed 53 percent of the total maize production in the state in 2023-24. The yield of maize has been relatively high in these four districts, along with Sheohar, Supaul, and Madhepura (see Table A 3.4).

In Bihar, the area under pulses cultivation increased from 433.9 thousand hectares in 2022–23 to 468.0 thousand hectares in 2023–24. However, yields of various pulses during the same period declined significantly (see Table A 3.5).

Another major crop in Bihar is sugarcane. The area under sugarcane cultivation had declined from 210.2 thousand hectares in 2022–23 to 202.2 thousand hectares in 2023–24. The yield of sugarcane experienced a slight decline, decreasing from 69 thousand kg per ha in 2022–23 to 67 thousand kg per ha in 2023–24. For district-wise details, see Table A 3.6.

3.3 Promotion of Horticulture in Bihar

The growth of the horticultural sector in Bihar has been encouraging. The adoption of various schemes to promote horticulture encourages farmers to take up fruit and vegetable production in Bihar. Area-wise, the most important fruit has been mango, followed by the banana in 2023-24. Out of 371.4 thousand hectares of land under fruit cultivation in Bihar, 164.6 thousand hectares (44.3 percent) consisted of mango orchards in 2023-24. Between 2022-23 and 2023-24, the growth of the area under mango was only 1.0 percent, while the total mango production has increased by 9.7 percent. This indicates higher yield of mango in 2023-24 compared to that in 2022-23. In 2023-24, litchi production was 345.1 thousand tonnes. The expansion of the area under litchi has been continuing in Bihar. Between 2022-23 and 2023-24, the area of litchi orchards has increased by 6.0 percent, whereas the total production has increased by 11.7 percent (see Table A 3.7).

Another high-value fruit grown in Bihar is makhana. In 2023-24, 27.8 thousand hectares of land were cultivated with makhana, and the total production was 56.4 thousand tonnes. Bihar accounts for 85 percent of the total makhana production of India. According to the State government's estimate, 50,000 households across ten districts (Darbhanga, Madhubani, Saharsa, Madhepura, Araria, Purnea, Katihar, Kishanganj, Khagaria, and Supaul) of Bihar are engaged at different nodes of the value chain of makhana production.

Under the aegis of the Mithilanchal Farmer Producer Organisation, the Government of India has awarded the Geographical Indication (GI) tag to Mithila makhana. It is well recognised that makhana production has the potential to become a major export product of Bihar. It is expected that the total export of makhana can be increased to 200 tonnes and the expected traded value is about Rs. 600 to 800 crore. Moreover, the fruits produced in Bihar, namely, mango, makhana, and litchi, have created niche markets outside Bihar. These crops realise high prices owing to their limited production but high demand.

The State government's support for horticulture has increased immensely in recent years, especially for makhana. The Directorate of Horticulture has implemented different schemes to promote makhana production in Bihar. The Directorate has implemented the Makhana Development Scheme through three components. First, the State government provides assistance for high-yielding variety (HYV) seed production to the Bhola Paswan Shastri Agricultural College, Purnea, and the National Research Centre of Makhana (NRC) at Darbhanga to ensure the supply of quality seeds for farmers. The state has provided a 100 percent subsidy for HYV seed production. To demonstrate improved seed, the State government has given a 75 percent subsidy to makhana farmers. The State government has provided a subsidy of 75 percent on a unit cost of Rs. 10 lakh to construct makhana storage houses with a capacity of 5 MT. This scheme aims to promote makhana cultivation, and enhance storage infrastructure for farmers. The State government has allocated Rs. 1081.97 lakh for the Makhana Development Scheme for 2023-24 to 2024-25.

Under the Agri Investment Promotion Policy, makhana production units have been given credit-linked capital subsidies to increase production capacity and to improve efficiency in the production process. Provisions of the additional subsidy were made for entrepreneurs of disadvantaged social groups (such as Scheduled Caste (SC), Scheduled Tribe (ST), Extremely Backward Class (EBC), women, and differently abled).

Under the Pradhan Mantri Formalisation of Micro Food Processing Enterprises Scheme, makhana was identified as 'one district one product.' This scheme benefits makhana producers in various ways: providing credit-linked capital subsidy, seed capital to SHG members, support for the common infrastructure, support for incubation centers, branding and marketing support. The support is limited to 50 percent of the total expenditure.

To promote tea in the Kishanganj district, the State government initiated the Tea Development Scheme. This scheme offers a 50 percent subsidy for new and existing tea estates, including support for mechanisation. To promote the holistic growth of the tea sector, a Center of Excellence for Tea is proposed to be established in the Kishanganj district. Under the Fourth Agriculture Road Map, Rs. 4,950.83 lakh has been approved for 2023-24 to 2024-25, of which Rs. 4,024.58 lakh is allocated for 2023-24.

Table 3.8 : Area and Production of Fruits in Bihar (2021-22 to 2023-24)

(Area in '000 hectare/production in '000 tonne)

Fruit	2021-22		2022-23		2023-24

Source: Directorate of Horticulture, GoB

The State government has also provided financial support to grow betel leaves in six districts (Nalanda, Nawada, Gaya, Aurangabad, Sheikhpura, and Vaishali). Under the Betel Development

Scheme, the State government has allocated Rs. 491.36 lakh for 2023-24 to 2024-25, under the State Plan. For 2023-24, Rs. 311.51 lakh has been allocated for expenditure. Furthermore, under the Fourth Agriculture Road Map (DPR), Rs. 469.0 lakh has been approved for establishing the Model Horticulture Center (Betel) in Bidupur, Vaishali. This fund is allocated for a period of five years from 2023-24 to 2027-28. Cultivation of different varieties of betel leaves in the northern part of Bihar is encouraged through this scheme.

Under the Fourth Agriculture Road Map and the scheme named 'Promoting Agriculture for Revolutionizing Agrarian Growth' (PARAG), the State government has initiated the Beekeeping and Honey Production Programme to enhance the quality of honey production. A provision of 75 percent subsidy for non-SC/ST producers (and a 90 percent subsidy for SC/ST producers) on bee boxes (with beehives), and honey extractors and food-grade containers have been made. This will create another viable earning avenue for the rural population, including those without land ownership. The State government has allocated Rs. 2440.92 lakh for 2023-24 under the state plan. Bee boxes, beehives, and honey extraction equipment are provided to the beekeepers.

Vegetable Production

The extent of land cultivated with vegetables was 894.01 thousand hectares in 2023-24, which was 0.5 percent more than the land used for vegetable cultivation in 2022-23. Among the vegetables, the largest area of land was cultivated with potatoes, accounting for 39.6 percent of the total land under vegetables cultivation in 2023-24. In 2023-24, 329.5 thousand hectares of land were cultivated with potatoes and 8842.6 thousand tonnes of potatoes were produced. Except for a few vegetables, almost all vegetables showed growth in production in 2023-24 compared to 2022-23. District-wise details of four major vegetables are presented in Table A 3.8.

Assessing market demand and supply, the State government has been providing financial assistance to producers of high-value vegetables, hybrid vegetables, and onions. Farmers producing these crops receive a 75 percent subsidy. For the first time, onion cultivation in kharif season has been promoted in 500 hectares of land with subsidy of 50 percent and a component for onion storage has been added with a subsidy of 75 percent. The provision of storage subsidy will facilitate farmers in timely storage and reduce the distress sales. Due to the increase in demand for Kufri Chipsona 1, a variety of potato, the Department is providing a 75 percent subsidy at a unit cost of Rs. 1.25 lakh per hectare for its production in selected potato-growing districts. Similarly, the farmers who are growing spices (coriander and fenugreek) can avail a 50 percent subsidy at a unit cost of Rs. 30,000 per hectare.

For 2023-24, the State government has allocated Rs. 1303.56 lakh to implement the Vegetable Development Scheme under the Bihar Horticulture Development Society. This scheme is being implemented across 23 districts in Bihar. These initiatives aim to boost vegetable production, improve storage infrastructure, and support farmers by reducing input costs and increase in profitability.

To encourage mushroom production, the State government has initiated the Mushroom Production Scheme under the National Agricultural Development Scheme. Mushroom cultivation has emerged as a lucrative agribusiness opportunity in Bihar in recent years. Bihar is now the leading producer of mushroom in the country. Considering the nutritional and economic benefits, the Department of Agriculture has made multiple efforts in the form of financial assistance. Mushroom kits (compost and spawn) are distributed to landless farmers at a 90 percent subsidy. Similarly, for mushroom production in thatch houses, a 50 percent subsidy has been announced. In view of year-round mushroom production under a controlled environment, 'agripreneurs' can avail themselves of a subsidy of Rs. 10 lakh (maximum) for air-conditioned mushroom production units. Likewise, they can also avail themselves of a subsidy of Rs. 10 lakh per unit and Rs. 7.5 lakh per unit for mushroom compost units and mushroom spawn units, respectively. The State government has approved a budget of Rs. 359.0 lakh for the Mushroom Production Scheme in Hut. One village per Krishi Vigyan Kendra is being developed as a Mushroom Village using paddy straw for mushroom production.

Table 3.9 : Area and Production of Vegetables in Bihar (2021-22 to 2023-24)

(Area in '000 hectares/ Production in '000 tonnes)

Vegetable	2021-22		2022-23		2023-24

Under the Integrated Horticulture Development Scheme, farmers cultivating yam, turmeric, and ginger on vacant or fallow land (0.30 hectare or more) are reimbursed for expenses on seeds and organic inputs. The programme is being implemented in 12 districts in Bihar. Training, seminars, and workshops are organised to enhance farmers' knowledge and skills in cultivation of crops. In 2023-24, Rs. 1,086.22 lakh was made available for this scheme.

Flower Production

Commercial production of flowers has taken place in some parts of Bihar. The most prominent flowers are marigold, rose, and jasmine. In 2023-24, 1.350 thousand hectares of land were cultivated with marigold, and the total marigold production was 12.8 thousand tonnes. Marigold production constituted 96.0 percent of the total flower production.

Table 3.10 : Area and Production of Flowers in Bihar (2021-22 to 2023-24)

(Area in '000 hectares and production in '000 tonnes)

Flower	2021-22		2022-23		2023-24

Source : Directorate of Horticulture, GoB

According to the data presented in Table 3.11, the most prominent schemes that are implemented to improve the horticulture landscape in Bihar are: the National Horticulture Mission, the Chief Minister Horticulture Mission, the Makhana Development Scheme, the Pradhan Mantri Krishi Sinchayee Yojana, and the Bihar Agricultural Investment Promotion Policy.

To promote collectivization and improve the marketing facilities for the horticulture crops, the Horticulture Cluster Development Scheme has been launched for guava, Indian gooseberry, lemon, wood apple, papaya, dragon fruit, strawberry, lemongrass, and marigold flower. Each cluster will cover a minimum area of 25 acres in a revenue village for cultivation of identified horticulture crops. The farmers are offered a subsidy of Rs. 2 lakh per acre for strawberry and dragon fruit and Rs. 1 lakh per acre for other horticulture crops. For horticulture marketing and export, a state-of-the-art integrated pack house has been constructed at the Agriculture Research Institute, Mithapur, Patna. It has been leased out to the operating agencies for commercial purposes.

Source : Directorate of Horticulture, GoB

The Department is also providing support to establish infrastructure such as shades, nets, and polyhouses for the cultivation of high-value crops under the Protected Cultivation Scheme. The amount of subsidy provided under the scheme is 75 percent. To cater to the long-standing demand for horticulture mechanisation, a 35 percent subsidy is also provided to the farmers for the purchase of small tractors and power tillers.

The Department of Agriculture has specifically intervened, through policy initiatives, for a dryland horticulture scheme exclusively for the South Bihar region. The State government has offered a

50 percent subsidy on the cultivation of Indian gooseberry, lemon, guava, and apple ber, and has additionally announced support for micro irrigation on a priority basis. The State government is providing an 80 percent subsidy to small and marginal farmers on drip and micro sprinkler systems under the Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) to promote the efficient and judicious use of water for irrigation.

To reduce the post-harvest loss and enhance market prices of horticultural crops, the State government is focusing on strengthening the cold chain infrastructure. The construction of cold storage allows farmers to choose the price at which they wish to sell their products, minimising distress sales. In the 12 districts without any cold storage facilities, the State has provided financial assistance for construction of new cold storage units. To meet the demands of small and medium 'agripreneurs', the Micro Solar Cold Room Scheme has been launched with the financial assistance of 50 percent. Considering the significant energy demand for operating cold storages, a 50 percent subsidy is proposed on the project cost of Rs. 35 lakh for conversion to solar power in existing cold storages.

For the quality production of horticulture crops in the state, the availability of quality planting material is critical. Two Centers of Excellence (CoE) — Chandi, in the Nalanda district for vegetables and Desari, in the Vaishali district for fruits — have been established to help facilitate the timely availability of good quality planting materials to the farmers. To meet the increasing demand for quality planting material, the Department of Agriculture is establishing plug-type nurseries across the state and is rejuvenating departmental nurseries. As part of the rejuvenation effort, the focus is also on maintaining and upgrading the pedigree of the mother orchards.

Besides various production interventions, crop-specific promotional awareness is crucial for the overall growth of the sector. Bagwani Mahotsav, Aam Mahotsav, and Makhana Mahotsav have been successfully organised by the Department of Agriculture. In light of the high demand and future export potential of makhana, the Department has organised a makhana-related promotional event and workshop in Bengaluru.

3.4 Animal Husbandry, Dairy Farming, and Fisheries

In Bihar, the total number of livestock has increased significantly in the last one and a half decades. Between 2003 and 2019, the number of livestock has increased by 35.5 percent. A similar pattern can also be observed in poultry; the number of poultry has increased by 18.3 percent in the same period (see Table 3.12).

Given the increase in the number of livestock, the production of milk, eggs, fish, meat and wool has been rising continuously (see Table 3.13). Between 2018-19 and 2023-24, milk production has increased by 30.9 percent, while egg production has increased by 95.1 percent. Fish production in the State has steadily increased from 6.02 lakh metric tonne in 2018-19 to 8.73 lakh metric tonne in 2023-24. Between 2018-19 and 2023-24, fish production has increased by 45.0 percent.

Dairy Farming

The Directorate of Animal Husbandry and Dairying also provides services that ensure health and productivity of animal resources. Table 3.14 provides information on three services: animal treatment, immunization, and artificial insemination. In the last five years, the number of animals receiving treatment and artificial insemination has increased significantly. In Bihar, each of six districts — Madhubani, Patna, East Champaran, Gaya, Samastipur, and Bhagalpur — reported the treatment of over two lakh animals during 2023–24. The highest immunization rates were observed in Gaya, Madhubani, and Purnea districts. Moreover, the highest levels of artificial

insemination were recorded in Samastipur, Muzaffarpur, Begusarai, and Bhojpur districts (see Table A 3.9).

Table 3.14 : Services for Livestock in Bihar (2019-20 to 2023-24)

Year	Animal Treated (lakh)	Immunization (lakh)	Artificial Insemination (lakh)
2019-20	45.47	615.77	36.76
2020-21	40.24	49.96	36.29
2021-22	36.80	217.23	38.15
2022-23	35.92	509.61	44.83
2023-24	55.57	430.89	44.76

Samagra Gavya Vikas Yojana : In 2024-25, under the state plane, the State government has approved Rs. 48.48 crore to establish dairy units (of 2, 4, 15, and 20) high-breed milk cattle/heifers. A provision of 75 percent subsidy has been made for the dairy farmers belonging to the EBC, SC, and ST, while other dairy farmers receive a 50 percent subsidy. Furthermore, for 15-20 cattle units, a subsidy of 40 percent is provided for all categories of beneficiaries for setting up units and 114 dairy units for milch cattle/heifers were set up. Under this scheme, between 2021-22 and 2023-24, 5,873 units were set up against the physical target of 7,194 units, and Rs. 102.56 crore was disbursed out of the target of Rs. 106.98 crore.

In 2024-25, approval has been granted for providing free training in modern scientific dairying to all sections of dairy farmers under the state plan. The estimated cost of the training programmes is Rs. 7.99 crore in 2024-25. Between 2021-22 and 2023-24, 18,401 stakeholders were trained in national-level institutes. For the training programmes, the State government has disbursed Rs. 10.61 crore out of the target of Rs. 11.64 crore.

Desi Gaupalan Protsahan Yojana : In 2024-25, under the Saat Nishchay-2, approval has been granted for establishing dairy units of 2 and 4 indigenous cows/heifers under the Desi Gaupalan Protsahan Yojana. The estimated cost of implementing the scheme was Rs. 25.46 crore. Under this scheme, a provision has been made to offer a 75 percent grant to the beneficiaries of EBC, SC, and ST communities, and a 50 percent grant to all others for establishing units with 2 and 4 indigenous cows/heifers units. In 2023-24, 1,214 units were established against the target of 1,545 units. To establish 1,214 units, the State government has disbursed Rs. 34.30 crore against the allocated fund of Rs. 37.05 crore in 2023-24.

In 2024-25, under Saat Nishchay-2, an insurance scheme for milch cattle has been approved, with an estimated cost of Rs. 2.99 crore. The scheme offers financial security through livestock insurance in the event of death, illness, or other reasons. In 2023-24, 3,947 milch cattle were insured, achieving 79 percent of the target. The expenditure amounted to Rs. 1.35 crore.

Formation of Milk Products Cooperation Committee : Under Saat Nishchay-2, approval has been granted to establish milk cooperative societies in 7,000 villages at a cost of Rs. 56.00 crore over four years (2021-22 to 2024-25). Of the proposed milk cooperative societies, 40 percent must be women-led committees. In 2024-25, 2,000 societies will be formed by COMFED, Patna, by spending Rs. 14.00 crore.

Under Saat Nishchay-2, approval has been given to expand the marketing system in urban and rural areas at a cost of Rs. 30.10 crore over four years (2021-25). For 2024-25, Rs. 7.53 crore has been allocated to establish 150 new marketing centers. COMFED, Patna, is setting up Sudha product sales counters at municipal, corporation, and block levels to ensure the availability of essential milk products.

In recent years, goat rearing has gained importance, and as a result, the Directorate has initiated different schemes to attract people to goat rearing. The State government has announced subsidies to establish goat farms of different sizes. In this direction, the State government has set the aim of establishing 590 goat rearing farms with different capacities and allocating Rs. 1755.99 lakh in 2023-24. Furthermore, the State government has made provisions for the distribution of female goats to families below the poverty line (BPL). In 2023-24, the State government has targeted the provision of three breedable female goats (per family) to 3,941 families through JEEVIKA. For this purpose, the expected expenditure is Rs. 522.85 lakh.

Table 3.15 : Details of Physical and Financial Achievements of Goat Rearing in Bihar (2019-20 to 2023-24)

Year	Name of Scheme	Physical (Number)	Financial (Rs. Lakh)
2019-20	Subsidy on establishments of Goat Breeding Farm of different capacities (100 Goats+5 Bucks, 40 Goats+2 Bucks and 20 Goats +1 Buck)	350	677.54
	Free distribution of 3 breedable female goats per BPL family through JEEVIKA	12883 families	1455.56
2020-21	Subsidy on establishments of Goat Breeding Farm of different capacities (40 Goats +2 Bucks, 20 Goats +1 Buck)	39	52.99
2021-22	No scheme was sanctioned during the year		
2022-23	Free distribution of 3 breedable female goat per BPL family through JEEVIKA	3984 (target)	473.121 (target)
2023-24	Subsidy on establishments of Goat Breeding Farm of different capacities (100 Goats+5 Bucks, 40 Goats+2 Bucks and 20 Goats +1 Buck)	590 (target)	1755.99 (target)
	Free Distribution of 3 breedable female goats per BPL family	3941 families (target)	522.85 (target)

Poultry Sector

The State government has also initiated various schemes to provide livelihood options to BPL families through poultry raising. The State government uses JEEVIKA's network to spread the scheme. In 2023-24, as per the specification of the scheme, BPL families received 28-day-old

chicks free of cost. The State government sets a target of reaching 13,860 families through this scheme in 2023-24 (see Table 3.16). For this purpose, the state government has targeted to spend Rs. 575.19 lakh in 2023-24.

Table 3.16 : Details of Physical and Financial Achievements for Poultry Sector (2019-20 to 2023-24)

Year	Name of Scheme	Physical (Number)	Financial (Rs. Lakh)
2019-20	Subsidy on establishment of 5000 and 10000 Capacity Layer Farm with feed mill	37	602.3
	Free distribution of 28-day-old 45 chicks per BPL family through JEEVIKA	38824 Families	774.47
2020-21	No scheme was sanctioned during this year		
2021-22	No scheme was sanctioned during this year		
2022-23	Free distribution of 28-day-old 45 chicks per BPL family through JEEVIKA	11948 (Target)	468.96 (Target)
2023-24	Free distribution of 28-day-old 45 chicks per BPL family through JEEVIKA	13860 families (Target)	575.19 (Target)
	Subsidy on establishment of 5000/10000 capacity layer farm	137	3223.30
	Subsidy on establishment of 3000 capacity broiler farm	100 (Target)	370 (Target)

Fisheries

The Government of Bihar is actively promoting sustainable fish farming and aquaculture practices by providing financial assistance in the form of subsidies to fishers, fish farmers, and entrepreneurs. The aims are to increase fish production to meet local demand and to generate surplus for export. Popular freshwater fish species in Bihar include Rohu, Catla, Mrigal, Silver carp, Grass carp, Common carp, and various species of catfish. The Directorate of Fisheries has implemented the following schemes.

Mukhyamantri Samekit Chaur Vikas Yojana : The objective of this scheme is to transform the 'chaur' areas of the State into aquaculture-based integrated farming systems using modern technology. Under this scheme, financial assistance of 70 percent of the unit cost is offered to fish farmers belonging to EBC, SC, and ST communities and 50 percent of the unit cost is provided to farmers of other categories. In 2023-24, 549.6 hectares of chaur have been developed, with an expenditure of Rs. 22.8 crore.

Table 3.17 : Physical, Financial Target and Achievements of Mukhya Mantri Samekit Chaur Vikas Yojana (2022-23 and 2023-24)

Year	Target		Achievement

Mukhyamantri Talab Matsyki Vikash Yojana: The aim of this scheme is to maximise the sustainable utilisation of ponds, tanks, and other water resources to increase fish seed production, as well as overall fish production and productivity. The components of the scheme include advance input supply scheme for fish farming in ponds, advance fish seed production, installation of tubewells and pumpsets, and renovation and development of finfish hatcheries. Under this scheme, fish farmers from EBC, SC, ST communities are provided with financial assistance covering 70 percent of the unit cost, while other communities receive 50 percent of the unit cost. The details of physical and financial achievements are presented in Table 3.18.

Table 3.18 : Physical and Financial Targets and Achievements of Mukhyamantri Talab Matsyki Vikash Yojana (2022-23 and 2023-24)

Scheme for Pond Construction in Plateau Area for Fish Farming: To promote and encourage fish farming in the plateau region of South Bihar, the state government has provided financial assistance to SC and ST fish farmers at a rate of 80 percent of the unit cost. In 2023-24, the state government spent Rs. 6.13 crore for the construction of ponds on 77.27 acres of land.

Table 3.19 : Physical and Financial Targets and Achievements of Scheme for Pond Construction in Plateau area for Fish Farming (2022-23 and 2023-24)

Year	Target		Achievement	
	Physical (Acre)	Financial (Rs. crore)	Physical (Acre)	Financial (Rs. crore)

Renovation of Private Pond : This scheme has been implemented under the Saat Nishchay 2, which aims to renovate private ponds to enhance their water retention capacity and strengthen the dykes. This initiative will boost fish production and productivity in the renovated ponds. In 2023-24, the state government has provided Rs. 1.45 crore for the renovation of ponds covering an area equivalent to 81.24 hectares.

Table 3.20 : Physical and Financial Targets and Achievements of Renovation of Private Pond Scheme (2022-23 and 2023-24)

Jalasaya Matsyki Vikas Yojana : The Bihar State Reservoir Fisheries Policy 2022 was approved by the state government. Under this policy, the Animal and Fisheries Resource Department has granted 'Fisheries Rights' in all the reservoirs of the State to increase fish production. To achieve this goal, the Jalasaya Matsyki Vikas Yojana has been sanctioned. The components of the scheme include the stocking of fish fingerlings in reservoirs, the installation of cages in reservoirs, and installation of pens in reservoirs. Farmers are offered financial assistance covering 70 percent of the unit cost. In 2022-23 and 2023-24, the state government has spent Rs. 2.98 crore for various components of the scheme.

Table 3.21 : Physical and Financial Targets and Achievements of Jalasaya Matsyki Vikas Yojana (2022-23 and 2023-24)

Year/Component		Target		Achievement	
		Physical (No.)	Financial (Rs. crore)	Physical (No.)	Financial (Rs. crore)

Talab Matsyaki Vishesh Sahayta Yojana : The primary objective of this scheme is to provide targeted financial assistance to farmers from SC, ST and EBC communities for the construction of rearing ponds, installation of tubewells and pumpsets, provision of fisheries inputs, construction of sheds, and installation of aerators, all under a comprehensive 'Package support' initiative. The successful implementation of this scheme is expected to generate livelihoods and create employment opportunities. Farmers belonging to SC, ST, and EBC communities are eligible for

financial assistance covering 70 percent of the unit cost. In 2023-24, the state government spent Rs. 6.89 crore to achieve a physical target of 152.69 acres.

Table 3.22 : Physical and Financial Targets and Achievements of Talab Matsyaki Vishesh Sahayta Yojana (2023-24)

River Ranching Programme : This programme has been approved for a duration of three years, with the goal of stocking 2.4 crore fish fingerlings in the Ganga river system. The initiative is being carried out in 22 districts of Bihar. Between 2022-23 and 2023-24, the state government has spent Rs. 719.97 lakh to ranch 1.29 crore fingerlings.

Table 3.23 : Physical and Financial Targets and Achievements of River Ranching Programme (2022-23 to 2024-25)

Year	Target				Achievement

Pradhan Mantri Matsya Sampada Yojana : The aim of the scheme is to enhance fish production and productivity, develop marketing and post-harvest infrastructure for the fisheries sector, and ensure aquatic health management. The total expenditure was Rs. 8879.68 lakh between 2020-21 and 2023-24, with both the Central and State governments sharing the costs to implement the scheme.

Table 3.24 : Physical and Financial Targets and Achievements of Pradhan Mantri Matsya Sampada Yojana (2020-21 to 2023-24)

Year	Sanctioned amount			Expenditure (Rs. lakh)

Fisheries Training Scheme : This scheme is being implemented with the objective of training fish farmers in capacity building techniques. Training sessions are conducted at training centres within the state and at ICAR institutes outside the state. In 2023-24, the state government has organized 6,502 training programmes, incurring an expenditure of Rs. 469.73 lakh for these initiatives.

Table 3.25 : Physical and Financial Targets and Achievements of Fisheries Training Scheme (2023-24)

Year	Physical target (No.)	Financial target (Rs. lakh)	Physical achievement (No.)	Financial achievement (Rs. lakh)
2023-24	7990	773.09	6502	469.73

Source : Directorate of Animal and Fisheries Resources, GoB

District-wise details of fish production and fish seed are presented in Table A 3.10. The total fish production increased by 14.5 percent, rising from 762 thousand tonnes in 2021–22 to 873 thousand tonnes in 2023–24. Madhubani, Darbhanga, and East Champaran are the top fish-producing districts in the state. In 2021–22, these three districts contributed nearly 30 percent (227 thousand tonnes) of the total fish production. This share remained constant in 2023–24, despite an overall increase in production compared to 2021–22.

3.5 Agricultural Inputs

This section deals with the availability and usage of inputs for agricultural production. Furthermore, we discuss the schemes and programmes of the State government and central sponsored schemes to make infrastructure and other facilities accessible to the farmers in the state.

Seed

The crop yield is directly determined by the quality and timely availability of seeds. The mismatch between the demand and supply of seeds in Bihar has decreased over the years. Given the cereal-dominated cropping pattern in Bihar, the gap between the requirement and supply of rice seeds has declined significantly in the last three years. For instance, in 2021-22, the demand for rice seeds was 495 thousand quintals, and the supply was 387.2 thousand quintals, resulting in a shortfall of 107.8 thousand quintals. The situation has improved significantly in 2023-24, when the gap between the supply of and demand for rice seed has declined to 64.6 thousand quintals. For wheat, maize, and other crops, the supply of seeds was greater than their respective demands. The seed replacement rate (SRR), an indicator of improved yield, has improved in Bihar. For kharif rice, SRR was 50.5 percent in 2023-24. The SRR for wheat was 42.6 percent. Among cereals, SRR was the highest at 100 percent for maize (rabi). The SRRs for pulses were low, at less than 30 percent in 2023-24.

The Bihar Rajya Beej Nigam Ltd. produces foundation and certified seeds for key kharif and rabi crops. Certified seeds are sourced from seed-producing farmers, progressive farmers, and government fields in limited quantities. The capitalist and progressive farmers in the state produce foundation seeds and it is sold to the producers. This entire activity is supervised by the corporation. The registration and certification of seed crop areas are managed through the seed certification agency, which also conducts final inspections to determine eligibility for seed purchases.

The corporation ensures that farmers receive a purchase price higher than the market rate or the minimum support price, whichever is greater. Since kharif 2009-10, seeds have been purchased based on cultivated seed rather than raw seed. Unsold seeds are disposed of through e-auction by NCDEX e Markets Limited (NeML), where NCDEX stands for the National Commodity and Derivatives Exchange Limited. Currently, 11,955 seed-producing farmers are registered with the Bihar Rajya Beej Nigam Ltd. Furthermore, in 2019-20, the corporation had achieved a total production of 1,66,995.91 quintals. Under the Mission 4.0, the target for increasing seed production was set at 4.00 lakh quintals. In 2020-21, 3.07 lakh quintals of seeds were produced, surpassing targets through enhanced crop production. Under the Mission, in 2021-22, the total seed collection reached 2.93 lakh quintals. For 2022-23 (kharif and rabi seasons), the corporation collected 2.13 lakh quintals of raw seeds. In 2023-24, the total seed production was 2.56 lakh quintals. The targeted seed production for 2024-25 is 5.48 lakh quintals.

The Bihar Rajya Beej Nigam Ltd. has five processing units at their regional offices, another 10 (one tonne per hour or TPH) processing plants have been installed in 10 seed multiplication farms and one non-operational processing unit in Bihta, Patna. The annual processing capacity of the corporation is 7.15 lakh quintals. The corporation has established its largest unit in Kudra, Kaimur district with processing capacity of 5.0 lakh quintals per year. The corporation has the storage capacity of 10.82 lakh quintals in 2024-25, which increased from 6.72 lakh quintals in 2022-23. To improve seed quality, the corporation has installed dehumidifiers at nine locations and seed dryers at six.

The Bihar Rajya Beej Nigam Ltd. supplies seeds to implement various schemes like the state plan, the National Food Security Mission, and the National Agricultural Development Plan. In 2023, for summer crops, 38,857 quintals of seeds were distributed to 5,48,984 farmers. For kharif 2023, the corporation has distributed 70,605 quintals of seeds to 2,86,055 farmers. Furthermore, for rabi 2023-24, 4,65,594 quintals of seeds were distributed to 11,18,667 farmers.

The Chief Minister Crash Seed Programme promotes the use of base/certified seeds for seed production. These seeds are supplied at a 90 percent subsidy. Adopting new seed varieties (of cereals, pulses, and oilseeds) across villages is facilitated by exchanging seeds produced within the village. In 2023-24, the achievements of the programme for rice and wheat seeds were 98.5 and 75.8 percent, respectively. In 2024-25 (up to September 2024), the Department of Agriculture has distributed 6,48,144 quintals of seeds among 20,99,263 farmers.

Fertiliser

In Bihar, fertiliser use has been increasing over the years. Total fertiliser use was 3085.7 thousand tonnes in 2021-22 and that has increased to 3867.1 thousand tonnes in 2023-24. This shows an increase of 25.3 percent over the two-year period. Of the total fertiliser used, almost two-third was urea. This indicates the overuse of urea during crop production. The data also suggest inter-season variation in fertiliser use. In 2023-24, the consumption of fertiliser per hectare of land in the kharif season was 177.7 kg and 211.1 kg in the rabi season, showing an inter-season gap of 33.4 kg.

The State government promotes integrated nutrient management, emphasizing the balanced application of organic, biological, and chemical fertilizers, with a recommended NPK ratio of 4:2:1. A state soil-testing programme supports this initiative. In 2022-23, the NPK ratio was 14.1:4.7:1, and 13.4:4.1:1 in 2023-24. Furthermore, fertilizer consumption per hectare has decreased from 207.0 kg in 2022-23 to 195.6 kg in 2023-24. District-wise details of different fertilizers' consumption are presented in Table A 3.11.

Table 3.28 : Fertilizer Consumption for Agriculture in Bihar (2021-22 to 2023-24)

('000 tonnes)

Farm Machinery

Farm mechanisation enhances both crop production, productivity and reduces crop duration. At the same time, it also reduces human drudgery in agricultural operations. Table 3.29 suggests that farmers purchased pump-sets for irrigation and threshers availing subsidy scheme in 2023-24. A large number of manually operated tools or implements were purchased in 2023-24.

The State government has approved Rs. 11,900.00 lakh for agricultural mechanisation in 2023-24. As per the provision, a 40 to 80 percent subsidy on 108 types of agricultural equipment is offered to farmers. To manage crop residue, 33 percent of the total fund was set aside to subsidise implements like different kinds of seeders, and straw reapers. Small and marginal farmers are eligible for an 80 percent subsidy (up to Rs. 800) to purchase small tools like hoes and spades. To encourage the agricultural machinery manufacturing in the state, a provision has been made in the Agricultural Mechanization State Scheme 2023-24. Under this scheme, a 10 percent additional subsidy is provided to farmers on the purchase of agricultural machinery manufactured by the eligible agricultural machinery manufacturers of Bihar. At least 18 percent of district funds are

allocated to EBC farmers, equal to the subsidy for SC and ST farmers. The scheme uses NIC-developed mechanization software for online applications, for processing through an online lottery system to ensure transparency.

Residential Training for Agricultural Equipment Repair

To train mechanics in agricultural equipment repair, Rs. 531.75 lakh has been approved under the Agricultural Mechanization State Scheme. Training is conducted at the Bihar Agricultural University, Bhagalpur and Dr. Rajendra Prasad Central Agricultural University, Pusa, Samastipur, and agricultural engineering workshops in Bhojpur, Muzaffarpur, and Purnea. The trainees receive 26-day residential training and are awarded a certificate along with a free toolkit worth Rs. 4200 upon completion. In 2023-24, 769 youths were trained through 32 training sessions.

Sub Mission on Agricultural Mechanization (SMAM) 2023-24

For the Sub Mission on Agricultural Mechanization, the Government of India allocated Rs. 3866.23 lakh (60 percent) and the State government Rs. 2577.48 lakh (40 percent), totalling Rs. 6443.71 lakh. Under the Custom Hiring Centre, Rs. 2000 lakh was allocated for 500 centres, with a subsidy of 40 percent (up to Rs. 4 lakh) on centres, costing up to Rs. 10 lakh. To establish the agricultural equipment bank in selected villages, the State government has allocated Rs. 1000 lakh for 125 agricultural equipment banks with an 80 percent subsidy (up to Rs. 8 lakh) on equipment costing up to Rs. 10 lakh. To establish the Special Custom Hiring Centre for Crop Residue Management, the State government has allocated Rs. 1044.00 lakh for 87 centres costing up to Rs. 20 lakh each with subsidy of Rs. 12 lakh (80 percent subsidy on equipment). These centres were opened in Patna and Magadh divisions to reduce crop residue burning. In 2023-24, to subsidise agricultural equipment, the total allocation was Rs. 2316.16 lakh for 20 types of agricultural equipment, in which the shares of the Central and State governments were Rs. 1389.70 lakh and Rs. 926.46 lakh, respectively. For the district-wise details of farm implements, see Table A 3.12.

Power Use

The use of energy in agriculture has increased over the years. As Table 3.30 suggests, in the total power supply, the share of power consumption in agriculture in the total power consumption has increased from 4.3 percent in 2019-20 to 17.6 percent in 2023-24. Considering the rise in power consumption in agriculture, the State government has installed dedicated feeders to ensure an uninterrupted power supply under the Deen Dayal Upadhyaya Gram Jyoti Yojana (DDUGJY). Under this scheme, 291 power substations and 1,354 dedicated agricultural feeders have been constructed.

The State government, under the Mukhyamantri Krishi Vidyut Sambandh Yojana (MKVSY), has provided electricity subsidies for the agricultural sector. Due to the increase in electricity connections for agriculture, the amount of subsidies has also risen tremendously, from Rs. 486.93 crore in 2019-20 to Rs. 3856.8 crore in 2023-24. Between 2019-20 and 2023-24, the amount disbursed for electricity subsidies has increased eightfold (see Table 3.32).

Table 3.30 : Power Use for Agricultural Purposes in Bihar (2019-20 to 2023-24)

Particular	2019-20	2020-21	2021-22	2022-23	2023-24

Agricultural Credit

Farmers require both short-term and long-term credit to invest in farming. They use short-term credit to cover inputs and other out-of-pocket expenditures during a cropping season. They require long-term credit to invest in capital goods, such as agricultural machinery, and to create infrastructure like irrigation facilities in the field, and buildings for agricultural purposes. Under the Kisan Credit Card (KCC) scheme, farmers receive short-term loans. In Bihar, over the years, the access to the KCC scheme has expanded. For instance, in 2019-20, 3,01,223 farmers had KCCs, and that number has increased to 4,68,896 in 2022-23. However, a marginal decline in the number of KCCs was observed in 2023-24. The total disbursement of KCC loans in 2019-20 was Rs. 3204.51 crore, which has increased to Rs. 7080.07 crore in 2023-24.

Bihar Rajya Fasal Sahayata Yojana

The Bihar Rajya Fasal Sahayata Yojana provides financial assistance to farmers for crop losses caused by natural calamities. The benefits of the scheme can be availed by Raiyats (self-cultivating landowners), non-Raiyats (those cultivating leased land), and others who cultivate both owned and leased land. The level of assistance depends on indemnity and threshold yields, calculated over the 70 percent indemnity level based on the seven-year average yield. The scheme covers the kharif crops (rice, maize, soybean, potato, brinjal, tomato, cabbage) and rabi crops (wheat, maize, gram, mustard, pigeon pea, sugarcane, onion, potato, brinjal, tomato, cabbage, chili). Farmers receive Rs. 7,500 per hectare (maximum of Rs. 15,000 for two hectares) for the yield loss up to 20 percent. In cases of yield loss exceeding 20 percent, the affected farmers receive Rs. 10,000 per hectare (maximum of Rs. 20,000 for two hectares). To prevent any leakage, the financial assistance is directly transferred to the farmers' bank accounts.

Irrigation

Irrigation is pivotal in crop production and in other related activities. The availability of irrigation increases crop production, productivity, and intensity. Major sources of irrigation include canals, tanks, various types of wells, etc. Table 3.35 indicates that groundwater irrigation has been the primary source of irrigation in Bihar. In 2022-23, irrigation through accessing groundwater using different types of wells was carried out in 64.1 percent of the gross irrigated area. Surface irrigation via canals was available in 30.3 percent of the gross irrigated area.

Table 3.35 : Source-wise Gross Irrigated Area in Bihar (2018-19 to 2022-23)

(Area in '000 hectares)

Year	Canal	Tank	Well			Other sources	All sources
			Well/ Tubewell	Other wells	All wells		
2018-19	1659.1	115.3	3488.8	41.1	3529.9	188.4	5492.7

Source: Directorate of Economics and Statistics, GoB

In Bihar, it is estimated that 53.53 lakh hectares of land can be brought under major and medium irrigation projects, while 64.01 lakh hectares of land can be irrigated through minor irrigation facilities. As of 2023-24, the irrigation through major and medium irrigation projects is available in 37.72 lakh hectares out of 53.53 lakh hectares. This implies that 70.5 percent of the potential land has already been brought under the major and medium irrigation projects. Similarly, 75.2 percent of the potential land to be irrigated through minor irrigation projects has already been developed. In case of minor irrigation projects, groundwater lifting has been the primary source. Over the years, the State government has devised several major and medium irrigation projects to increase the command area for irrigation. A district-wise detailed list of gross and net irrigated area in Bihar is presented in Table A 3.13 and Table A 3.14.

Table 3.36 : Status of Irrigation Potential in Bihar (2021-22 to 2023-24)

(Area in lakh hectares)

Type of Irrigation	Ultimate Potential	2021-22		2022-23		2023-24	
		Created Potential	Utilized Potential	Created Potential	Utilized Potential	Created Potential	Utilized Potential

The minor irrigation sources are tanks (including Ahars and Pynes) and tubewells (private and government-owned). Between 2022-23 and 2023-24, area irrigated through tanks has increased by 60 percent. However, the use of tubewells has declined significantly between 2022-23 and 2023-24.

For efficient and participatory irrigation management system, farmers' societies have been constituted. As of March 2024, 622 societies were in various stages of formation (see Table 3.39).

Table 3.38 : Area Brought under Irrigation through Minor Irrigation Sources (2020-21 to 2023-24)

(Area in hectares)

The State government has invested heavily in creating irrigation infrastructure in Bihar. Table 3.40 indicates that expenditures on irrigation have been increasing over the years. Between 2019-20 and 2023-24, the expenditure on irrigation was the highest in 2021-22, at Rs. 2670.5 crore. In 2023-24, the total expenditure on irrigation was Rs. 1674.2 crore, registering an increase of 9.7 percent over 2022-23. Of the total expenditure on irrigation, around 90 percent was capital expenditure. Numerous projects have been undertaken in Bihar over the years to increase the command area of irrigation and ensure the continuous availability of water during the crop seasons.

Table 3.40 : Public Expenditure on Irrigation in Bihar (2019-20 to 2023-24)

(Rs. crore)

Year	Revenue Expenditure	Capital Expenditure	Total Expenditure
2019-20	151.1	1244.1	1395.2
2020-21	157.1	1957.8	2114.9
2021-22	112.8	2557.7	2670.5

2023-24	179.2	1495.0	1674.2

Source : Department of Water Resources, GoB

On major and medium irrigation projects, the State government has spent Rs. 1577.29 crore in 2023-24. Furthermore, a provision of Rs. 464.31 crore was made under the establishment head for

major irrigation projects in 2023-24. For repair and maintenance works of canals, the State government provided Rs. 198.95 crore in 2023-24. A detailed list of major and medium irrigation schemes and irrigation potential created is presented in Table 3.41.

Table 3.41 : Irrigation Potential Created under Major and Medium Irrigation Schemes in Bihar (2023-24)

Name of Scheme	Irrigation potential created (in hectare)
Residual work of western Kosi Canal Project	14811
Construction work of weir near Laxmipur village on Bihul river	252
Garaul weir Irrigation scheme in Alinagar Block of Darbhanga district	1810
Irrigation scheme on Baghelaghat of old Kamla river in Alinagar block of Darbhanga district	842
Implementation of Residual Work of Restoration (ERM) of Western Gandak Canal System (Saran Main Canal and its Distribution System)	300
Construction of three check dams for irrigation on Bagra, Gorhiya rivers near village Khaira (Haveli-Kharagpur block, Munger district) and on Muhane river between Mahkaula and Tajpur villages, restoration of the canal system emanating from it and land reclamation on Gangri river near village Khaira. Construction work of two check dams for ground water recharge	500
Restoration work of Payen and Ahar in Piri Bajaar Area in Suryagarha block, Lakhisarai district	800
Construction work of lift irrigation scheme originating from reduced distance of 1.70 of Durgawati Left main canal	318
Construction of Jaitpura pump canal scheme on Karmnasha river	1555
Durgawati Reservoir Scheme	5754
Construction of Berra Barrage near Berra village on Dardha river in Masaurhi block	3187
Restoration work of Tiroji weir on Paimar river in Ben block in Nalanda district	2200
Har Khet Tak Sinchai Ka Pani Scheme	2350
Total	**34679**

Centrally-sponsored Schemes for Irrigation

Prime Minister Agricultural Irrigation Scheme (Per Drop More Crop): Micro-irrigation, particularly drip irrigation, conserves water, reduces fertilizer use, minimizes pests and diseases, and lowers production costs. It also enhances crop quality, helping farmers secure better prices while preventing groundwater pollution and rapid water depletion. Under the Pradhan Mantri Krishi Sinchai Yojana (Per Drop More Crop), the total spending was Rs. 3417.69 lakh in 2023-24. The scheme covers all districts under the Pradhan Mantri Krishi Sinchai Yojana and aims to implement micro-irrigation in 9,654 hectares during the same period.

Pradhan Mantri Krishi Sinchai Yojana (PMKSY): Under the Pradhan Mantri Krishi Sinchai Yojana (PMKSY), farmers adopting drip irrigation receive assistance of Rs. 40,000 or 50 percent of the cost, whichever is lower, for source creation. The grants are provided for borewell and pump

set installation, which integrate micro-irrigation and other interventions. The scheme covers all 38 districts. In 2023-24, Rs. 345.0 lakh was made available, of which Rs. 64 lakh has been spent. This scheme focuses on the efficient use of water sources for irrigation, resulting in reduction of cost of production, higher crop production per drop of water by enhancing crop density, and an overall increase in agricultural output and, hence, farmers' income.

Under the Watershed Development Component of the Pradhan Mantri Krishi Sinchai Yojana 2.0, the State government has initiated various activities. Some of the major activities undertaken in 2023-24 include the construction of 60 concrete check dams, 55 farm ponds, 232 water harvest tanks (WHTs), 162 ahar renovations, 285 community irrigation wells, 35 community ponds, 11 pond renovations, 69 Earthen Check Dams (ECDs), 325 Saad barrier dams, levelling of 20.10 hectares of cultivable land, creation of plantation on 114 hectares. Additionally, 47,480 production system works, and 1,603 livelihood projects have been completed. The State government has spent Rs. 10,287.71 lakh to complete these works.

State-sponsored Schemes for Irrigation

Jal-Jeevan-Hariyali Abhiyan : Under the Jal-Jeevan-Hariyali Abhiyan, 2,377 schemes were approved by 2023-24, of which 2,182 have been completed, restoring 2,22,639 hectares of irrigation capacity and 992 lakh cubic meters of water storage. The State government has spent Rs. 269.66 crore in 2023-24. In 2024-25, 138 schemes worth Rs. 252.10 crore has been approved, which are expected to restore 25,830 hectares of irrigation capacity. As a result, a progressive increase in the groundwater level has been observed in majority of the blocks.

Har Khet Tak Sinchai ka Pani: Under the 'Har Khet Tak Sinchai ka Pani' programme of the Saat Nishchay-2, the Minor Water Resources Department has been given the responsibility for renovating Ahar-Payne with area greater than one acre and constructing or renovating weirs or check dams (above 15 meters in length) to provide irrigation facilities in command areas up to 2,000 hectares. By 2023-24, administrative approval was granted for 981 schemes, of which 707 have been completed, restoring irrigation facilities in 1,02,957 hectares of land by spending Rs. 308.73 crore. In 2024-25, approval has been granted for 1,528 schemes worth Rs. 2339.10 crore, which are expected to restore irrigation facilities in 1,87,194 hectares of land.

Groundwater Irrigation Schemes: The Department provides two types of tubewell schemes to help facilitate farmers: the State Tubewell Irrigation Schemes and the Mukhyamantri Niji Nalkup Yojana.

State Tubewell Irrigation Schemes: There are 8,922 government tubewells in the state, of which 5,450 are operational. Efforts are underway to revive 3,472 non-functional state tubewells affected by mechanical, electrical, or any other faults. The responsibility for repairing and operating these tubewells has been assigned to Gram Panchayats, with repair expenses covered by the Minor Water

Resources Department. Gram Panchayats are authorized to collect irrigation charges from the irrigated area. To revive non-functional tubewells and to maintain up-to-date data for each tubewell through an online portal, the formation of regional teams at the headquarters for oversight, regular reviews, inspections, monitoring, and coordination with the Electricity Department to address electrical and combined faults have been made. Since 2018-19, Rs. 191.22 crore has been allotted to Gram Panchayats for repairing 4,884 tubewells. Additional allotment have also been made under the non-plan head.

Mukhyamantri Niji Nalkup Yojana: Under this scheme, 35,000 private tubewells are proposed to be installed. Administrative approval of Rs. 266.00 crore has been granted for providing subsidies to beneficiaries. Currently, applications from farmers are being received and subsidy is given to 4,198 farmers.

New Schemes Initiated by the Water Resources Department, Government of Bihar

Eastern Gandak Canal System: The Main Eastern Canal originates from the Valmikinagar Barrage in the West Champaran district. In certain sections between 223.11 km (R.D. 732.00) and 240.85 km (R.D. 790.00) of the Tirhut Main Canal, the Natural Surface Level (NSN) of the surrounding land is below the canal bed. This results in leakage during the canal's operation period, hindering the delivery of the water flow to the downstream sections of the canal system. The estimated cost of the scheme is Rs. 181.76 crore, and it is targeted for completion by 2025-26.

Ganga Water Supply Scheme: For the Ganga Water Supply Scheme, the amount of allocated fund is Rs. 4,515.70 crore. In Phase-1, 9.91 million cubic meters (MCM) of water was supplied to Rajgir and Nawada in 2023 from the Ganga ji Rajgir reservoir. In 2024, 16.18 MCM of water is required, with 10.79 MCM stored for an 8-month supply after monsoon. In Phase-2 approved amount of fund under the Jal-Jeevan-Hariyali Abhiyan was Rs. 1,110.27 crore. It includes the Madhuvan reservoir (27 MCM capacity) and related works, with completion targeted by August 2025.

Nikrish Pump Canal Scheme on Karmnasha River : The Udwah irrigation scheme addresses water shortages in the Rampur distribution canal (30.4 km) of the Chausa branch under the Son canal system, ensuring irrigation for 2,786.10 hectares in Rajpur block, Buxar district. Against the revised cost of Rs. 8,994.46 lakh, the project is expected to be completed by February 2025.

New schemes for Irrigation started in 2024-25

(A) Watershed Development Component of Pradhan Mantri Krishi Sinchai Yojana 2.0 : Under the Watershed Development Component of Pradhan Mantri Krishi Sinchai Yojana 2.0 (2024-25), 55 check dams, 20 farm ponds, 92 WHTs, 126 ahar/payen renovations, 117 irrigation wells, construction of one community pond, renovation of 11 community ponds, construction of 52 ECDs, construction of 180 Saad barrier dams, 26.40 hectares of land

levelling, 119.10 hectares of plantation, 11,244 production system works, and 2,031 livelihood projects have been completed. A total of Rs. 4,732.18 lakh has been spent.

(B) **Construction of permanent check dams up to 30 feet in 17 districts of south Bihar under the Saat Nishchay-2** : Under the Saat Nishchay-2, permanent check dams up to 30 feet are being constructed in 17 districts of south Bihar, including Banka, Munger, Jamui, Gaya, Nawada, and others, based on surveys by the Water Resources and Agriculture Departments. The scheme aims to conserve rainwater for irrigation, increase groundwater levels, maintain soil moisture, and protect crops by controlling water flow during heavy rains and floods.

(C) **Land and Water Conservation Programme under the state plan**: Land and Water Conservation Programme under the state plan is being implemented in 17 south Bihar districts, including Banka, Munger, Jamui, and others. It focuses on constructing ponds and wells outside watershed areas identified under the Pradhan Mantri Krishi Sinchai Yojana 2.0. The scheme aims to conserve rainwater for irrigation, recharge groundwater, and enhance soil moisture, ensuring increased irrigation capacity, land and water conservation, and crop protection during heavy rains and floods.

3.6 Other Important Initiatives for Agriculture and Related Activities

Jaivik Kheti Protsahan Yojana

Green manure refers to undecomposed plant material used as a natural fertiliser. Generally, to retain the nitrogen balance of soil, the farmers grow green manure crops like Dhaincha. To encourage farmers to grow Dhaincha, a subsidy of 90 percent was given on seeds. The Bihar Rajya Beej Nigam Ltd. (BRBN) is tasked with ensuring the quality of the seed. The Jaivik Kheti Protsahan Yojana covers 38 districts to promote organic farming. For 2024-25, the Yojana has been sanctioned for three components: pucca vermi compost unit, commercial vermi compost unit, and Gobar/biogas unit, and allotment for the same is given. The details of the three components sanctioned under the scheme are provided as follows.

Pucca Vermi compost Unit : Vermi compost is a vital source of organic carbon that significantly enhances soil fertility and plays an essential role in organic farming. Initially, beneficiaries of the vermi compost unit receive assistance with earthworms, which is a one-time provision. Additionally, farmers practising agriculture and livestock management can benefit from a 50 percent grant for establishing a pucca vermi compost unit, with a maximum subsidy of Rs. 5000. This assistance applies to a maximum of three vermi pits per farmer. For 2024-25, 20,000 vermi pits are sanctioned for construction.

Commercial Vermi compost Unit : To encourage entrepreneurship in manufacturing organic inputs, the State government provides subsidies to individual entrepreneurs, Krishi Vigyan Kendras (KVKs), and Government Seed Production Farms/Non-governmental Organizations (NGOs). Farmers, Farmer Producer Organisations (FPOs) and Farmer Producer Companies

(FPCs) will receive a subsidy of 40 percent on production capacities of 1000 MT, 2000 MT and 3000 MT. The amount of subsidy will be Rs. 6.4 lakh for 1000 MT, Rs. 12.8 lakh for 2000 MT, and Rs. 20 lakh for 3000 MT. For 2024-25, 10 commercial vermi compost units are sanctioned for construction.

The financial assistance shall be disbursed in three instalments in the ratio of 50:25:25. The first instalment of 50 percent shall be extended upon completion of infrastructure such as civil works, plant, and machinery; 25 percent upon the first production cycle; and 25 percent upon the second production cycle.

Gobar/Biogas Unit : To promote the use of biogas, the State government provides a 50 percent subsidy on the unit cost of Rs. 22,500, including Rs. 1,500 as a turn-key amount for the service provider. In 2024-25, 100 Gobar/Biogas units are sanctioned for construction.

Hari Khad Karyakram

In 2024-25 (up to September 2024), the physical target for Hari Khad (green manure) was 18,600 quintals, and the financial allocation for that was Rs. 1,439.64 lakh. Table 3.42 indicates that both physical and financial targets are met during that year.

Table 3.42 : Targets and Achievement under Hari Khaad Yojana in Bihar (2024-25)

Year	Physical (Quintal)		Financial (Rs. Lakh)	
	Target	Achievement	Target	Achievement
2024-25	18600	18535.79	1439.64	1434.69

Source : Department of Agriculture, GoB

Jaivik Corridor Yojana

The second phase of the Jaivik Corridor Yojana was implemented in the same 13 districts as the first phase. In this phase, 20,000 acres of land were distributed among the interested farmers who were not part of the first phase of the Jaivik Corridor Yojana. The objectives of the Yojana evolved to ensure sustainable agriculture, maintain soil quality, minimise the use of chemical fertilisers, and create employment opportunities. Following a cluster-based approach, 129 FPOs or FPCs were formed for organic farming. A comprehensive package of assistance is being extended to the farmers to promote organic farming. The focus of the scheme is to provide infrastructural support to farmers in terms of the Common Facility Centres (CFCs) and insulated vans as logistic support, along with marketing assistance in the form of logistics and also organise three buyer-seller meetings per year at the district level. The Jaivik Corridor Yojana has nearly achieved its physical target in 2023-24. The State government has allocated Rs. 3,192.62 lakh for 2023-24, and acquiring the C1 certification is in progress. As this is a continuous process, the work will continue in 2024-25 to achieve its desired goal.

Table 3.43 : Details of Progress of the Organic Corridor Scheme in Bihar (2022-23 to 2024-25)

Year	Physical (Acres)			Financial (Rs. Lakhs)	
	Target	Achievement	Sanctioned	Allotment	Achievement
2022-23	20000	19594.87	4109.22	4109.22	3965.67
2023-24*	19594.87	19573.87	3192.62	3192.62	C1 Certification is in progress
2024-25	The C1 Certification is in progress				

Note : 1. *Rs. 332.02 lakh surrendered from the expenditure head of headquarters
2. The scheme was sanctioned on 16-01-23 and the scheme is time-bound, hence the work is going on.

Source: Department of Agriculture, GoB

Namami Gange Scheme

The scheme was sanctioned for 12 districts in 2021-22; however, the implementation began in 2022-23, and the scheme was approved for three years. The names of the districts for which the scheme was sanctioned are: Buxar, Bhojpur, Patna, Lakhisarai, Munger, Bhagalpur, Katihar, Samastipur, Vaishali, Saran, Begusarai, and Khagaria. In these 12 districts, 14,000 hectares of land were covered. It involved 16,744 farmers distributed in 700 groups. The financial allocation for this scheme was Rs. 3016.65 lakh. The project is in its third year of implementation.

Paramparagat Krishi Vikas Yojana (PKVY)

Paramparagat Krishi Vikas Yojana (PKVY) was implemented in 11 districts. The selected districts are: East Champaran, Muzaffarpur, Darbhanga, Siwan, Rohtas, Gaya, Jamui, Saharsa, Kishanganj, Banka, and Araria. This scheme has been implemented in over 5,620 hectares. It includes 6,122 farmers distributed across 281 groups. The project is in its second year of implementation. This is a centrally sponsored scheme, and the cost of the scheme is shared between the Central and State governments in a ratio of 60:40. Farmers receive financial assistance in three annual installments of Rs. 12,000, Rs. 10,000 and Rs. 9,000 respectively.

Table 3.44 : Details of Progress of Paramparagat Krishi Vikas Yojana in Bihar (PKVY) (2023-24 to 2024-25, up to September 2024)

Year	Physical (Hectares)		Financial (Rs. Lakh)	
	Target	Achievement	Allotment	Achievement
2023-24	14000	14000	3016.65	1311.57
2023-24 (11 districts)	5620	5620	945.85	511.09
2024-25*			341.67	—

Note : *The scheme of 2023-24 is being implementing in 2024-25 and, hence, the fund allocated in 2024-25 is not utilised as of now. Also, the scheme is for three years, hence, physical target remains the same for the entire scheme duration.

Biofertilizers and Biopesticides

In Bihar, biofertilizers and biopesticides are promoted through various schemes such as the Jaivik Corridor Plan, the Traditional Agricultural Development Scheme under Namami Gange, and the Paramparagat Krishi Vikas Yojana. In 2023-24, the State government has allocated Rs. 2253.4 lakh to achieve a physical target of 19,594.9 acres under the Jaivik Corridor Plan. Furthermore, through the Traditional Agriculture Development Scheme under Namami Gange, 16,744 farmers received benefits in 2023-24. The State government has spent Rs. 2,301.7 lakh to achieve a physical target of 35,000 acres.

Table 3.45 : Details of Progress of Biofertilizer and Biopesticide in Bihar (2021-22 to 2024-25, up to September, 2024)

Name of the Scheme	Financial Year	Physical (Acre)		No. of farmers	Financial (Rs. lakh)

Rashtriya Krishi Vikas Yojana (RKVY) (DPR-based Scheme)

One of the important components of the RKVY Cafeteria scheme is the RKVY Detailed Project Report (DPR). Under the RKVY DPR-based scheme, the state government has spent Rs. 167.69 lakh for rice and Rs. 193.71 lakh for wheat in 2023-24. Furthermore, the total expenditure on composite or hybrid maize amounted to Rs. 135.50 lakh during the same period. The scheme addresses various aspects of crop production. For instance, in rice cultivation, emphasis is placed on different rice planting methods, distribution of quality seeds, and techniques for nutrient management and soil improvement. To educate farmers on diverse farming practices, provisions

have been made to organise training programmes. Similar programmes are also implemented for wheat and maize production. Detailed physical and financial targets, along with achievements for each component, are presented in Table A 3.15 for rice, Table A 3.16 for wheat, and Table A 3.17 for maize.

Krishonnati Yojana

The Krishonnati Yojana is a centrally sponsored scheme with nine components. These are: National Food Security and Nutrition Mission (NFSNM), National Mission on Edible Oil-Oil Seeds (NMEO-OS), National Mission on Edible Oil-Oil Palm (NMEO-OP), Mission for Integrated Development of Horticulture (MIDH), Digital Agriculture Mission, Mission Organic Value Chain Development for the North Eastern Region (MOVCDNER), Sub-Mission on Agricultural Extension (SMAE), Integrated Scheme for Agriculture Marketing-National Agriculture Market (ISAM-eNAM), and Integrated Scheme for Agricultural Marketing-Others (ISAM-Others). Under the Krishonnati Yojana, the National Food Security Mission and the National Mission on Edible Oil-Oil Seeds (NMEO-OS) are discussed here. The stated objectives of the Missions are: to increase production of rice, wheat, pulses, coarse cereals (maize and barley), multi-cereal, and oilseeds through area expansion and productivity enhancement in a sustainable manner in the identified districts of the country. It aims to restore soil fertility at the individual farm level, and to restore confidence among the farmers by improving farm-level economy. Furthermore, it aims to enhance post-harvest value addition at farm gate for better price realization for farmers through efficient market linkages.

The Missions identify less productive districts in the country and intervene to increase the productivity of the selected crops. Under this scheme, the districts across the states have been identified to improve the productivity of selected crops like rice, wheat, and oilseeds.

The National Mission on Edible Oil-Oil Seeds (NMEO-OS) is implemented in Bihar, where a subsidy is provided for different interventions such as crop demonstration, seed distribution, Integrated Nutrient Management (INM), Integrated Pest Management (IPM), and farm equipment. In Bihar, under these two missions, 15 districts have been selected for rice, 10 for wheat, 38 for pulses, 11 for coarse cereals, seven each for nutri cereals, TRFA-pulses, TRFA-oilseeds, and jute, 5 for sugarcane, and 10 for oilseeds.

Table 3.46 : Details of Target and Achievement of NFSM Scheme in Bihar (2021-22 to 2023-24)

Programme	Target		Achievement	
	Physical (in hectare)	Financial (Rs. Lakh)	Physical (in hectare)	Financial (Rs. Lakh)
2021-22

Assistance to Farmers in Contingent Situation

Diesel Subsidy Scheme : Due to erratic monsoons and drought-like situations, farmers are provided a diesel subsidy to irrigate their crops. Assuming diesel consumption of 10 litres per hectare of cultivated land, farmers receive diesel (at the rate of Rs. 75 per litre) for two irrigations to protect their rice seedlings and three irrigations to save their standing crops in severe drought conditions. In 2023-24, 6.3 lakh farmers benefited from the subsidy, and the total amount of the subsidy was Rs. 102.93 crore. In 2024-25 (up to September 30, 2024), 1.85 lakh farmers received the diesel subsidy, costing the state Rs. 34.93 crore (see Table 3.48).

Table 3.48 : Details of Progress of Diesel Subsidy Scheme in Bihar (2022-23 to 2024-25, up to September, 2024)

Year	No. of Farmers (Lakh)	Amount (Rs. crore)
2022-23	9.6	146.4
2023-24	6.3	102.93
2024-25 (up to September, 2024)	1.85	34.93

Source : Department of Agriculture, GoB

Krishi Input Subsidy Scheme : In the scenario of crop loss exceeding 33 percent due to floods and hailstorms, the State government provides financial support under the Krishi Input Subsidy Scheme. According to the National Disaster Response Fund (NDRF)/State Disaster Response Fund (SDRF) norms, the rates of compensations are Rs. 17,000 per hectare for irrigated crops, Rs. 8,500 per hectare for unirrigated crops, and Rs. 22,500 per hectare for perennial crops. In 2023-24, 87.12 lakh farmers were affected due to hailstorms and unseasonal rains. To provide financial support to these farmers, the State government disbursed Rs. 55.05 crore.

Contingent Crop Scheme : In the event of crop loss, the farmers were provided with seeds for alternative crops as a compensatory measure. The State government has spent Rs. 18.15 crore in 2023-24 to distribute these seeds. In 2023-24, 2.05 lakh affected farmers availed themselves of the scheme to obtain alternative seeds for cultivation.

Table 3.49 : Details of Contingent Crop Scheme in Bihar (2022-23 and 2023-24)

Year	No. of Farmers (Lakh)	Amount (Rs. crore)
2022-23	3.3	21.78
2023-24	2.05	18.15

Source : Department of Agriculture, GoB

Climate-resilient Agriculture Programme (CRA)

The objectives of the Climate-resilient Agriculture Programme (CRA) are to enhance the resilience of agriculture, covering crops, livestock, and fisheries to climatic variability and climate change. The aim will be achieved through the development and application of improved production and risk management technologies; demonstrating site-specific technology packages on farmers' fields to adapt to current climate risks; and building up the capacity of scientists, researchers, and other stakeholders in climate-resilient agricultural research and its applications. Several interventions can be made to build soil carbon, control in soil loss due to erosion, and enhance the water-retaining capacity of soil, all of which build resilience in soil.

The partners in the project are: Borlaug Institute for South Asia (BISA), Pusa; Bihar Agricultural University (BAU), Sabour; Dr. Rajendra Prasad Central Agricultural University (RPCAU), Pusa; and ICAR-Research Complex for Eastern Region (ICAR-RCER), Patna. The nature of the interventions includes: laser land levelling, crop diversification, climate-resilient varieties, direct seeded rice, zero tillage, raised bed planting, precision input management, intercropping, community irrigation, potato-based farming systems, crop residue management, carbon credits, solar harvesting, millets in food system, and empowering rural women.

The Climate-resilient Agriculture Programme is implemented in 30 districts of Bihar for the period from 2020-21 to 2024-25. The State government has allocated Rs. 238.49 crore for this period.

Table 3.50 : Details of Implementation of Climate-resilient Agriculture in Bihar (2019-20 to 2024-25)

Sub-scheme	District	Period	Sanctioned Amount (Rs. crore)
Climate-resilient Agriculture Programme for 8 districts (CRA 1)	Nalanda, Nawada, Munger, Gaya, Bhagalpur, Banka, Madhubani and Khagaria	2019-20 to 2023-24	60.66
Climate-resilient Agriculture Programme for 30 districts (CRA 2)	Vaishali, Samastipur, Purnea, Katihar, Buxar, Araria, Arwal, Aurangabad, Bhojpur, Jamui, Jehanabad, Kaimur, Kishanganj, Lakhisarai, Madhepura, Patna, Rohtas, Saharsa, Sheikhpura, Supaul, Darbhanga, Sitamarhi, Sheohar, Muzaffarpur, East Champaran, West Champaran, Siwan, Begusarai, Gopalganj, and Saran	2020-21 to 2024-25	238.49

Soil Testing

The soil testing programme aims to ensure healthy soil for crop production by analyzing its condition and promoting the balanced use of fertilizers based on test results. This approach enhances crop yields and reduces cost of cultivation.

Soil Testing Programme

Under the Centrally-sponsored Soil Health and Fertility Scheme, a target of 2,00,000 soil samples was set for collection and analysing in villages of the state. To promote the use of micronutrients, zinc is being distributed across 7,600 hectares, with an allocation of 200 hectares per district. Additionally, plans include establishing one soil testing laboratory at the block level in Gaya, Bhagalpur, and Munger districts, along with three quality control laboratories in Saharsa, Bhagalpur, and Muzaffarpur districts.

For free testing of soil samples from fields, nine district-level soil testing laboratories are operational across 38 districts in Bihar, along with nine mobile soil testing laboratories (one per division). Currently, 72 village-level soil testing laboratories are functional. Fee-based soil testing is also conducted in laboratories run by the agricultural universities and the Krishi Vigyan Kendras. All district-level laboratories analyze soil samples based on 12 parameters (pH, EC, OC, N, P, K, Zn, Cu, Mn, Fe, S, and B). To ensure transparency, soil sample collection is carried out through app-based software, where agriculture department staff upload the farmer's complete address and geolocation details. In 2023-24, the Digital Soil Health Cards were sent directly to farmers' mobile phones to expedite the process of delivering soil health results.

To ensure quality control of testing, in addition to the Central Soil Testing Laboratory, the soil testing laboratories of both Agricultural Universities in the state have been designated as referral laboratories.

The mobile soil testing laboratory aims to cover remote villages by providing on-the-spot soil testing and issuing soil health cards. During the kharif and rabi seasons, these mobile labs visit villages, testing soil samples from fields in the presence of farmers and delivering soil health cards. In 2023-24, the target was to test 2.00 lakh soil samples, and 2.50 lakh samples were tested. Furthermore, 2024-25 (up to September 2024), 2.39 lakh samples were tested by spending Rs. 7.71 crore.

Table 3.51 : Details of Physical and Financial Target and Achievement of Soil Testing in Bihar (2023-24 to 2024-25, up to September, 2024)

Year	Physical (No.)		Financial (Rs. crore)	
	Target	Achievement	Target	Achievement
2023-24	2,00,000	2,50,053	6.00	5.96
2024-25 (up to September, 2024)	5,00,000	2,39,130	15.00	7.71

Bihar Skill Development Mission (BSDM) : Recognising the lack of skills among the rural youth in agriculture, skill training is provided to fill this gap. Efficient farming, value addition, storage, and marketing increases income for skilled workers. There are two main components of the training programme conducted in skill development, that is Domain Skilling and Recognition of Prior Learning (RPL). The programme aims to increase the quality of skills and develop entrepreneurial knowledge with the following objectives. First, to develop skilled technical and professional qualifications and capacity by providing skill training to young men and women in agriculture and agriculture-related activities. Second, to provide gainful employment to youth and women after skill training in agricultural commercial establishments, meeting their demands and enabling quality materials to be manufactured in these establishments. Third, to organise skill training for the maximum number of young men and women by granting funds to skill development centres. Lastly, to refine the existing skills through the RPL course.

BSDM has organised 117 training programmes in 2023-24, which is 19.4 percent more than the number of training programmes organised in 2022-23. In 2023-24, the expenditure for these training programmes was Rs. 451.04 lakh. Specifically, in 2024-25 (up to January 15, 2025), BSDM has spent Rs. 333.58 lakh to organise 189 RPL training programmes and two domain training programmes (see Table 3.53).

Table 3.52 : Details of Physical and Financial Target and Achievement of BSDM in Bihar (2019-20 to 2023-24)

Year	Physical (No. of Training)		Financial (Rs. lakh)

National Mission on Agricultural Extension and Technology (NMAET)

The National Mission on Agricultural Extension and Technology functions through four sub-missions. The sub missions are sub-mission on Farm Mechanisation; sub-mission on Agriculture Extension and National e-Governance Plan; sub-mission on Seeds and Planting Materials; and sub-mission on Plant Protection and Quarantine.

The Sub-Mission on Agricultural Extension (SAME) focuses on creating awareness and enhancing the use of appropriate technologies in agriculture and the allied sector. The ongoing extension schemes include the centrally sponsored schemes being implemented by the State government. Furthermore, the Support to State Extension Programmes for Extension Reforms scheme aims to make the extension system farmer-driven and farmer-accountable by disseminating technology to farmers through new institutional arrangements, namely, the Agricultural Technology Management Agency (ATMA) at the district level to operationalise the extension reforms in a participatory manner.

The areas of intervention of SAME are as follows. First, to encourage multi-agency extension strategies involving public or private extension service providers. Second, to promote an

integrated, broad-based extension delivery mechanism consistent with a farming systems approach, focusing on a bottom-up planning process. Third, to adopt a group approach to extension in line with the identified needs and requirements of the farmers in the form of Commodity Interest Groups (CIGs) and Farmer Interest Groups (FIGs) and to consolidate FPOs. The scheme also organises training programmes for women, Kisan Melas, farm schools, and visits for farmers and field functionaries. The details of the physical and financial targets and achievements of different aspects of ATMA are presented in Table 3.54.

Table 3.54 : Progress of ATMA Scheme in Bihar (2022-23 and 2023-24)

Activity	Physical				Financial (Rs. lakh)

Kisan Chaupal

Kisan Chaupal is arranged to disseminate information about the schemes initiated by the Department of Agriculture. The Kisan Chaupal is held in both kharif and rabi seasons at the Gram Panchayat level across the villages in Bihar. According to the estimates provided by the Department, around 10 lakh farmers have been informed about season-wise crop planning, farm practices, soil nutrient management, climate-based farming systems, and ongoing schemes in the

state. Furthermore, the promotion of millets, agriculture-based enterprises, and entrepreneurship development in various aspects of agriculture is also part of the awareness campaign. Extension officers, scientists, and experts in their respective fields participate in the awareness campaign. Over the years, the financial allocation for the Kisan Chaupal has increased. Between 2022-23 and 2023-24, the financial allocation has increased from Rs. 4.95 crore to Rs. 15.00 crore, marking a three-fold increase in a single year. The utilisation of allocated funds was significantly high.

Table 3.55 : Details of Physical and Financial Target and Achievement of Kisan Chaupal in Bihar (2021-22 to 2023-24)

Year	Physical (No. of Campaign)		Financial (Rs. crore)	
	Target	Achievement	Target	Achievement

Storage, Warehouse and Procurement

The Bihar State Warehousing Corporation (BSWC) arranges storage for agricultural and other notified goods. BSWC builds or rents godowns to store agricultural products, fertilisers, etc. In 2023-24, 54 centres were operational with a total storage capacity of 5.79 lakh tonnes. It can be observed from Table 3.56 that even though the owned storage capacity remained constant, the hired storage capacity has increased over the years. Between 2019-20 and 2023-24, the hired storage capacity has increased by 53.8 percent. The utilised capacity in 2023-24 was 5.61 lakh tonnes, or 97 percent of the available capacity. Although the Food Corporation of India (FCI) continues to be the main depositor in the utilisation of storage capacity, the share of other PSUs in total deposits has been increasing over the years. For instance, the share of other PSUs in the total deposits was 17.8 percent in 2019-20, and that has increased to 30.0 percent in 2023-24.

In the case of procurement, rice and wheat were obtained (see Table 3.58). In 2023-24, the target for rice procurement was 4,500 thousand tonnes, while the actual procurement was 3,079.45 thousand tonnes. For wheat, the total procured quantity was 601.19 thousand tonnes against the target of 1,000 thousand tonnes in 2023-24. The storage and procurement of essential commodities serve two important purposes. First, they insulate farmers from general price declines immediately after the harvest of crops and provide them with the benefit of availing the Minimum Support Prices (MSP). Second, from the consumer's perspective, it ensures food security in the state.

Table 3.56 : Status of Warehouse in Bihar (2019-20 to 2023-24)

Year	Number of Centres	Capacity (Lakh tonnes)			Capacity Utilized (Lakh tonnes)		
		Owned	Hired	Total	Owned	Hired	Total

Renovation and Modernisation of Market Yards

The State government decided to renovate and modernize 21 market yards in Bihar. Under the state plan, 12 out of the 21 market yards are being renovated and modernised at a cost of

Rs. 748.46 crore for 2021-24. The State government has approved an expenditure of Rs. 449.08 crore for 2022-23. For the remaining 9 market yards, the approved budget is Rs. 540.61 crore for the period 2022-25. The State government has approved an expenditure of Rs. 113.62 crore for 2023-24. For all market yards, the financial support is provided by NABARD, which funds 95 percent of the total project cost.

Crop Residue Burning

The Agriculture Department has formed an inter-departmental working group to raise awareness among farmers and the public about the harmful effects of burning crop residue in fields. To prevent waste, the State government has provided a 40 percent subsidy to purchase machinery to manage the crop residue. Demonstrations of the waste decomposer are conducted through 25 Krishi Vigyan Kendras under the Bihar Agricultural University. The decomposer is made available for 3,000 acres of farmland.

These initiatives aim to promote sustainable farming and discourage crop residue burning. The State government has also taken punitive action against farmers who burn crop residue. Since 2019, the Agriculture Department has blocked farmers burning crop residues from registering on the DBT portal, disqualifying them from availing themselves of schemes. In 2023, 656 farmers were penalized after wheat harvesting, and 2,398 farmers were penalized during paddy harvesting. Furthermore, the list of offenders was shared with the Co-operative and Food and Consumer Protection Departments to deny them benefits under rice procurement schemes.

CHAPTER - IV

ENTERPRISES SECTOR

Abstract

This chapter explores the trajectory of industrial growth in Bihar, emphasizing the dual role of large-scale industries and small, informal enterprises in shaping the state's economic landscape. Despite its potential, Bihar faces unique challenges in fostering industrialization. However, recent government initiatives focus on attracting large investments and promoting entrepreneurship. Utilizing data from the Annual Survey of Industries (ASI) and the Annual Survey of Unincorporated Sector Enterprises (ASUSE), the chapter assesses the performance and challenges of both the formal and informal industrial sectors in Bihar. The secondary sector, particularly construction and manufacturing, has been a major driver of Bihar's industrial growth, with construction contributing 50.2 percent of the Gross State Domestic Product (GSDP) of the secondary sector in 2022-23. The manufacturing sector followed with a contribution of 37 percent. Bihar has seen significant growth in 'fixed capital and industrial output', with notable improvements in productivity and investment. The state's industrial growth is evident in the increase in fixed capital per factory and the value of output, surpassing the national average in certain performance metrics. Furthermore, the informal sector in Bihar, dominated by small-scale, labour-intensive enterprises, accounts for a large portion of the state's non-agricultural establishments. The chapter highlights the importance of fostering this sector through entrepreneurship and skill development programmes aimed at enhancing productivity. The Bihar Industrial Investment Promotion Policy 2016 aims to foster industrial growth and employment by leveraging the state's sectoral advantages. It identifies priority sectors such as food processing, tourism, IT, renewable energy, and healthcare. The State Investment Promotion Board (SIPB) facilitates investments, leading to substantial financial inflows and job creation. The government has launched various schemes like the Mukhyamantri Udyami Yojanas to promote entrepreneurship, alongside sector-specific policies for textiles, biofuels, and startups. Key sectors like mining and tourism have also contributed significantly to the state's revenue. Bihar's integrated approach has significantly accelerated sustainable industrial growth, economic development, and job creation.

Introduction

The industrial sector is a cornerstone of long-term economic development, driving sustainable growth, creating employment, and producing goods that cater to both domestic and global markets. Bihar stands at a pivotal moment in its industrial evolution. Despite its rich history and potential, the state faces unique challenges in terms of industrial growth. However, recent government initiatives have emphasized the role of industrialization in Bihar's economic transformation, with a particular focus on attracting large-scale investments and fostering entrepreneurship.

The Bihar government recognizes the importance of both large-scale industries and small and informal enterprises in shaping the economic landscape. While large industries offer high-scale production and employment, small and marginal enterprises are critical in driving local economic activities and providing grassroots employment opportunities. Understanding the dynamics of industrial growth in Bihar thus requires a dual focus on both formal and informal sectors. This chapter aims to explore the trajectory of industrial growth in Bihar by utilizing data from the Annual Survey of Industries (ASI) and the Annual Survey of Unincorporated Sector Enterprises (ASUSE). These datasets provide valuable insights into the performance and challenges of both formal industries and small-scale manufacturing activities, highlighting the complexities of fostering industrial growth in a state like Bihar. Moreover, the role of government policies in promoting industrialization, particularly those targeting youth entrepreneurship and small enterprise development, will be discussed.

In the structural composition of any economy, the secondary sector consists of mining and quarrying; manufacturing; electricity, gas, water supply, and other utility services; and construction. Over the years, construction has been the most important activity in Bihar. Construction activities grew at the rate of 22 percent between 2021-22 and 2022-23. It contributed 50.2 percent of the GSDP of the secondary sector, followed by manufacturing. In 2022-23, the manufacturing sector contributed 37.0 percent of the GSDP of the secondary sector. In other words, construction and manufacturing were the drivers of the secondary sector growth in Bihar.

Table 4.1 : Annual Growth Rate of Secondary Sector in Bihar at Constant (2011-12) Prices (2018-19 to 2023-24)

(in percent)

Year	Secondary sector					Gross State Domestic Product
	Mining and quarrying	Manufacturing	EGWUS	Construction	Total	
2018-19	144.5	-1.3	53.9	9.2	8.4	10.9
2019-20	275.5	2.8	7.0	1.0	5.4	4.4

The contribution of the secondary sector to the Gross State Value Added (GSVA) across the states of India is presented in Table 4.2. The secondary sector in Bihar has continued contributing approximately one-fifth of GSVA for many years now. In 12 out of 18 states mentioned in Table 4.2, the contribution of the secondary sector to GSVA was less than 30 percent. In these states, the contribution of the secondary sector to GSVA has stagnated at below 30 percent level over a long period. Specifically, the contribution of the secondary sector to GSVA in Telangana was the lowest at 19.8 percent, followed by Bihar at 21.5 percent in 2023-24.

Table 4.2 : Contribution of Secondary Sector in GSVA in Selected States (2019-20 to 2023-24)

(in percent)

State	2019-20	2020-21	2021-22	2022-23	2023-24

4.1 Status of Industries

In India, one of the key data sources to estimate the contribution of the registered manufacturing sector is the Annual Survey of Industries (ASI). According to the report, the primary units of enumeration in the survey are the following: for manufacturing industries, the unit of enumeration is a factory; for repair services, the unit of enumeration is a workshop; for electricity, gas, and water supply undertakings, the unit of enumeration is an establishment or a licensee; for bidi and cigar industries, the unit of enumeration is an establishment.

According to the recent round of ASI for the reference year 2022-23, the total number of factories in Bihar was 3307, of which 2782 were operational. Considering the division of industries provided by the National Industrial Classification, 2008 (NIC, 2008), numerically the most important industry in Bihar was the manufacturing of other non-metallic mineral products

(1234 units), followed by that of food products (905 units). The manufacturing of other non-metallic mineral products includes manufacturing of cement, lime, and plaster. These two divisions of industries constituted 65 percent of the units in Bihar. The number of units in manufacturing wood and products of wood and cork (except furniture, manufacturing of articles of straw, and plaiting materials) was 191.

Table 4.3 : Number of Factories and Operational Factories in Bihar and India (2013-14 to 2022-23)

Year	Bihar		India	
	No. of Factories	No. of Factories in Operation	No. of Factories	No. of Factories in Operation
2013-14	3420	3132	224578	185690
2014-15	3530	2942	230433	189466
2015-16	3623	2918	233116	191062

To understand the nature and scale of operations of industries in Bihar, a few important parameters are considered here for discussion. These parameters are – the number of factories, fixed capital, working capital, persons engaged (workers, employees other than workers, and unpaid family members/proprietors, etc.), the value of output, and net value added. The position of Bihar, in the context of national scenario of industries, is presented in Table 4.4. Though the number of factories in Bihar has varied within a small range over the last few years, the quantum of fixed capital has increased significantly. For instance, in 2022-23, the amount of fixed capital in the factories of Bihar was Rs. 31.95 thousand crore, reflecting an increase of 60 percent in a year. The share of fixed capital of Bihar in the total fixed capital of India has increased from 0.54 percent in 2021-22 to 0.78 percent in 2022-23. The value of output has grown by 53 percent in Bihar between 2021-22 and 2022-23. Furthermore, the share of the value of output produced in Bihar, in the total value of output produced in India, was 0.98 percent in 2022-23, showing an increase from 0.78 percent in 2021-22. All these factors indicate a steady growth of the industrial output in Bihar.

Table 4.4 : Different Aspects of Industries in India and Bihar (2013-14 to 2022-23)

Year	Number of factories (in '000)		Bihar as percent of India	Fixed capital (Rs.'000 crore)		Bihar as percent of India
	India	Bihar		India	Bihar

The structural ratios in the context of Bihar and at the all-India level, such as fixed capital per factory, fixed capital per person engaged, workers per factory, persons engaged per factory, net value added per factory, and net value added per person engaged, are discussed below. These factors indicate the performance of the industries in Bihar compared to the all-India levels. In terms of industrial production growth, Bihar has performed satisfactorily over the last few years. The fixed capital per factory has increased significantly from Rs. 607.1 lakh in 2021-22 to Rs. 966.1 lakh in 2022-23, registering a growth rate of 59.1 percent within one year. The fixed capital per factory in Bihar, compared to the all-India average, has risen from 40.7 percent in 2021-22 to 59.4 percent in 2022-23. A similar pattern was also observed for all other structural ratios. For two specific ratios, fixed capital per person engaged and net value added per person engaged, Bihar has outperformed the all-India levels.

Table 4.5 : Structural Ratios of Industries in India and Bihar (2018-19 to 2022-23)

Characteristic		Fixed capital/ per factory (Rs. lakh)	Fixed capital/ per person engaged (Rs. lakh)	Workers/ per factory	Persons engaged / per factory	Net Value Added / per factory (Rs. lakh)	Net Value Added / per person engaged (Rs. lakh)
2018-19	India	1429.9	21.3	53	67	526.6	7.8
	Bihar	687.8 (48.1)	18.1 (85)	32 (61.5)	38 (56.6)	174.1 (33.1)	4.6 (58.5)
2019-20	India	1477.2	21.9	53	67	491.9	7.3
	Bihar	437.8 (29.6)	11.7 (53.5)	32 (59.7)	37 (55.4)	175.9 (35.8)	4.7 (64.5)
2020-21	India	1475.1	29.9	50.3	64.2	533.3	8.3
	Bihar	475.4 (32.2)	12.7 (42.5)	31.5 (62.6)	37.5 (58.4)	221.5 (41.5)	5.9 (71.1)
2021-22	India	1490.6	21.6	54	69	699.4	10.2
	Bihar	607.1 (40.7)	15.3 (70.8)	33.6 (62.2)	39 (56.5)	343.5 (49.1)	8.7 (85.3)
2022-23	India	1627	22.2	58	73	742	10.2
	Bihar	966.1 (59.4)	23.6 (106.3)	35 (60.0)	41 (56.2)	435.3 (58.7)	10.6 (104.0)

Note: Numbers in parentheses represent the structural ratios of Bihar as percent of India
Source : Annual Survey of Industries

The contribution of Bihar to India's GVA was 0.5 percent 2022-23 (Table 4.6). The ratio of GVA to GVO in Bihar was 11.2 percent, indicating a gap of 3 percentage points compared to the all-India level. Bihar's contribution to GVA for the entire country was 0.7 percent. The ratio of GVA to GVO has been relatively high for the states with very small industrial bases, such as Himachal Pradesh (23.0 percent), Uttarakhand (22.8 percent), and Jammu and Kashmir (21.4 percent). Among the states with a large industrial base, the GVA to GVO ratio in Maharashtra was (16.9 percent), followed by Tamil Nadu at 15.7 percent and Gujarat at 12.6 percent. These three states account for 38.3 percent of the total number of industries in India and

contributed 42.3 percent of the country's GVO. Three states in India (Gujarat, Maharashtra, and Odisha) controlled 39.6 percent of the fixed capital. In terms of the amount of working capital, the three most significant states were Maharashtra, Gujarat, and Tamil Nadu; together, they controlled 42.0 percent of the total working capital of industries in India. The Gross Capital Formation (GCF) is another crucial indicator of industrial progress, defined as the total of gross additions to fixed assets and increases in inventory stocks. In 2022-23, the GCF in the industrial sector in India was Rs. 7,66,791 crore. Bihar's share in the GCF of India was 1.7 percent.

Table 4.6 : Comparison of Various Aspects of Industries in Selected States (2022-23)

State	Number of factories	Gross Value of Output (GVO) (Rs. crore)	Gross Value Added (GVA) (Rs. crore)	GVA as percentage of GVO	Fixed capital (Rs crore)	Working capital (Rs crore)	Gross capital formation (Rs. crore)

4.2 Informal Enterprises in Bihar

The unincorporated sector contributes immensely to the growth and employment of the Indian economy, including Bihar. The size of the unincorporated sector in Bihar is significantly large. An important data source of the unincorporated sector is the Annual Survey of Unincorporated Sector Enterprises (ASUSE), 2022-23. The basic features of this sector are the following: (a) easy entry for new enterprises, (b) family ownership of enterprises, (c) reliance on indigenous resources, (d) small-scale operations and low productivity, (e) labour-intensive technology, etc. For the survey in 2022-23, 16,497 (8,568 in rural and 7,929 in urban) first-stage units (FSUs) had been selected at an all-India level. Out of these, 16,382 FSUs (8,495 in rural and 7,887 in urban) have been surveyed. The total number of establishments surveyed was 4,58,938 (2,58,296 in rural areas and 2,00,642 in urban areas). ASUSE 2022-23 provides an estimate of 6.50 crore establishments categorised as the unincorporated non-agricultural sector for the period October 2022 – September 2023 for different broad activity categories (BAC). Out of these 6.50 crore establishments, 3.56 crore belong to the rural areas and 2.94 crore to the urban areas.

ASUSE categorises establishments into two: own account establishments (OAE), and hired worker establishments (HWE). OAE is defined as an establishment that is run without any hired workers employed on a regular basis (the major part of the period during which the operations of an establishment are carried out in a reference period). HWE is defined as an establishment that employs at least one hired worker on a regular basis. Paid or unpaid apprentices, paid household member/servant/resident workers in an establishment are considered as hired workers. Out of 6.50 crore establishments, 5.53 crore establishments were OAEs, and 97 lakh establishments have been estimated as HWE. In rural India, the estimated number of OAEs was 3.28 crore, and the estimated number of HWEs was 0.28 crore. In urban India, the estimated numbers of OAEs and HWEs were 2.25 crore and 0.69 crore, respectively.

Out of 6.5 crore unincorporated non-agricultural establishments, 5.7 percent were located in Bihar (see Table 4.7). Further disaggregation suggests that, out of 3.56 crore establishments in rural India, the number of establishments in Bihar was 28.09 lakh (or 7.9 percent) in 2022-23. Out of these 28.09 lakh establishments in rural Bihar, 25.67 lakh were OAEs, and 2.4 lakh were HWEs. After Uttar Pradesh and West Bengal, Bihar has the largest number of establishments in rural areas. The number of establishments in urban Bihar was 8.9 lakh. Out of 8.9 lakh establishments in urban Bihar, 7.0 lakh were OAEs, and 1.9 lakh were HWEs.

Table 4.7 : Share of Estimated Number of Establishments by Sector and Establishment Type in Selected States/UTs (2022-23)

ASUSE collects information on a variety of ownership of the establishments. The surveyed types of ownership are proprietary (male/female/transgender), partnerships with members of the same household, partnerships between members not all from the same household, self-help groups (SHGs), societies/trusts/clubs/associations/bodies of individuals/membership organisations, co-operatives, and others. Table 4.8 suggests that the majority of unincorporated non-agricultural establishments were proprietary. At the all-India level, 94.7 percent of establishments were proprietary, followed by SHG at 3.7 percent. Only 0.07 percent of establishments fall into the ownership category of partnerships with members from the same or a different household. In the case of proprietary establishments across all the states in India, male members held most of the property rights of the establishments. In Bihar, 99.3 percent of the establishments were proprietary. Of all the proprietor ownerships, only 14.5 percent of the proprietors were female.

Across India, 10.96 crore workers were employed in unincorporated non-agricultural enterprises in 2022-23. About 5.23 crore workers were working in rural areas, and 5.72 crore workers were working in urban areas. In ASUSE, the workers were classified as working owners, hired workers, unpaid family members, and others. In rural India, OAEs and HWEs have engaged 3.93 crore and 1.31 crore workers, respectively. A similar distribution of workers between OAEs and HWEs was observed in urban India. In Bihar, 59 lakh workers were working in unincorporated non-agricultural enterprises in 2022-23. Out of 59 lakh workers, 43.6 lakh were employed in rural establishments. Furthermore, out of 43.6 lakh workers engaged in establishments in rural Bihar, 68 percent were working in OAEs, while the remaining 32 percent worked in HWEs. About 16.6 lakh workers were employed in unincorporated non-agricultural enterprises in urban Bihar.

Female workers play an important role in the unincorporated non-agricultural establishments in India. Out of 10.96 crore workers engaged in such establishments, 2.81 crore (25.6 percent) were female. Of the total female workforce engaged in these establishments, 53.0 percent were working in rural areas and the remaining 47.0 percent in urban ones. Among all female workers, 3.3 percent (9.27 lakh, in absolute numbers) were employed in establishments in Bihar. In rural Bihar, 81.5 percent of all female workers were employed in establishments. In rural Bihar, OAEs and HWEs have employed 5.6 lakh and 1.9 lakh female workers, respectively. Total female employment in urban establishments in Bihar was 1.6 lakh.

To assess the performance of any sector of the economy, the gross value added (GVA) is an important indicator. Table 4.11 presents GVA for market establishments across states in the unincorporated non-agricultural sector. According to ASUSE, 2022-23, a market establishment is defined as one that sells its products or services at an economically significant price. By this definition, more than 99 percent of the surveyed establishments were market establishments. Therefore, the information provided here nearly covers the entire unincorporated non-agricultural sector. At the all-India level, other services (including food and accommodation service activities,

land transport, and education, to name a few) accounted for the maximum value addition in the overall GVA, both in the rural and urban unincorporated non-agricultural sectors. In terms of overall GVA, Bihar's contribution was 4.5 percent, and majority of the GVA came from the rural non-agricultural unincorporated sector (also presented in Chart 4.1). The top three states, in terms of GVA contribution of rural market establishments in India were Uttar Pradesh (14.1 percent), Bihar (8.8 percent), and Maharashtra (8.8 percent).

Table 4.12 suggests that, at the all-India level, there was a stark difference in the performances between OAEs and HWEs in rural and urban areas. Furthermore, the urban market establishments outperformed rural market establishments in terms of annual GVA per establishment. In rural India, the annual GVA of an OAE was only 13 percent of the annual GVA of an HWE. A similar pattern of differences in the annual GVA of HWE and OAE establishments of rural areas was observed across all the states. In Bihar, the annual GVA of a rural OAE was Rs. 1,08,690.0 and that of an HWE was Rs. 8,07,420.0, demonstrating a marked difference between the annual GVA of OAEs and HWEs. It can also be noted that the OAEs and HWEs in rural Bihar were adding more value, on an average, than those at the rural all-India level. Apparently, the reason for the lower annual GVA of OAEs compared to the annual GVA of HWEs of rural areas was the difference in the scale of production and the difference in the level of efficiency, especially in terms of labour productivity. Table 4.13 provides information on the annual GVA per worker for market establishments, which is an indicator of labour productivity. The data suggest that the annual GVA per worker was higher for HWEs than for OAEs in rural and urban areas. Additionally, the annual GVA per worker for urban market establishments was greater than that for rural market establishments. In Bihar, the annual GVA per worker of OAEs in rural areas was Rs. 93,558.0 compared to Rs. 1,08,944.0 of OAEs in urban areas. Moreover, comparing with the all-India average, the annual GVA per worker of OAEs in rural Bihar was higher than the average annual GVA per worker of OAEs in rural India. In rural Bihar, the difference in the annual GVA per worker between OAEs and HWEs was significant. The annual GVA per worker for rural OAEs

was 66.0 percent of that for HWEs. This difference was smaller among the urban units than their rural counterparts, implying that the labour productivity of OAEs and HWEs in urban market establishments was more or less similar while they differed significantly for OAEs and HWEs in rural areas.

Source: Annual Survey of Unincorporated Sector Enterprises, 2022-23

As mentioned earlier, unincorporated non-agricultural establishments have been an important source of employment for a large section of skilled and semi-skilled workers in both rural and urban areas. In the following table, we present the annual emoluments of hired workers to assess their levels of earnings from economic activity. It should be noted that the hired workers can be differentiated into formal or informal categories, depending on the employment conditions they agreed to with their employers. The formally hired workers enjoy better employment conditions along with varying levels of social security benefits. A few observations can be made from the following table (Table 4.14). First, the annual emoluments of hired workers in urban areas were higher than the annual emoluments of hired workers in rural areas at the all-India levels. Second, the annual emoluments of formally hired workers were greater than that of the informally hired workers, both in urban and rural areas. Notably, the share of formally employed hired workers was much smaller than the share of informally employed hired workers in the total hired workforce. This implies that a large section of workers survives on low annual incomes derived from working in unincorporated non-agricultural establishments and are deprived of any social security benefits

in India. For rural India, the annual emoluments of the informally hired workers were just 39.0 percent of that of the formally hired workers. In urban India, the annual emoluments of informal workers were 48.4 percent of that of formally hired workers. Third, the annual emoluments of formal and informal hired workers in both rural and urban areas in Bihar were lower than the annual emoluments prevailing at the all-India level.

Source: Annual Survey of Unincorporated Sector Enterprises, 2022-23

The results from the secondary data sources on industries and informal enterprises suggest that, first, the industrial sector in Bihar has been small, but has shown a progress in terms of scale and productivity in recent years. To attract more investment in Bihar, the State government has devised an overall industrial promotion policy as well as sector-specific policies. Moreover, the State government has created an institutional structure to ensure rapid industrialisation in Bihar. Second, as shown by ASUSE, 2022-23, the unincorporated non-agricultural sector in Bihar was large but represented a low scale of production and productivity. To harness this vast sector, the State government has adopted various entrepreneurship and skill development programmes. The state's role in the growth of industrial and enterprise sectors is discussed below.

4.3 Agro-based Industries

Sugar Industry

Besides sugar production, ethanol production as biofuel and power generation has increased the role of sugar mills in producing energy for the state. The National Policy on Biofuels, 2018 allowed the production of ethanol using sugarcane juice. In 2023-24, 677.20 lakh quintals of sugarcane was crushed in nine sugar mills of Bihar. At the recovery rate of 10.16 percent (with BH), the total sugar production was 68.77 lakh quintals (see Table 4.15). Over the years, the recovery rate has increased; hence, the productivity of sugarcane has increased. In 2023-24, the distillery capacity and power generation of sugar mills have been 530 KLPD (kilo litre per day) and 88.5 MW (mega watt), respectively (see Table 4.16). The increased production-related activities in sugar mills have also increased the number of days of operation, which implies that more number of days of employment were generated in the sugar mills (see Table 4.17).

Based on the National Policy on Biofuels, 2018, the Government of Bihar has notified the Bihar Biofuels Production Promotion Policy, 2023. The stated objectives of the policy are, first, to promote production of Ethanol and Compressed Bio-Gas (CBG)/bio-CNG from all feedstocks permitted under the National Policy on Biofuels, 2018, and by the National Biofuel Coordination Committee. The second objective is to facilitate and financially incentivise eligible investment in the sphere of Ethanol and Compressed Bio-Gas (CBG) manufacturing. Third, this policy also aims to increase the income of farmers for producing feedstock or raw material, and generate employment at the manufacturing units and related services.

Table 4.15 : Performance of Sugar Mills in terms of Sugar Production and Recovery Rate (2021-22 to 2023-24)

The Chief Minister Sugarcane Development Programme includes many schemes aimed at increasing the production and productivity of sugarcane on farms and focuses on crop diversification. Crop diversification has been achieved by encouraging the farmers to inter-crop different pulses with sugarcane. The production of other crops, especially pulses, alongside

sugarcane, would increase farmers' income and improve the nutritional balance of food consumption at their household level. In 2023-24, major schemes with significant financial outlets included, first, a grant on select varieties of sugarcane (Rs. 1337.92 lakh), followed by an incentive on certified seed (Rs. 311.0 lakh) and an incentive for producing foundation seed (Rs. 210.0 lakh). All these initiatives assist a large section of sugarcane farmers in the state.

Table 4.18 : Performance of Chief Minister Sugarcane Development Programme (Seed Development) (2023-24)

Particulars of initiative	Unit	Target		Achievement	
		Physical	Financial (Rs. lakh)	Physical	Financial (Rs. lakh)
Three-Tier Seed Production Programme					
For breeder seed production programme in the State by IISR, Motipur Centre, incentive @ Rs. 2.20 lakh per ha	Hectare	35	77.0	35	77.0
For production of foundation seed, incentive @ Rs. 60,000 per ha	Hectare	350	210.0	246.27	147.751
For production of certified seed, incentive @ Rs. 50 per quintal	Lakh quintal	6.22	311.0	3.46	172.84
Purchase grant on select varieties of sugarcane @ Rs. 210/ quintal (for General category) and @ Rs. 240/ quintal (for SC/ST community)	Lakh quintal	6.22	1337.92	3.46	729.34
Grant for intercropping of Masoor using certified seeds with sugarcane (50 percent of the price of seeds, max @ Rs. 800 per acre)	Acre	1500	12.0	1037.5	5.54
Grant for intercropping of Moong using certified seeds with sugarcane (50 percent of the price of seeds, max @ Rs. 800 per acre)	Acre	3000	24.0	728.8	5.05
On use of insecticide for protection of sugarcane from borer insects and other diseases (grant of 50 percent of the cost price, max @ Rs. 2500 per ha)	Hectare	5900	147.5	2742	62.95
On purchase of bio-fertilizer/bio-compost, grant of 50 percent of the cost price, max @ Rs. 150 per quintal for 25 quintal per ha (translating to Rs. 3750 per ha)	Hectare	1000	37.5	613	20.43
Bud chip/single chip method for sowing of sugarcane, grant of Rs. 1.50 per seedlings, max 10000 seedling per acre (translating to Rs. 15000 per acre)	Qty	350	52.5	58	8.7
For the Monitoring and Advisory Services for Sugarcane in Bihar (MAAS) by SRI, Pusa			20.61		
Allocated funds for "Design and Development of Sugarcane Management Portal" by NIC, Patna and provision for IT-related equipment (TAB) for officials			40.0		37.28
Total			**2270.03**		**1266.89**

Source : Department of Sugarcane Industries, GoB

Apart from promoting seeds, the Chief Minister Sugarcane Development Programme also arranged training programmes for sugarcane farmers, sugar mill representatives, and officials of the Department of Sugarcane. In 2023-24, the State government spent Rs. 189.83 lakh against an allocated amount of Rs. 229.97 lakh to train different stakeholders within the state or arrange their training in different specialised training institutes across India.

Table 4.19 : Performance of Chief Minister Sugarcane Development Programme (Training) (2023-24)

Training programme	Unit	Target		Achievement	
		Physical	Financial (Rs. lakh)	Physical	Financial (Rs. lakh)
One-day State-level Seminar/Workshop @ Rs. 30.00 lakh/seminar	No.	3	90.0	2	59.84
Tour and training of departmental officials/sugar mill representatives outside Bihar			49.97		49.97
Inter-state exposure visits-cum-training of the progressive farmers (team of 20 farmers) for 7-10 days @ Rs. 1500 per farmer per day (training venues VSI, Pune/SBI, Coimbatore/SBI, Karnal/SBI, Seorahi/NSI, Kanpur/IISR, Lucknow and other sugarcane institutes)	No.	15	45.0		45.0
One-day training programme for farmers @ Rs. 10000 per training	No.	450	45.0	359	35.02
Total	—		**229.97**		**189.83**

Latest Initiatives

- The State government has reopened the Riga Sugar Mill, which will undoubtedly enhance the sugarcane production in Sitamarhi.
- Under the Bihar Jaggery Industry Promotion Programme, the State government has allocated a subsidy of Rs. 12.40 crore to 81 jaggery-producing units in 2024-25. The scheme offers a 50 percent capital subsidy for various sizes of jaggery production units.
- In 2024-25, the State government has launched the Sugarcane Mechanization Scheme. This initiative has the potential to lower the cost of sugarcane cultivation and enhance its production, hence leading to increase in farmers' income.

Dairy Industry

To develop the dairy industry in Bihar, the Bihar State Milk Co-operative Federation Ltd. (COMFED) was established in 1983. Apart from producing safe- and high-quality milk and milk products, COMFED also supports animal farmers in multiple ways. In 2023-24, the number of members of COMFED was 13.5 lakh (see Table 4.22). According to Table 4.20, in 2023-24, the total number of organised societies was 29,172, spread across 13 unions or projects in Bihar and Jharkhand. The daily milk collection from the 13 unions or projects has been increasing over the years. The total daily milk collection has increased from 1,662.0 thousand kg in 2022-23 to 2,305.1 thousand kg in 2023-24, representing an increase of 38.7 percent in one year (see Table 4.21).

Furthermore, daily milk collection per working dairy has increased in dairy cooperative societies of all the unions and projects. In 2022-23, COMFED has collected 81.4 kg milk per day per functional dairy cooperative society and that has increased to 110.9 kg in 2023-24.

The expansion of retail outlets continues in Bihar. Between 2022-23 and 2023-24, the number of retail outlets increased by 8.8 percent. Sudha, the marketing brand of COMFED, sells various value-added products also. Table 4.22 shows that among all the products, the sales of dahi, ice cream, ghee, and gulab jamun have increased between 2022-23 and 2023-24.

Services such as artificial insemination, vaccination, de-worming, seed distribution, and cattle feed distribution are also provided by COMFED. The number of vaccinations increased by 35 percent between 2022-23 and 2023-24 (Table 4.22). Seed distribution and cattle feed distribution also increased significantly between 2022-23 and 2023-24.

Source : COMFED, GoB

A new initiative has been taken by COMFED for the all-round development of farmers, especially, milk producers in November, 2023. COMFED has helped in the constitution of 10 Farmers Producer Organisations (FPOs) in five milk unions. Generally, FPOs are formed and managed by farmers, which gives them bargaining power to determine the prices of the produce owing to their control over a large quantity of the produce. To form FPO and making it economically viable and self-reliant, milk unions of COMFED have been selected as Cluster Based Business Organisation (CBBO) in collaboration with the National Dairy Development Board (NDDB), Anand. Two types of FPOs have been constituted: Fodder Plus FPOs and Honey Production FPOs. Out of 10 FPOs constituted, seven were Fodder Plus FPOs and three were Honey Production FPOs.

4.4 Non-Agro Based Industries

Textile Industry

Under the purview of the Bihar Industrial Investment Promotion Policy 2016, the Bihar Industrial Investment Promotion Policy (Textile and Leather Policy) 2022 has been notified. This policy aims to create a value chain from fibre to fashion, promote micro and small units, and incentivise the value addition of khadi, silk, handloom, and powerloom. Furthermore, the policy seeks to incentivise the large units in the hosiery, garments, and textile processing segments. In Bihar, 14 districts produce specialised handloom products (shown in Table 4.23).

The state produces three types of silk: mulberry, tasar, and castor/Eri. As shown in Table 4.24, the total mulberry cocoon production was 10.4 tonnes, yielding 1.2 tonnes of raw silk in 2023-24. The production of tasar and castor/Eri raw silk was 43.9 tonnes and 15.2 tonnes, respectively. Between 2022-23 and 2023-24, the production of raw silk from tasar and castor/Eri has increased by 18 percent and 15 percent, respectively. In 2023-24, the budget allocation was Rs. 430.0 lakh, reflecting a 32.3 percent growth over a one-year period. The entire budget allocation was utilised in that financial year.

Table 4.23 : Concentration of Handloom Products in Different Districts in Bihar

District	Product
Bhagalpur	Silk, Cotton, Furnishing cloth, Staple chadar, Silk (export quality), and Linen cloth
Banka	Tasar silk, Silk (export quality), and Cotton towel
Gaya	Cotton long cloth, Bed sheet, Towel, Woollen blanket
Nalanda	Cotton, Silk, Linen sari, Bawan Buti sari, Bed cover, Towel, Tasar, Mulberry Kurta cloth, Tasar, Munga shirting, Mercerised katya, Tasar kurta cloth
Nawada	Dress material of Tasar silk and Linen
Madhubani	Fine cotton long cloth, Dhoti, Shirting
Aurangabad, Rohtas	Towel, Woollen carpet, Woollen blanket
Kaimur	Woollen carpet, Banarasi sari
Patna, Siwan	Cotton cloth, Bed sheet, Chadar, Shirting, Lungi, Towel, Duster, Plain cloth
Purnea, Katihar	Jute bags, Jute-blended material, decorative material
West Champaran	Shawl, Muffler, Towel, Chadar

To sustain the handloom and powerloom sectors in Bihar, the State government has provided a power subsidy worth Rs. 33.34 crore to the powerloom units for 2023-24. Each of handloom operators have received Rs. 10,000 as working capital to run their operations. For this purpose, the State government has spent Rs. 2.0 crore in 2023-24.

Table 4.25 : Ongoing Schemes for Handloom and Powerloom (2023-24)

(Rs. crore)

Scheme	Details of scheme	Financial target	Financial achievement
Grant of power subsidy	Grant power subsidy at the rate of Rs. 3.00 per unit to powerloom weavers	33.34	33.34
Scheme for Working Capital	To provide Rs. 10,000 working capital to operational handlooms within the state	2.0	2.0

Bihar State Khadi and Village Industries Board (KVIB)

The Bihar State Khadi and Village Industries (KVIB) plays the role of a facilitator for the operations of the handloom sector. According to Table 4.26, in 2023-24, the KVIB has provided Rs. 436.13 lakh as the working capital and spent Rs. 191.94 lakh to distribute charkhas to the handloom operators. In 2024-25 (up to September 30, 2024), it has distributed 650 charkhas and 150 looms along with Rs. 270.0 lakh as the working capital, which was provided as loans to the loom operators. The KVIB has also recovered the loans. It has recovered Rs. 418.58 lakh from the loom operators in 2023-24 and Rs. 221.53 lakh in 2024-25 (up to September 30, 2024). Evidently, loan recovery has increased over the last two years.

In addition to distributing charkhas and looms, the KVIB has provided rebates to Khadi institutions and committees. In 2023-24, the KVIB granted rebates to 53 institutions or committees, amounting to Rs. 292.45 lakh. In 2024-25 (up to September 30, 2024), the rebate amounted to Rs. 290.83 lakh and was provided to 52 institutions or committees.

Table 4.26 : Details of Distribution of Charkha, Loom and Working Capital by KVIB (2022-23 to 2024-25, up to September, 2024)

4.5 Industrial Promotion in Bihar

The State government has identified priority sectors based on an assessment of the sectoral advantages the state enjoys under the Bihar Industrial Investment Promotion Policy 2016. Moreover, the State government intends to leverage these advantages to maximise industrial growth and employment creation. The State government has identified the following priority sectors of Bihar: food processing, tourism, small machine manufacturing, IT, ITeS, electrical and electronic hardware manufacturing, textiles, plastics, and rubber, renewable energy, healthcare, leather, and technical education. In recent years, the State government has also prepared long-term policy documents for specific sectors, such as the Bihar Textile and Leather Policy 2022, the Bihar Start-Up Policy 2022, and the Bihar Biofuels Promotion Policy 2023, to name a few.

The State Investment Promotion Board (SIPB) plays an important role in attracting industries to the state. It completes the application process in an online mode and adopts a transparent, accountable, and reliable method for selecting investment proposals in the state. As of September 2024, SIPB has received 3,752 online applications, of which 3,150 investment proposals received initial clearance for an investment amounting to Rs. 75,293.76 crore. In 2023-24, the total amount of proposed investments was Rs. 5,642.57 crore from 706 proposed projects. In Bihar, 769 units are currently operational. The total investment in these functioning units was Rs. 8,464.35 crore, and they generated employment for 31,749 workers. Under the Bihar Industrial Investment Promotion Policy 2016, the Government of Bihar awarded Rs. 1,615.37 crore as grants to these working units (see Table 4.27).

Table 4.27 : Details of Investment under the Bihar Industrial Investment Promotion Policy 2016 (2016-17 to 2024-25, up to September 2024)

Stage of implementation	2016-22	2022-23	2023-24	2024-25*	Total
Number of proposals received for investment under the new policy	2291	430	706	325	3752
Number of offers received for Stage-1 clearance	1959	415	539	237	3150
Proposed investment amount (Rs crore)	56587.36	8417.25	5642.57	4646.58	75293.76

Note : * Up to September 2024
Source: Department of Industries, GoB

The sector-wise investment details suggest (Table 4.28) that the food processing sector is the largest in Bihar, with a total investment of Rs. 3,517.09 crore in 353 operational units. Due to proactive policy formulation on bio-fuels by the State government, ethanol production has attracted substantial investments in Bihar in the last few years. As of September 2024, 12 units were operating in Bihar, and the total investment was Rs. 1,363.38 crore. The proposed investment in ethanol production was Rs. 30,747.55 crore, representing 41 percent of the total proposed investment in Bihar. Furthermore, investments in the cement industry have also been increasing rapidly. As of September 2024, Rs. 872.94 crore was invested in the cement industry. The renewable energy sector has also attracted significant investments in Bihar. As of September 2024,

75 investment proposals worth Rs. 10,613.20 crore have received Stage-I clearance. In the renewable energy sector, 13 units were operational with an investment amount of Rs. 568.91 crore.

Table 4.28 : Status of Industrial Units in Bihar as of September, 2024

Sector	Stage-1 Clearance		Operational units

Bihar Industrial Area Development Authority (BIADA)

As part of infrastructure development for industrialisation in Bihar, the Bihar Industrial Area Development Authority (BIADA) has created nine clusters. By September 30, 2024, BIADA had acquired and developed 7652.6 acres of land to make it suitable for industrial units. Of the total land acquired, BIADA has already distributed 4520.8 acres among the industrial units.

Table 4.29 : Details of Acquisition and Allotment of Land and Sheds for Industrialisation in Different Clusters by BIADA (September 30, 2024)

Cluster	Total acquired land and sheds		Land reserved for infrastructure, administrative blocks, roads etc. (acres)	Total allotted land and sheds		Litigated land (acres)	Total vacant land and sheds for allotment	
	Land (acres)	Sheds (Nos.)		Land (acres)	Sheds (Nos.)		Land (acres)	Sheds (Nos.)

In 2023-24, the growth in the number of enterprises, of different scales, was significantly high. In fact, the number of units set up in 2023-24 was more than double the previous year. Consequently, the total investment had increased 3.5 times between 2022-23 and 2023-24. Micro enterprises have attracted six times more investment in 2023-24 than that in 2022-23. On the employment generation front, micro and small enterprises had created 66.0 percent of the total employment created by enterprises in 2023-24. Between 2022-23 and 2023-24, the total employment generation across enterprises increased by 2.6 times (see Table 4.30).

In 2023-24, the major share of investment came in four types of enterprises, namely, food processing, general manufacturing, plastic and rubber, and Information Technology, Information Technology-Enabled Services, Electronics System Design and Manufacturing (IT/ITES/ESDM). The total investment in these four enterprises was 93.4 percent of the total investment in enterprises in 2023-24. Furthermore, textile enterprises have shown tremendous potential to generate large-scale employment. In 2023-24, 126 textile enterprises with an investment of Rs. 419.7 crore could create 27,588 jobs, or, on an average, 219 jobs per textile unit. The next best job creator was the food processing unit, as these units generated on an average 67 jobs per unit in 2023-24.

Table 4.30 : Details of the Number of Units, Investment and Employment by Type of Enterprises (2022-23 and 2023-24)

Category of enterprise	No. of Units		Investment (Rs. crore)		Employment (number)	
	2022-23	2023-24	2022-23	2023-24	2022-23	2023-24

4.6 Udyog Mitra

Udyog Mitra is one of the important institutions ensuring ease of doing business in Bihar. Udyog Mitra assists new entrepreneurs in setting up industries in Bihar by providing advice on project profiles, among other services. In 2023-24, 2,153 visiting entrepreneurs benefited from the services provided by Udyog Mitra. In addition, Udyog Mitra organises seminars, training programs, and investors' meetings. One such investors' meet for the textile industry was organised by Udyog Mitra in July 2024. To support various functions of Udyog Mitra, the State government allocated Rs. 200.0 lakh in 2023-24, and the entire allocation was utilised in the financial year.

Table 4.32 : Physical and Financial Achievements of Udyog Mitra (2019-20 to 2023-24)

Year	Fund Allotted (Rs. lakh)	Fund Spent (Rs. lakh)	Fund Spent (Percent)	No. of entrepreneurs benefitted
2019-20	153.0	153.0	100.0	616
2020-21	153.0	153.0	100.0	556
2021-22	200.0	200.0	100.0	797

4.7 Chief Minister's Schemes to Promote Entrepreneurship

To encourage youth from different sections of society, the State government has initiated various schemes of self-employment. Currently, the Mukhyamantri Mahila Udyami Yojana, the Mukhyamantri Yuva Udyami Yojana, the Mukhyamantri Scheduled Castes/Scheduled Tribes/EBC Udyami Yojana, the Mukhyamantri Minority Udyami Yojana, and the Bihar Small Entrepreneurs Yojana are operational in Bihar. Among all the schemes, the Mukhyamantri Minority Udyami Yojana and the Bihar Small Entrepreneurs Yojana were launched in 2023-24. In 2023-24, the Bihar Small Enterprises Yojana was the most prominent scheme. Based on the Bihar Caste-based Survey 2023, the State government has realised that there are a large number of poor families/households living in Bihar. The Bihar Small Entrepreneurship Yojana targeted these poor families/households and aimed to uplift their economic status. To implement the scheme, the State government has allocated a budget of Rs. 250.0 crore in 2023-24 and Rs. 1000.0 crore in 2024-25. The State government has also decided to provide additional funding in the event of receiving a large number of applications from the economically weaker sections of the population. In 2024-25, a total expenditure of Rs. 100.0 crore was proposed. Out of Rs. 100.0 crore, an expenditure of Rs. 20.0 crore was proposed for the Scheduled Caste-dominated areas and Rs. 2.0 crore for the Scheduled Tribe-dominated areas.

Under the Bihar Small Entrepreneurship Scheme, 2,02,014 applications were received in 2023-24. Out of 2,02,014 applications, the Department of Industries has approved 40,102 applications, and almost all of them have received benefits under this scheme. To provide financial support to 40,099 small entrepreneurs, the State government has spent Rs. 200.47 lakh in 2023-24. In addition to the small entrepreneurship scheme, the women entrepreneurship scheme has received Rs. 70.95 lakh against 1,614 approved applications. In 2023-24, the State government has spent Rs. 524.93 lakh to provide financial support to 47,404 applicants across all the entrepreneurship schemes (see Table 4.34).

Table 4.33 : Number of Applications Received and Entrepreneurs Selected for Different Entrepreneurship Schemes (2022-23 and 2023-24)

4.8 Status of Startups under the Bihar Startup Policy 2022

Along with the entrepreneurship schemes discussed above, the State government has created a startup ecosystem in Bihar. As stated in the policy document of the Startup Policy 2022, it has been designed on four pillars, acronym as YUVA. The four pillars are: Yes to startups (awareness, networking, and mentoring campaigns); unleash regulatory enablers for supporting startups; vibrancy in the education system to encourage and facilitate startups; and access to financing and incubation support. The State government has signed an MoU with 21 incubation centers at some of the premier educational institutes of Bihar. An internship programme was launched to match-make startups and interns. To support startups for scaling up, a provision of Rs. 15 lakh as a post-seed fund has been created. The State government has set up 46 startup cells in 38 districts of Bihar. To impart skill, a 2-year full-time post-graduate diploma in management (PGDM) course on Innovation, Entrepreneurship, and Venture Creation was introduced at the Chandragupt Institute of Management Patna (CIMP), funded by the Startup Bihar. The State government has created a 'Fund-of-funds' of Rs. 150 crore in collaboration with the Small Industries Development Bank of India (SIDBI). Apart from that, events such as the Bihar Innovation Challenge'23, the Bihar Startup Awards' 23, the Bihar Connect, Women for startups workshop, Ecosystem Building workshops, etc., were conducted in 2023-24. Among other achievements, the Startup Bihar took a leap from 'Emerging Ecosystem' to 'Aspiring Leader' in states' startup ranking by the Department for Promotion of Industry and Internal Trade (DPIIT). The Startup Bihar became the state partner with the Biotechnology Industry Research Assistance Council (BIRAC) Global Bio-India 2024. Moreover, seven industrialists or corporates will mentor the startups in Bihar.

As shown in Table 4.35, in 2023-24, 297 of 1706 applications for startups received certification. Of 297 certified startups, 267 have received the first instalment of seed fund, amounting to Rs. 11.18 crore. The State government disbursed Rs. 3.90 crore to give the second instalment of seed fund to 65 certified startups. In 2023-24, the State government has spent Rs. 15.08 crore to provide seed funding to the certified startups.

Table 4.35 : Current Status of Startups under the Bihar Startup Policy 2022 (2022-23 and 2023-24)

Level of implementation	2022-23	2023-24	Total
Number of applications received	10856	1706	12562
No. of Certified Startups	181	297	478
No. of Startups which received the first instalment as seed fund	152	267	419
No. of Startups which received the second instalment as seed fund	37	65	102
Total amount of money disbursed in the first instalment (in Rs. crore)	7.53	11.18	18.71
Total amount of money disbursed in the second instalment (in Rs. crore)	2.22	3.90	6.12
Total disbursed money (in Rs. crore)	9.75	15.08	24.83

4.9 Mines and Geology

One of the formidable sources of revenue for the State government has been minerals. In 2023-24, the State government set a target for revenue collection of Rs. 3,300.00 crore, which was 10 percent more than the revenue target of 2022-23. In 2023-24, the amount of revenue earned from all sources of minerals was Rs. 3,114.79 crore, which was 14 percent more than the revenue collection of the previous year.

In the absence of major minerals, Bihar's primary source of revenue generation has been minor minerals. Among minor minerals, the most important one is sand mining. The construction activities in Bihar have caused the demand for construction materials, including sand, to rise rapidly. In 2023-24, of the total revenue collected from mining (both major and minor), sand mining alone contributed 50.0 percent. Furthermore, over the years, the revenue collection has increased significantly. Between 2022-23 and 2023-24, revenue collection from sand mining increased from Rs. 1,384.47 crore to Rs. 1,558.16 crore, registering a growth of 12.5 percent. Similarly, the revenue collection from the Public Works Department has also increased significantly in the past five years. Between 2022-23 and 2023-24, the revenue collection of the Public Works Department rose by 30 percent (see Table 4.36).

In recent years, the State government has gained control over 12 major mineral blocks from the Ministry of Mines. Since nine out of 12 mineral blocks are of strategic importance, the Government of India will carry out the auction process. Meanwhile, the State government will auction three mineral blocks (two blocks of iron ores in Jamui district and one block of limestone in Rohtas district). In 2023-24, the total revenue collection from major minerals was Rs. 8.32 crore.

4.10 Tourism

The Department of Tourism has developed a comprehensive tourism policy, 'Bihar Tourism Policy 2023.' This policy aims to integrate the tourism industry with the economic progress of the state. Through this initiative, the State government wants to develop tourism infrastructure, improve accessibility, and provide a safe and memorable experience to the tourists. The tourism industry has the potential to provide large-scale, quality employment to the trained youth and boost local economies. A comprehensive road map of community participation has also been specified in the policy document.

Through this policy, the State government laid down a detailed incentive structure for private investment in infrastructure and services. As part of the fiscal incentives, all eligible projects would receive a subsidy based on the approved project costs. The subsidy can be availed either through the capital subsidy route or the interest subvention route.

The State government has notified the Bihar Tourism Branding and Marketing Policy 2024 to promote tourism both nationally and internationally using modern marketing technology. The aim of this policy is to inform people from various parts of India and abroad about the rich tourism heritage, including the Ramayana Circuit, the Buddhist Circuit, and the Jain Circuit. Among the various branding methods, digital display boards and glass panels in different cities in India are effectively used to attract tourists to Bihar.

The tourist footfall has significantly increased in 2023, with 821.33 lakh people visiting Bihar (see Table 4.37). Out of 821.33 lakh people, 815.86 lakh were domestic tourists, while 5.47 lakh were foreign tourists. The number of both domestic and foreign tourists in 2023 returned to its pre-Covid-19 pandemic levels. Between 2020 and 2022, the number of visitors in Bihar had plummeted because of the pandemic.

Table 4.37 : Number of Domestic and Foreign Tourist Arrivals (2019 to 2023)

Year	No. of tourists (in lakh)		
	Domestic	Foreign	Total
2019	339.9	10.9	350.8
2020	56.4	3.0	59.5
2021	25.0	0.01	25.0
2022	253.3	0.87	254.17
2023	815.86	5.47	821.33

Source : Department of Tourism, GoB

The budget allocation for the Department of Tourism in 2023-24 was Rs. 339.15 crore. Of the total allocation, Rs. 328.03 crore was spent in 2023-24. Over the years, the utilisation of funds has significantly improved.

Table 4.38 : Statement of Budget Allocation and Expenditure of Department of Tourism (2019-20 to 2023-24)

Major Tourism Development Works

In 2023-24, the State government has approved Rs. 494.71 crore to implement various projects across the state. The three most prominent projects in terms of the amount of money spent are as follows:

First, the estimated cost of the Gaya Ji Dharamshala in the Gaya district was Rs. 120.16 crore.

Second, the estimated cost for developing Punaura Dham in Sitamarhi was Rs. 72.47 crore.

Third, the estimated cost for the construction of the pathway-cum-shed building structure and the alternate approach path for the Vishnupad Temple and the bus depot in the Gaya district was Rs. 61.97 crore.

In 2024-25, the State government has allocated Rs. 204.99 crore to carry out important projects. The three most prominent projects, in terms of cost, are as follows:

First, the estimated cost for the construction of a budget hotel on the premises of Hotel Janaki Vihar in Sitamarhi is Rs. 29.87 crore.

Second, the estimated cost for the construction of the main building for the service plaza and motel in Supaul is Rs. 29.54 crore.

Third, the estimated cost for the construction of the office building of the Bihar Tourism Development Corporation in the Patna district is Rs. 28.87 crore.

Eco-tourism

The State government has created a separate division to expand and promote eco-tourism in Bihar. This division has various programmes for eco-tourism and park development. It has begun working on developing and maintaining parks in different districts while also creating amenities

at tourist destinations. The recent major eco-tourism attractions in the state include Valmiki Tiger Reserve, Rajgir Zoo Safari, and Kaimur Wildlife Sanctuary, to name a few. Between 2020-21 and 2023-24, eco-tourism-related development work was carried out in 24 divisions in the state. In 2023-24, some notable eco-tourism projects included the construction of a glass bridge and a suspension bridge at Rajgir, as well as the development of a park in Gaya, Bodh Gaya, and Piparghatti (all in the Gaya division), and the Bharkund area (Aurangabad division), among others. Various eco-tourism destinations have attracted local tourists and visitors from outside. Over the years, three eco-tourism sites in Rajgir have drawn a large number of tourists. Between 2022-23 and 2023-24, the footfall has tremendously increased at all eco-tourism sites listed in Table 4.39.

Table 4.39 : Number of Visitors at Different Ecotourism Sites (2021-22 to 2023-24)

Eco-tourism Site	2021-22	2022-23	2023-24

Bihar Sharif Parks	Nil	172293	418276
Total	306390	527843	1256862

Source : Department of Environment, Forest & Climate Change, GoB

In 2023-24, the total outlay for eco-tourism and park development was Rs. 100.00 crore, constituting 21.6 percent of the total outlay of the Department of Environment, Forest, and Climate Change. In 2023-24, the financial allocation for park development was Rs. 87.2 crore. The Patna Park division has received the largest allocation of Rs. 15.97 crore, followed by the Nalanda division (Rs. 11.33 crore). Overall, the fund utilisation rate was high at 96.1 percent considering all the divisions.

CHAPTER - V

LABOUR, EMPLOYMENT AND SKILL

Abstract

The economic prosperity of a nation largely depends on the skill level of its workforce and its ability to cater to industry-specific labour demands. To align with the growing needs of the economy, the labour force needs to acquire diverse and specialized skills. Recognising the importance of a skilled workforce, the State government has taken proactive steps to address the increasing demands for skilled labour by implementing various skill development programmes. These programmes aim to equip the workforce with necessary competencies. In addition to such initiatives, the government has also introduced welfare schemes, targeting both organized and unorganized sector workers to ensure their well-being. Regular recruitment drives are conducted to create quality employment opportunities within the state. Furthermore, in a significant step towards women's empowerment and increase their participation in the workforce, the state has implemented extensive women's reservation policies across employment levels. This chapter highlights the government's concerted efforts to eradicate child labour and the implementation of schemes aimed at their rehabilitation and reintegration into mainstream. Through these initiatives, the State government strives to ensure holistic development and inclusive growth by addressing the needs of its diverse labour force.

Recognising labour as a critical aspect of economic progress, the government of Bihar has taken a multitude of initiatives to harness its labour resources. The State government has devised a range of policies and programmes that would benefit every section of the labour force. On the one hand, the State government has created jobs in the public sector to bolster the government service delivery system. In recent years, a substantial number of employment opportunities have been created in different government departments. Commissions and institutions, such as the Bihar Public Service Commission, recruit suitable candidates for government departments. On the other hand, the State government has adopted various policies to provide timely social security benefits to almost all sections of the large workforce engaged in the informal sector. Generally, workers in the informal sector receive low remuneration and are mostly deprived of any social security benefit. The State government has taken the responsibility of providing different kinds of benefits through welfare schemes. The State government has also focused on creating a skilled youth

workforce by providing them with training in different trades and vocations to be employable in the job market of Bihar and elsewhere.

In this chapter, we discuss the broad pattern of employment and unemployment in Bihar with reference to other states of India, using the Periodic Labour Force Survey (PLFS) data. In the subsequent sections, the State government's welfare schemes for informal sector workers, employment generated in the government sector, and skill development programmes by different departments, specially the Labour Resources Department of the State government are discussed.

5.1 Status of Employment and Unemployment

The Periodic Labour Force Survey (PLFS) provides data on various parameters of the working-age population in India. The latest series of PLFS was for the reference year 2023-24. PLFS provides quarterly results on key employment and unemployment indicators for urban areas as well as annual estimates of employment and unemployment indicators in both rural and urban areas. For annual estimates, both usual status (principal status and subsidiary status) and current weekly status reference timeframes are considered. The usual status of a person is the activity status over the reference period of the last 365 days preceding the date of the survey. The current weekly status is the activity status of a person over the reference period of the last seven days preceding the date of the survey. Notably, the sampling design, concepts, definitions, survey methodology, and measurements have remained unchanged since 2017, allowing researchers and policymakers the opportunity to compare the results of different rounds of the survey to devise long-term policies.

In this section, we will discuss three indicators of employment and unemployment, namely, the labour force participation rate (LFPR), worker population ratio (WPR), and unemployment rate (UR) based on the usual (principal plus subsidiary) status concept. LFPR is defined as the number of employed persons, and the number of unemployed persons in the total population. The improvement in LFPR suggests an increase in the economically active population in the total population. In Bihar, LFPR for males was 79.2 percent in rural Bihar and 71.9 percent in urban Bihar. However, the female LFPR was lower compared to male LFPR. LFPRs for both males and females in both rural and urban Bihar were lower compared to the all-India average. Between 2022-23 and 2023-24, the female LFPR in both urban and rural areas has improved. For instance, LFPR for rural women was 24.8 percent in 2022-23, which increased to 33.5 percent in 2023-24. Similarly, LFPR for urban women was 18.0 percent in 2023-24 compared to 13.8 percent in 2022-23. The increase in female LFPR indicates an improvement in women's involvement in economic activities.

Table 5.1 : Labour Force Participation Rates (LFPRs) of Selected States (2023-24)

(Percent)

India	**84.3**	**51.2**	**67.6**	**81.9**	**31.2**	**57**	**83.5**	**45.2**	**64.3**

Note : LFPR is based on usual (principal + subsidiary) status, for the 15 years and above population
Source : Periodic Labour Force Survey (MoSPI), 2024

PLFS defines WPR as the proportion of persons employed among all the persons in the population. Across all the selected states, WPR (in usual status) in rural areas was higher than that in urban areas. The male and female WPRs in Bihar was lower than the male and female WPRs at the all-India level. In both rural and urban areas in Bihar, female WPRs was much lower than male WPRs.

Both LFPR and WPR of women were low in most developing countries, indicating that most women did not participate in economic activities due to the functioning of social and economic institutions, especially in rural areas. In addition, the prevalent definition of work or economic activity is biased against women's work. The definition of work has limitations, in that it does not recognise household chores and caregiving work that invariably fall on women.

Table 5.2 : Worker Population Ratios (WPRs) of Selected States (2023-24)

(Percent)

Note : WPR is based on usual (principal + subsidiary) status, for the 15 years and above population
Source : Periodic Labour Force Survey (MoSPI), 2024

Using the usual activity status, the unemployment rate is defined as the share of unemployed persons in the total population of employed and unemployed persons. In developing economies where a large portion of the working-age population is engaged in informal activities, unemployment rates have been low, and India is no exception. The unemployment rate in usual status presents open unemployment for a longer period and masked 'disguised unemployment'. In a country like India, most of the working-age population is poor and unskilled. Therefore, they cannot remain unemployed for a long time in search of better job opportunities. They accept any employment opportunity they obtain to maintain their daily consumption needs. This is another reason for the lower levels of open unemployment in developing countries, including India. In Bihar, unemployment rates for males and females were 3.6 percent and 1.4 percent, respectively. Further, the unemployment rate in urban areas, for both males and females, was higher than in rural areas. The incidence of unemployment in urban Bihar for male and female were 6.9 percent and 9.1 percent, respectively.

Pattern of Employment

The PLFS considers three employment statuses according to the nature of employment. These are: self-employed, regular wage/salary earners, and casual labour. Self-employed status is further subdivided into own-account workers, employers, and helpers in household enterprises. The data reported in Table 5.4 suggests that a large portion of self-employed workers were either engaged in agricultural activities or run their own enterprises. In Bihar, 61.2 percent of male workers were self-employed. Further, 28.5 percent of all male workers in Bihar were casual labour, working on daily wages without any job contracts or job security. The proportion of male self-employed and male casual workers in Bihar was higher than the all-India average. In contrast, only 10.3 percent of male workers received regular wage/salary earnings. The share of regular wage/salary earners in Bihar was 15.1 percentage points lower than that at the all-India level. The employment statuses of male workers in Bihar as well as in other states of India, suggest that a large number of workers were engaged in the informal sector where the nature of work is precarious.

The employment statuses of female workers were remarkably different from that of the male workers. In Bihar, the share of self-employed female workers was as high as 83.7 percent. Of 83.7 percent of self-employed female workers, 39.8 percent were engaged as helpers in household enterprises. The proportion of self-employed female workers in Bihar was 17.1 percentage points higher than the all-India average. In Bihar, 10.8 percent of female workers were engaged in casual labour, and that was 4.1 percentage points more than the all-India average. The proportion of female workers engaged in regular wage and salaried jobs was 5.5 percent in Bihar.

The economy is broadly divided into three sectors: primary, secondary, and tertiary. In Bihar, 53.2 percent of all workers were engaged in the primary sector, while the secondary and tertiary sectors absorbed 23.7 percent and 23.1 percent of workers, respectively. The absorption of workers in the primary sector in Bihar was 9.7 percentage points higher than the all-India average. The gender-wise distribution of workers across sectors suggests that an overwhelming majority of female workers (81.2 percent) were engaged in the primary sector compared to 42.9 percent of male workers. For male workers in Bihar, the secondary sector was an important employment-generating sector, as 29.6 percent of workers were engaged in the manufacturing sector. Table 5.6 shows that male workers have received more employment away from the agricultural sector. On

the other hand, most of the female workers were confined within the village boundaries and engaged in agricultural activities.

The distribution of working persons in the usual status (ps and ss) according to the sections of the National Classification of Industries, 2008 (NIC 2008) is presented in Table 5.7. This suggests that for male workers in Bihar, the three most important industries, in terms of employment generation, were agriculture, forestry, and fishing (42.7 percent), construction (25.4 percent), and wholesale and retail trade; repair of motor vehicles and motorcycles (13.0 percent). These three industries engaged 81.1 percent of workers in the reference year 2023-24. This leads to two important conclusions. First, an overwhelming majority of workers were engaged in occupations that were low-paying and devoid of social security measures. Given the informal nature of occupations, working conditions were of poor quality. Second, a small section of male workers was skilled

enough to obtain employment in industries that require educational and technical skills, and often these jobs fetch decent remuneration for workers.

For female workers, agriculture, forestry, and fishing employed 82.1 percent of workers in the reference year 2023-24 in Bihar. This information also indicates the continued confinement of female workers in agricultural activities in rural areas. In Bihar, only 7.2 percent of female workers were engaged in manufacturing. Within the services sector, the education sector provided employment to 2.4 percent of the male workers and 2.8 percent of the female workers in Bihar.

Table 5.7 : Percentage distribution of usually working persons (ps+ss) by industry of work (industry sections of NIC-2008) for Bihar and India (2023-24)

Sector	Male		Female		Person

According to the 15th ICLS (International Conference of Labour Statisticians) conceptual framework, proprietary and partnership enterprises, including informal producers' cooperatives, are largely considered informal sector enterprises. Following the same concept, PLFS reported that, in Bihar, 90.8 percent of male workers and 78.8 percent of female workers were employed in the informal sector (see Table 5.8). A larger share of female workers was employed in government/local bodies/public sector enterprises (16.3 percent) compared to their male counterparts (5.4 percent). However, in absolute terms, the number of female workers in government/local bodies/public sector enterprises might not be more than the number of male workers, as we have seen that the size of the female working population was small in Bihar compared to the size of the male working population in Bihar.

Table 5.8 : Percentage of persons engaged in non-agriculture by enterprise in Bihar and India (2023-24)

Sector	Male		Female		All	
	Bihar	India	Bihar	India	Bihar	India
Proprietary and partnership	90.8	76.8	78.8	61.2	89.4	73.2

In Table 5.9, we attempt to capture the employment conditions of regular wage/salaried employees in usual status (ps+ss) engaged in the non-agricultural sector. Four aspects of employment conditions are considered here: first, workers with no written job contract; second, workers not eligible for paid leave; third, workers without any specified social security benefits; and fourth, those not eligible for paid leave, without a written job contract and without any specified social security benefits. As mentioned earlier, 10.3 percent of male and 5.5 percent of female workers were regular wage/salaried employees in Bihar. Among male regular wage/salaried employees, 66.8 percent did not have any written job contracts. Furthermore, 56.7 percent of male regular wage/salaried employees were not eligible for paid leave, without a written job contract and without any specified social security benefits. The employment conditions of female regular wage/salaried employees were better than that of male workers in Bihar.

Table 5.9 : Employment Conditions of Regular Wage/Salaried employees in usual status (ps+ss) in non-agriculture sector for Bihar and India (2023-24)

(in percent)

Gender/ category	Employment Condition	Bihar	India
Male	With no written job contract	66.8	58.2
	Not eligible for paid leave	61.6	47.8
	Without any specified social security benefits	61.1	51.8
	Not eligible for paid leave, without written job contract and without any specified social security benefits	56.7	40.1
Female	With no written job contract	49.5	57.3
	Not eligible for paid leave	48.3	45.9
	Without any specified social security benefits	48.9	58
	Not eligible for paid leave, without written job contract and without any specified social security benefits	29.3	38.3
All	With no written job contract	63.9	58
	Not eligible for paid leave	59.4	47.3
	Without any specified social security benefits	59.1	53.4
	Not eligible for paid leave, without written job contract and without any specified social security benefits	52.2	39.6

Levels of Earnings from Employment

In PLFS, information on earnings from employment was collected for all three categories of workers, viz., self-employed persons, regular wage/salaried employees and casual labour. For the information on earnings, PLFS uses the current weekly status. For self-employed persons in current weekly status, information on earnings during the last 30 days from self-employment activity was collected. For regular wage/salaried employees in current weekly status, information on earnings during the preceding calendar month from such work was collected. For casual labour, information on earnings was collected for each day of the reference week.

The self-employed category was a numerically dominant category across all states of India. As previously noted, 61.2 percent of male workers and 83.7 percent of female workers were self-employed. The average gross monthly income of a male self-employed worker in rural Bihar was Rs. 10480.2 compared to Rs. 11088.0 at the rural India level. For a female worker, the average monthly income in rural Bihar was Rs. 4434.8, which is only 42 percent of the average monthly income of a male self-employed worker. For regular wage/salaried employees, the average monthly income of a male worker in rural Bihar was Rs. 18504.0 (Table 5.10). The male-female wage differential was lower for regular wage/salaried employees than the earnings from self-employment in rural Bihar. For regular wage/salaried jobs in rural Bihar, the average monthly

earning of a female worker was 80 percent of that of a male worker. Furthermore, the average monthly earnings of both male and female workers in Bihar were higher than that at the all-India level. The average monthly earnings of male and female workers of both self-employed and regular wage/salaried categories in urban Bihar were higher than that in rural Bihar. In urban Bihar, the gender differential in average monthly earnings was high for the self-employed category, as a female worker earned just 45 percent of the earnings of a male worker. In the case of regular wage/salaried jobs, the average earnings of a female worker were almost at par with that of a male worker.

For casual workers in rural Bihar, the average daily earning was Rs. 420 for a male worker and Rs. 339 for a female worker (Table 5.12). In urban areas, the average daily earning was Rs. 449 for a male worker and Rs. 369 for a female worker. In both rural and urban areas, the gender wage gap was significantly high. This gender wage disparity was evident across all states in India. However, in Bihar, the gender wage differential in daily earnings was lower compared to other states in the country.

5.2 Social Security Measures for Workers of Unorganised Sector

PLFS data indicate that a significant portion of the working population, both male and female, is either self-employed or engaged in casual labour. Furthermore, it suggests that most regular wage/salaried employees also work as informal workers, lacking written contracts with their employers and without social security benefits. These patterns have been observed across all the states in India, though in varying extents, and Bihar is no exception. Over the years, the Government of Bihar has implemented several initiatives to provide social security benefits to various groups of workers. Additionally, the government conducts skill development programmes aimed at enhancing the employability of different segments of the working population in Bihar. In recent years, the State government has actively recruited individuals for positions in the public sector. This large-scale recruitment in the government sector has a multiplier effect on household consumption among newly hired government employees, contributing to the overall economic growth of Bihar. In the following sections, we will discuss the measures the State government has undertaken to provide skills, training and social security benefits to informal sector workers.

Bihar Shatabdi Unorganized Sector Workers and Artisans Social Security Scheme : The scheme was implemented on April 1, 2011, to provide social security for unorganised workers and artisans (age group of 18 to 65 years) in the event of death, various disabilities, and injuries resulting from accidents. It also offers scholarships to the children of victims to support their pursuit of school, vocational, and technical education. However, the scheme does not cover individuals registered under the Aam Aadmi Bima Yojana (AABY) or the Building and Other Construction Workers (Conditions of Service) Act, 1996. This initiative provides financial assistance to unorganized sector workers and their dependents, including Rs. 2,00,000 for accidental death, Rs. 50,000 for natural death, Rs. 1,00,000 for permanent total disability, and Rs. 50,000 for permanent partial disability. In 2023-24, the compensation amounts were increased. Additionally, the number of beneficiaries and the amount of total grant have significantly risen during this period. In 2023-24, the number of claims reached 2563, representing a 146 percent increase compared to the previous year, 2022-23. The total grant amounted to Rs. 14.99 crore, reflecting a 144.1 percent increase from 2022-23 to 2023-24.

Bihar State Migrant Labourer Accident Grant Scheme : This scheme provides financial assistance to the dependents of migrant workers in the event of accidents. If a migrant worker dies due to an accident while working outside Bihar or abroad, the dependents of the deceased will receive Rs. 2,00,000 within 180 days following the incident. The Government of Bihar has amended the Bihar State Migrant Labour Accident Grant Scheme Rule, 2008 and has notified the Bihar State Migrant Labour Accident Grant Scheme (Amendment) Rule, 2023. The compensation amounts have been increased. The compensation for death resulting from an accident has risen from Rs. 1,00,000 to Rs. 2,00,000. The compensation for permanent total disability has been raised from Rs. 75, 000 to Rs. 1,00,000. In the case of permanent partial disability, the compensation has increased to Rs. 50,000 from Rs. 37,500. In 2023-24, there were 213 deceased migrant workers, and their dependents received a total of Rs. 2.32 crore in compensation (see also Table A 5.1).

Bihar Building and Other Construction Workers Welfare Board : According to PLFS, 2023-24, 18.2 percent of usually working persons were engaged in work in the construction sector in Bihar. This sector was the second most significant sector, following agriculture, forestry, and fishing in Bihar. The majority of construction workers were employed informally, with minimal or no social security measures in place. To safeguard this substantial segment of the workforce, the State government established the Bihar Building and Other Construction Workers Welfare Board (henceforth the Board). Initially, the Board focused on registering construction workers. In 2023-24, 405.01 thousand construction workers were registered with the Board. Over the past five years (2019-20 to 2023-24), the cumulative number of registered construction workers has reached 1772.01 thousand. In 2023-24, the number of beneficiaries was 109.63 thousand. The total sanctioned amount for that year was Rs. 694.80 crore, reflecting a 50 percent increase compared to the funds allocated in 2022-23. The total amount of funds utilised was Rs. 622.70 crore, resulting in a utilisation rate of 90 percent.

Between April and December 2023, the Board organised 6,041 camps at the block and panchayat levels to promote the schemes implemented by the Board.

As provided in the Bihar Building and Other Construction Workers (Regulation of Employment and Service Conditions) Rules, 2005, the Board has conducted 1066 inspections at the regional level to ensure compliance with health, safety, and other standards for construction workers at the

construction sites. Additionally, the Board has issued 285 notices for violations of safety regulations.

Table 5.15 : Numbers of Registered Construction Workers, Beneficiaries, and Fund Utilization (2019-20 to 2023-24)

Eradication of Child Labour : The existence of child labour poses a significant threat to any civilised society. In accordance with the Child and Adolescent Labor (Prohibition and Regulation) Act, 1986, the Bihar State Child and Adolescent Labour (Prohibition and Regulation) Rules, 2024 have been implemented. Furthermore, the Bihar State Child Labor Commission (Amendment) Act, 2024 was enacted to amend the Bihar State Child Labor Commission Act, 1996.

The State government established the Bihar State Child Labour Commission in 1999. The Commission's mandate includes addressing child labour issues, facilitating rehabilitation, and advising the government on related matters. Recently, the State government has reorganised the Commission to enhance its effectiveness. District-wise number of rescued and rehabilitated child labour under the Chief Minister's Relief Fund is presented in Table A 5.2.

The Commission has collaborated with NGOs across all districts of Bihar to organise awareness campaigns at various locations and on multiple occasions. Furthermore, the Commission has established task forces in different districts to rescue child labour. These task forces hold regular meetings at the district, block, and panchayat levels.

Following the Hon'ble Supreme Court's directive, the offending employers are required to pay a fine of Rs. 20,000 as compensation. This amount is deposited into the Child Labour Rehabilitation and Welfare Fund. Upon rescue, each child receives Rs. 3,000 for clothing and one month's supply of food. Additionally, Rs. 25,000 is allocated to each freed child from the Chief Minister's Relief Fund.

An upgraded version of the Child Labour Tracking System (CLTS) software has been introduced to monitor and facilitate the rehabilitation of rescued child labourers. Each released child labourer registered in the CLTS receives Rs. 25,000 from the Chief Minister's Relief Fund. A total of Rs. 6.64 crore has been distributed to 2,658 children at the rate of Rs. 25,000 per child, according to the available data. Additionally, the "Dhaava Dal" application has been developed to streamline the monitoring of child labour release processes.

The Commission has also implemented affirmative actions to promote the welfare of children of brick kiln workers. During the brick-making season in Bihar, workers from various districts migrate to work in brick kilns. In the absence of caregivers at home, these workers are compelled to bring their children to the kilns. It is often observed that the children of these workers engage in various activities within the brick kilns, exposing them to hazardous and polluted environments. Furthermore, these children are deprived of educational opportunities. To address this issue, the Commission is working to establish temporary crèches for children under the age of 7 years and temporary schools for children aged 6 to 14 years, ensuring a safer and more supportive environment for their growth and learning.

Employees' State Insurance Scheme (ESIS) : The primary objective of the Employees' State Insurance Scheme is to provide medical facilities and benefits to 4,11,210 insured individuals and their dependents. These individuals receive medical services through 17 ESI dispensaries and 40 affiliated medical centres.

Any establishment with ten or more employees is required to register under the Employees' State Insurance Act. The ESIC, established under the Employees' State Insurance Act 1948, provides insurance coverage for employees. Currently, employees contribute 0.75 percent of their wages, while employers contribute 3.25 percent of the wages paid or payable during each wage period.

In 2023-24, more than 43 types of medicines have been procured from the Bihar Medical Services & Infrastructure Corporation Limited (BMSICL), Patna. The procured medicine was distributed among the ESI dispensaries. During this period, 25.6 thousand employees and their dependents have received treatment through these dispensaries.

Minimum Wage : The State government revises the minimum wages to account for the dearness allowance, where dearness allowances is linked to consumer price index. In 2023-24, the minimum wage has increased by 5.7 percent for 88 employment categories under the Minimum Wages Act of 1948.

5.3 Employment Generated by the State Government and Other Organisations

The Government of Bihar has been creating a substantial number of employment opportunities in the public sector and related services. The Bihar Public Service Commission (BPSC), the Bihar Technical Services Commission (BTSC), the Bihar Police Sub-Ordinate Services Commission, the Central Selection Board of Constables, and the Bihar State Electronic Development Corporation (BSEDC) are responsible for recruiting qualified candidates for various positions within the State government departments.

Bihar Public Service Commission (BPSC) : The commission selects officers for various departments of the Government of Bihar and submits recommendations for appointments. After receiving requisitions from various departments, advertisements are published for various posts. Based on the applications received from eligible candidates in response to these advertisements, competitive examinations are conducted to select suitable candidates. In 2023-24, advertisements were published for 4,29,015 posts. As of September 30, 2024, 2,00,592 applications have been received for 3420 advertised posts.

Bihar Technical Service Commission (BTSC) : The Commission is responsible for recommending candidates for Group 'B' and 'C' with a Grade Pay of less than Rs. 4800 (with the corresponding Grade Pay revised periodically). In 2023-24, BTSC advertised vacancies for 3913 posts, adhering to the reservation policy of the State government, which includes horizontal reservations for women in both reserved and non-reserved categories of posts. Against 3913 advertised posts, 2961 candidates were selected and recommended by BTSC. In 2024-25 (up to September 30, 2024), 638 candidates were recommended by BTSC (see Table 5.21). The budget allocation for BTSC in 2024-25 was Rs. 1397.45 lakh, representing a 7.2 percent increase compared to the budget allocation for 2023-24. In 2024-25 (till September 30, 2024), BTSC had spent Rs. 491.32 lakh (see Table 5.22).

Bihar Police Sub-ordinate Services Commission : In 2023-24, the Commission advertised 1403 positions, including sub-inspector (prohibition), sub-divisional fire station officer, and police sub-inspector. As of 2023-24, the recruitment process had been completed for 56 of these positions. The recruitment efforts continued into 2024-25, resulting in the hiring of 1339 personnel by September 2024. Among the recruited candidates, 863 were male, 473 female, and three transgender individuals. The process adhered to the State government's prescribed reservation policy, which includes a 35 percent horizontal reservation for women, as detailed in Table 5.24.

Central Selection Board of Constables: In the past three years (2021-22 to 2023-24), the Central Selection Board of Constables has advertised 27,846 positions and successfully recruited 27,204 candidates (Table 5.25). In the recruitment process, the Central Selection Board of Constables adheres to the norms of quota allotted to different social groups and complies with the mandated 35 percent horizontal reservation for women in both reserved and non-reserved categories. A detailed distribution of police personnel recruitment by social group is presented in Table 5.26.

Bihar State Electronics Development Corporation Limited (BSEDC) : BSEDC has a mandate to support different departments by recruiting skilled personnel to enhance the efficiency and accessibility of government services for the people of the State. Generally, BSEDC recruits data entry operators, software programmers, stenographers, and IT professionals. In 2023-24, BSEDC successfully recruited 1037 individuals to fulfil the needs of different government departments. Of the 1037 deployed manpower, 989 (95 percent) were data entry operators.

Information related to Employment Exchanges

The primary function of an Employment Exchange is to register job seekers. In Bihar, 7,39,492 people were registered with various Employment Exchanges in 2023-24. The Employment Exchanges have been regularly organising camps to offer guidance, and opportunities through job camps, and job fairs. In 2023-24, 3228 guidance camps were organised and 1,17,925 individuals benefited from these. Furthermore, 1376 job camps were organised, which benefited 31,784 individuals. In 2023-24, the Employment Exchanges organised 40 job fairs, benefiting 25,951 aspirants. Here, we mention two important initiatives adopted by the Employment Exchanges, namely, 'Tool Kit distribution' and 'Study Kit distribution'.

Under the Expansion of Employment Services Scheme, Employment Exchanges have initiated the Tool Kit distribution programme for registered candidates (including Divyangs, Transgenders, Women, and those belonging to SCs, STs, OBCs, and EBCs) who are skilled in various trades such as electrician, fitter, mobile repair, beautician, plumber, electronic repair. It has been decided that 30 percent of the total beneficiaries will be women. The maximum cost of a tool kit is Rs. 15,000. In 2023-24, tool kits were provided free of cost to 1666 registered candidates. In 2023-24, the State government has spent Rs. 79.64 lakh on the supply of tool kits.

Apart from the 'Tool Kit distribution' initiative, the Employment Exchanges have also begun distributing 'Study Kits' to the registered candidates (including Divyangs, Transgenders, Women, and those belonging to SCs, STs, OBCs, and EBCs). Under the Employment-cum-Guidance Scheme, the 'Study Kit distribution' programme assists the registered and eligible candidates in preparing for government jobs and other competitive examinations. The maximum purchase price of a study kit is Rs. 5,000. In 2023-24, 'Study Kits' were provided free of cost to 2436 registered candidates. In 2023-24, the State government has spent Rs. 144.14 lakh on strengthening of Employment-cum-Guidance Programme.

Table 5.28 : Achievement of Employment Exchanges, 2023-24

Plan	Particular	2023-24
Registration*	Total number	739492
Guidance	Number of camps	3228
	Number of beneficiaries	117925
Job Camp	Number of camps	1376
	Number of selected candidates	31784
Job Fair	Number of job fairs	40
	Number of selected candidates	25951
Career Information Centre	Number of beneficiaries	71682

Note : * Registration of Applicant is done on NCS Portal, (www.ncs.gov.in) developed by GOI and adopted by Bihar

5.4 Skill Development

The Bihar Skill Development Mission (BSDM) aims to prepare a skilled workforce to enhance the employability of the working population of the State. The primary focus of BSDM is on imparting employment-oriented training and capacity building, etc. Since its inception, over 20 lakh people have received training, and the network of training centres is well-established throughout the State. As part of the new initiatives, BSDM has started conducting employment-oriented training programmes, especially for women, in partnership with the Patna Municipal Corporation. Besides providing training in traditional fields like information technology, healthcare, retail, manufacturing, computing, and electronics, BSDM also offers modern and advanced courses, such as drone technology, cloud computing, web development, and multi-skill technician training. Collaborating with various departments of the State government, these efforts aim to equip the youth with skills relevant to today's evolving industry and job markets, helping them to advance in their careers. BSDM is also committed to provide continuous training in the State's primary sectors, including agriculture and allied services. Efforts have been made to train farmers and entrepreneurs in areas such as mushroom cultivation and link them to self-employment opportunities. As a result, the State now ranks first in the country for mushroom production.

Additionally, BSDM has opened new pathways for skill development in the State's informal sectors, including for street food vendors, tyre fitters, retail vendors, and sandal makers, providing valuable recognition for their skills.

Kushal Yuva Programme (KYP) : This programme was conducted from 1886 centres with more than 4.7 lakh enrolled trainees in 2023-24. A diametric shift in the gender ratio was observed in KYP. Over the years, the female participation in the training has increased substantially. For instance, in December 2016, the male-female ratio of the trainee was 80:20, which has changed to 42:58 by January 2024. The encouraging change indicates a positive shift in women's perceptions of skill development programmes. Now, more women are opting for skill training to improve their skills and take part in the economic process in the State. Under KYP, training programmes were designed exclusively for women. As part of the State government's "Saat Nishchay" scheme, under "Arthik Hal Yuvaon Ko Bal," the Skilled Youth Programme was designed to provide 240 hours of training for employability to youth in Bihar who are 10th pass and in the age group of 15-28 years (33 years for SC/ST and Divyang, and 31 years for OBC). In 2023-24, more than 2.5 lakh trainees received certificates after successfully completing their training (Table 5.29).

Domain Skilling: This programme was introduced to provide advanced professional training to the workers who meet minimum eligibility according to course or scheme guidelines. BSDM coordinated with 15 departments to design the training programme. In 2023-24, out of 15,470 enrolled trainees, 6,897 trainees could complete the training (Table 5.29). Further, 1,416 trainees were certified, and 260 of them obtained jobs.

Recruit-Train-Deploy (RTD) Scheme: Under this scheme, the State government provides training to candidates (aged 15-45 years) based on industry standards specific to industry needs. BSDM funds the training expenses under this scheme. In 2023-24, this programme was conducted from 15 centres, where 4,546 candidates were enrolled, and 3,307 candidates have completed their training. Of 1,248 certified candidates, 479 candidates were offered jobs (Table 5.29). It must be highlighted that out of every three certified candidates, one candidate received employment.

Recognition of Prior Learning (RPL): Within the framework of the National Skill Qualification Framework (NSQF), RPL offers training to individuals (aged 18-59 years) with pre-existing knowledge and skills. In 2023-24, this programme was conducted from 49 centres with 5,888 enrolled individuals (Table 5.29). Of these, 1,216 candidates have received certificates after completion of their training.

Bihar State Certificate in Financial Accounting (BS-CFA): BSDM introduced the BS-CFA course, which provides financial accounting training for aged 17-45 with educational qualification of 12th grade. From 78 centres, 7,755 candidates have received training, and 4,267 trainees could complete the training programme. Under the programme, 4,204 candidates have received certificates (Table 5.29).

Sankalp Yojana: Sankalp Yojana is a centrally sponsored scheme, and is funded by the World Bank. It has introduced innovative training programmes in Bihar, including tyre fitting, street vending, and e-cart driving for economically disadvantaged women under Patna Municipal Corporation. So far, 1,301 candidates have been trained under Sankalp, with 1,181 candidates receiving the completion certificates. Under the Sankalp Yojana, a Migration Counselling and Registration Centre (MCRC) is being established for migrant workers of Bihar. An RFP has been published to select an agency to set up MCRC centres across ten districts in Bihar (Patna, Purnea, Bhagalpur, Madhubani, Siwan, Darbhanga, Muzaffarpur, Samastipur, Sitamarhi, and Gaya). Additionally, centres will be established at ten key locations outside Bihar (like Mumbai, Delhi, Guwahati, Bengaluru, Hyderabad, Kolkata, Surat, Pune, Ludhiana, and Jaipur) to offer migrant workers vital guidance, information, and counselling to face workplace challenges.

Other Achievements

The innovative flagship programmes, like KYP and RTD scheme, have been recognised with the national-level SKOCH Award in 2023-24. NITI Aayog has also recognised the *Kushal Yuva Programme.*

At the 2023 World Skills Competition (considered the Olympics of skill competitions), participants from Bihar won 13 medals, including 4 gold, 2 silver, and 5 bronze. In 2023-24, BSDM has organised state-level competitions with the National Skill Development Corporation (NSDC).

In future, BSDM plans to organise roadshows, creating a command-and-control centre, implementing KYP in high schools, conducting 3-day training sessions for KYP trainers, and launching divisional-level reviews and KYP dialogues. New skill centres will be opened in subdivisions where it was non-existent previously. Under BS-CFA, a "Mega Skill Centre" in Patna will be established using the hub-and-spoke model.

In 2023-24, the State government has allocated Rs. 893.67 crore for skilling programmes run by different departments in the State (Table 5.30). BSDM and the Department of Rural Development have received Rs. 799.03 crore, translating to 89 percent of the total allocation. BSDM alone received a budget allocation of Rs. 621.0 crore in 2023-24 for the skilling programmes. The finances for the skilling programme came from three sources, viz., the state plan, the state plan (Saat Nishchay-2), and the Central Government schemes, shown in Table 5.31.

Under the State Plan, Rs. 27,295.98 lakh has been allocated for 2023-24 to construct new buildings and to renovate old buildings for Industrial Training Institutes (ITIs). Of the allocated funds for buildings, Rs. 11,768.00 lakh has been utilized. To construct new ITIs, Rs. 9132.31 lakh was allocated with a utilisation rate of 85.44 percent. For modernization of machines and equipment of ITIs, Rs. 4410.31 lakh out of allocated Rs. 4715.69 lakh was spent in 2023-24. Under the State Plan (Saat Nishchay-2), the State government allocated Rs. 50000.0 lakh, primarily to construct and renovate buildings of ITIs and conduct the skilling programmes by BSDM. Under the State government's *Saat Nishchay Part-2*, a Mega Skill Centre will be established using a hub-and-spoke model to provide industry-aligned, employment-oriented training for youth. Under the Central government schemes, the total allocated fund was Rs. 17,334.0 lakh to run various skilling programmes (see also Table A 5.3).

Rural Self-Employment Training Institutes (RSETI)

The RSETIs impart skills among youth by conducting Entrepreneurship Development Programmes (EDPs) for four different purposes, namely, Agricultural Programmes, Product Programmes, Process Programmes and General Programmes. Apart from such EDPs, there were skill upgradation and growth programmes. In Bihar, eight banks, including the Rural Development and Self Employment Training Institute (RUDSET Institute, Hajipur) sponsor the RSETIs in all the districts of Bihar; a list of the banks is provided in Appendix (Table A 5.4).

JEEVIKA is the nodal agency for providing support to RSETIs in the State. The number of training programmes and the number of candidates trained have seen an increase over the years. In 2023-24, 973 training programmes were organised, and 30,434 candidates were trained in such training programmes. Total expenditure to run the training programmes was Rs. 10.91 crore in 2023-24 (Table 5.34). The employment opportunities for the trained candidates have been consistently high. As in 2022-23 and 2023-24, 80 percent of the trained candidates received employment. The sponsoring banks provide credit support to the trained candidates to start their own enterprise. The gender composition of the trainees was also in favour of women as more women participated in the training programmes compared to men.

Table 5.32 : Number of Training Programmes, Candidates Trained by RSETIs and Trainees who Received Employment (2019-20 to 2024-25, up to Sep. 30, 2024)

Year	No. of Training Programmes	No. of Candidates Trained				No. of Trainees Receiving Employment

Deen Dayal Upadhyaya – Grameen Kaushalya Yojana (DDU-GKY)

DDU-GKY aims to provide livelihood by imparting skills to the rural poor youth. In Bihar, JEEVIKA is the implementing agency. Till September 2024, 83,806 youth got benefitted from the training programmes conducted under DDU-GKY. Of all the trained candidates, 54 percent

obtained employment. In 2023-24, the total expenditure to conduct skill training programmes was Rs. 28.04 crore (see Table 5.34).

The Bihar Rural Livelihoods Promotion Society has taken an initiative called "Youth Counselling cum Resource Center" to provide a platform at the community level to the rural youth and their parents to participate in awareness about the DDU-GKY programme, RSETI, and Direct Placement. Job Resource Person policy has been framed for strengthening mobilisation, and a target to reach 100 households per month has been fixed. An in-house application named JEEVIKA Skills App has been developed. The application has been developed with a vision to organise paperless job fairs and capture all the mobilisation and placement data. Data capturing in the JEEVIKA Skill App has been continuing for the past year.

5.5 Issuance of Passport

Better economic and educational opportunities outside India have always attracted the working population of Bihar. Previously, the access to avail the opportunity to visit abroad was hindered by the tedious and complicated process of obtaining passports for aspiring workers. In recent years, the simplification of application procedures and time-bound police verification encourages aspirant to apply for a passport. For instance, in the last five years, 1703.9 thousand people applied for passports, and of them, 1683.1 thousand people have received the same (Table 5.35). The Regional Passport Office, Patna, reported that for 84 percent of passport applicants, the police verification was completed within 21 days in 2023. In 2019, the police verification was completed within 21 days for 69 percent of the total passport applications. It shows marked improvement in

the last five years. Further, the average number of days taken for police verification has been declining sharply over the period (see Table 5.36). In 2019, on an average, 17 days were required to complete the police verification process, while in 2023, only 12 days were required to complete the same process. The district-wise distribution of passport applications and passport issuance suggests that the growth of passport applications between 2022-23 and 2023-24 was over 40 percent for six districts. Between 2022-23 and 2023-24, Banka registered the highest growth in passport applications, at 70 percent, though the absolute number was small. Similarly, the other five districts with a growth of passport applications over 40 percent were Katihar (55 percent), Supaul (49 percent), Madhepura (48 percent), Patna (47 percent), and Gaya (41 percent). In case of passport issuance, three districts (Siwan, Gopalganj, and Patna) accounted for 29.7 percent of all passports issued in 2023-24. Historically, the workers from these districts migrated abroad, specifically to countries of the Middle East, to obtain gainful employment, and that network of migration continues to persist unabated (Table A 5.5).

Under the Government of India's ambitious initiative, 'Passport Aapke Dwar', Bihar has two new passport service centres and 35 post office passport service centres. Further, three more post office centres will be made operational very soon. This project aims to make passport application services more accessible to residents by allowing applications to be submitted nearer to their home.

In addition to that, the Ministry of External Affairs provided a "Passport Mobile Van" to the Regional Passport Office, Patna in 2024. The mobile service has started to organise camps in different educational institutions in Bihar and achieve success in attracting fresh passport applications.

Currently, the Passport Mobile Van is utilised in areas where applicants face difficulties in scheduling appointments, offering a convenient solution for on-the-spot application processing. The Regional Passport Office, Patna, plans to extend the mobile services to more locations, reinforcing its commitment to improve access and service.

CHAPTER - VI

PHYSICAL INFRASTRUCTURE

Abstract

Physical Infrastructure brings socio-economic development in the society. It is regarded as engine of growth and development and also improves regional equality through opening up development opportunities to remote and underserved areas. The infrastructure is very much essential in expanding the production base, enlarging trade and linking together resources and markets into an integrated economy. It also helps in strengthening rural economy by connecting with towns and market centers and links farm with non-farm sector, rural economic activities with urban ones, and brings underdeveloped and developed regions closer to one another. The State government has considerably invested in this sector. As an outcome, during the last one and a half decades, the transport and communication sector has proved to be one of the major growth drivers of the Bihar's economy. Bihar has also witnessed improvement in rural infrastructure and development has been recorded in the rural areas of the state. The state has achieved the goal of reaching Patna in five hours from any corner of the state and has been moving faster towards getting a congestion-free traffic by building expressways and new highways. The registration of vehicles in Bihar has recorded one of the highest growths in the country and revenue collection under the motor vehicle tax has also recorded a huge growth in the recent times. Majority of infrastructure corporations are building state-of-the-art infrastructures in the state.

6.1 Growth of Transport, Storage and Communication Sector

Economic development needs some basic foundation to move forward. Among all factors of economic development, physical infrastructure is the major one. It opens up multiple opportunities for the region to connect with the rest of the world. The State government has endeavoured to build adequate physical infrastructure during the last two decades. The growth of the transport, storage and communication sector of major states of India is presented in Chart 6.1 during 2011-12 to 2023-24. Bihar registered the third highest growth (7.6 percent) in this sector during this period, after Uttar Pradesh (10.1 percent) and Karnataka (7.7 percent) among major states of India. Further, Chart 6.2 gives the detail of growth recorded in this sector and also gives trend of the contribution of this sector in the Gross State Value Added (GSVA). As a result of high growth recorded in this sector, the contribution of this sector has gradually increased and reached Rs. 47,313 crore in 2023-24 from Rs. 17,545 crore in 2011-12 at constant (2011-12) prices. The contribution of this sector in the overall GSVA has also gone up by 3.0 percentage points from 7.3 percent in 2011-12 to 10.2 percent in 2023-24.

6.2 Public Expenditure on Creation of Roads and Bridges

The State government is committed to building an adequate and quality road network in the state; therefore, the government has allocated significant funds from its limited resources and assigned high priority to improve road infrastructure. The expenditure on creation and maintenance of road infrastructure has been steady during the last two decades (2005-25). A significant budget of Rs. 1.13 lakh crore has been spent on roads and bridges during the last two decades to spread their length and breadth across the state. Table 6.1 shows the quinquennial expenditure on roads and bridges of Bihar during the last two decades. It is important to note here that the State government has achieved the vision of reaching the state capital of 'Patna' within five hours from any corner of the state.

Table 6.1 : Summary of Public Investment on Roads and Bridges in Bihar

(Rs. crore)

6.3 Road Network

Bihar is the third largest state in terms of population, having 8.6 percent of the country's population in 2011. The state is 12th largest in the country on account of area holding, which is 2.86 percent of the national area. In terms of road network, Bihar has around 3 lakh kms of road network and is placed on 8th rank among all Indian states as of 2019. The priority has been given to the hassle-free smooth traffic movement for passengers as well as freights from one place to another across the state. Chart 6.3 presents the road length of National Highways (NH), State Highways (SH) and Major District Roads (MDR) by their width, till September 2024. Nearly 90 percent of NHs are double or more lane. Similarly, around 85 percent SHs are double or more lane; however, 48 percent MDRs are intermediate type and 32 percent single lane. The state is progressing fast to have four expressways (Table 6.2) and also some additional NH (Table 6.3) in the near future that will change the face of traffic in the state. In addition, the quality of roads have massively improved and its network has widened in a substantial manner. District-wise details of road network of NH, SH and MDR are given in Appendix Table A 6.1, Appendix Table A 6.2 and Appendix Table A 6.3, respectively.

The Bharatmala Pariyojana (Phase – I and II) plays a vital role in developing NH network in the country and Bihar has substantially benefitted from it. The scheme emphasizes a 'corridor-based NH development' approach to ensure infrastructure symmetry and consistent road-user experience. The details of the Bharatmala projects passing through Bihar are presented in Appendix A 6.4. A total of 26 projects have been sanctioned and proposed for Bihar, involving the construction of 1652 kms of road network at an estimated cost of Rs. 49612 crore. Some of the major projects of expressways and, National Highways are listed in Tables 6.2 and Table 6.3 respectively.

Chart 6.3A : Length of National Highways in Bihar by Width (As of September, 2024)

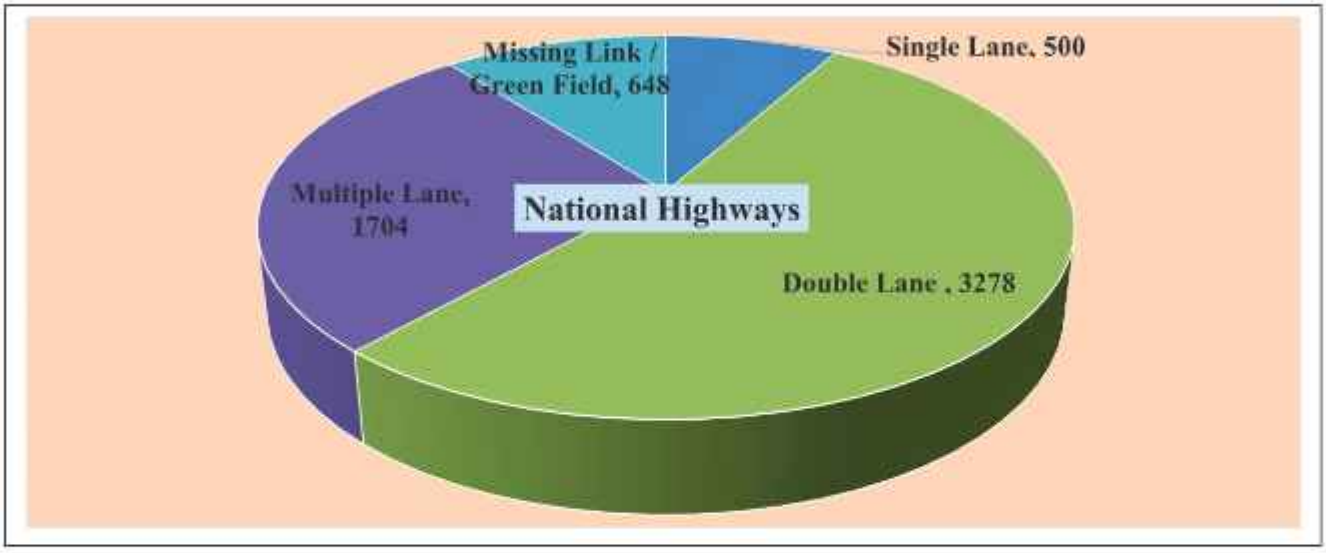

Chart 6.3B : Length of State Highways in Bihar by Width (As of September, 2024)

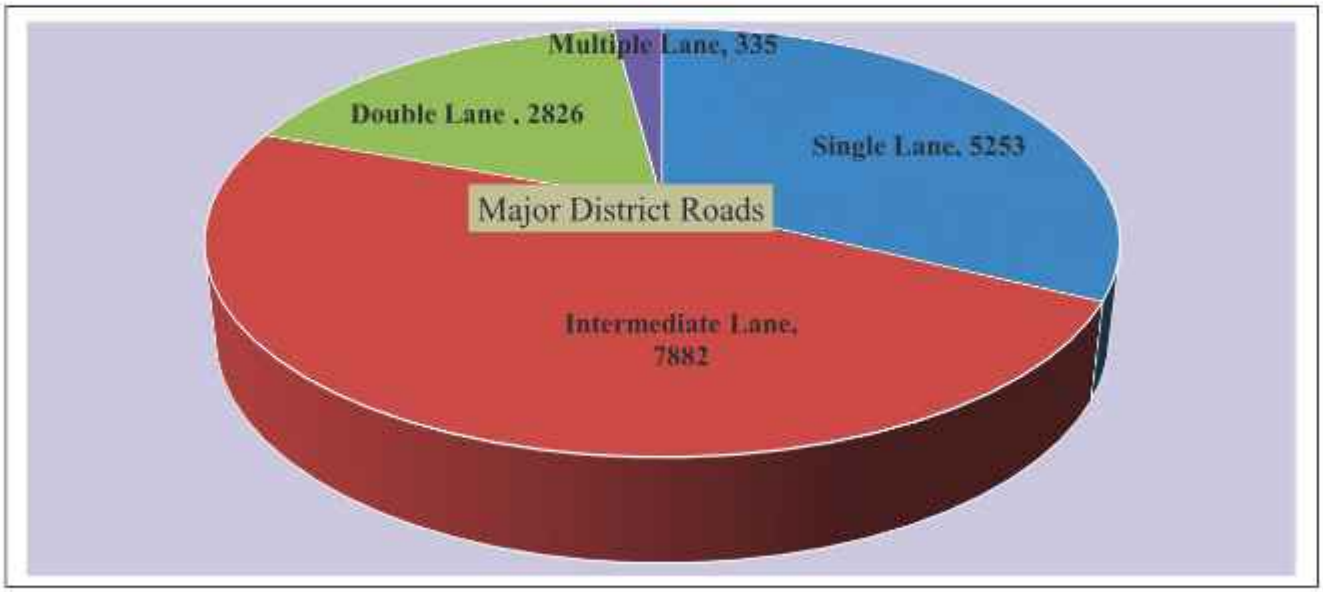
Chart 6.3C : Length of Major District Roads in Bihar by Width (As of September, 2024)



Source: Road Construction Department, Government of Bihar

Table 6.2 : Expressways in Bihar

Varanasi – Ranchi – Kolkata Expressway	Gorakhpur – Siliguri Expressway	Patna – Purnia Expressway	Raxaul – Haldia Expressway
Presently, the major connectivity for traffic moving from Varanasi to Kolkata is through NH – 19 (old NH – 02), GT Road, which is part of the Golden Quadrilateral. The existing GT Road (NH – 02) is full of congestion and presently the average traffic on the existing GT Road is 50,000 PCU which will exhaust the capacity of 6 lanes in near future.	Presently, the major connectivity for traffic moving from Gorakhpur to Siliguri is through NH – 27, which is part of the East – West Corridor. The current route from Gorakhpur to Siliguri takes 12-13 hours. It is very difficult to provide access-controlled facilities on existing NH-27 due to huge ribbon development along the highway and very high cost of land acquisition and resettlement.	This new expressway will provide direct connectivity between Patna and Purnia as the shortest route which will increase vehicle fuel efficiency.	The new expressway will also reduce the travel time from more than 18 hours to 7 hours.
This new greenfield alignment will reduce travel time by 6 hours and road users will benefit significantly in vehicle operating cost.	The new alignment will provide direct and shortest connectivity from Northern and Central India to Siliguri, thus reducing travel time by almost 6 hours. It will also benefit the road user through significant savings in vehicle operating costs.	The proposed road is designed to achieve a 120 Km/hr speed to allow for smooth and hindrance-free traffic movement at the fastest speed.	The route will connect the Integrated Check Post Raxaul at the Nepal international border in Bihar to Haldia Port in West Bengal and pass through 3 states i.e. Bihar, Jharkhand and West Bengal, further enhancing international trade.
The road will connect 4 states viz. Uttar Pradesh, Bihar, Jharkhand and West Bengal. It will also connect many important places such as Varanasi, Mohania, Rohtas, Sasaram, Aurangabad, Gaya, Chatra, Hazaribagh, Ranchi, Bokaro, Dhanbad, Ramgarh, Purulia, Bankura, Pashchim Medinipur, Hooghly, Howrah and Kolkata.	It will also enhance inter – state connectivity and will promote regional development of three states. The road will connect 3 states viz. Uttar Pradesh, Bihar and West Bengal. It will pass through Gorakhpur, Kushinagar, Deoria, West Champaran, East Champaran, Sheohar, Sitamarhi, Madhubani, Supaul, Araria, Kishanganj and Darjeeling.	The new expressway will reduce the distance between Patna and Purnia from 377 Km to 269 Km and will save travel time up to 3 to 4 hours. The expressway will pass through Patna, Saran, Vaishali, Samastipur, Begusarai, Darbhanga, Saharsa, Madhepura and Purnia districts tentatively.	The route will pass through East Champaran, Sheohar, Sitamarhi, Muzaffarpur, Samastipur, Begusarai, Lakhisarai, Jamui, Banka, Deoghar, Dumka, Jamtara, Birbhum, East Bardhaman, Hooghly, Medinipur East and Medinipur West districts.
The proposed alignment passes through the Naxalite affected area and the proposed Greenfield Expressway will result in the economic growth of the backward region.	It will certainly enhance the development of under-developed areas of Bihar.	This road will connect approx. 6 proposed Airports in future which will help to increase ground as well as air transportation.	This new expressway is entirely greenfield.

Source : National Highways Authority of India, Patna

Table 6.3 : Major New National Highways in Bihar

Ara – Parariya – Mohania NH – 319	Patna Ring Road NH – 131G	Ram Janki Marg Highways	Patna – Gaya – Dobhi NH – 22
This road starts from Zero mile of Ara town and connects with NH – 02 at Mohania.	A ring road around Patna has been proposed to further develop the Capital city and provide smooth and jam-free connectivity to all the commuters coming to or passing through the city.	It is from Ayodhya in Uttar Pradesh to Janakpur in Nepal. This religious corridor was announced to provide the devotees to visit the pilgrimage places comfortably and in less time.	This road provides connectivity to Bodhgaya, one of the four holy places related to the life of Lord Buddha
The road has been upgraded a 4-lane configuration from a 2-lane, providing fast connectivity out of Ara town towards NH – 02 which further provides connectivity to neighbouring states.	The ring road is proposed in four phases. Part-1 i.e. Kanhauli to Ramnagar is already completed with a length of 39 kms at a cost of Rs 984 crore. Part-2 is under construction with a 6-lane bridge over Ganga from Sherpur in Patna to Dighwara in Saran at a cost of Rs 4250 crore. Remaining parts are in development phase and the construction of these are proposed.	The corridor starts from Ayodhya, the birthplace of Lord Ram in Uttar Pradesh and ends at Janakpur, the birthplace of Mata Sita in Nepal via Meharouna, Siwan, Malmalia, Mashrakh, Rajapatti, Kesaria, Chakia, Sheohar, Sitamarhi, Sursand and Bhitha More.	The project is of vital importance as the road connects Patna to Ranchi via Jehanabad, Gaya, Dobhi, Chatra, Balumath and Bijupara.
The total length of highway is 115 kms and the cost incurred is Rs. 1616 crore.		The 50 kms long Siwan to Mashrakh highway has been entrusted to NHAI for construction and work has been awarded to Agency at a project cost of Rs 1431 crore.	The project has a length of 127 kms and the cost will be Rs. 5519 crore.

Amas – Darbhanga NH - 119D	Rajauli – Bakhtiyarpur NH – 31	Aunta – Simaria Highway & 6-lane bridge over Ganga at Mokama (NH-31)	Galgalia – Araria NH – 327E	Sasaram – Ara – Patna NH – 119A
This project has major development components as it will develop road communications in the backward areas, religious and tourist places.	It helps in increasing trade and transportation to the state.	The 6 – lane bridge over the Ganga river connects North and South Bihar. This project will provide the shortest route to travel between the two districts .	This route provides smooth travel for commercial as well as private vehicles that travel towards Siliguri and further on.	The road passes majorly through backward areas, thus enabling development and adding to employment in those areas.
This project will improve better connectivity between the District Headquarters of Gaya, Darbhanga, Samastipur, Hajipur and Patna.	This highway provides fast connectivity to the commuters from and to the Jharkhand state.	This unique project between Aunta in Patna district and Simaria in Begusarai district will significantly enhance the connectivity between the two districts of the state.	This corridor provides alternate route from Araria on East – West Corridor (NH – 27) to the neighbouring state of West Bengal at Galgalia.	The greenfield highway is starting from Sasaram and is ending at Ring Road at Kanhauli on Patna Ring Road through Ara town.
It will connect Golden Quadrilateral (NH – 19) to East – West Corridor (NH – 27) that will provide faster connectivity to commuters crossing the state.	It is around 107 kms of length in Bihar, of which 100 kms have been upgraded to being 4-lane at a cost of Rs 3500 crore.	The length of the project is 8.15 kms and the construction cost is Rs 1161 crore. It will also provide employment opportunities to the youth of the state.	The length of the project is 94 kms and has a capital cost of approx. Rs. 2500 crore.	The length of the project is 118 kms and has a cost of approx. Rs 4125 crore.

Source : National Highways Authority of India, Patna

Bihar State Highways Project (BSHP): It is an ambitious project of the State government to broaden the SH network in the entire state, with financial assistance of the Asian Development Bank (ADB) in four phases. A total of 1453 kms of SHs have been widened from single lane to 2-lane in the first two phases under 18 road projects at a cost of Rs. 8553 crore. The progress under phase BSHP (Phase-III) and BSHP (Phase-IV) are given in Table 6.4.

Table 6.4 : Overview of Widening of State Highways (as of September, 2024)

Agency-wise Road/Bridge	Length (Kms.)	Remarks
BSHP-III (Phase-I) upgradation of 2-lane with paved shoulder of 5 SHs (SH-82,84,102,58,85)	231.75	Cost Rs. 1859.58 crore; All work completed except SH-82
BSHP-III (Phase-II) upgradation up to 2-lane standard configuration of 6 SHs (SH-95,98,99,101,103 & 105)	266.55	Estimated cost Rs. 2680.35 crore; Work is in progress
BSHP-IV (Phase-I) 4 MDR roads and 1 H. L. Bridge	225.47	Estimated cost Rs. 2900 crore; Administrative approval accorded.
BSHP-IV (Phase-II) upgradation of 5 roads (3 SHs and 2 MDRs)	268.11	Estimated cost Rs. 3366 crore;

Source : Road Construction Department, Government of Bihar

Indo-Nepal Border Road Project : Under this project, a 2-lane road of 554.00 kms length is being constructed in Bihar and starts at Gobarhiya (Madanpur) on the border of Uttar Pradesh and runs parallel to the India-Nepal international border, passing through 7 districts (West Champaran, East Champaran, Sitamarhi, Madhubani, Supaul, Araria and Kishanganj) before reaching its end point at Galgaliya in Bihar at the border of West Bengal. It will provide connectivity to the border post on the sensitive border between India and Nepal. At the same time, unwanted and illegal activities have to be controlled by effectively patrolling the border. This project is important on strategic, economic and social dimensions. At present, out of 552.00 kms length, 492.00 kms earthwork and 405.00 kms bituminous work has been completed. Along with this, 125 High Level Bridges and 752 culverts have also been completed. This project is targeted to be completed by December 2025.

6.4 Bihar State Road Development Corporation Limited (BSRDCL)

The BSRDCL is an ISO 9001: 2008 certified corporation of the State government and is operational since 2009. The Corporation endeavors to build roads and also earn profit since its beginning. It took projects of ADB, JICA, PPP, EPC and CRF. Table 6.5 presents the financial performance of the Corporation during the last five years. For development of society and needy people, the Corporation has contributed Rs. 7.5 crore during 2023-24 in Chief Minister Relief Fund. Under its CSR initiative in 2023-24, a sum of Rs. 1.28 crore has been contributed by the Corporation.

Table 6.5 : Status of Financial Management of BSRDCL

(in Rs. crore)

Head	2019-20	2020-21	2021-22	2022-23	2023-24	Total	Average

Some Prestigious Undergoing Projects of BSRDCL

J.P. Ganga Path (Digha to Deedarganj): The stretch of JP Ganga Path from Digha to Kangan Ghat (15.5 kms) is now operational and provides direct connectivity from Eastern Patna to Western Patna and also connects two major bridges on the river Ganga. The movement between North Bihar and South Bihar has become much easier for road users. Presently, 20 kms length out of total 20.5 kms has been completed and the main alignment up to Deedarganj is likely to be completed by March 2025.

6-Lane Bihar New Ganga Bridge: The project is being constructed with the assistance of ADB at an estimated cost of Rs. 4988.40 crore. The ADB assistance is Rs. 3000 crore and the rest is from the State government. This project has a total length of 19.76 kms, consisting of 9.760 kms long six-lane extra-dosed bridge over the Ganga river and approximately 10 kms of approach via duct and roads, tolling and service facilities. The project originates at the NH-30 at Kachchi Dargah in Patna, passes through Raghopur Diara and terminates at NH-103 near Chaksikandar (Bidupur) in Vaishali district. The project is expected to be completed by September 2025. It will substantially reduce the travel time to Patna from the surrounding regions, in particular, north Bihar.

Sipara – Ram Govind Singh Mahuli Halt Elevated/Grade Road: Under phase-I, the construction of Elevated/Grade Road (6.7 kms) along the eastern side of Patna-Gaya railway line (from Sipara to Ram Govind Singh Mahuli Halt, Patna) has been completed at the cost of Rs. 850.0 crore. Further under phase-II, the construction of 4-lane Elevated Road (2.1 kms) from Mithapur to Sipara (along with 2-lane ROB at Sipara) and 4-lane at-grade road from Ram Govind Singh Mahuli Halt to Punpun (Lakshman Jhula) (2.2 kms), total length of the project 4.3 km along the eastern side of the railway line, Mithapur-Sipara-Mahuli-Punpun road is in progress. The cost of the project is Rs. 437.15 crore.

Bakhtiyarpur – Tajpur Bridge: Construction of greenfield bridge across the Ganga river, connecting Bakhtiyarpur bypass of NH-31 near village Karjan and Tajpur on NH-28 (bridge-5.52 kms and approach road 45.5 kms) is in progress at a total revised cost of Rs. 2875.20 crore. The project is expected to completed by February, 2026.

Extension of JP Ganga Path and JP Ganga Path Samagra Udayan

Extension of JP Ganga Path from Digha to Koilwar is proposed to be constructed in the total length of 35.5 kms, of which 17 kms road is an elevated structure of 6-lane configuration and rest 18.5 kms is an embankment structure of 6-lane configuration. The tentative project cost is Rs. 7577 crore. It will connect Sherpur-Dighawara Bridge that is a part of Patna Ring Road being constructed by MoRTH. At Chhitnawan, the provision of 4-lane connectivity has been made. Upon construction of this project, the movement of traffic from Western Bihar to Eastern Bihar will become much easier and, the travel time will reduce significantly.

Extension of JP Ganga Path from Deedarganj to Athamalgola via Bakhtiyarpur is proposed to be constructed on an elevated structure of 6-lane configuration of 42.5 kms. The estimated project cost is Rs. 15453 crore. This includes the provision of 6-lane connectivity with Bakhtiyarpur-Tajpur Bridge, 4-lane connectivity at Fathua, Khusurupur and Salimpur. Upon construction of this project, reaching Bakhtiyarpur and other parts of Bihar will become much easier.

JP Ganga Path Samagra Udayan Project: JP Ganga Path is a 20.5 km long road along the banks of the river Ganga. The first phase of JP Ganga Path was made operational in June 2022. Post inauguration, it was witnessed that some sections of the JP Ganga path were being used as tourist spot by people of Patna, specially during the evening hours. In view of the growing popularity of the JP Ganga Path as a public attraction, there is a proposal of river front development between Digha to Gandhi maidan along both sides of the JP Ganga path project in an area of around 50 hectare, of which 90 percent area shall be developed as green belt and 10 percent as river front, parks for old-aged people and children, biodiversity park, food court, cycle track/Pedestrian walkway, parking etc. along with the basic facilities. The tentative cost of project is Rs. 785 crore.

6.5 Sulabh Samparkata under Saat Nishchay – II

The Government of Bihar has adopted 'Sulabh Samparkata' as one of the seven resolves under Saat Nishchay-II. A sum of Rs. 143 crore was sanctioned for 8 projects for construction of around 40 kms length of road stretches on different bypasses during 2021-22. A total of 12 projects were sanctioned at an outlay of Rs. 413 crore in 2022-23 for construction of 52.7 kms road network on different bypasses. However, during 2023-24, five projects were sanctioned at a cost of Rs.128.09 crore for construction of 30 kms length of bypasses (Appendix Table A 6.5). Once these bypasses become operational, majority of the towns of the state will become congestion-free.

6.6 Bridge Sector in Bihar

Bihar is one of the densely populated states, therefore, bridges over roads and railways are required in significant numbers at appropriate places. During the recent period, a number of overbridges

have been constructed all over the state for smooth road traffic. The distance and travel time have been reduced for several towns. Further, many high-level bridges have been built across the rivers at required distances.

Bihar Rajya Pul Nirman Nigam Limited (BRPNNL)

The BRPNNL is another profit-making State government's Corporation constructing roads and bridges having an estimated cost of more than Rs. 25.00 lakh. During the period from 2012-13 to 2023-24, the Nigam has constructed 1112 bridges in the state and recorded a work execution of Rs. 16,761 crore. It earned an amount of Rs. 545.07 crore as a net profit during the same period. Table 6.6 presents an overview of the working condition of the Corporation during the last 12 years. The work executing (work turnover) of the Corporation was Rs. 1567.15 crore in 2023-24, with a gross profit of Rs. 47.74 crore and a net profit of Rs. 18.65 crore. In addition, the Nigam has contributed Rs. 205.11 crore to the State government as a dividend and also donated Rs. 205.00 crore to the Chief Minister's Relief Fund. Apart from this, the Corporation has undertaken work worth Rs. 54.43 crore under its CSR initiative. During 2023-24, 132 new projects costing Rs. 2523.58 crore and for 2024-25 (up to 30th September, 2024) 12 new projects worth Rs. 267.30 crore have been allotted to the Corporation.

Table 6.6 : Summary of workings of Bihar Rajya Pul Nirman Nigam Limited (Rs. in crore)

Year	No. of Bridges	Work execution (work Turnover)	Centage (Agency Charge) / Other Income	Administrative Expenditure	Gross Profit	Net Profit
2012-13	136	1273.31	141.94	34.95	106.99	63.81
2013-14	119	1480.85	159.22	39.03	120.18	72.54
2014-15	177	1739.32	183.22	44.12	139.10	80.93
2015-16	173	1698.99	150.59	42.88	107.71	70.26
2016-17	103	1840.02	147.44	39.29	108.15	68.76
2017-18	84	1500.98	118.31	40.22	78.09	37.98
2018-19	97	1496.76	128.21	47.55	80.66	42.74
2019-20	81	1114.31	161.85	85.70	76.10	39.23
2020-21	69	827.55	102.10	63.77	38.34	8.97

Ongoing Ambitious Projects of BRPNNL

Double-Deck Flyover at Ashok Rajpath: BRPNNL has been assigned work for construction of an ambitious project of Rs. 422.00 crore on Ashok Rajpath in Patna. The alignment of this Double-Deck Flyover stretches from Kargil Chowk to NIT More via PMCH. It is the busiest road having medical and educational institutions along its side. All types of vehicles (light, heavy and commercial) ply through this stretch, often resulting in severe congestion on the road, posing extreme difficulties to commuters. Therefore, for minimum land to be acquired in such stretches, construction of a Double-Deck Flyover is only the best remedy to overcome the heavy traffic congestion on Ashok Rajpath.

The total length of the Lower Deck of the flyover is 1.5 km, including the ascending ramp near Patna College and descending ramp near BN College. The total length of the Upper Deck of the flyover is 2.2 kms, including the ascending ramp near Kargil Chowk and descending ramp near Patna University and Science College. The proposed bridge project will help overpass the traffic coming from Gandhi Maidan and will connect directly to PMCH through three Multi-Level Car Parks (MLCPs). The flyover will split into two separate routes – (i) leading towards Patna University Gate that will connect to Krishna Ghat and provide direct connectivity to Ganga Path, and (ii) leading towards NIT more.

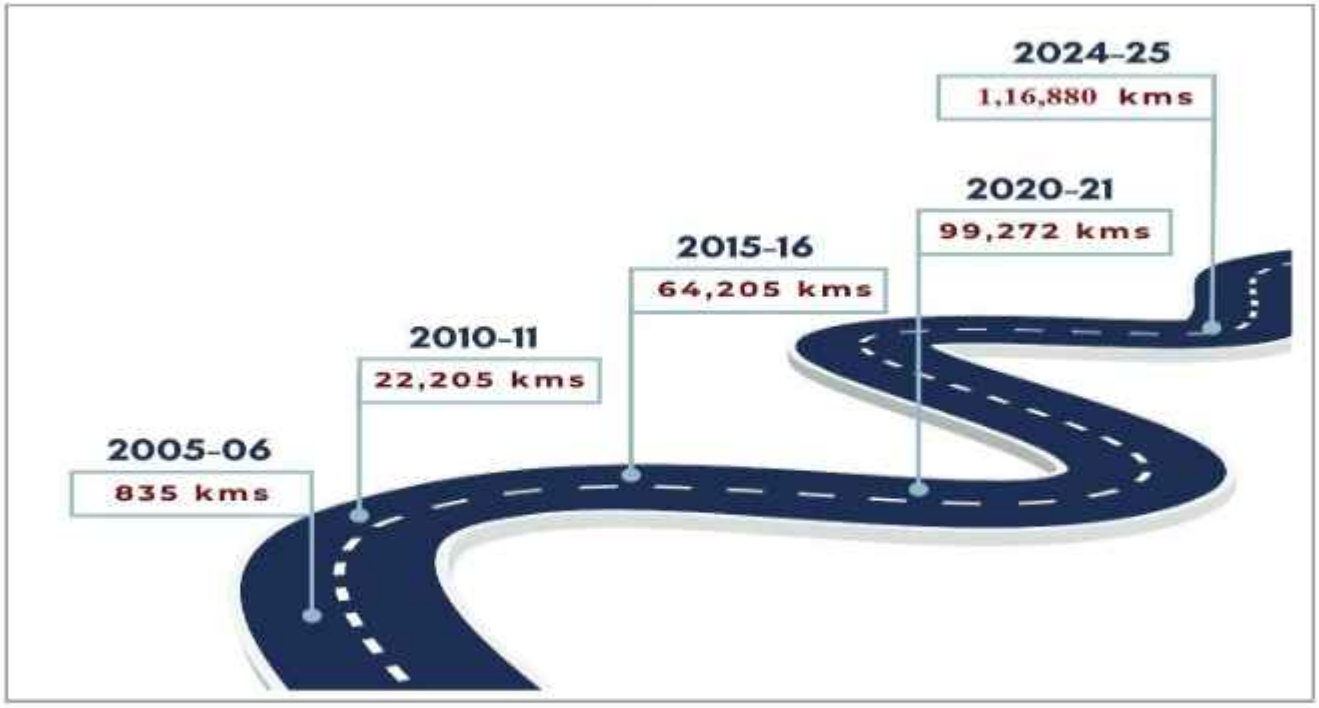
Double-Deck Flyover in Chhapra: BRPNNL has been assigned work for construction of a prestigious project in Chhapra town of Saran District under the Central Road Investment Fund (CRIF) at an estimated cost of Rs. 411.3 crore. The alignment stretches from Bhikhari Thakur Chowk to Bus Stand via Gandhi Chowk, Mauna Chowk and Municipality Chowk. It is the busiest commercial location of Chhapra, where all types of vehicles, coming from local area as well as outside of Chhapra, ply.

The Lower Deck of the flyover (total length of 2.8 kms) (including one ascending Leg/Ramp of 285-metre length proposed at Gandhi Chowk for vehicles coming from Garkha, Muzaffarpur sides) starts from Police Station and ends near Rajendra Sarowar via Gandhi Chowk and Municipality Chowk. This Deck may be used by the vehicles coming from Ara, Hazipur and Patna sides to go towards Chhapra Collectoriate, Bus Stand and Siwan. The Flyover would benefit the neighbouring Uttar Pradesh too and would boost trade and economy.

6.7 Rural Roads Network

Rural infrastructure opens up economic development of the majority of residents in Bihar. As per Census 2011, rural area constitutes 88.7 percent. Expansion and reach of rural roads to every settlement is necessary to utilize the fullest development opportunity in that area. In order to boost the rural economy and provide hassle-free traffic movement, the State government has strategically invested in creation and maintenance of rural roads. Chart 6.4 shows the growth of paved rural roads in Bihar during the last two decades.

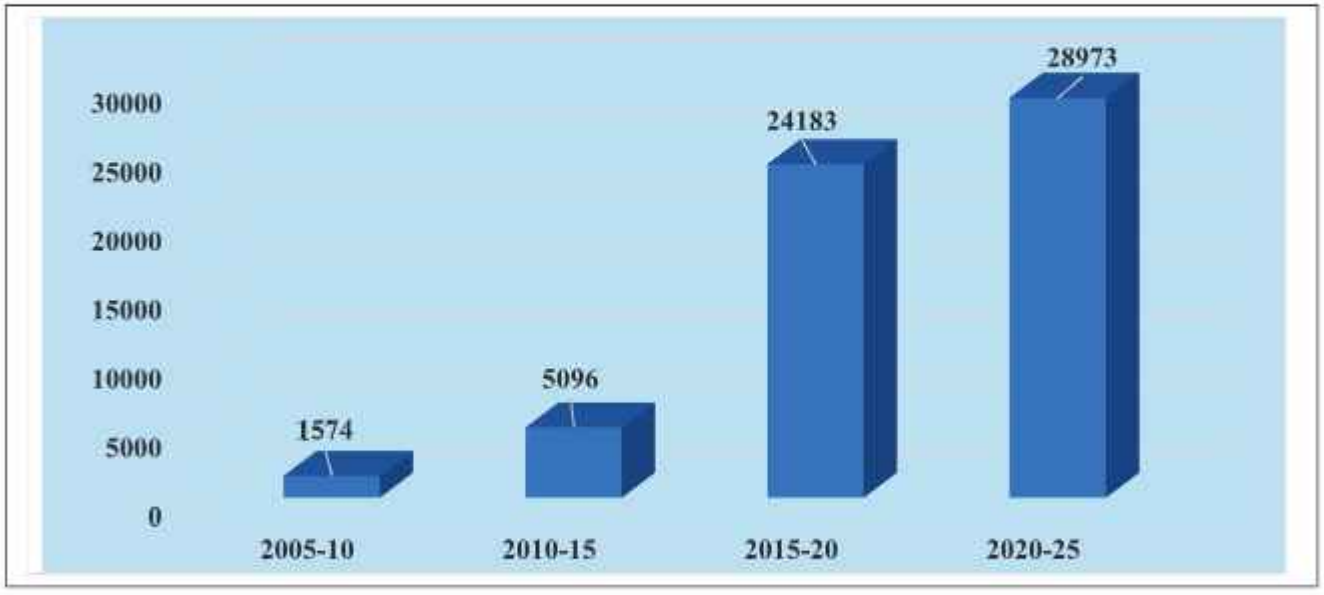
Chart 6.4 : Trend of Rural Road Length in Bihar (2005-06 to 2024-25*)



Note : * represents data till September for 2024-25
Source : Rural Works Department, GoB

The growth of expenditure on rural roads is given in Chart 6.5 during the period of 2005-25. As evident from the data, the expenditure on rural roads has gone substantially up from Rs. 1574 crore during 2005-10 to Rs. 28,973 crore during 2020-25. The Output and Performance based Road Maintenance Contract (OPRMC) has been implemented for maintenance of quality road infrastructure in the state. During this period of one and a half decades, the government has implemented several policy initiatives such as Saat Nishchaya, including road maintenance policy. A sum of Rs. 60,000 crore has been spent during 2005-25 to achieve the last mile connectivity in rural habitats.

Chart 6.5 : Expenditure on Rural Roads (2005-25) (Rs. crore)



Source : Finance Department, GoB

Table 6.7 gives the details of physical and financial progress of rural roads under different schemes as of September, 2024. These schemes are — (i) Mukhya Mantri Gram Sampark Yojana (MMGSY), (ii) Gramin Tola Sampark Nishchaya Yojana (GTSNY), (iii) Pradhan Mantri Gram Sadak Yojana (PMGSY), (iv) Mukhya Mantri Gramin Sadak Unnayan Yojana (MMGSUY), (v) State Scheme and a few others under other Plan Schemes. A total of 1.17 lakh kms of rural roads have been constructed at a cost of Rs. 63,513 crore till September, 2024. In addition, around 6362 kms rural road network have been upgraded at an outlay of Rs. 5330 crore. The growth of inter-district rural road network is given in Appendix Table A 6.6.

Table 6.7 : Status of Rural Road Network by Scheme (as of September, 2024)

Name of Scheme	Road Constructed (kms.)	Bridge Constructed (Nos.)	Expenditure (Rs. crore)
Construction			
Gramin Tola Sampark Nishchay Yojana (GTSNY)	3966.82	—	2319.27
Mukhya Mantri Gram Sampark Yojana (MMGSY)	31821.79	120	21748.92
Pradhan Mantri Gram Sadak Yojana-I (PMGSY-I)	53419.09	1153	28292.47
State Scheme	4784.85	760	5209.21
Other State Plan Schemes	22887.44	40	5942.91
Total	**116879.99**	**2073**	**63512.78**
Upgradation			
Pradhan Mantri Gram Sadak Yojana-II (PMGSY-II)	2434.90	98	1650.07
Pradhan Mantri Gram Sadak Yojana-III (PMGSY-III)	3850.32	96	3579.46

Mukhya Mantri Gramin Setu Yojana, 2024

In order to provide connectivity in rural areas, Mukhya Mantri Gramin Setu Yojana has been started in 2024. Under this scheme, bridges damaged by floods or otherwise, missing bridges, construction of approach roads of approach-less bridges, bridges to unconnected habitations have to be constructed. Priority has to be given on the basis of deprived villages and population, connectivity to district, sub-division, block headquarters, important industrial zone, market, tourism zone, etc. Additionally, it will give connectivity to the NH, SH, MDR and expressways. The Rural Works Department has proposed construction for around 600 bridges, costing Rs. 3000 crore in 2024-25.

6.8 Road Transport Sector

The road transport emerged as one of the growth drivers of Bihar's economy during the last two decades. As evident from Chart 6.6, a double-digit growth has been recorded throughout the period from 2012-2024. As a result, the size of the transport sector increased by three times to reach Rs. 25,100 crore in 2023-24 from Rs. 8400 crore in 2011-12.

Chart 6.6 : Growth of Road Transport of GSVA, at Constant (2011-12) Prices, of Bihar

(Rs. '000 crore)

Note : 2020-21 is Covid year
Source : Ministry of Statistics and Programme Implementation, GoI

The distribution of transport and non-transport motor vehicles is presented in Table 6.8 that provides a summary of different vehicles registered during January to December, 2023 across the major Indian states. Bihar is placed at the fifth rank in the list on account of highest transport motor vehicle registration, followed by Uttar Pradesh, Maharashtra, Karnataka and Gujarat. However, Bihar ranked 7th in terms of non-transport motor vehicles registration and again at the same position in terms of all motor vehicles. District-wise vehicle registration figures have been presented in the Appendix Table A 6.7 for the year 2023-24.

In the recent period, transport ecosystem has improved through several policy and e-governance interventions aimed at streamlining the services in the road transport sector. The State government has brought in a strong coordination and cooperation between citizens (transport users) and service providers (transport department, etc). Table 6.9 presents the number of different vehicles registered and Chart 6.7 presents revenue collection during the recent years.

Table 6.8 : State-wise Motor Vehicle Registration in India (Jan. to Dec. 2023)

(Figures in Thousands)

States	Transport							Non-transport				Grand total
	Bus	Goods Carrier	Three-wheelers	e-Rickshaw	Taxi/ cab	others	Total	Two-wheeler	Motor-car	Others	Total

Source : Department of Transport, GoB

Mukhya Mantri Gram Parivahan Yojana (MMGPY): Development of a strong and efficient transportation system for the rural hinterlands is of prime eminence for the socio-economic development of Bihar. The MMGPY addresses the issue of passenger transportation through providing self-employment opportunities to more than 57,000 unemployed rural population of the state. The scheme provides 50 percent subsidies on purchase price subject to maximum subsidy of Rs. 70,000 on E-Rickshaw, Rs. 1,00,000 on passenger vehicle and Rs. 2,00,000 on the purchase of an ambulance. As of June, 2024, a total of 44,754 beneficiaries have been given subsidies of Rs. 460 crore. Further, more than 6500 applications have been received under phase-XI.

E-governance initiatives: Under e-governance, all types of licenses, vehicle registration and permit fees are paid online using e-payment on a specified portal. The online-payment facility is operational throughout the state and is helping to increase the revenue of the transport department. This e-payment is executed through the OGRAS portal of the Finance Department. The details of the e-governance programmes are discussed in a separate chapter (Chapter-VII).

Mukhya Mantri Vahan Chalak Kalyan Yojana, 2024

The Transport Department has facilitated drivers of Heavy Motor Vehicles, Light Motor Vehicles, and three-wheelers in various ways through the 'Mukhya Mantri Vahan Chalak Kalyan Yojana, 2024.' Drivers holding a valid driving license are eligible under this scheme. Drivers will be benefited in several ways, including free health check-ups on the 15th and 30th of every month and free eye check-ups with the provision of spectacles every month. In addition, various health and life insurance schemes, such as Chief Minister Jan Aarogya Yojana, Atal Bihari-Pradhan Mantri Jan Aarogya Yojana, Pradhan Mantri Jeevan Jyoti Bima Yojana and PMSBY, will be provided, with all insurance premiums paid by the Transport Department. The department will also support the seamless enrollment of drivers in the Mukhyamantri Vridhjan Pension Yojana, Indira Gandhi National Old Age Pension Scheme, and e-Shram Portal.

Additionally, the department will offer training on HMV courses at ITDR, Aurangabad, with HMV licenses issued to successful trainees. It will also conduct awareness programmes on road safety and new technology-based driving. The Road Safety Council will manage the entire programme at the district level.

Mukhya Mantri Prakhand Parivahan Yojana (MMPPY), 2024

MMPPY is a flagship programme of the Government of Bihar for providing a seamless, fast and convenient mass transportation system to reach the unreachable location, improve lives, and create livelihood in the remotest part of the State. With the development of strong road network connectivity across the State, MMPPY makes a strong case to address connectivity issues by providing subsidies on the purchase of buses. A subsidy of Rs. 5,00,000 for each bus to purchase a maximum of 7 buses (2 members from SC/ST, 2 from EBC, 1 from BC,1 member from Minority and 1 from General Category) in each block, excluding the district headquarter blocks, will be provided by the government to the various sections of society.

More than 6,000 applications have been received till September, 2024. A total of 100 buses have been purchased and the department has already provided a total subsidy of Rs. 50 crore.

6.9 Road Safety

Road safety is a multifaceted responsibility engaging various stakeholders. The state's commitment towards 'reduced fatalities' led to the establishment of the Bihar Road Safety Council at the State level and Road Safety Committees at the district level. The Council at the State level constitutes officers from different departments like the Police, Road Department, Health Department, Education Department, etc. Similarly, the Committees at the district level are constituted with district-level officers from the same departments. The State government is committed to minimizing road accidents and promoting road safety and security. This initiative involves officers from different departments, fostering a coordinated approach. The strategy encompasses the 4 E's: Enforcement, Engineering, Education, and Emergency care.

Motor Driving Training Schools: Motor Driving Training School Incentive Scheme has been formulated by the department to be established 74 MDTS in the state. Subsidy of up to a maximum of Rs. 20 lakh is being given to the beneficiaries in installments. These schools would also help in strengthening the road safety. Construction of 31 such driving training schools has been completed.

Driving Testing Track: The State government has planned construction of driving testing tracks in all 38 districts, along with plans for automation. Till date, testing tracks are functional in 23 districts, rest will be completed soon. Further, automation of 5 tracks is being done through a collective effort of the Transport Department and Maruti Suzuki.

Automatic Number Plate Recognition (ANPR)- Camera-based Challan System: The collaborative efforts of Bihar's Traffic Police, Transport, and Urban Development Departments

along with the introduction of ANPR based E-Challan systems in cities like Patna, Muzaffarpur, Nalanda, and Bhagalpur, represent a significant improvement in traffic management, road safety, and urban development. While this camera-based modern challan system is already operational in Patna, Muzaffarpur, Nalanda and Bhagalpur, for other 34 districts the process is going on.

Institute of Driving and Traffic Research (IDTR), Aurangabad and Patna : It is a joint venture between the Department of Transport, Government of Bihar and Maruti Suzuki India Ltd. A total of 1,18,881 Light Motor Vehicle DL tests are done at IDTR Patna, while Aurangabad has executed 7519 LMV DL tests till September, 2024. In totality, 8678 violators, 4329 traffic police, 487 BSRTC bus drivers' and 349 flying squads have been trained by these institutes.

Bus-Stops Construction: Constructing bus stops in rural areas with a focus on safe boarding and deboarding of passengers is an important step towards improving road safety and public transportation infrastructure. In three phases, a total of 1582 Bus Stops are proposed for construction, out of which 929 have been constructed till date. The design encompasses prioritizing the safety of passengers and pedestrians, considering the covered waiting area, raised platform, ramp and handrails and seating facility for passengers.

Handheld Devices: District Transport Officers, Motor Vehicle Inspectors and Enforcement Officers of Transport Department and Police issue e-challans using nearly 2000 handheld devices, gradually replacing manual challans. This transition offers multiple benefits, including improved efficiency, real-time monitoring, digital record-keeping, transparency, convenient payment options, faster resolution, and behavior modification.

Compensation in cases of Hit-and-Run Road Accidents: It is important to not only focus on reducing accidents but also on providing support to those who have been affected by them. The Transport Department is taking proactive steps to ensure seamless compensation for victims of road accidents through rigorous follow-up with the General Insurance Corporation (GIC). This initiative provides monetary support of Rs. 2.0 lakh in case of death and Rs. 50 thousand in case of grievous injury. A total of 3516 persons have got compensation till September 2024.

CNG and Electric Vehicles: The department has taken various initiatives to promote EV or CNG based vehicles. A rebate of 50 percent on road tax is given by the State government for battery-operated vehicles including e-rickshaws. Fuel CNG Stations have been established across Bihar.

EV Policy: Based on recent techno-economic developments in the EV sector and enthusiastic adoption of electric vehicles by the citizens of Bihar, Bihar Electric Vehicle Policy 2023 has been

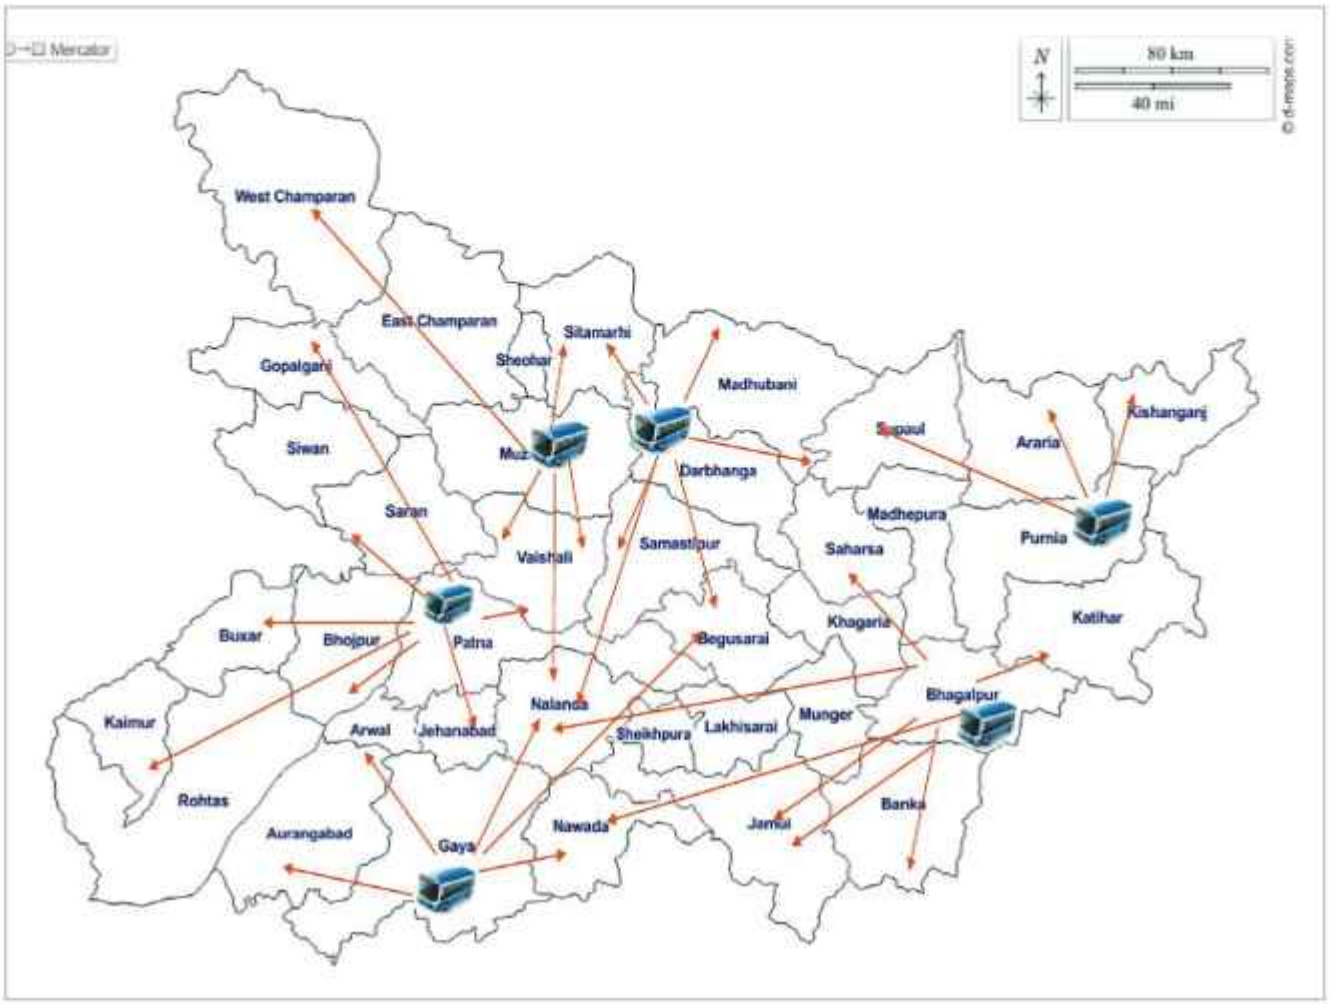
introduced for promotion of electric vehicles and EV charging stations to build a EV transport ecosystem and ensure a 30 percent share for EVs in the overall vehicle registration by the year 2030. To make Bihar a modal state for developing a EV ecosystem, the government under this policy is providing purchase incentives at the rate of Rs. 5000 per KWH for each two-wheeler, with a maximum benefit of up to Rs. 10,000 for the first 10,000 vehicles, and that at the rate of Rs. 10,000 per KWH for four-wheeler passenger vehicles with a maximum benefit of up to Rs. 1.25 lakh to the general category applicant and Rs. 1.50 lakh to the applicant from SC/ST category for the first 1,000 vehicles. Further, the government also provides a tax rebate of 75% to two-wheelers, four-wheeler passenger vehicles and heavy motor vehicles and that of 50% to the rest category of vehicles. The government is also promoting the establishment of robust charging infrastructure by providing purchase incentives on the purchase of charging station equipment under various categories of chargers.

Bihar Clean Fuel Policy 2019 and 2023: The State government has issued a notification banning all government vehicles that are more than 15 years old. Plying of commercial vehicles that are more than 15 years old has been banned in Patna, Gaya and Muzaffarpur. Further, green tax has been levied on commercial vehicles that are more than 12 years old. In addition, the State government has launched the Bihar Clean Fuel Policy 2019 that prohibits plying diesel-operated three-wheelers in the areas of Patna Municipal Corporation, Danapur Nagar Parishad, Khagaul Nagar Parishad and Phulwari Sharif Nagar Parishad from March 31, 2022 and Muzaffarpur and Gaya from October 01, 2023. Diesel three-wheelers have been replaced by CNG three-wheelers, while petrol three-wheelers have been retrofitted with CNG kits. Till date, a total of 1566 three-wheelers' retrofitting/ conversion has been done with a total expenditure of Rs. 4.18 crore as subsidy. Further, a subsidy of Rs. 4.725 crore has been given to 63 diesel city-bus owners in Patna for replacement with CNG buses under the Bihar Clean Fuel (City Bus Incentive) scheme, 2023.

PuC Centre: The procedure to set up new Pollution under Control Centers has been simplified and the State government has launched an online portal for processing of new applications and renewal of PuC Center licenses. Prepaid facility for PuC Center is also implemented.

PM e-Bus Sewa: The Ministry of Housing and Urban Affairs, Government of India has marked significant steps towards its commitment for decarbonizing the transportation system and augmenting the urban bus operation. Six cities of Bihar (Patna, Bhagalpur, Darbhanga, Gaya, Muzaffarpur and Purnea) have been selected under the scheme for procurement of 400 e-buses with the Central assistance of Rs. 671.6 crore. Further, financial assistance will also be provided for the development of behind-the-meter power infrastructure and depot infrastructure for seamless movement and maintenance of buses for the period of 12 years.

Map 6.1 : PM E-Bus Seva in 6 Places of Bihar



6.10 Bihar State Road Transport Corporation (BSRTC)

The Bihar State Road Transport Corporation (BSRTC) was established in 1959 under the Road Transport Corporation Act, 1950. It is a State Public Sector Enterprise. The State government is continuously striving to provide smooth public transport services to the people through this Corporation. Table 6.10 depicts the annual revenue collection by the Corporation and also presents the number of passengers during 2017-18 to 2024-25 (up to September).

Table 6.10 : Revenue Collection and Number of Passengers Carried by BSRTC

Particular	2017-18	2018-19	2019-20	2020-21*	2021-22*	2022-23	2023-24	2024-25 (Till Sep. 24)
Revenue Collection (Rs. crore)	124.8	151.18	168.81	49.64	94.47	134.16	123.04	60.79
No. of Passengers Carried (lakh)	212.0	320.00	395.0	117.45	182.84	302.00	221.24	127.09

Note : * Represents the Covid years.
Source : BSRTC, GoB

In order to facilitate inter-state road transportation, State governments have made several agreements with neighbouring states for the convenience of passengers. In this background, the

State government has signed mutual agreements with Jharkhand (200 routes), Chhattisgarh (28 routes), Odisha (16 routes), West Bengal (45 routes) and Uttar Pradesh (34 routes).

Bihar shares an international border with Nepal and the people of both Bihar and Nepal travel very frequently to each other's territory for economic, social, cultural, and religious reasons. In this background, through a mutual agreement, BSRTC has provided two buses on Bodh Gaya – Patna – Kathmandu and four Buses on Patna-Janakpur routes as daily transport services.

In order to provide safe, clean and comfortable services to the passengers and to strengthen the public transportation in the state, currently 581 buses are plying in rural and urban areas through the Corporation. In addition, 300 buses are running under the Public-Private Partnership (PPP) mode. In light of the increasing population of Patna, 127 buses are provided for easy and speedy travel in Patna and nearby regions. BSRTC has taken a number of measures for the benefit of its passengers.

The BSRTC has further embarked upon the journey of adopting state-of-the-art technologies in the domain of online ticketing, GPS-based vehicle location tracking systems, Automatic fare collection system (AFCS), Bus Ticketing Machines and Common Mobility Cards. All the City buses have been equipped with the ETIMs and other necessary equipment for the same and the passengers are availing of the Prepaid cards, passes and online services, providing a positive impact on travelling experience of the commuters.

As a recent initiative, the Transport Department has surveyed Bus Stands across Bihar. It has been decided that the BSRTC bus stands will be used as model bus stands to be developed across the state for better citizen-centric services. The Department has taken this step to ensure proper accessibility, conducive ambience, smooth and digital ticketing system, food court, Public Announcement System and amenities for commuters at the bus stands under the jurisdiction. The BSRTC has received Rs. 12.26 crore for the upgradation and renovation of facilities at 14 Bus Stands in 2023-24. A comprehensive plan is being chalked out to cover all the depots in the state.

6.11 Railway Network

Railway plays a pivotal role in the transportation of passengers and freights in India. A total of 4509 kms of railway tracks existed in Bihar till March, 2024, which constituted 3.4 percent of the total tracks in the country. It contributes a notable proportion of transportation of goods as well as passengers. It is an economic means of transportation. Chart 6.8 illustrates contribution of railways sector in GSVA during 2011-12 to 2023-24 in Bihar. The railways transport in GSVA of Bihar shows moderate growth, with fluctuating trends, and recorded a decline in growth during 2016-17 and 2020-21. However, this sub-sector of economy grew by almost three times during these 13 years, from Rs. 2751 crore in 2011-12 to Rs. 7522 crore in 2023-24.

Chart 6.8 : Growth in Railways Sector of GSVA at Constant (2011-12) Prices

(Rs. '000 crore)

Recent Achievements of East Central Railways (ECR)

In order to provide better rail connectivity and services to the people of Bihar, ECR has embarked upon a massive drive for modernisation and development of rail infrastructure viz. construction of New Lines, Multi-tracking, Gauge Conversion, Railway Electrification, Yard Remodeling with modernisation of signaling systems, construction of Road Over Bridges (ROBs)/ Road Under Bridges (RUBs), replacement of old bridges, Rolling Stock Maintenance Workshops, Locomotive Sheds, Coach Care Centers, etc. (Chart 6.9). Since 2014, Indian Railway has constructed 624 kms of New Lines, has undertaken 739 kms of multi-tracking, 519 kms of Gauge Conversion, 1927 kms of Electrification, 63 Road Over Bridges and 214 Road Under Bridges in Bihar. During the same period, 115 new trains were introduced for the convenience of passengers. Also, additional stoppages were introduced at many stations for more than 300 pairs of trains.

6.12 Air Transportation

Growth in air transport sector shows the economic activities and trade in the regions. The Patna airport is one of the emerging airports in the country. The contribution of air transport in economy has been increasing over the years in Bihar. Chart 6.10 provides a trend of growth recorded in airways (sub-sector of GSVA) of Bihar during 2011-12 to 2023-24. The size of air transport in GSVA jumped by nine times from Rs. 31 crore in 2011-12 to Rs. 282 crore in 2023-24. This sector has recorded an annual growth of 21 percent during 2023-24, compared to the previous year.

Chart 6.10 : Growth of GSVA from Air Transport at Constant (2011-12) Prices in Bihar

(Rs. crore)

The trend of business at the Patna airport is illustrated through Chart 6.11. As of March 2024, the air transport services recorded a massive growth since 2004-05 (Chart 6.11). Further, Table 6.11 shows the year-wise trends of the air transport movements. The Patna airport has served nearly 3 crore passengers during the last decade (2014-15 to 2023-24) and carried around 83 thousand tonnes of freight during the same period. The average aircraft movement is nearly 24,026 annually during the same period of time.

6.13 Building Construction

The State government has been continuously strengthening the governance, administration, economy and culture of the state through building administrative, social, historical, cultural and sports infrastructures in the state. The trend of annual expenditure of the Building Construction Department (BCD) is given in Chart 6.12. As the data shows, the scheme expenditure by BCD has recorded an increase of more than 332 times, while committed and establishment expenditure went up by 4 times only during the last one and a half decade (2008-09 to 2024-25 BE). The scheme expenditure has been gradually surpassing the committed expenditure since 2011-12. The State government has budgeted an amount of Rs. 4008 crore under the scheme expenditure head and a sum of Rs. 1005 crore under the committed and establishment expenditure head during 2024-25 BE. Further, the composition of work assigned by different departments of the State government during 2024-25 BE is shown in Chart 6.13. These investments create direct and indirect employment opportunities and also provide an opportunity to grow economy at a higher rate.

Some Important Projects of the Building Construction Department

Rajgir Khel Academy

Type : Stadium

Budget : Rs. 889.26 crore

Seating Capacity : 40,000

Land (Area) : 1,47,735 sqm

Status: Expected to Complete by 30.06.2025

Rajgir Khel Academy

Features : 40,000 capacity international cricket stadium, Five indoor halls for various sports. An administrative-cum-training building for training and operations. Outdoor sports facilities – two football fields, athletics track, bicycle track, Velodrome, modern hockey field, handball, basketball, volleyball, lawn tennis, swimming pool, etc. Residential colony – Director's residence, Assistant Director's residence, Boys' and Girls' Hostels, Transit Hostel, Coach Suite, Third and Fourth-class accommodation, etc.

APJ Abdul Kalam Science City

Type : Science City

Budget : Rs. 640.55 crore

Land (Area) : 37,619 sqm

Status: civil work completed. Exhibit work completion expected date 30.11.2025.

APJ Abdul Kalam Science City

Features : 5 gallery, Bank of House, Auditorium, Dormitory, Atrium om the ground floor, attached 4D theatre, pre-functional hall, multi-purpose hall and cafeteria, etc., security barrack, ticket counter, service yard, organic waste composter building, etc.

Bihar Animal Sciences University (BASU)

Type : University

Budget : Rs. 889.29 crore

Campus Area : 1,92,758 sqm

Status : Expected to Complete by 05.05.2025

BASU

Features : Administrative Building (B+G+3), Educational Building (B+G+4), Teaching Veterinary Clinical Complex (B+G+3), Various laboratories and animal post mortem halls, Dairy Engineering Block (3) and Real Estate Engineering Branch, 1200 capacity auditorium, 350 boy students' capacity hostel, 150 girl students' capacity hostel, 50 capacity scientists' hostel, Vice Chancellor's residence, 222 residential flats of various categories and University Guest House.

Buddha Samyak Darshan and Museum

Type : Museum

Budget : Rs. 550.48 crore

Land (Area) : 19765 sqm

Status : Construction work completed

Features : Buddha Stupa (stone structure), Museum Block, Library and Meditation Room, Visitor center, Guest house, Amphitheater and Service Area.

Buddha shamyak darshan and museum

Bapu Tower

Type : Museum

Budget : Rs. 129.38 crore

Land (Area) : 9972 sqm

Functional since : 02-10-2024

Features : Rectangular Gallery Building, Circular Exhibition Hall, Auxiliary Building (ESS, UGT, HVAC Plant), Orientation cum Immersive Exhibit Hall, Turntable Base Immersive Exhibit.

Bapu Tower

6.14 Bihar State Building Construction Corporation Limited (BSBCCL)

The State government established the Bihar State Building Construction Corporation Limited (BSBCCL) in 2008 under the Building Construction Department (BCD). This Corporation has played an important role in providing adequate building infrastructure for the state administration. During the last one and a half decades, the Corporation has done ambitious and prestigious projects in a stipulated time. Out of 2483 projects, the Corporation has completed 2154 projects. Till March 2024, the total project's expenditure Rs. 6532 crore. The rest projects of the BSBCCL are under different phases. An overview of the working conditions of BSBCCL shown through Table 6.12 during the period of 2013-14 to 2023-24. A detailed list of the financial status of some major projects is given in Appendix – A 6.8.

Table 6.12 : Overview of Physical and Financial Progress of BSBCCL

6.15 Bihar Police Building Construction Corporation Limited (BPBCCL)

The State government is committed to maintain law and order in the state and police modernization remains a top priority. The State government has revamped the Bihar Police Building Construction Corporation Limited (BPBCCL) in an unprecedented manner to construct the infrastructure (buildings) equipped with safety and security features. It is another profit-making Corporation of the state. It maintains its efficient financial management and timely completion of projects. An overview of the physical and financial progress of the BPBCCL during the last decade (2013-14 to 2023-24) is presented in Table 6.13. As per the data shown in the table, the sanctioned amount for 7093 projects is Rs. 5730 crore during 2013-14 to 2023-24. The Corporation has also donated in the Chief Minister's Relief Fund and spent under its Corporate Social Responsibility (CSR) initiative.

6.16 Postal Infrastructure

India's postal network is the largest postal network in the world. It is worth mentioning here that a post office provides its services in an area of about 19.93 sq km and also provides international postal service to more than 100 countries. The Postal financial services include core banking solution, ATM, internet banking, mobile banking, etc. Apart from these, e-products and e-services have also been introduced along with e-post, e-payment, e-money order, Jeevan Pramaan Patra

door-to-door service. A total of 46 postal export centres are functioning under Bihar Postal Circle, from where export material is dispatched to more than 200 countries. In order to make passport issuance easy, 35 Post Office Passport Seva Kendras are functioning in Bihar Postal Circle. Chart 6.15 gives details of the postal network infrastructure in Bihar as of March 2023. The banking services provided by the Postal Department is shown in Table 6.14.

Table A 6.4 : Overview of Bharatmala Project in Bihar as end of September, 2024

Project Name	Cost (Rs. crore)	Length (Km)	Status
2017-18			
Aunta - Simaria including Ganga Bridge	1161	8.15	Under construction
2019-20			
Umagaon-Saharsa (Package-IV) Koshi Bridge & approach Road - (Bheja-Bakaur)	1101.99	13.3	Under construction
2020-21			
4L of Galgalia - Bahadurganj section from Km 0.000 to Km 49.000 (Package-I) of NH327E	1051	49	Under construction
4L of Bahadurganj Araria section from Km 49.000 to Km 94.000 (Package-II) of NH-327E	1081.7	45	Under construction
Bakhtiyarpur-Rajauli Pkg-III from km. 101.630 to km.152.520	2310	50.89	Under construction
6L of Kanhauli - Ramnagar (Patna Ring Road PKG-I) from Km 0.000 to Km 39.160 of SH-78/ new NH-131G	797	39.16	Under construction
Ara - Mohania (Pkg-II)	690	60.8	Under construction
Ara - Mohania (Pkg-I)	700	54.75	Work completed
2021-22			
4L Greenfield Alignment of Amas to Shivrampur from 0.000 Km. to 55.002 Km. of NH 119 D (Pkg-I)	1157.5	55	Under construction
4L Greenfield Alignment of Shivrampur to Ramnagar from Km. 55.002 to Km. 109.300 of NH 119 D (Pkg-II)	1207	54.32	Under construction
4L Greenfield Alignment from Kalyanapur to Tal Dashraha of NH-119D (Pkg-III)	1358	47	Under construction
Umagaon-Saharsa (Package-I) Umagaon-Basopatti-Kaluahi & Sharghat-Benipatti-Rahika	1228.24	47.75	Work Awarded
Umagaon-Saharsa (Package-II) Rahika & Madhubani Bypass (Rahika-Pokharauni-Rampatti)		14.88	Work Awarded
Umagaon-Saharsa (Package-III) Bideshwar Asthan (NH-27, E-W) to Bheja		26.04	Work Awarded
2022-23			
4L of Greenfield Alignment from Km. 45.000 to Km. 89.090 of Tal Dashara to Bela Nawda Section of NH-119D	1687.81	44	Under construction
Ara-Sasaram (NH-119A)	2950	118	Bids invited
Sherpur-Dighwara (NH-131G)	4994	8.48	Awarded
Kisanganj-Badhurganj (Not declared yet)	747	22.6	To be tendered
Chorma-Bairgania (NH-227F)	875	35	Awarded
2023-24			
Muzaffarpur-Barauni [NH-28 (old)]	2160	108	
Kanhauli-Sherpur (NH-131G)	350	14.52	DPR in progress
Ramnagar Kachhi Dargah (NH-131G)	1200	14	DPR in progress
Bidupur-Nayagaon (NH-131G)	900	30	Not awarded
Adalwari- Bettiah (NH-139W)	4125	165	One package awarded
Kolkata –Varansi (NH-319B)	3300	110	68.7 Km Awarded
Gorakhpur-Siliguri	12480	416	Not awarded
Total	**49612.24**	**1651.63**

CHAPTER - VII

E-GOVERNANCE

Abstract

In order to promote e-Governance in a holistic manner, various policy initiatives and projects have been undertaken by the State Government to deliver good governance and development with socio-economic justice. The fundamental objectives of the State Government in terms of E-Governance are to achieve excellence with innovation in public administration and development with inclusive growth, equality and fairness. The government machinery has been strengthened with many ICT initiatives for delivering good governance. The Emergency Response Support System is effectively operational in the state. The control and command centre receives around 68,000 calls per day. The response time of the ERSS team is 15 minutes, which rescues people in an emergency. Several e-governance initiatives are adopted by the Transport Department, which enhance the transparency and efficiency in service delivery as well as save money and time of the applicant. E-Shikshakosh serves as a single centralized dynamic platform for monitoring all key parameters to ensure the effective delivery of quality education to all the schools in the state. Another digital initiative of the state government, 'BHAVYA', is a one-stop digital platform that supports everyday functions at the government health facilities of Bihar and streamlines the OPD and IPD functionalities, right from a patient's registration till discharge. The land record management system, public distribution system, direct benefit transfers and many other initiatives relevant to citizens of the state are focus areas in this chapter.

E-Governance, or electronic governance, refers to the use of digital technologies and information systems to enhance the efficiency, transparency, accountability, and accessibility of government services and processes. By leveraging tools such as the internet, mobile applications, and data analytics, e-Governance transforms traditional governance mechanisms to better meet the needs of citizens, businesses, and government stakeholders. It encompasses various dimensions, including government-to-citizen (G2C), government-to-business (G2B), and government-to-government (G2G) interactions.

7.1 ICT Infrastructure: Foundation for E-Governance

The Information and Communications Technology (ICT) is essential to deliver good governance using digital technologies. The e-governance penetration and success are also determined by many

factors, especially the access to telecommunication, internet connectivity, online authentication i.e. Aadhaar seeding, etc. In this backdrop, the State government has been continuously strengthening the ICT infrastructure right from the headquarters to districts to blocks to panchayats and lastly to the villages. Table 7.1 presents the status of the ICT infrastructure of Bihar and India The table includes tele-density and internet density, apart from Gram Panchayats onboard for e-gram swaraj. In order to access the majority of e-governance programmes, services and entitlements (Direct Benefit Transfers), the State government has been making faster progress in taking all gram panchayats on board. The table also indicates that every third person in Bihar has internet access. It is important to note that all the panchayats have been onboarded for digital access.

Table 7.1 : Coverage of Basic ICT Infrastructure in Bihar and India (as of March, 2024)

State	Tele-Density	Internet Density	Panchayat Onboard (%)
Bihar	**55.59**	**42.1**	**100**
All-India	**85.69**	**68.19**	**95.1**

Source : Telecom Regulatory Authority of India and Press Information Bureau, GoI

Some of the important initiatives of the IT Department of the state are discussed below:

Bihar State Data Centre (BSDC 2.0) and DR (Disaster Recovery) : The BSDC facilitates the State government to provide efficient, secure and reliable digital services from across its departments to citizens. The BSDC 2.0 is now operational and is a Tier-III compliant data centre with 99.982 percent uptime and hosts 305 applications of the different departments. It is equipped with 6200 cores capacity, 64000 RAM capacity and 2.6 petabyte storage capacity, and has multi-layer security. It has the provision of a Disaster Recovery (DR) site. The objective of the DR-cum-BCP (Business Continuity Programme) is to recover and restore data and operations when the primary data centre becomes unavailable. Till September, 2024, a total of 150 applications hosted at SDC have been provisioned with DR.

Bihar State Wide Area Network (BSWAN 2.0) : It is a network highway that provides uninterrupted Voice, Video and Data connectivity services to the offices of the State government. BSWAN 2.0 connects Government Offices (450), District Headquarters (38), and Block Offices (528) through a high-speed network that supports efficient and transparent service delivery to citizens. As of September, 2024, a total of 611 Points of Presence (PoP) have been established. It is important to note here that continuing its thrust on network reach and accessibility, the State government has approved BSWAN 3.0 to scale-up the network to the Panchayat level.

Secretariat Local Area Network : The objective of the SecLAN is to enhance and strengthen the existing Secretariat Network that serves as the backbone for communications throughout the

Secretariat and other important government buildings in Patna. It is a high-speed and secure intranet, with approximately a 60-km-long optical fibre network across Patna. It provides 10 GBPS-speed data transfer and 24x7 availability with more than 21000 nodes. To address increasing data security concerns, the government has approved SecLAN 3.0 that will provide the facility of LAN and Wi-Fi under a single project with additional 5000 LAN nodes along with an end-point security management tool.

Bihar Aadhaar Authentication Framework (BAAF) : It is an umbrella framework that enables all Aadhaar-based transactions in the state and helps in identification and authentication of beneficiaries electronically in a safe and swift manner. It makes service delivery more efficient, helps remove ghost beneficiaries, and reduces leakages. More than 57 crore authentications by 14 Sub-AUAs (State Government Department that use the facility of Aadhaar User Authentication) have been carried out since 2018. Further, 2 additional Sub-AUAs are likely to be added soon.

Email Service : The DIT also provides free Email Services to all Departments, following the National Email Policy. The department currently serves more than 1.14 lakh users, of whom 44,000 have been added in the last year.

Mobile Service Delivery Gateway (MSDG) : Bihar is the leading state in terms of push SMS usage through MSDG. The DIT provides free of cost SMS services to all user departments and Public Sector Undertakings. Around 16 crore SMSs are sent per month on an average in Bihar. To increase multiple access channels, Unified Messaging Platforms are also being explored, including WhatsApp and other channels.

Establishment of Blockchain as a Service Infrastructure : The IT Department has recently approved the project which aims to secure key transactions, documents and certificates being issued by various departments of the State government through immutable Blockchain-based security.

Skilling in IT and ITeS Domain : DIT is currently providing technical skills training throughout the state for employability of youths. The government is providing 9 different courses through its 124 Skill Development Centres for the purpose. Till date, more than 56,010 candidates have received training. A total of 2200 persons received training in the financial year 2024-25 and 1838 persons are currently under training.

C-DAC Centre in Patna : In order to facilitate advanced training and research in ICT within the state, DIT has helped C-DAC to set up its Centre in Patna. C-DAC has four units – (i) Cyber Security and Forensics, (ii) AI Centre of Excellence, (iii) IoT and Embedded Lab, and (iv) Centre for Advanced Data Analytics and Decisions. More than 100 students are currently receiving training in Emerging Tech areas.

National Institute of Electronics and Information Technology (NIELIT) : It is located at Bihta in Patna and is spread over 12.36 acres. The land was provided free of cost by the State

government. In addition to Bihta, two more new Centres of NIELIT – in Buxar and Muzaffarpur – became operational in July 2023. Nearly 5,000 youths receive training at NIELIT centres every year.

Incubation Space for IT/ITeS Entities : DIT is providing free plug-and-play office spaces to startups at BISCOMAUN Tower, Patna. A total of 13 startups were provided space at BISCOMAUN Tower in the financial year 2024-25. In addition, DIT has supported STPI in setting up 1 lakh sq ft office space at the STPI Patna campus, which will become operational by the end of this financial year. In addition, 16,000 sq. ft. of such office space in Bhagalpur and Darbhanga will become available by March 2025.

7.2 Enforcement of Law and Administration

Good governance is highly dependent on the maintenance of law and order. In the current world of cybercrimes and data frauds, it has become extremely difficult and challenging for the state to control unlawful activities and safeguard its citizens and businesses. At the same time, the State government has wisely used Artificial Intelligence (AI), Cybersecurity, Internet of Things (IoT), etc., which are playing a major role in establishing strong foundations for the maintenance of law and order. Some of the important e-governance programmes related to it are:

Crime and Criminal Tracking Network and System (CCTNS) : The objective of rolling out the CCTNS is to create a comprehensive and integrated system for enhancing the efficiency of policing at all levels through adopting e-Governance measures. It transforms the police force into a knowledge-based force. It improves the delivery of citizen-centric services by creating a platform for sharing crime and criminal information on a real-time basis across the police stations in the country.

Chart 7.1 : Progress of CCTNS as of September 2024

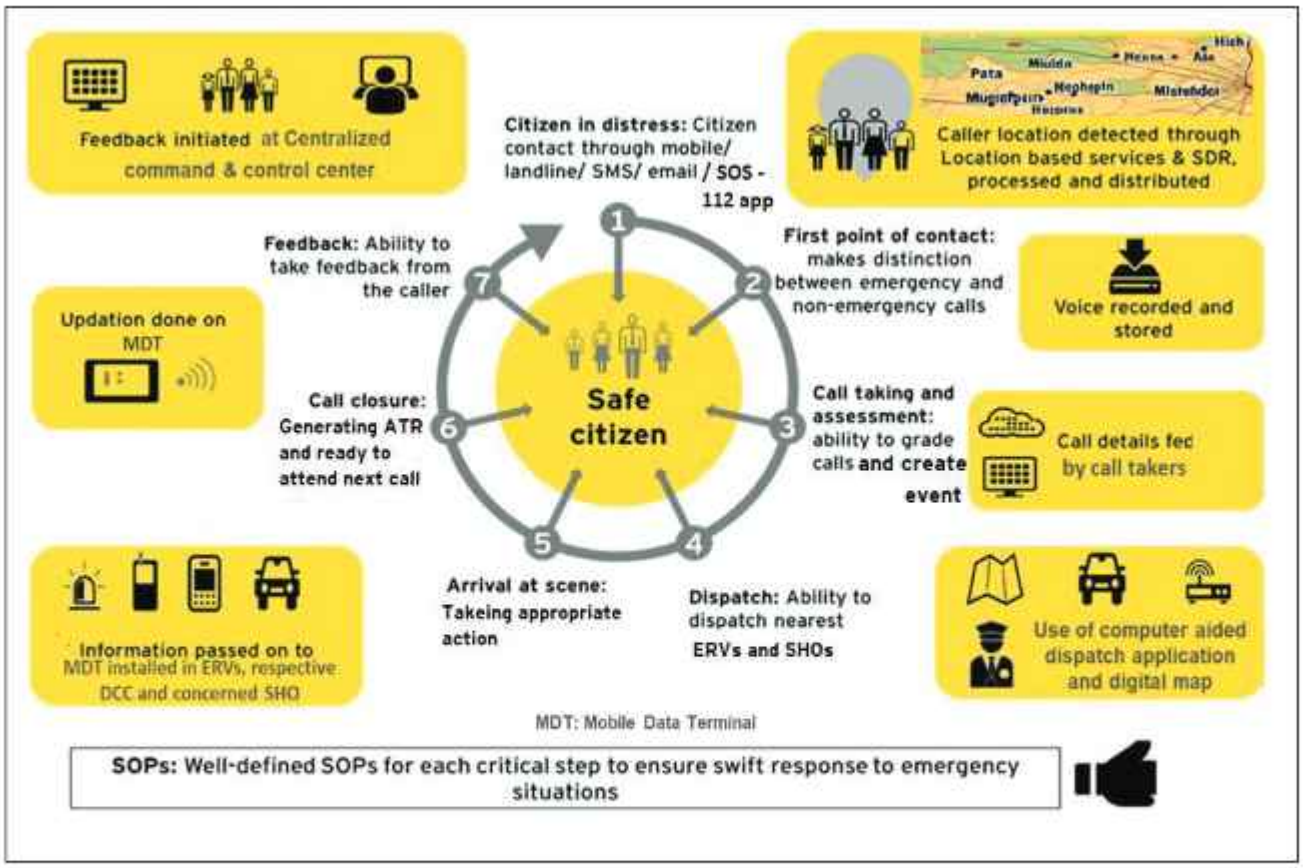
Source: Department of Home, GoB

CHAKRA : This application was handed over to STF, Bihar by CID (prohibition) that has been operational since January 2023. The important features of the CHAKRA App include powered criminal registration and a search platform for Bihar Police. Further, a criminal database prepared on the basis of face recognition, gang analysis and such advanced features are used for criminal identification, criminal history, speedy arrest, effective crime prevention, detection and control. It also assists the police in analysing the connection between different criminals, criminal networks and gang analysis. During the last five years, nearly 10 lakh criminals' data have been uploaded to the system.

Cyber Security : A total of 70,057 complaints of financial fraud were registered till November 2024. After verifying these frauds, 3668 FIRs were lodged. Cyber cells in different district and cyber police stations received 15.72 lakh calls regarding cybercrime. A total of 560 cybercriminals have been arrested. The Economic and Cyber Crime wing has developed 'Cyber Prahar' for raids and arrests of cybercriminals.

ERSS (Emergency Response Support System) Dial 112 : In order to provide prompt and integrated 24x7 emergency services for public safety in a stipulated time across the state, a centralised command centre for ERSS operation has been established to connect with field ERVs (Emergency Response Vehicles) and officers from ranks such as SHO, Dy SP, and SP have been provisioned for the purpose. Wireless and GPS equipment have been installed across the EVRs. Following is the process of E RSS:

Chart 7.2 : ERSS Process



Source : Department of Home, GoB

The 'Surakshit Safar Suvidha' application has been launched in September, 2024 under ERSS 2.0 to ensure a safe journey for women travellers from source to destination. The progress of ERSS is given in Chart 7.3 as the emergency response centre received emergency calls through voice call to 112, email, WhatsApp, panic buttons, activated calls and the 112 India mobile app.

Chart 7.3 : Overview of ERSS (as of September 2024)

Source: Department of Home, GoB

Traffic Signals Integration with Surveillance and CCTV Operations (TISCO) : In order to implement CCTV-based surveillance systems in 9 cities in Bihar - Begusarai, Bettiah, Chhapra, Darbhanga, Dehri, Gaya, Munger, Purnea and Saharsa, the TISCO project aims to create a safe, secure and empowering environment for citizens in public places, to enable them to pursue all opportunities without any threat of gender-based violence and/or harassment and also implement the intelligent and adaptive traffic control system. The State government has taken the initiative to implement TISCO in 9 cities of Bihar to ensure the safety and security of citizens, determine crime, and facilitate a real-time traffic detection system to avoid congestion, wastage of fuel, etc.

e-Courts Project : It is one of the National e-Governance projects being implemented in District/Subordinate Courts across the country. The project has been prepared by the e-Committee of the Supreme Court of India. More than 2 lakh users (Advocates and Litigants) have already availed the services being offered under the project. Phase-I of the project was initiated in 2009, and Phase-II in 2016. All district courts and most of the civil courts in Bihar have already been computerized and are running the CIS software as provided under the e-Courts Project. A total of 79 locations (Civil Courts) in Bihar are covered under the Project (Phase-II) comprising 37 Districts and 42 Sub-Divisional Courts. CCTV installation work in sub-ordinate courts has been

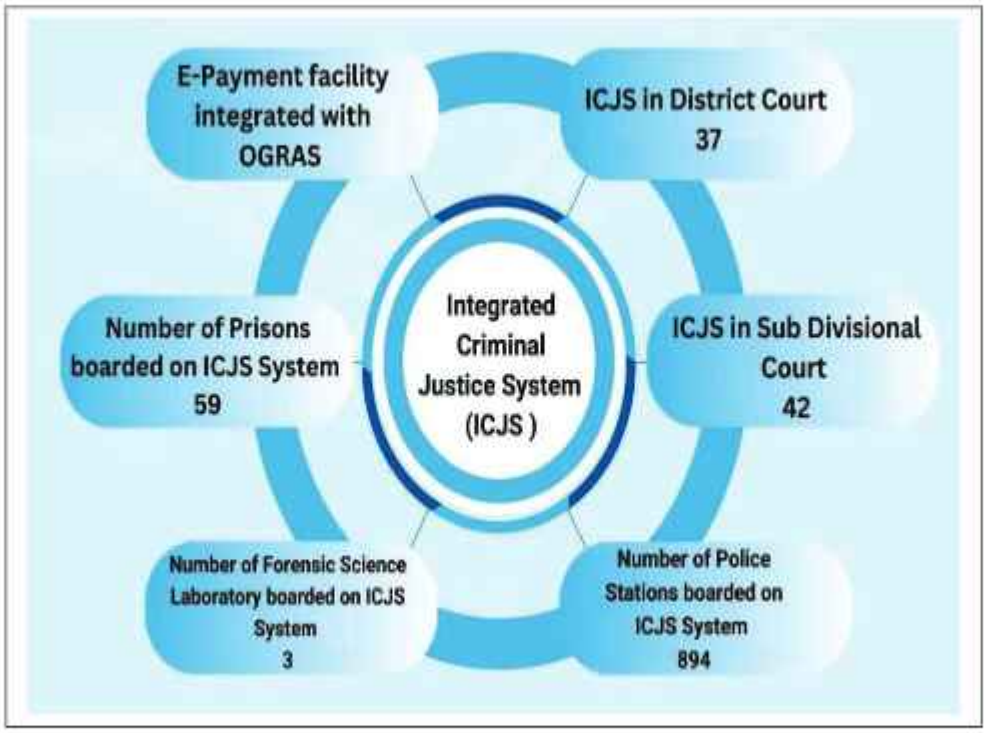
completed in Court Rooms at 68 locations and 4631 units of CCTV Cameras have been installed in district courts. e-Court fee and e-Stamping through Stock Holding Corporation are functional at all district courts, including the High Court.

CIS HC : It is functional in the Patna High Court and CIS 3.2 is functional in all 79 locations of Bihar. The Patna High Court was the first to start this facility from October, 2022. The Buxar Judgeship has been chosen as a pilot district for implementation of CIS 4.0. Migration of CIS 3.2 to CIS 4.0 is also ongoing and the same will be completed within a month in all the Judgeships of Bihar.

e-Filing : Almost all cases and documents are being e-filed in the Patna High Court, since 2020, and since 2023 in the District Courts of Bihar. More than 4 lakh cases have been done on the e-filing portal, including the Test and Live Server. The total number of Ld. Advocates registered on the e-filing portal are more than 8000. Steps are being taken to encourage the lawyers to e-file their cases.

Integrated Criminal Justice System (ICJS) : With the aid of the ICJS platform, the metadata of the First Information Reports (FIR) and Chargesheets can be accessed by courts. Currently, all the District and Sub-Divisional courts of Bihar are consuming the metadata related to FIRs as well as Chargesheets from Police Stations across the state. Till date, a total of 13.60 lakh FIRs and 2.45 lakh Chargesheets' data have been made available on the CIS application.

Chart 7.4 : Overview of ICJS as of November, 2024



Source : Department of Law, GoB

NSTEP : The facility of NSTEP was started in District Courts in 2020 that enables real-time tracking of serving notices and summons by courts. A total of 340 smartphones for Process Servers/ Bailiffs have been procured and a total of 6,73,183 NSTEP Summons have been consumed. As of November, 2024, a total of 2,33,185 NSTEP Summons had been delivered in various Judgeships of Bihar.

Multi-Level e-Sewa Kendra : Patna High Court has 4-Tier e-Sewa Kendras. All District Courts, Sub-Divisional Courts and courts in Panchayats can also access this facility. For taking the e-court initiatives to the end user at the panchayat level, the High Court has embarked upon the task. It has started offering e-Sewa Kendra facilities in panchayats by enabling the existing panchayat bhawans to cater the facility. Till date, 41 e-Sewa Kendras have been established (one in Patna High Court, 37 in District courts, one in Sub-divisional Court and two in Panchayats).

CCTV-based Surveillance System : In order to provide overall safety and security at important places, the Department of Home has installed CCTV cameras to monitor the activities and prevent unlawful activities. It covers Secretariat Buildings in Patna such as Old Secretariat, Adhiveshan Bhawan, Sinchai Bhawan, Vikas Bhawan, Soochna Bhawan, Vishveshvaraiya Bhawan and Niyojan Bhawan. It also covers Vidhan Sabha (old and new Annexe Buildings). Apart from the Secretariat and Vidhan Sabha, the Department has also covered all Police Stations and all Court campuses (from the Subdivisional Courts to the High Court) with the 24/7 CCTV surveillance project. The system captures the details of vehicles entering and exiting the building premises, identifies any suspicious activity and alerts the control-cum-monitoring rooms using state-of-the-art technology and video analytics.

e-Prisons : It is an integrated system application software for computerising all the activities related to prison and prisoner management in real time. It has covered the entire lifecycle of the prisoners in all 59 prisons of Bihar since 2016. Legacy data of prisoners have also been captured in e-Prisons application since 2005. There are several modules in the application for serving the purpose at various levels of the government. New laws – (i) Bharatiya Nyaya Sanhita, (ii) Bharatiya Nagarik Suraksha Sanhita, and (iii) Bharatiya Sakshya Adhiniyam have been incorporated in to the system. Till now, details of total 28.23 lakh prisoners have been captured.

e-Mulakat System : This system is available at all prisons of Bihar and provides citizen-centric services to the relatives of inmates. This includes registration for visiting an inmate and inmates' video conference-based Mulakat with their relatives. The portal also consists of dashboards showing statistical data of various prisons in the district/country. Grievances with respect to their wards inside the prison can also be submitted by people through this portal, which are then forwarded to the respective prison for action. These services are being provided to the relatives/advocates/doctors of the prisoners. Till now, a total of 23.28 lakh visits of prisoners' relatives/friends have been completed at prisons of Bihar.

T-HCBS : The Government of Bihar has approved the Scheme for installation of 'Towers of Harmonious Call Blocking System' (T-HCBS) in 15 prisons of Bihar to prevent unauthorized communication from prisons. The system would block incoming/outgoing calls, SMS and data services on prison premises. Telecom Service Providers have optimized their Radio Access Network in the vicinity of 15 prison complexes in Bihar.

GIS mapping and Geo-fencing layers in TERA Maps for Prisons (iBhugoal) : The Latitude and Longitude of prisons of Bihar have been taken for GIS mapping and Geo-fencing layers and integrated in Tera Maps of GIS. It provides a single window for detailed information on topography, geography, infrastructure and socio-economic indicators. Integration of GIS and MIS data is achieved for planning and decision making.

Mission Vihaan : This is a software application through which the prison headquarter monitors day-to-day activities in the prisons of Bihar.

e-Aushadhi and telemedicine in prisons : e-Aushadhi is being used for providing medicines to prisoners and maintain the medicine stocks in prisons. In addition, Telemedicine has been introduced in Central Prisons of Bihar for medical diagnosis, timely treatment and medical care of prisoners, which also helps during the visit of prisoners to district hospitals and other hospitals.

Court Case Monitoring System : The Court Case Monitoring System (CCMS) is an online application for Government departments to manage their case information and make updates. The system is used to set alerts like next date of hearing, case compliance, and case history. This system is integrated with the Court Information System to receive Cause lists and Final Orders. Additionally, CCMS works as a digital diary to simplify court case tracking, which keeps everything organized and easily accessible.

ICJS Software Application : In order to enable seamless transfer of data and information among different pillars of the criminal justice system (courts, police and forensic science laboratories), 'Inter-operable Criminal Justice System' (ICJS) software application has been developed. At present, prisons are taking prisoners' admission through ICJS module. It is an effective tool for case and court management, as all the relevant information of a case will be available in real time for courts' use. The ICJS enhances the productivity of the criminal justice system and also of prisons and correctional services, both qualitatively and quantitatively. The core target of ICJS is to eliminate the manual entry of a person's details and act as a facilitator to exchange the data across pillars like Police, Court, FSL, Prosecution and Prisons. Police personnel are being encouraged to use the ICJS portal more and more.

FASTER System : A secured electronic communication channel has been established in all prisons of Bihar. Through FASTER system, e-authenticated copies of interim orders, stay orders,

bail orders, and records of proceedings from the Supreme Court are transmitted to the jail administration for compliance and due execution. All prisons of Bihar are taking timely action on the Supreme Court's directions received via JCN e-mail ID through the FASTER System.

e-Sakshya Platform

The e-Sakshya platform is suite of e-Sakshya mobile application for recording of process, Sakshya locker for storage and bundle of APIs for authentication and data exchange. e-Sakshya mobile App is intended to record the process for three purposes:

(i) Scene of Crime Videography – Bharatiya Nagarik Suraksha Sanhita 173;

(ii) Search and Seizure Videography – Bharatiya Nagarik Suraksha Sanhita 105; and,

(iii) Search by Police Officer Videography Bharatiya Nagarik Suraksha Sanhita 185.

e-challan : Violation of traffic rules is captured by camera and after entry of vehicle number or Driving Licence, e-challan is issued after selection of offence. These cameras capture photographs and videos of traffic violations and are linked to the Vahan and Sarathi Portal of the National Informatics Centre (NIC). Hand-held Devices (HHD) have been given to the police personnel to issue e-challan against traffic violations in real time. With the help of hand-held devices, the traffic police collect fines from violators in real time through debit cards, credit cards, and UPI. It introduces transparency in issuing challan on the spot and facilitates online payments. A sum of Rs. 120 crore has been collected through e-challans to 19 lakh traffic violators till September, 2024.

iRAD & eDAR : Integrated Road Accident Database- Electronic Detail Accident Report (iRAD-eDAR) project provides an integrated digital platform for all stakeholders and collects real-time accident data in the entire country to analyse the causes of crashes and helps in devising safety interventions to reduce accidents and fatalities. The State government rolled out this platform in Bihar in January 2022 and 32,725 accident cases have been registered so far and 2877 cases proceeded to e-DAR. It covers 40 police district administrations, 1237 police stations, and 3084 field office users. It integrates all the divisions and subdivisions of road agencies right from NH to Village Road. Also, 38 District Transport Offices and more than 76 MVIs are registered in the system for motor vehicle inspection. More than 146 hospitals and 2975 patients are registered in iRAD. A total of 14,394 training sessions have been organized throughout the state for 39,560 participants.

e-Detection : The Bihar Transport Department has rolled out an e-Detection system in all 32 toll plazas of Bihar. The toll gates of NHAI have been integrated with the portal. The objective is to keep a check on vehicles plying without valid documents. The system, based on Fastag, identifies the vehicles plying without Insurance Certificate, PUC, Fitness and Tax whenever they drive

through a NH toll plaza. The vehicle information is then transmitted to the e-Detection software. Later on, the vehicle data is compared with the data on the NIC's Vahan database for identifying vehicles with invalid documents. The objective is to keep a check on vehicles plying without valid documents, the State Government has developed an e-detection portal. For a vehicle to ply on a public road, it is mandatory to have valid documents like registration certificate, fitness certificate, insurance, PuCC, valid driving license etc. The toll gates of NHAI have been integrated with the portal.

Table 7.2 : Challan Payment Collection Summary through e-Detection as of September, 2024

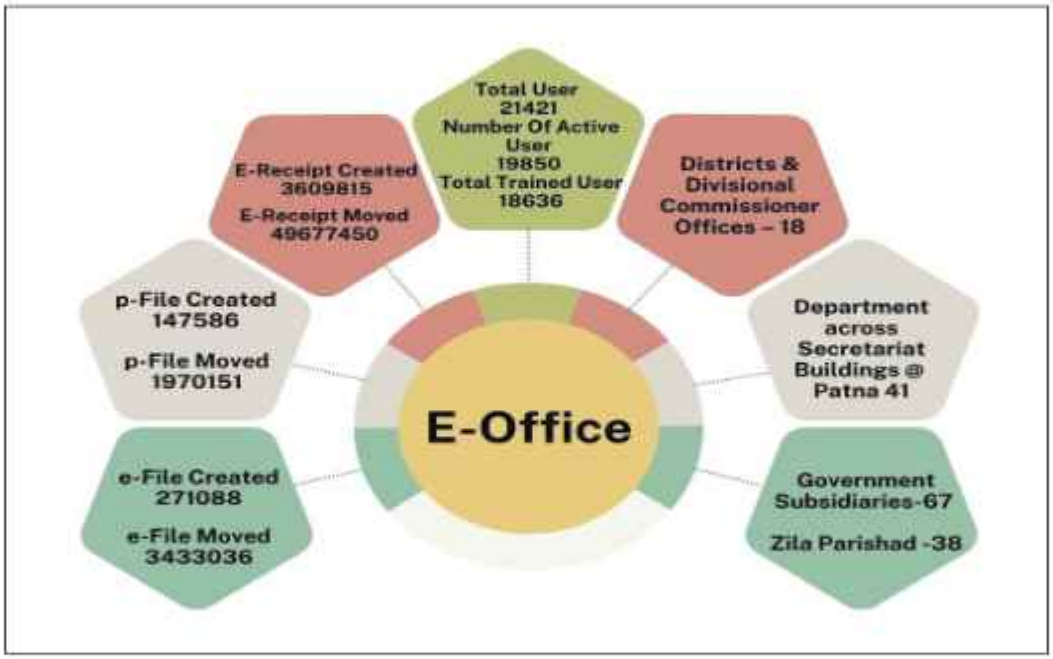
Challan Particulars	Values
Total Challans issued	48965
Challan Amount Generated (in Rs. lakh)	3189.51
Challans Paid	4535
Challans Amount Paid (in Rs. lakh)	364.79
Challans Pending	44430
Challan Amount Pending (in Rs. lakh)	2824.72

Source : Department of Transport, GoB

Child Labour Tracking System (CLTS) : It is a web-based tracking system launched in 2016 which facilitates the monitoring of rescued child labours and their rehabilitation. After the release of the child labour, a sum of Rs. 3000 is provided as immediate assistance by the Labour Resources Department. According to the order of Hon'ble Supreme Court, a sum of Rs. 5000 by the State Government and Rs. 20,000 from the accused employer is deposited in District Rehabilitation-cum-welfare fund. In addition to this after entry on CLTS portal, for each eligible rescued child labour an amount of Rs. 25,000 from the CM Relief Fund is provided as F.D / annuity. A total of 2912 child labours have received assistance of Rs. 25,000 per child labour from CMRF through this annuity scheme. The total number of entry of child labours in CLTS is 10,039 (as on 31-10-2024). Dhawa Dal App has been launched to monitor the activities of Dhawa Dals constituted in every district for rescue of child labours.

e-Office : The e-Office aims to support governance using more effective and transparent inter and intra-government processes. This system involves all stages of working in a file, including the diary noting of inward receipts, creation of files, movement of receipts and files and finally, the archival of records. With this system, the movement of receipts and files becomes seamless and there is more transparency in the system since each and every action taken on a file is recorded electronically. This simplifies decision making, as all the required information is available at a single point. It envisions a paperless office, with increased transparency, efficiency and accountability of the organization. E-Office has been functioning smoothly across the departments, selected districts and subsidiaries across the state since 2015.

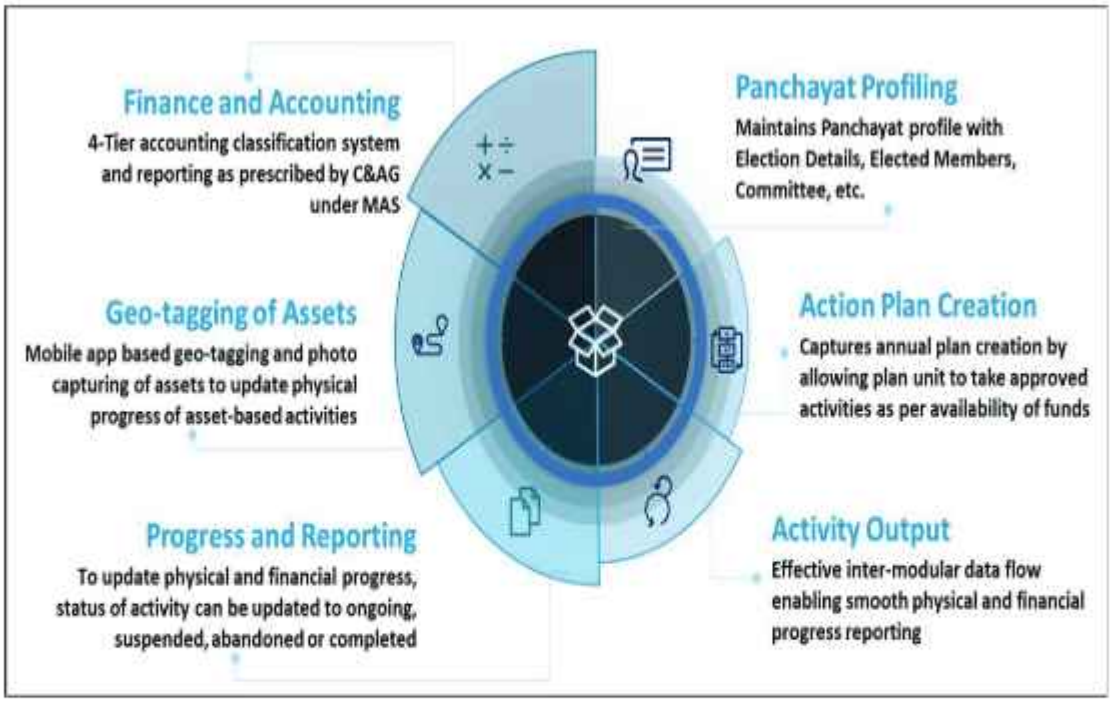
Chart 7.5 : Achievement of E-Office as of September 2024



Source: Department of Information Technology, GoB

e-GramSwaraj : It is one of the Panchayat Enterprise Suites under e-Panchayat Mission Mode Project of the Ministry of Panchayati Raj, which aims to improve transparency in decentralised planning, progress reporting and work-based accounting. The State has also rolled out this digital governance initiative. The different components of this e-governance programme is illustrated through Chart 7.6.

Chart 7.6 : Mechanism of E-Gram Swaraj



Source: Ministry of Panchayati Raj, GoI

Sewa Itihas (Service History Management) : It is a Government to Employee application that allows employees and the Personnel Department to manage relevant Service History information.

The Sewa Itihas portal manages government officers' details such as their Name, Service Cadre, Category, Pay Scale, Grade, Civil List/ Seniority, Working Status with all Posting details and Additional Charges. It covers all Cadre Services of the state.

Panchayat Nishchay Soft : The physical and financial progress of any scheme of the Panchayati Raj Department can be tracked. Panchayat Sarkar Bhawans' progress status, Solar Streetlight scheme, Audit and Accounts Module, Technical Module, etc. will be added gradually. In addition to this, the ranking system of TAs, Accountants, BPROs and DPROs based on their work performance will also be monitored.

e-Panchayat : The e-Panchayat, Bihar software is developed for facilitating payments under the Sixth State Finance Commission (SFC) awards. All scheme-related payments under the 6th SFC will be through the REAT module of PFMS. For processing payments to Labours, Vendors and Contractors, it becomes necessary to integrate with the e-Panchayat, Bihar Portal. All the payments under the 6th SFC for the three-tier PRI system (Zila Parishad, Panchayat Samiti and Gram Panchayat) will be made via this very portal after PFMS verification. Further, the Audit and UC module will also be integrated to this e-Panchayat, Bihar portal.

7.3 Promotion of Economic Development

E-governance provides opportunities to investors through a single window system, e-auction, e-bidding, and e-clearance. However, the government monitors and evaluates its infrastructure projects through PMIS, provides transparent bidding and public procurement; digitalise land records; provides transparent financial support to farmers, supports entrepreneurs and labourers; facilitates ease of doing business; etc. E-governance programmes in the state provide a platform to connect all stakeholders (i.e. government, households, bankers, businesses houses) and help them interact in a better way to improve the economy.

Physical Infrastructure

Project Management Information System (PMIS) : In order to monitor real-time progress of the ongoing projects, infrastructure sectors like roads and bridges, building construction, power infrastructure, etc. utilises the PMIS. It includes a project's scope management, cost management, time management, quality management, communications management and its online monitoring. Online project monitoring helps to supervise the project's execution progress as planned. In case of an issue in the project plan, PMIS helps to review the requirements to make sure that the project has met its goals and objectives. It also organizes the information collected over the course of the project for performance review and productivity analysis. PMIS now provides exact real-time location of road projects of any scheme on Google Maps. PMIS open dashboard is now available and all information related to road statistics can be seen here. Also, physical and financial information with graphical view of road projects are available on this dashboard.

I-GRAM (Integrated GIS-based Road Assets Management System) : This is a GIS-based project which aims to digitise the data of various roads under the Road Construction Department and display that on I-GRAM. Road alignment and details of Expressways, NH, SH and MDR roads are available on I-GRAM, which can be obtained on a GIS Map with different layers viz. State, District, Habitations, Urban Local Bodies Location, Habitation Boundary, Railway, Airport, Industrial Area, etc.

Output and Performance-based Road Assets Maintenance Contract (OPRMC) : It is a Preventive Maintenance Policy, under which the responsibility of maintaining the Service Level and International Roughness Index (IRI) of roads is given to the contractor for a particular time. Under this policy, along with the road crust, other road furniture like shoulder drainage, vegetation and signage, etc. are also maintained. Under this system, a total of 9064 kms of roads were successfully maintained in the first phase (2013 to 2018) at the cost of Rs. 2579 crore. Further, more than 13,000 kms of roads are being maintained at a cost of Rs. 6655 crore in the second phase (2019 to 2026). The State government took a new step for real-time monitoring and reporting of road maintenance work in July, 2022 through its Control and Command Centre. At present, the maintenance work of a total of 1282 roads (9817 kms) is being monitored through this Centre at the Headquarter level and 11 Superintending Engineers, 44 Executive Engineers, 116 Assistant Engineers and 217 Junior Engineers are inspecting the task.

Contractor e-Registration : It was introduced in 2016 for the re-registration of contractors and provides them with a digital platform where they can easily apply for their registration and pay the required fee. They can also download their registration certificate from the portal after their application gets approved.

Online Management, Monitoring and Accounting System (OMMAS) : It is a web-based system for monitoring of schemes related to Pradhan Mantri Gram Sadak Yojana (PMGSY). This facilitates planning, scheduling, monitoring, tracking and execution of the scheme. OMMAS comprises master data, rural road plan, proposal, tendering, execution, quality monitoring, receipt and payments and maintenance module. A citizen can track the day-to-day progress of the scheme.

Anurakshan App : Bihar Rural Roads Maintenance Policy, 2018 has been implemented for an effective management of rural road assets. Using this mobile App, roads are inspected by field officers, duly capturing and geo-tagging photographs of five components, namely – Carriageway, Shoulder and Embankment, Cross Drainage including Culverts and Bridges, Road Signage, and Vegetation. Based on the captured field data, quarterly inspection and payment are generated using weightage percentage reduction for every component of the scoring matrix. Accordingly, quarterly allotment is generated online through the MIS web service. Apart from Anurakshan App, the Rural Works Department has also developed the Bihar Rural Road Routine Maintenance System

(BRRMS) App for rural roads and bridges under the five-year routine maintenance arrangement. This will assess the actual maintenance condition of rural roads.

Digital Governance in Power Sector : The e-governance and digital process re-engineering initiatives taken by BSPHCL has successfully laid the foundation for the forthcoming Al revolution. DISCOMs are registering profit for the first time since their inception. AT&C losses are dropping below 19.94 percent for 2023-24 with a net profit of Rs. 1,410 crore, consequently reducing the tariff by 15 paise.

DISCOM Power Supply Operations & Revenue Management : Power procurement upholds more than 80 percent share of the total expenses incurred by the energy utilities in the state. To curtail difficulties in decision-making, the SAMADHAN portal was developed as a central integrator of national-level grid information systems and internal databases and has been designed as an easy-to-use dashboard to boost up the real-time decision-making. The impacts of these decisions are quantified in terms of money. Coupled with Energy Payment Prioritization Monitoring System (EPPMS), these innovative developments have been a major contributor to the DISCOM's profitability. SAMEEKSHA, SAMPURN, SCADA, SANGRAHAN and Raid & FIR Management System RFMS are the other platforms which have been crafted to keep a check on leakages and losses in distribution. They also help the field teams with participatory, accountable, transparent, and quantified MIS systems.

Digital initiatives in Transmission Company : In the past few years, several IT & data-driven platforms, initiatives and projects have been implemented for efficient and real-time control over the system. ASBM (Automated System Balancing Mechanism), CCCC (Centralized Control & Command Centre), SUGAM (e-office), an ERP system based on SAP, SAMAST (Proper scheduling to settlement of electricity transactions transparently), SAS (Substation Automation System), PMIS (Project Monitoring Information System) and Online Grid Inspection Reporting System together bundle up to form the basket of digital innovations by the BSPTCL. The Company has become the first State Transmission Utility/SLDC in India to establish a dedicated Cyber Security Operations Centre (C-SOC).

Electricity Consumer service standards improvement through IT interventions : Smart prepaid meters have provided consumers with data liberty to visualize, plan and control their daily consumption activities. Consumer is also empowered to pay as per use, get the SPM converted into a net meter upon rooftop solar installation without any hassle, gain financial incentives and many more benefits owing to this most advanced technology. SUVIDHA App, Outage management System (OMS), OMNI Channel Complaint Handling System (CHS) have been adopted as supplementary verticals to ensure ease of living. The newly developed SAMPARK portal is helping build trust among the citizens.

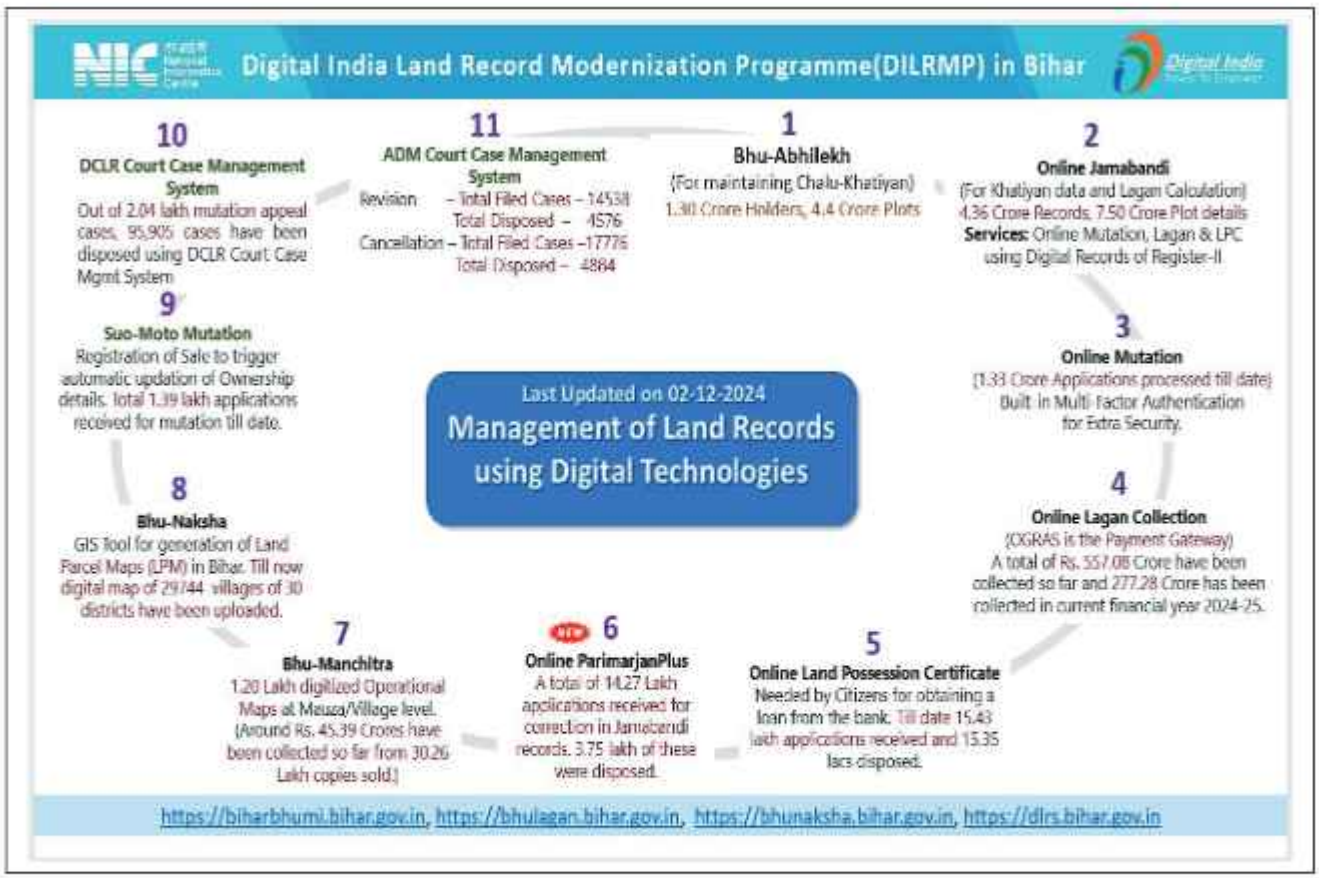
IT Innovations in internal & human resource management under BSPHCL & its subsidiaries : It is not just the technical processes that have undergone a transformation, but the

employee management is also experiencing a data-driven standardisation. SANGYAN - Court Case Management System, E-office, BUDDY Training Portal: Online APAR, KYP and Urjaswini e-magazine are some of such noticeable efforts of the State government.

Integrated Mining Management Information System (IMMIS) : It is a web-based platform for bringing efficiency and transparency to mineral administration in the state. There are many critical business processes involved in various levels of activities related with mineral production and consumption. In 2024, a total of 43.19 lakh e-Challans have been generated, 9.13 crore MT sand, and 1.08 crore MT stones have been dispatched. 82,112 mineral-carrying vehicles with GPS have been registered, 410 weighbridges integrated and 247 Ghats have been geo-fenced.

Land Settlement and Record Updation : In 2024, the department took lots of ICT initiatives to enhance the transparency in automated processes further and to intervene in the untouched sectors in Revenue where IT and ICT penetration can change the game, like Land Acquisition, Consolidation and also in the ongoing Bihar Special Land Survey. Major Projects/Applications operational in Bihar have been analyzed in terms of numerical parametric growths, as depicted in the Chart 7.7. This revenue growth has empowered the State government to adopt further innovative IT and ICT tools for the betterment of common citizens. Major improvements in the methodology of delivering the service have evolved to new versions of Parimarjan and Bihar Bhumi.

Chart 7.7 : Summary of Land Settlement and Land Record Modernisation Programme



Source: National Informatics Centre, Patna

Better land records eased the way for land acquisition, mutation, tax payment and finally gave shape to new development projects. The modern land records system of the state bolsters the Single Window System for investors. Another latest ICT intervention has significantly facilitated the Mutation of lands acquired by the government. This step has resulted in realizing big projects related to Railway Tracks, Airports, Highways, Office Complexes, etc in the state.

Agriculture and Allied Sectors

Agriculture Single Window : The primary goal of this project is to address inefficiencies and transparency issues in the previous system, creating a single transparent window for communication and information exchange. The system incorporates a four-layer verification process involving the Panchayat, Block, District, and Headquarters levels. This structure ensures thorough validation and reduces the average processing time from 90 to 15 days. Farmers can submit requests online or through 45,000+ VLE centres/cybercafés, reducing the need for physical visits and paperwork. Payments are directly credited to Aadhaar-linked bank accounts, reducing issues related to payment returns by 90 percent. Automated SMS alerts keep beneficiaries informed of their request status and updates throughout the process, improving transparency and communication. A comprehensive dashboard and MIS facilitate real-time monitoring and reporting of agricultural schemes, including procurement, seed testing, and weather updates. A digitized database of two crore registered farmers is maintained, allowing for better management and evaluation of agricultural schemes.

Here is a comprehensive list of major vendors and their products used in the development and implementation of the Single Integrated Platform for Direct Benefit Transfer (DBT) in Government Subsidy Schemes. The new system has led to a substantial increase in the assistance transferred, i.e. from Rs. 1,700 crore to Rs. 16,000 crore. The number of subsidy requests has surged from 6 lakh to 16 lakh, and the financial aid distributed has seen a ten-fold increase. This demonstrates the system's effectiveness in scaling up operations to meet the growing demands of farmers and improving their economic well-being.

BIHAN App : The platform has optimized crop target projections, monitored pest incidences, tracked pesticide consumption, and provided market price analyses. It has also assessed cold storage infrastructure needs and streamlined the allocation of seeds and fertilizers, ensuring sustainable practices and enhanced productivity. It has different modules: (i) Crop Target, (ii) Crop Coverage and Productivity, (iii) Cold Storage, (iv) Agriculture Seed Performance, (v) Horticulture Seed Performance, (vi) Seed Variety, (vii) Seed Requirements Analysis, (viii) Horticulture Produce (Honey and Mushroom), (ix) Agri Asset Structure, (x) Farm Machinery, (xi) Organic Farming, (xii) Agriculture Marketing Information System, (xiii) Pest Surveillance, (xiv) Pesticide Usage Data, (xv) Capacity Building, (xvi) Geo-fencing, (xvii) Agriculture Cluster, (xviii) Combine Harvester Pass, and (xix) Farmer Outreach Services.

DBT to Farmers : The Agriculture Department has been implementing several schemes to enable farmers to have better livelihoods and income levels. A sum of Rs. 2824.64 crore has been transferred via DBT to the farmers' bank accounts during 2019-20 to 2024-25. In addition, the farmers also got Rs. 12,562.60 crore under the PM Kisan Samman Nidhi Yojna during the same period. Apart from these benefits, Rs. 146.39 crore of diesel subsidy for irrigation during drought in the kharif season of 2022-23 and Rs. 55.05 crore of Krishi input subsidy in the same year have been transferred to their bank accounts. In 2023-24, Rs. 102.93 crore of diesel subsidy was transferred to 6.30 lakh beneficiaries. A sum of Rs. 120.83 crore of Krishi input subsidy to 1.87 lakh beneficiaries as well as Rs. 55.50 crore of diesel subsidy have been transferred to 20.93 lakh beneficiaries in 2024-25.

Food Grain Procurement System : It has been made fully online and automated, covering all aspects from farmer registration to procurement by Primary Agriculture Credit Societies (PACS), and subsequent equivalent MSP payments to farmers. In a noteworthy development, a biometric system for farmer verification has been introduced from the kharif season of 2023, culminating in a comprehensive automation of the procurement process which has significantly improved the process's efficiency and transparency.

Direct Benefit Transfer (DBT) under Bihar Rajya Fasal Sahayata Yojana (BRFSY) : The introduction of an online registration system under the Bihar Rajya Fasal Sahayata Yojana has simplified access for farmers, allowing them to avail benefits with ease. The integration of mobile field inspections and the Aadhaar-enabled Payment System (AEPS) have expedited the verification process, ensuring that eligible farmers receive financial assistance without delays.

Mukhyamantri Harit Krishi Sanyantra Yojana : A mobile application has been developed to support farmers in availing agricultural equipment under the Mukhyamantri Harit Krishi Sanyantra Yojana. This App enables the electronic hiring of equipment, providing a seamless and accessible platform for farmers to rent machinery from PACS. The initiative is a step forward in promoting agriculture mechanization, enhancing productivity, and reducing manual labour for farmers.

Cooperative Court Information System : It has been designed to automate and streamline the management of court cases related to cooperative societies. This system has drastically improved case processing efficiency, transparency, and accessibility. The digital management of cases facilitates better record-keeping, timely notifications, and easier access to case details for all stakeholders. In order to provide real-time information and grievance redressal services to farmers, a 24x7 Sugam Call Center has been established, ensuring prompt and efficient support.

Online Consent Management and Monitoring System (OCMMS) : It has been developed for submitting online applications for consent (Consent-to-Establish and Consent-to-Operate) and authorization/ registration under the related acts/ rules. The related consent/ authorization/ registration is granted through the aforesaid online system, OCMMS. The Board has initiated an auto-renewal system of CTOs, which facilitates the renewal process immediately after submitting

an application. The environmental monitoring reports are also uploaded on the Board's website. The ambient air quality is monitored through 35 Continuous Ambient Air Quality Monitoring System (CAAQMS) in the state and linked with CPCB/BSPCB servers. The related data are disseminated in public domain through CPCB/BSPCB servers as well as a mobile App called Sameer.

E-governance in Road Transport Sector : The Transport Department has adopted digital governance to overcome the problem of coordination in regional offices and headquarters. The major initiatives of the Department include – (i) M-Parivahan, (ii) Digi-Locker, (iii) Vahan, (iv) Sarathi, (v) OGRAS, (vi) Online Permit Services, (vii) Online License Services (Pollution Centre, Fitness Centre, Petrol Pumps & Motor Driving Training Institute), and (viii) E-Challan system.

Table 7.3 : Achievement of Transport Sector in Bihar through E-Governance

Key Services	Process Time Earlier	Process Time at present
Issuance of Driving License	30-60 Days	5-10 Days
Registration of vehicles	30-90 Days	1-3 Days
Issue of permits	1 month-1 year	1-30 Days
Collection of tax	1-7 Days	Online
Challan for Traffic Violations & Deposits	7-30 Days	Online
Delivery of RC/DL Card	7 days-3 Months	Through Speed Post

Source: Transport Department, GoB

Online Platform for Cultural Programmes in Bihar : An innovative online platform has been launched by the Department of Art, Culture, and Youth, Bihar, to organize cultural programs, workshops, seminars, and events. It is designed to connect multiple stakeholders and artists, this platform serves as a unified hub for the state's three premier cultural academies namely : Bhartiya Nritya Kala Mandir, Bihar Lalit Kala Academy, and Bihar Sangeet Natak Academy for fostering greater accessibility, collaboration, and cultural enrichment across Bihar.

7.4 Enabling Fiscal Governance

Economic development is highly dependent on efficient financial management. The Comprehensive Financial Management System (CFMS) needs a sound public finance management and technological innovations play a significant role in achieving the same. Keeping this in mind, the State government works with a robust Public Finance Management System (PFMS), right from the stage of budget planning to that of execution.

Comprehensive Financial Management System (CFMS): CFMS has been rolled out to strengthen public finance management of the state, digitalize such operations, encourage electronic transactions, and thus ensure that there is just a single source of truth. The system makes a

provision for effective financial control, monitoring and reliability in reporting and recalibration of regulatory and institutional framework. Rationalization of DDO offices has been done and their number has been brought down from 12,000 to 8,000. Now, a visit to the treasury is not required for submission of bills, vouchers, and payments. Digital signature is legally valid for transactions. Also, the Auditor General interface has been enabled to render treasury accounts online with the provision for real-time audit. Letter of Credit (LoC) System and Cheque system have been replaced with a regular budget allotment system. This has resulted in integrated work accounts at the Divisional Office, online expenditure management and accounting by the treasury, direct debit from the account in RBI that reduces reconciliation issues, online submission of life certificates by pensioners through Jeevan Pramaan integration, and contributions to the NPS being uploaded in NSDL on a daily basis to avoid any delays. Integration with RBI's e-Kuber has reduced the processing time for payments by direct transfer to the bank account of the beneficiary/payee, thus eliminating the need for frequent treasury visits. The claim processing time has been reduced from 30-45 days to just 3 days.

All government accounts are progressively being brought under the Treasury's control, resulting in minimal idle cash, including the deposit of idle cash, to the tune of Rs. 6000 crore. Online budget preparation and authorization of budget estimates have effectively reduced the budget preparation time from 3-4 months to nearly 1 month. Also, it facilitates timely Budget Allotment as the budget is available for allotment/sub- allotment on the very first day of a Financial Year. Online reporting eliminates the need for maintenance of multiple physical registers i.e. allotment register, expenditure register, payment register, etc. It also helps in identification of ghost employees/pensioners due to the controls and checks introduced in the application. Audit Trail of every action, including data created/modified/deleted, records or details of modification, note sheets or remarks entered/modified, documents uploaded or removed, is maintained in the application. Finally, it facilitates the online auto surrender of budgets at the end of a financial year.

The Finance Department is also gradually progressing to achieve a fully automated, workflow-driven, and all-inclusive PFMS, and, therefore, the Department has already initiated actions for stabilization and sustenance of the rolled-out CFMS application by CFMS 2.0, which shall broadly cover the following additional functions: (1) Pensioners' Digitization, (ii) Cash (Ways & Means) & Debt Management, (iii) Revenue Management, (iv) Audit Management System, (v) Asset Management System, (vi) Grievance Management, (vii) Business Intelligence/OLAP Tools, and (viii) PFMS (SNA SPARSH) integration.

Further, the integration activities between CFMS 2.0, RBI and PFMS is also initiated and targeted according to be completed by February, 2025. Authorization from the Accountant General has been obtained for opening the SLS accounts with RBI. For payment processing, the cyber treasury has been implemented in CFMS. The development related to the Implementing Agency, etc., is in progress and is targeted to be completed by March 2025. Additionally, to improve the functional

capability and enhance the management and reporting efficiency of the CFMS application, the Finance Department has planned to include several other interfaces: HRMS, e-Labharthi, NPCI, E-KYC, etc. with the CFMS application and aid in attaining a 360-degree coverage of expenditure management in the state.

Value Added Tax Management Information System (VATMIS) : The VATMIS is a web-based application software, which provides an integrated computerized solution to the Commercial Taxes Department for administration of various taxes, like Value Added Tax, Central Sales Tax, Luxury Tax, Electricity Duty, Advertisement Tax, Entertainment Tax and Professional Tax.

GST Single Sign-On : GSTSSO is an integrated platform designed to streamline the access and management of various GST-related applications. Key platforms hosted on GSTSSO include GST Prime, Comprehensive e-Waybill Analytics, e-Waybill MIS, and e-Invoice Analytics, each of which plays a crucial role in the tax administration system.

GAIN Portal (GST Analytics and Intelligence Network) : Earlier known as BIFA Portal, it has been developed by BIFA Unit-GSTN for the use of DGGI, CGST and SGST officials. It envisages detection of tax evasion by its ability to display complex networks of suppliers and do an analysis of connected transactions. The focus areas of this tool are primarily Gap Analysis, Network Analysis, Anomaly Detection, Identification of Inconsistent Behaviour, Revenue Analysis and Predictive Modelling.

e-Stamping : This provides e-stamping facility to the citizens through a secure electronic way to generate e-Stamp certificates. The Stamp certificate so generated will have unique identification number and security features that will eliminate the counterfeits. As a part of Citizen Services and to have a digital strategy to ensure a fast and hassle-free payment process, the departmental in-house 'e-Stamping' is required in the new e-Registration Solution which, in turn, makes handling this mandatory procedure convenient, every time a party executes a deed/contract.

e-Registration

The e-Registration facility for land transactions has been gradually rolled out to the public from July 29, 2024, which is now available in all 137 offices in the State. This initiative allows the public to apply for land registration from their homes and can automatically calculate the value of their land. Through this new software, users will receive real-time updates on their application status, land category information, and applicable fees thereof. The system also incorporates e-KYC (Aadhaar Authentication) for the concerned parties and is integrated with the Land Revenue and Reforms Department's platform. For individuals in land transactions, the registration process requires only one visit to the office for getting their photographs, fingerprints, and signing the agreement.

Property Tax System : It is a mobile and web-based application that provides a digital interface to make property assessments, pay property tax, generate payment receipts and monitor tax collection in Patna Municipal Corporation. It can be used by the citizens, Urban Local Body (ULB) counter and field employees, and ULB Administrators to accomplish their specific tasks. Its features include: (i) Registration, Login and Creation of User Profile, (ii) Filling an Assessment for a Property, (iii) Searching for a Property, (iv) Modifications to a Property, (v) Generate Demand Notice, (vi) Payment collection and Receipts, (vii) Dashboards and Reports, and (viii) General Features. It facilitates online payment.

7.5 Ease of Public Service Delivery Mechanism

e-Shikshakosh : The education value chain in Bihar runs on several independent systems in bulk data through various information systems like Shaala Siddhi, BEST, UDISE+, Online Medha soft Platform for DBT, etc. The State government has an integrated digital platform called e-Shikshakosh to ensure the robust governance of schools and effective service delivery. It serves as a single centralized dynamic platform for monitoring all key parameters to ensure the effective delivery of quality education to all the schools in the state. It also serves as a two-way communication platform to address issues and grievances of schools, and education officials at multiple levels.

It has different modules : (i) Master Module (to manage the data of State, District, Block, Village & Panchayats), (ii) School Management Module (managing the details of teachers and students), (iii) Teacher Management Module (for managing various sub-modules such as the Teacher Registration and Approval, Update Service Status, Teacher Deputation, Promotion and Transfer, Industrial Training, Leave, Training, and MIS Report in the application), (iv) Grievance Management Module (help Teachers and Public register their grievances), (v) Student Management Module (maintains and manages all the Academic details, Achievements, and Progression of the Student), (vi) User Management Module, (vii) Mid-Day Meal Management Module (maintains and manages the details of items available in the daily menu), (viii) Committee Management Module (maintains all the details of the School Committees such as Member details, Meetings, Committee Reconstitution, and Bank Details), (ix) Grant and Fund Management Module, (x) Holiday Management Module, (xi) Notification Management Module, (xii) Online assessment and Question bank, (xiii) School Inventory Module, (xiv) Library Inventory Module, (xv) School Monitoring and (xvi) Selfie Based Teacher Attendance through Mobile App.

Reproductive and Child Health (RCH) Software : One of the prime focuses of the National Health Mission (NHM) is to reduce Infant Mortality Rate (IMR) and Maternal Mortality Ratio (MMR) and ensure quality services to pregnant women and children across the country. Capturing information in an integrated reporting system is important for any evidence-based decision-making. In light of the above, this portal was developed to capture information on all RCH-related services, including family planning, maternal health, child health and immunization. Application

facilitates timely delivery of all components of antenatal, postnatal and delivery services and tracking of children for complete immunization services. In addition, the ANMOL App is being used for real-time reporting on RCH Portal by 16,868 ANMs using tablets, out of which 79.29 percent ANMs are active users of the App. On a pro rata basis, 55.68 percent Pregnant Women and 57.22 percent Children were registered on the RCH Portal during 2024-25 (till October).

Mukhyamantri Digital Health Yojana (MDHY) : It is also known as BHAVYA (Bihar Health Application Visionary Yojna for All). BHAVYA is a one-stop digital platform that supports everyday functions at the government health facilities of Bihar and streamlines the OPD and IPD functionalities, right from a patient's registration till discharge. It even automates community health initiatives through standardized workflows across the state. The implemented platform includes more than 20 different modules such as patient registration, OPD & IPD management, doctor's scheduling and roster management, pharmacy, radiology, and lab information modules, all operational across the state. The platform is also integrated with the legacy or existing standalone applications used by the State government, creating a unified HIMS. Not only the operations but the performance of these facilities, medical professionals, the region's health profile, and the outcomes are monitored at the State/District Command-and-Control Centre (CCC).

IT System with Quality Monitoring System Software : It was initiated in 2017 for online monitoring of the programme and ensure that all aspects of the rural potable water supply and sanitation facilities and services programme in the state are systematically monitored and feedback used for correcting deficiencies. Additionally, a report provides a summary of new hand pump installations and repair and maintenance activities documented through the mobile application.

Social Security Pension MIS : SSPMIS is a web-based application envisaged to keep track of the entire social security beneficiary sanctioning process, which includes addition, deletion and integration through assigning a code to each beneficiary for its unique identification leading to effective utilization of funds. This application is being used for nearly one crore beneficiaries of different social security pension schemes of the Central and State governments.

E-labharthi Portal : The database of all pensioners is maintained on the E-labarthi portal and monthly DBT is done through PFMS from this portal. Pension payment is being made to 107.65 lakh pensioners.

E-Suvidha Portal : Through the E-suvidha portal payments are made under the Chief Minister Family Benefit Scheme, Kabir Antyeshti Anudan Yojana, Bihar Shatabdi Leper Welfare Scheme, Chief Minister Disables Marriage Grant Scheme and Inter-caste Mariage Grant Scheme. Data of National Family Benefit Scheme beneficiaries obtained from the District Social Security Cell is also accepted and sent to the NSAP-PPS for payment.

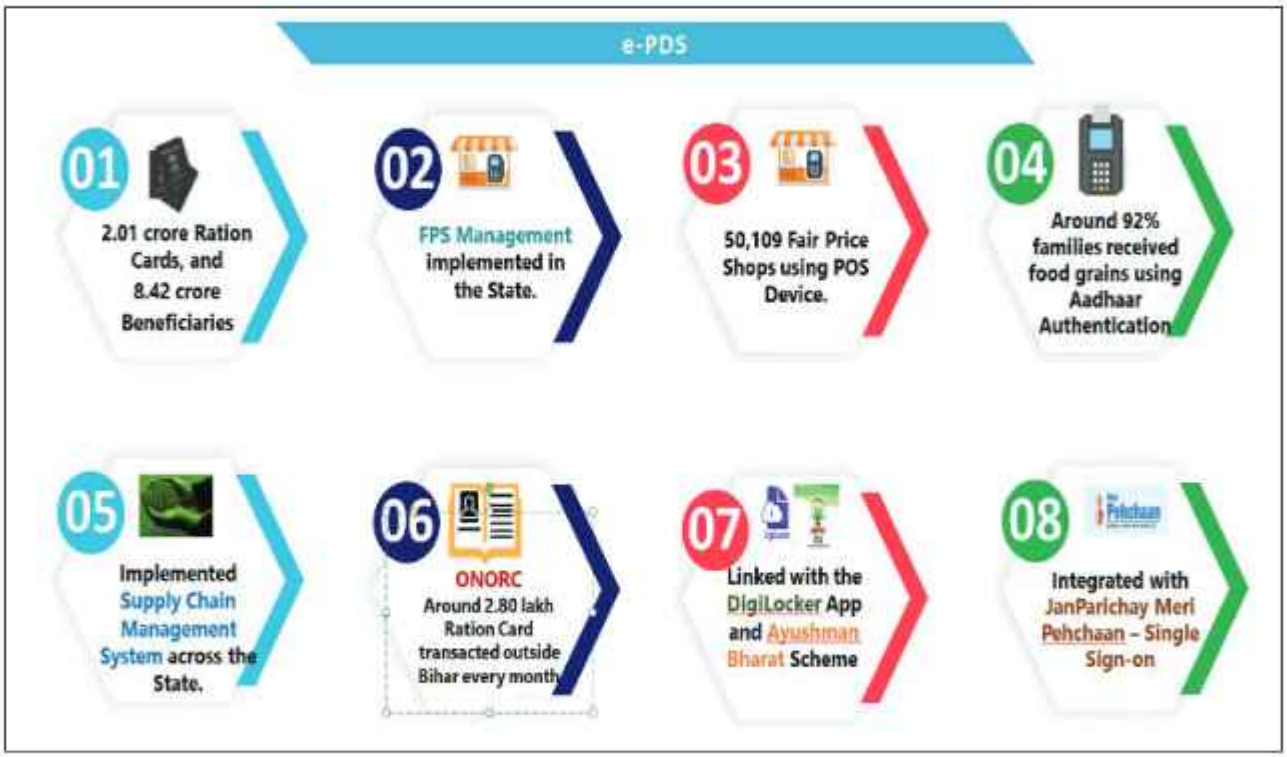
Poshan Tracker : Technology under Poshan Tracker is being leveraged for dynamic identification of stunting, wasting, under-weight prevalence among children and last-mile tracking of nutrition service delivery. The features include: (i) Real-Time recording and Monitoring, (ii) Services

Delivered (like Take Home Ration and Hot Cooked Meal, Vaccination for Infants and Pregnant Women), (iii) Growth Measurement (monitor nutritional indicators like Stunting, Wasting and Underweight prevalence), (iv) Pre-school Education (Early Childhood Care and Education), and (v) Home Visit Alerts.

Aangan App for Supervision & Monitoring of All AWCs by Lady Supervisors & CDPOs : This application is used during the inspection done by Lady Supervisors and CDPOs. The inspection report is instantly uploaded on the Aangan Dashboard on the NIC Server which provides Real-Time data on how many Anganwadi Centers are opening, how many are providing Supplementary Nutrition, how many children are present, etc. It is also used to record the attendance of Anganwadi Workers and Helpers, and upload the vouchers of purchases done for the Supplementary Nutrition Programme (SNP). Based on this attendance and uploaded vouchers, the Anganwadi Workers are paid their honorarium through DBT and the SNP fund is sent to the Bank account of the Anganwadi Vikas Samiti.

Food and Civil Supplies : The State government provides for a sound public distribution system (PDS) with the help of ICT solutions. The system includes various modules to improve the mechanism of PDS for the benefit of the citizens of the state. These modules are: Fair Price Shop Management System (FPSMS), Ration Card Management System (RCMS), Cashless Payment, Integration of Weighing Scale with e-POS device, Aadhaar-enabled PDS (AePDS), Grievance Redressal System, One Nation One Ration Card (ONORC), Supply Chain Management, GPS-enabled Vehicle Tracking system, etc. An overview of e-PDS is shown in Chart 7.8.

Chart 7.8 : Overview of e-PDS



Source : National Informatics Centre, Patna

Bihar Right to Public Services Act, 2011 : To ensure transparent, accountable and time-bound service delivery, the Government of Bihar in its Good Governance agenda of 2010 listed a legal right to citizens as its number one priority. Currently, the number of services offered stands at 153 from 14 departments. Out of 42.31 crore applications received till November, 2024, the system has ensured that 42.11 crore are disposed of.

Bihar Right to Public Grievance Redressal Act, 2015 : In most grievance redressal systems, the procedures involve functionaries of the same institution where the grievances arise, therefore the absence of an independent decision-making authority. Bihar is the first state in India and probably the first government in the world to consider public grievance redressal as a legal right. Every citizen has a right to time-bound (60 working days) grievance redressal. The Act covers the entire state (45 Departments). An independent administrative structure of Public Grievance Redressal Officers (PGROs) with quasi-judicial powers would take cognizance of the complaints. 16.75 lakh grievances have been registered since implementation of the Act and 16.32 lakh of them have been disposed of.

Bihar Government Servants Grievance Redressal System : It is a system in which service-related and retiral benefit complaints are heard by Service Grievance Redressal Officers designated in the district and departments in the presence of the complainant and the officer responsible for redressal and the decision is taken in a time limit of 60 working days. As of November 2024, 11920 complaints have been filed under this system, and 10983 have been successfully disposed of. The rest are under the process of hearing and disposal.

Waste Management : All waste collecting vehicles are GPS-enabled in Patna Municipal Corporation. GPS ensures that garbage collection vehicles follow the shortest and most efficient routes, saving time and fuel. It also ensures that drivers and workers complete their tasks without deviation or misuse of resources. Vehicles can quickly address sanitation complaints or emergency cleanups, minimizing health risks. It also ensures timely cleaning of critical areas such as hospitals, markets, and residential zones.

7.6 Emergency e-Services

Disaster Management Tracking and Alert : Bihar faces multiple hazards and shocks. In order to carry out rescue and relief activities through relief centres, community kitchens, health centres, cold wave shelters, etc., an Emergency Operation Centre (EOC) Multi-hazard portal has been developed to record daily activities. Geo-tagging and photographs of such actions are also recorded for proper monitoring using dashboards at the Department and District levels. Further, the Department has also developed Flood Preparedness Score Card that provides a holistic overview of the preparedness level of flood-prone districts and blocks. The stakeholders (policymakers,

planners, implementation authorities, researchers, academicians and CBOs) can build perspectives to manage extreme flood events and their adverse impacts on people, properties and livelihood.

To avoid the impact of lightning on lives, the Earth-network web application has been developed to capture block-wise lightning alerts before 30 to 45 minutes within a radius of 20 kms of the mapped latitude and longitude. It works with the real-time Google Location. Any lightning alert generated by the Earth-network is dispatched to concerned BDO and district administration/DEOC through email. The DMD also sends block-wise alert notifications to the concerned officers, like Panchayat Representatives, BDOs, COs, SHOs, and DEOCs with the help of the CDAC-ESMS Application. Apart from this App, Indravajra, an ICT solution, provides real-time lightning alerts to users, and has been developed by the Indian Meteorological Department (IMD). The App also provides information on the number of lightning strikes in the last 30 minutes and the last hour. Overall, Indravajra is a useful tool for people living in areas with high lightning activity, and provides timely alerts and safety guidelines. In addition, the SACHET App and Portal warn the public before an earthquake and suggest ways for mitigation or preparedness and capacity building to deal with disaster situations. It also suggests measures through the geo-targeted location-based system where people receive alerts of an impending disaster. Any disaster alert generated by Alert Generating Agencies are pushed to SDMA/SEOC Sachet Portal, where, after proper authentication and verification, they are disseminated among people of a specific location for which the alerts have been generated.

Disaster Relief and Infrastructure Reconstruction : The Disaster Relief and Rescue Team Tracker System has been developed for relief and rescue tracking. It also provides vital information about the team's movement and activities, such as when the team has left headquarters for the task, whether the operation is underway or completed, etc. Furthermore, Aapda Sampoorti Portal has been developed to provide assistance to the victims' families in case a disaster strikes. This portal is used for compensating disaster victims in the optimum time by maintaining a pre-verified list of inhabitants living in flood-prone and drought-prone areas. During the disaster, the community kitchen and shelter homes are provided to the destitute and disaster-affected families through 'Community Kitchen and Shelter Home Geo-Tagging'.

The Disaster Management Department (DMD) prepares quick damage reports of resources and infrastructure through EOC Reporting App. Using this App, government officials can report damages caused by hazards and relief activities performed by the respective district/block. The officials can immediately report damage to resources and properties from the incident site. They can also report the relief delivered to the affected people or households.

Decision Support System (DSS) : The Decision Support System (DSS) is a web and mobile platform for efficient disaster management. It enables real-time data sharing, resource allocation and coordination among responders and administrative units like SEOC and DEOC. DSS provides

GIS mapping to track real-time events and resources across regions and helps manage disaster responses. DSS allows responders to submit reports digitally, reducing paperwork. Overall, DSS improves response times and coordination for effective disaster management.

WRD Scheme Implementation and Monitoring System (WSIMS) : WRD Scheme Implementation and Monitoring System (WSIMS) is designed and developed for monitoring of physical and financial progress of the ongoing schemes of the Department. The activities involved in planning, approval, tendering, job award, work agreement, physical progress and financial progress of schemes have been taken care of by this software. Modules developed in WSIMS are Administrative Approval & Technical Sanction, BOQ Sanction, and contractor details, Tender Details, Work Agreement, Fund Allotment, Physical Progress Entry, Financial Progress Entry, Physical Progress Report and Financial Progress Report. Reports can be generated date wise and month wise for the ongoing schemes.

Physical Modelling Centre (PMC) at Birpur : With the help of the World Bank-assisted Bihar Kosi Basin Development Project (BKBDP), the government is setting up a Physical Modelling Centre (PMC) at Birpur (Supaul) as 'Centre of Excellence' (CoE) for Research and Development under the Water Resources Department. The major objectives of the PMC are: (i) to study hydraulic properties of rivers, (ii) to study hydraulic structure & its effect, (iii) to study morphological behaviour of rivers, river meandering & channel activation, (iv) to support in designing appropriate projects for flood protection & anti-erosion works, and (v) to study other complex behaviour of rivers. The various components of functioning of the PMC are Administrative Building, Workshop and Laboratory, Water Circulatory System, Kosi River Model, Kosi Barrage Model, Four Model Trays and Store Room.

Real-Time Data Acquisition System (RTDAS) : The goal of the real-time hydro-met system in Bihar is to manage flood control measures in the region in a better way, which can protect the local population and agricultural interest along the river systems. The system also aims to support irrigation schemes in Bihar. To get real-time data, RTDAS has been established to get the Hyrdo-met data through real-time communication system under the World Bank-funded Bihar Kosi Basin Development Project (BKBDP) and the World Bank-assisted Central Sector Scheme- National Hydrology Project (NHP).

Bihar Embankment Asset Management System (BEAMS) : BEAMS is a GIS-based web portal, under which a master module is developed by populating the embankment and its important assets (Bridge, Anti-flood Sluice Gates, etc). Hydro-meteorological data under the Gandak basin, which has the important data of all river basins in Bihar, will be populated in future and an integrated Embankment Asset Management System for all river basins in Bihar will be developed. The main objective of BEAMS is to help the Department with maintenance and monitoring of flood management and flood-fighting activities of the embankments and their assets. It consists of 13

functional modules: (i) Asset Information System, (ii) Engineering Information System, (iii) Hydro-Meteorological Information System, (iv) Basin Information System, (v) Store Material Information System, (vi) Analysis and Planning Tool, (vii) Document Management System, (viii) Community Participation System, (ix) Scheme Monitoring System, (x) Flood Risk Information System, (xi) Asset Monitoring System, (xii) Data Editing System, and (xiii) Admin Control System.

Mathematical Modelling Center (MMC) : Presently at MMC, flood forecasting is being done with a lead time of 72 hours and 120 hours (in developing phase) for five river basins, namely Gandak, Bagmati-Adhwara, Kosi, Mahananda and Ganga during monsoons (June to October). The MMC has also carried out various other studies, like the Study of Kamla Embankment Breach which occurred in 2019, study of spur design in Sikarhatta- Manjhari Low Bund, etc. on the basis of which project has been formulated and is under implementation by the Water Resources Department.

Flood Forecasting Models : Precise and reliable forecasting is important for flood warning, flood control planning, and rehabilitation. After the establishment of MMC, the flood forecasting is being done for major north Bihar rivers in terms of water level and discharge at various locations inside Bihar. These flood forecasting models use Rainfall data (observed as well as forecast), observed water level and discharge at various locations, cross-section of the river, evaporation data and other hydrological data as input. These operational flood forecasting models in Bihar continue to be developed, based on the availability of quality input.

River Behaviour Analysis : Characteristics of the rivers are largely determined by the geomorphological characteristics of boundary materials i.e. bank and bed materials, its terrain slope, topography, geology, physiography, tectonics and seismicity. An in-depth understanding of the morphology and behaviour of the river is thus a pre-requisite for a scientific and rational approach to address different problems of the river, and for proper planning and designing of water resources projects. For river behaviour analysis, time-series satellite images and historical maps are great sources to understand the planform changes of a river. The River Behaviour Analysis tool for conducting a morphological study of the Kosi river system was developed in 2017. This has been helpful in planning river training works and anti-erosion control schemes aimed at sustaining flood protection since then. Presently, a morphological study of the Gandak River is ongoing for development of the river behaviour analysis tool for this river.

Bihar e-system for Flood & Irrigation Quick Response App : BeFIQR is a web, tablet, and smartphone App developed on the initiative of the Mathematical Modelling Center (MMC). Introduced in 2023, the App provides jurisdiction-based information for flood and irrigation management. It generates real-time alerts using data from sources such as departmental RTDAS

(Real Time Data Acquisition System) and SCADA stations, and shares key information on water levels, forecasts from WRD and other critical sources. The App enhances data accessibility for officials, with a focus on visualizing information for more efficient decision-making. The overall objective is to analyze the probable causes of frequent flooding in an area, challenges associated with inundations and develop plan for flood management projects in that area. Field survey work has been completed and modelling is under progress.

7.7 Green Initiatives

The Department of Environment, Forest and Climate Change has adopted several e-Governance initiatives to enhance its efficiency, transparency and public engagement. These programmes leverage technology to streamline processes and support sustainable development.

Forest Management Information System (FMIS) : This system is a micro-level approach of managing the Forest Plantations, Nurseries, Welfare Schemes covered under Joint Forest Management, Forest Offences, Wildlife Activities, Accounting-Budgeting, Human Resource Management System and Eco-Tourism Development in the state through ICT use of integrated Web, GIS and Mobile technologies. The project implementation covers all 8 circles, 28 divisions and 110 range offices of the department. Several e-governance projects have been implemented by the Department.

Chart 7.9 : Features of Forest Management Information System

Source : Department of Forest, GoB

Bihar-VanMitra App : The Bihar-VanMitra App is a user-friendly digital platform that serves as a one-stop solution for individuals, farmers, NGOs, industries, PSUs and government officials to access forestry-related services. It streamlines processes like pit-digging, plant requests and plantation site management, promoting afforestation and environmental sustainability. The Bihar-VanMitra App is an innovative step toward sustainable development, making afforestation efforts more efficient and inclusive while contributing to Bihar's environmental goals.

VanApp Mobile App for Plantation and Nursery Monitoring : Since its introduction in 2019, the mobile App has been instrumental in enabling online integrated monitoring of plantation, nursery, and soil moisture conservation (SMC) activities. Developed to assist the supervisory officials, the App ensures real-time tracking and accountability for forestry and conservation projects.

Bird Ringing Monitoring System (BRMS) Mobile App : The Bird Ringing Monitoring System (BRMS) mobile App is a tool designed in 2023 to collect critical data on migratory birds, focusing on their survival, productivity, and movement patterns. It plays a vital role in tracking bird populations and informing conservation strategies. This App is a crucial step towards leveraging technology for sustainable wildlife management and fostering a deeper understanding of avian ecosystems.

Nursery Management Information System : The Nursery Management Information System (NMIS) is a digital platform designed in 2023 to manage and monitor various aspects of nurseries, including contact details, plant inventory, nursery area and other operational data. It ensures streamlined management, transparency and better planning for afforestation and green initiatives. The NMIS helps in maintaining a comprehensive database of nurseries and their assets, enabling efficient resource allocation and improved monitoring. It supports data-driven decision-making for effective management of plants and nursery operations. This system not only improves nursery management but also strengthens afforestation programmes by ensuring efficient use of resources and timely monitoring of plantation efforts.

Application for Issuing Non-Forest Land/Distance from Forest Area Certificates : This application was designed in 2022 to streamline the process of issuing Non-Forest Land Certificates and Distance from Forest Area Certificates. Developed under the 'Ease of Doing Business' initiative, it simplifies compliance with regulatory requirements for individuals and businesses, ensuring transparency and efficiency in land-use permissions and forest area reporting.

Web Portal for Wood-Based Industry Registration : In 2022, an application was developed to facilitate the registration of individuals and enterprises in the wood-based industries sector seeking subsidies under the Bihar Wood-Based Industries Promotion Policy, 2020. This initiative streamlines the registration process and promotes investment and modernization within the sector. This application is a step forward in fostering a sustainable business ecosystem, enhancing industry standards, and generating employment in Bihar's wood-based industries.

National Transit Pass System (NTPS) : In 2023, the state adopted the National Transit Pass System (NTPS) to facilitate the smooth and transparent transportation of timber and forest produce. By becoming the fifth state in the country to implement this system, the state has taken a significant step toward modernizing forest governance and reducing regulatory delays. The

adoption of NTPS marks a progressive shift toward digital governance, ensuring efficiency in forest resource management while supporting sustainable development.

e-Parivesh Portal : e-Parivesh (Pro-Active and Responsive facilitation by Interactive and Virtuous Environmental Single-window Hub) portal is an initiative by the Ministry of Environment, Forest, and Climate Change (MoEF&CC) to streamline the environmental clearance processes. It serves as a single-window platform for submitting, processing, and monitoring applications related to environmental, forest, wildlife, and coastal regulation zone (CRZ) clearances.

e-Ticketing System for Ecotourism : The e-Ticketing System for ecotourism sites like Valmiki Tiger Reserve, Patna Zoo, Rajgir Zoo Safari, and Rajgir Nature Safari is a digital platform designed to facilitate online ticket bookings for visitors. It aims to enhance the visitor experience, improve operational efficiency, and support eco-friendly tourism practices.

Customer Relationship Management (CRM) in Forest Department : Customer Relationship Management (CRM) in the forest department started in 2021 and involves using structured processes and data analytics to manage and enhance interactions with the public. By analyzing large datasets, CRM helps the department improve engagement, address public concerns, and ensure efficient service delivery related to forest conservation, afforestation programmes, and environmental awareness.

CHAPTER - VIII

POWER SECTOR

Abstract

Energy plays a crucial role in driving the economic and social development. Bihar achieved 100 percent household electrification in 2018, and since then, the state has witnessed significant growth in both the consumer base and electricity demand. The consumer base has now crossed 2.12 crore, with peak power demand reaching a new record of 8005 Megawatt (MW) in 2024. In recent years, the per capita consumption of energy in the state has also increased significantly, from 134 Kwh in 2012-13 to 363 Kwh in 2023-24. Financially, Bihar has made substantial progress, with the aggregate technical and commercial (AT & C) losses declining from 45.41 percent in 2012-13 to 19.94 percent in 2023-24, surpassing targets fixed by the Ministry of Power under the Revamped Distribution Sector Scheme (RDSS). In the power generation segment, in line with the Central government's targets, the state is focusing on increasing the share of renewable energy. It is planned to develop around 1 Gigawatt (GW) of renewable power in the coming years. Also, there is continuous infrastructural development in the power transmission network. The number of grid substations increased from 45 in 2005 to 179 in 2024, while the length of transmission lines expanded from 5000 ckm in 2005 to 20393 ckm in 2024. Finally, the State government schemes like 'Mukhyamantri Krishi Vidyut Sambandh Yojana', etc. have been planned to manage the rural load of electricity.

8.1 Overview of Power Sector in Bihar

Energy is a fundamental component for driving economic progress. It plays a vital role in establishing the infrastructure that supports sustained growth. Electricity is among the most affordable, eco-friendly, readily available, and easily transportable energy sources on the planet, with minimal adverse environmental impacts. Consequently, ensuring a sufficient and dependable supply of electric power has remained a key focus for the government. Since the reorganisation of the previous Bihar State Electricity Board into five distinct companies in 2012 under Section 131 of the Electricity Act 2003, the energy sector in Bihar has seen significant improvements.

Furthermore, several State and Central governments' initiatives have successfully strengthened the power infrastructure, with new projects creating new networks and strengthening the existing network. The state has improved its control over the distribution network, by leveraging advanced IT tools and modernising its micro-level monitoring systems. As a result, urban areas in Bihar now receive a nearly 24-hour power supply, while rural areas get around 22 hours per day on an average.

In recent years, the per capita consumption of energy in the state has also increased significantly, increasing from 134 Kwh in 2012-13 to 363 Kwh in 2023-24. Financially, Bihar has made substantial progress, with the aggregate technical and commercial (AT & C) losses declining from 45.41percent in 2012-13 to 21.74 percent in 2023-24, surpassing targets fixed by the Ministry of Power under the Revamped Distribution Sector Scheme (RDSS).

In the power generation segment, in line with the Central government's targets, the state is focusing on increasing the share of renewable energy. Meanwhile, the transmission infrastructure is being developed to cater to the additional generation capacity, especially in renewable energy. It is planned to produce around 1 Gigawatt (GW) of renewable power in the coming years. The state is implementing the Jal-Jeevan-Hariyali Mission, wherein all government buildings will have grid-connected rooftop solar plants. Bihar has one of the highest population densities in the country, resulting in a scarcity of land in the state. Whatever land is available, it is either very fertile and entirely under cultivation or waterlogged. There is a small area bordering Jharkhand, where solar power generation is feasible. To tackle this issue, floating solar plants are being developed in the state. While the government is looking at all the aspects of the value chain, the consumer is at the centre of everything. There is a focus on enhancing consumer satisfaction with quality and round-the-clock power supply.

The state's commitment to providing sustainable power is evident from continuous infrastructural development in the power transmission network. The number of grid substations increased from 45 in 2005 to 170 in October 2024, while the length of transmission lines expanded from 5000 circuit kilometres (ckm) in 2005 to 20393 ckm in 2024. These developments have laid a strong foundation for providing reliable, quality and sustainable power to meet the growing demands of the population and industries.

Recently, for its outstanding performance, the North Bihar Power Distribution Company Limited (NBPDCL) received the prestigious Global CSR Award 2024 in the 'CSR Needs of the Community and Region of the Year' category, organised by Global Energy and Environment Foundation. Bihar State Power (Holding) Company Limited (BSPHCL) also received the SKOCH Gold Award in the Power and Energy category for pioneering the SAMAST project in the State Load Dispatch Centre (SLDC). Also, Bihar's State Load Dispatch Centre has gathered the 3rd LDC Excellence Award 2024 for excellence and outstanding contributions in ensuring the integrated operation of the power system in Bihar by adopting new technologies.

Bihar's State Load Dispatch Centre (SLDC) is amongst the first SLDCs to set up a Next-Gen Cyber Security Operation Centre. Recently, BSPHCL has launched several MIS portals to properly monitor the status of Power Purchase, Energy Accounting and Revenue Enhancement through SAMADHAN, SAMPURN and SAMEEKSHA portals. In this sequence of making consumers

aware of their rights and responsibilities, a Social Media Initiative "Voltage Bhaiya-Bijli Didi" has also been awarded.

Bihar Government has continuously carried out Krishi Roadmaps with a focus on development of electrical infrastructure for the agriculture sector through Mukhyamantri Krishi Vidyut Sambandh Yojana (MKVSY) and under two phases has provided 2.37 lakh agriculture connections to the farmers. With this, total number of agricultural (farming) consumers in the state has reached 5.42 lakhs. Power supply to the agriculture sector is also being made at a very subsidized rate which is now Rs. 0.55/kWh (92%). This has brought down the cost of agricultural products and is enhancing direct benefits for the farmers.

The transmission sector has aided the extensive growth and advancement of electrical infrastructure in the distribution sector by building numerous new grid sub-stations and transmission lines. So, the state has been able to substantially increase the number of electricity consumers, as well as, meet the highest peak demand of 8005 MW in 2024-25 (upto September). The increase in Supply Hours and availability of Quality Power has increased the per capita consumption of power.

Ensuring consumer satisfaction continues to be the top priority for the state. The use of IT in Revenue Management has allowed the department to serve a large consumer base effectively. The SUVIDHA App was created to offer online services to consumers. In a progressive move, the Government of Bihar opted to implement Smart Meters for all consumers on a prepaid basis. This initiative was a first for the country, and following positive outcomes, plans are underway to extend it to the rural areas as well.

8.2 Institutional Structure of Power Sector

The Bihar State Electricity Board (BSEB) was originally constituted in April 1958 under Section 5 of the Electricity (Supply) Act, 1948. It was mandated to manage generation, transmission, distribution, and other electricity-related activities in Bihar. Under the new Bihar State Electricity Reforms Transfer Scheme 2012, the BSEB was unbundled into five companies with effect from November 01, 2012 —

(i) Bihar State Power (Holding) Company Limited (BSPHCL),

(ii) Bihar State Power Generation Company Limited (BSPGCL),

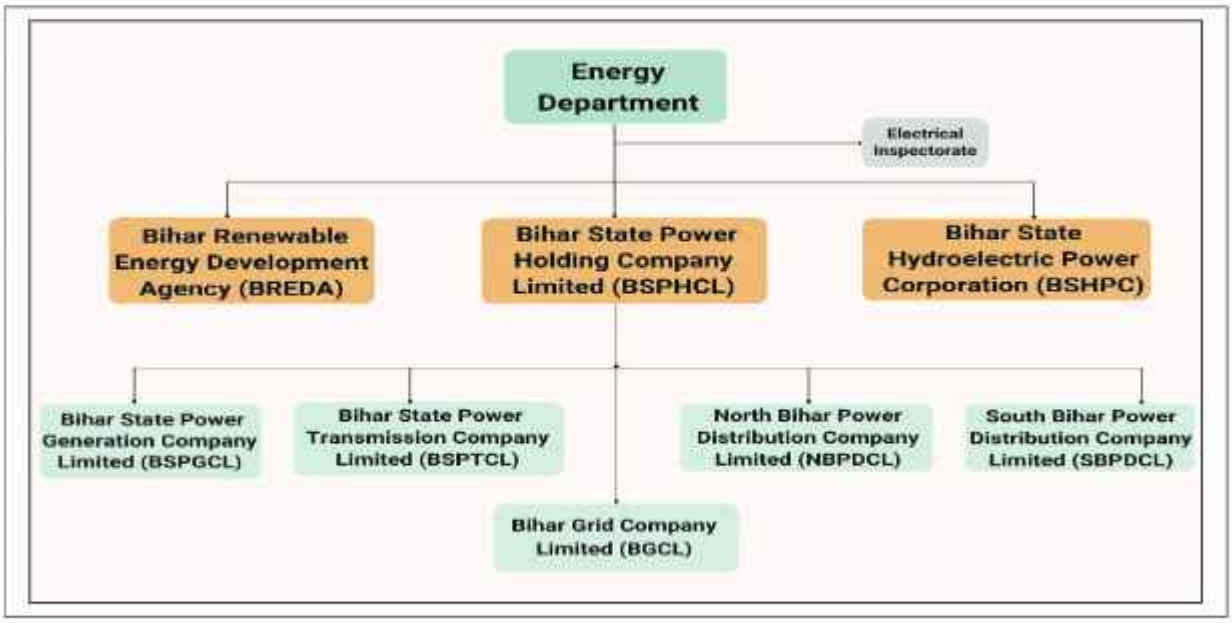
(iii) Bihar State Power Transmission Company Limited (BSPTCL),

(iv) North Bihar Power Distribution Company Limited (NBPDCL) and

(v) South Bihar Power Distribution Company Limited (SBPDCL).

The responsibilities of the newly formed companies are briefly described below:

Chart 8.1 : Institutional Structure of Power Sector



Bihar State Power (Holding) Company Limited (BSPHCL)

This company has been primarily an investment company. Now, it is vested with the assets, interest in property, rights and liabilities of the erstwhile Bihar State Electricity Board (BSEB). It co-ordinates the activities of other companies, handles disputes and provides all necessary support to them. It owns shares of the newly incorporated and reorganized four companies —

(i) Bihar State Power Generation Company Limited,

(ii) Bihar State Power Transmission Company Limited,

(iii) South Bihar Power Distribution Company Limited and

(iv) North Bihar Power Distribution Company Limited.

Bihar State Power Generation Company Limited (BSPGCL)

This company is responsible for the generation and supply of electricity and carrying on the business of purchasing, producing, trading or otherwise dealing in electric power and coordinating, aiding and advising on the activities of other companies and concerns including subsidiaries engaged in the generation, distribution or trading of power on all matters concerning the operation and maintenance of electricity generating station. BSPGCL is also responsible for acquiring, establishing, constructing, operating, managing, buying, selling, maintaining, renovating, modernising and using electric generating stations, projects associated lines and all things connected thereto for generation and distribution of power including power sub-stations.

Bihar State Power Transmission Company Limited (BSPTCL)

This company is responsible for the transmission of electricity and is vested with the transmission assets, interest in the property, and rights and liabilities of the erstwhile BSEB. Besides planning

and coordination activities, this company is expected to develop an efficient system of intra-state transmission lines for electricity, connecting load centres to the generating stations.

North Bihar Power Distribution Company Limited (NBPDCL) and South Bihar Power Distribution Company Limited (SBPDCL)

These two companies undertake the activities of distribution of electricity to all consumers, trading of electricity, and implementation of rural electrification schemes — under Deen Dayal Upadhyay Gram Jyoti Yojana (erstwhile Rajiv Gandhi Grameen Vidyutikaran Yojana), Special Plan (Backward Region Grant Fund – BRGF), Integrated Power Devolvement Scheme, State Plan and schemes funded by Asian Development Bank (ADB), the last one being an Externally-aided Project (EAP). The introduction of open access in distribution as per the Electricity Act, 2003 and the directions of the Regulator is also the responsibility of these two companies. They also tender, finalise and execute the Power Purchase Agreements (PPA) and other agreements for sale or purchase of electricity.

The fund allocation under the State Plan for BSPHCL and its subsidiary companies, Bihar Renewable Energy Development Agency (BREDA) and Bihar State Hydroelectric Power Corporation (BSHPC) in 2023-24 was Rs. 1586.52 crore. Due to a new step taken by the State government, which relates to Har-Khet-Tak-Sinchai-Ka-Paani (Saat Nishchay-2), a sum of Rs. 300.00 crore is being allocated every year from 2021-22 for the scheme. The breakup of the allocated fund among various heads has been given in Table 8.1.

Table 8.1 : Allocation of Funds under BSPHCL (2016-17 to 2023-24)

(Rs. crore)

Categories	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24
BRGF	1329.4	2600.0	2013.8	1391.3	—	—	489.9	—
State Plan								
BSPHCL	127.5	1576.1	1399.1	1989.0	371.4	240.0	386.6	200

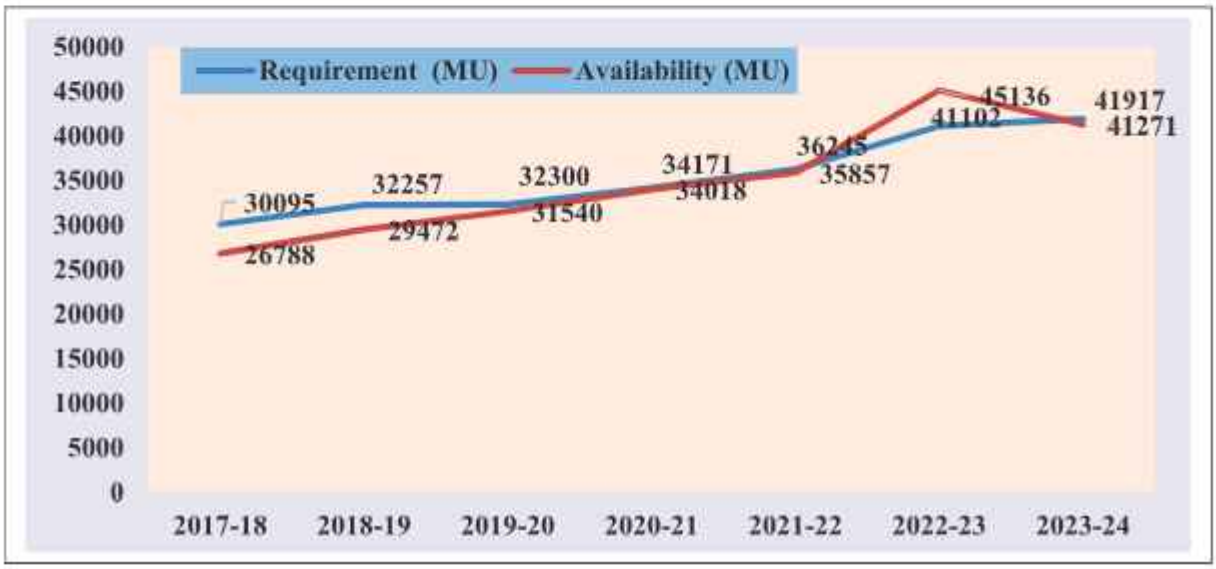
8.3 Demand and Supply of Power

The power sector plays a leading role in the economic growth of any region. Demand of power in Bihar has increased substantially in the last decade. In order to meet the power demand, the State government has ensured almost cent-percent power supply and thus the energy deficit has been continuously declining. In fact, the state recorded an energy surplus of 4034 MU in 2022-23. The peak demand increased by almost 1.4 times during 2017-18 to 2023-24, while power supply also increased by 1.5 times during the same period. Chart 8.2 presents an overview of power demand and supply, while Chart 8.3 shows the trend of power deficit or surplus in the state.

Chart 8.2 : Trend of Energy demand and supply (in MU)



Source : Department of Energy, GoB

Chart 8.3 : Deficit/Surplus Scenario of Power Sector in Bihar (in MU)

Source : Department of Energy, GoB

The Per Capita Consumption of energy in the state has almost tripled from 134 kwh in 2012 to 363 kwh in 2024. It has registered an increase of 229 kwh in the last 12 years. The year-wise trend has

been given in Chart 8.4. The average power availability in Bihar during 2021-22 in urban areas was 23.1 hours and 20.1 hours in rural areas. Presently, 23-24 hours of power is being supplied in urban areas and 21-22 hours in rural areas. The district-wise energy consumption is presented in Appendix Table A 8.1.

Chart 8.4 : Growth in Per Capita Electricity Consumption (in kwh)

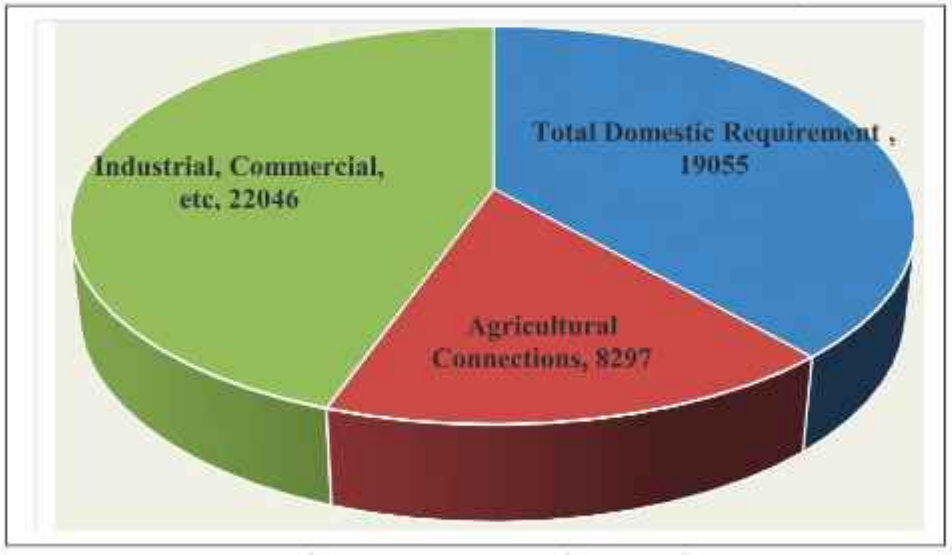
Source : Department of Energy, GoB

Future Demand of Power

The estimated demand for power for the domestic consumers is substantial and it is projected to constitute 41 percent of the total power consumption. In addition, agriculture connection is estimated to consume 13 percent of energy consumption, while the rest of the 46 percent will be provided to the non-domestic consumers (such as industrial, commercial, etc). Chart 8.5 presents the projected energy requirements among all categories of consumers in the state for 2025-26.

Chart 8.5 : Energy Requirement by Type of Consumers (2025-26)

(Figures in MU)



Source : Department of Energy, GoB

Power Demand at State Periphery

The estimated annual demand for 2024-25 and 2025-26 has been presented in Table 8.2 which shows the projected energy requirement at the state periphery, taking into account the distribution and transmission losses in the intra-state trajectory. The projected power requirement in the state is 49,438 MU for 2024-25, which is estimated to increase to 53,920 MU in 2025-26, implying a growth of 9.1 percent.

Table 8.2 : Annual Energy and Peak Demand Requirement at State Periphery

Indicators	Energy requirement		Peak demand		Distribution losses (percent)	Intra-state transmission losses (percent)
	As per demand projections (MU)	At State periphery (MU)	At 0.734 Load Factor (MW)	At 0.734 Load Factor (MW) (Incl. Agri. Load of up to 50 percent only)		
2024-25	49438	48539	8908	8670	16.17	3.0
2025-26	53920	52428	9743	9483	15.00	3.0

Source: Department of Energy, GoB

Sources of Power Generation

A total of 12058 MW power generation has been planned for 2024-25 through different energy sources. To meet the increased demand for power, the State government planned an for additional capacity of 1112 MW from different sources during 2025-26 (Table 8.3). These sources are - State Generating Stations (SGS), Central Generating Stations (CGS), Renewable Energy Sources (RNES) and long/medium-term Power Purchase Agreements (PPA) through competitive bidding. The additional power capacity will be either from new projects, or from those under construction, or from old projects, which are in the process of renovation. The estimated availability of power by source is shown in Chart 8.6 for 2024-25 and 2025-26.

Table 8.3 : Source-wise Proposed Capacity Expansion (Figures in MW)

Sources	SGS Small Hydro	SGS NCE/ RNES (Solar etc.)	Share in Central Generating Station (CGS)					Total
			Thermal	Hydro	IPPs Projects (Case 1)	NCE/RNES (Solar)	NCE/RNES (Wind)	
2024-25	54	236	7475	771	488	2130	699	11833
2025-26	54	236	8459	771	488	2730	699	13437

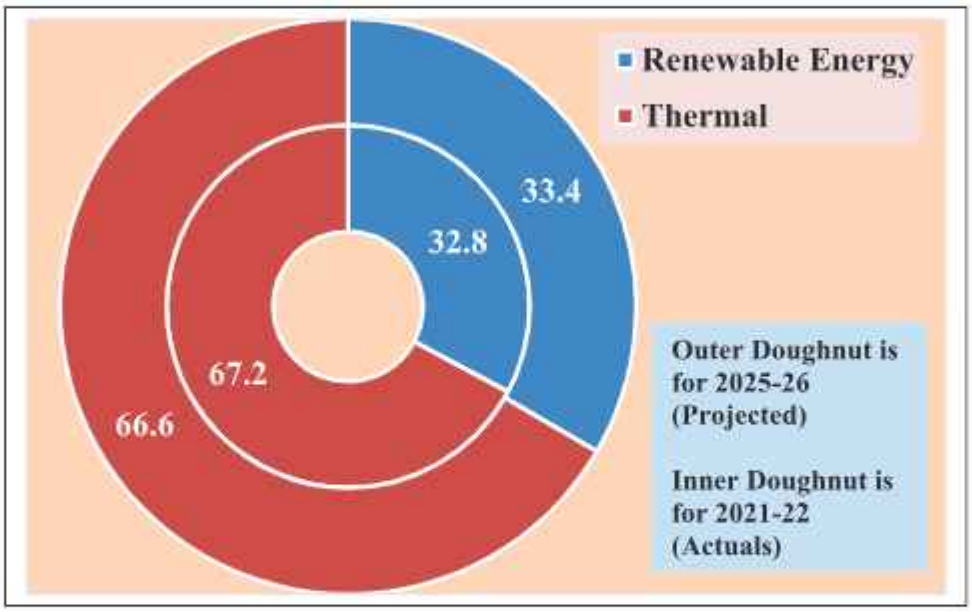
Chart 8.6 : Composition of Energy by Source (in Percent)



Source : Department of Energy, GoB

Future Power Availability

It is important to see the power demand and supply in the upcoming years from policy perspective. As shown in Table 8.4, the projected peak availability of power is estimated to be in a deficit of 7.1 percent than the projected peak demand as per the state generation plan during 2024-25 and 15.1 percent in 2025-26. However, there is surplus energy availability of 14.3 percent in 2024-25 and 6.3 percent during 2025-26 as per the estimated energy requirement at the state periphery. The deficit in peak demand availability will be bridged by additional power purchase from the Energy Exchange.

Table 8.4 : Projected Surplus/ Deficit in Power

Power Supply Position	2024-25	2025-26
Estimated Peak Requirement with 50 percent agriculture load only (MW)	8670	9483
Estimated Peak Availability as per State Generation Plan (MW)	7157	7463
Peak demand Surplus (+) / Deficit (-) (MW)	(-) 1513	(-) 2020
Peak demand Surplus / Deficit (Percentage)	(-) 17.5	(-) 21.3
Estimated Energy Requirement at State Periphery (MU)	55690	59912
Estimated Energy Availability at State Periphery as per State Generation Plan (MU)	63677	63677
Energy Surplus (+) / Deficit (-) (MU)	(+) 7987	(+) 3765
Energy Surplus (+) / Deficit (-) (Percentage)	(+)14.3	(+) 6.3

Note : 50 percent agriculture load will be supplied in rotation
Source : Department of Energy, GoB

8.4 Generation

The major sources of energy are classified into two categories, conventional which is available in limited quantity and cannot be renewed and non-conventional which is renewable energy. The details of the two are:

A. Conventional (Thermal Power)

The three power generation units of the State government — Barauni Thermal Power Station (BTPS), Kanti Bijli Utpadan Nigam Limited (KBUNL) and Nabinagar Power Generating Company Ltd. (NPGCL) have been transferred to NTPC to reduce the cost of power generation by utilizing the expertise of NTPC. Further, the construction work at two more power generation units viz. Nabinagar Thermal Power Project (Stage II) and Buxar Thermal Power Project are in progress.

Barauni Thermal Power Station (BTPS): The BTPS has 9 separate units. Five of them have already run through their working life and are not in service anymore. Presently, Unit No. 7 (110 MW) has been generating power since 2016. Unit No. 8 (250 MW) has been working since March 2020. Unit No. 9 (250 MW) has been operational since November 2021 and Unit No. 6 (110 MW) has been functioning since June 2022, after Renovation and Modernisation. Units 7 and 8 have been decommissioned on March 31, 2024.

Kanti Bijlee Utpadan Nigam Limited (KBUNL): The KBUNL was earlier a joint venture between NTPC and BSPGCL with an equity partnership in ratio of 65:35. The two old units of 110 MW each have run out of their working life and are no more in use now and their PPA with Bihar has been terminated on September 7, 2021. The construction work of two additional units (Unit Nos. 3 and 4) of 195 MW each was completed and the same have started producing electricity.

Nabinagar Plant (Stage 1): The Nabinagar Power Generating Company Ltd. (NPGCL) was initially a joint venture of NTPC and BSPGCL, having an equity share ratio of 50:50. Later, the State government has handed over its share to NTPC and now it is fully owned by NTPC. The Commercial Operation Date (COD) of Unit No. 1 and 2 of 660 MW each was declared in September, 2019 and July, 2021, respectively. Thereafter, Unit No. 3 (660 MW) has come under commercial operation since June, 2022. Further, under Stage II, 3 units of 800 MW each (total 2400 MW) is planned to be installed at Nabinagar. Bihar is expected to get 1500 MW of power from the new plant.

The availability of power in the state has shown a steady increase over the years. The total tied up capacity of powerbase in March, 2023 was 9234 MW and has reached 9543 MW in March, 2024, with an increase of 3.35 percent. The details of the existing generation capacity in Bihar are given in Table 8.5.

Table 8.5 : Existing Tied-up Capacity (2023 and 2024)

Ownership	March, 2023 (Figures in MW)				March, 2024 (Figures in MW)			
	Thermal (Coal)	Hydro (Renewable)	RES (MNRE)	Grand Total	Thermal (Coal)	Hydro (Renewable)	RES (MNRE)	Grand Total
State	0	54	242	296	0	54	202	256
Private/IPPs	488	0	0	488	488	0	0	488
Central	6220	771	1459	8450	6426	771	1602	8799
Total	**6708**	**825**	**1701**	**9234**	**6914**	**825**	**1804**	**9543**

Note: RES = Renewable Energy , MNRE = Ministry of New and Renewable Energy
Source: Department of Energy, GoB

The Generating Units of the Central Sector supplying power to Bihar are located either in Bihar or in the adjoining states. The details of these existing and planned Generating Units are given in Appendix Table A 8.2.

The following are upcoming thermal power projects in Bihar to meet the present and future demand for electricity:

Power Project in Buxar: M/s Satluj Jal Vidyut Nigam Ltd. (SJVNL) is the executing agency for the construction of a green field power project at Chausa (Buxar), having 2 units of 660 MW each. Its foundation stone was laid in March, 2019. The work is under progress and Unit 1 is expected to be commissioned in 2024-25. Unit 2 is scheduled to be commissioned by 2025-26. As per the Power Purchase Agreement (PPA), DISCOMs of Bihar will get 85 percent of the generated power from this project.

Ultra-Mega Power Project (Banka): A proposal has been prepared to set up an Ultra Mega Power Project in Banka, with a capacity of around 4000 MW, for which 2500 acres of land has already been earmarked. The Central Water Commission has approved the allocation of 120 Cusecs of water (1 Cusec = flow of 28.317 litres of water per second) from the Ganga river. The Power Finance Corporation (PFC) has incorporated two Special Purpose Vehicles (SPV) to carry out the pre-award project activities. The Union Ministry of Power has allocated Pirpainti and Barahat Coal Blocks for the project. Bihar will get 2000 MW of power from this project.

B. Non-Conventional (Renewable Energy)

In order to address the issues of climate change and global warming, renewable energy stands out as a feasible solution for preserving the environment for future generations. However, Bihar faces limitations in the availability of natural resources for generating renewable energy. Due to its geographical position in the plains, the potential for hydroelectric power production is quite low. Likewise, ideal locations for setting up wind turbines to generate electricity are typically found offshore, in coastal regions, on rounded hilltops, or in open valleys with strong and consistent wind currents. As a result, the state also cannot take full advantage of wind energy for power generation.

Among the various renewable energy sources, Bihar has significant potential primarily in solar energy, benefiting from abundant and consistent sunshine throughout the year. However, there are two major obstacles – first, due to its fertile land, most agricultural fields are occupied with growing crops throughout the year, and second, the high population density means that urban areas also have limited open spaces. Only a small percentage of land is suitable for solar energy generation.

The strategy of the Jal-Jeevan-Hariyali Mission, launched in 2019, is to generate an additional 150-200 MW of solar power, with 50 MW already operational. The state has grand plans to establish around 1 GW of renewable energy in the near future.

Solar Plants by Bihar Renewable Energy Development Agency (BREDA)

To encourage the adoption of renewable energy, the State government has established an organization known as the Bihar Renewable Energy Development Agency (BREDA). Currently, it is implementing the installation of Grid-Connected Rooftop Solar Power Plants, Floating Solar Power Plants, Ground-Mounted Solar Power Plants, Off-Grid Hybrid Rooftop Solar Power Plants, and Solar Street Lights through various initiatives aimed at promoting and spreading renewable energy technology throughout Bihar, while increasing the proportion of renewable energy in the energy mix and leading to a decrease in carbon emissions. This initiative will aid in global efforts to lower greenhouse gas emissions and promote a cleaner environment. Below are the activities being carried out by BREDA:

(i) **Grid-Connected Rooftop (GCRT) Solar Power Plant at Government Buildings under Jal-Jeevan-Hariyali Mission Phase-I**: Under the 'Mukhyamantri Navin Evam Navikarniya Saur Adhisthapan Yojana' and 'Jal-Jeevan-Hariyali Mission', Grid-Connected Rooftop Solar Power Plants are being installed by BREDA. These power plants have a capacity of 500 KWp. These plants will save electricity bill of the various State government offices and promote the use of renewable energy in the state. The State government buildings covered by the scheme are — Nek Samvad Bhawan, CM House, Patna High Court, Bihar Museum, Buddha Smriti Park, Planetarium, IGIMS, various ITIs, BDO offices, Primary Health Centers, Panchayat Sarkar Bhawan, Government High Schools, etc. Between 2018-19 and 2024-25, a total of 2589 Solar Power Plants have been installed, having a total capacity of 22 MW at a cost of Rs. 100 crore.

(ii) **Grid-Connected Rooftop Solar Power Plants at Private Residential Buildings**: Under the 'Mukhyamantri Navin Evam Navikarniya Saur Adhisthapan Yojana', Grid-Connected Rooftop Solar Power Plants have also been installed at private residential buildings by BREDA. A total of 113 Solar Power Plants were installed at private residential buildings, which together have 583 KWp capacity, at the cost of Rs. 3.08 crore.

(iii) **Floating Solar Power Plant**: Floating Solar Power Plant is an emerging technology in the field of Solar Energy. In this technology, the solar power plant is installed on the water bodies

and the land requirement is negligible. In addition, with the floating solar panels, the evaporation rate from water bodies is significantly reduced, thus also helping in water conservation. With the water body beneath, the solar modules can maintain their ambient temperature, thereby improving their efficiency. Keeping these considerations in mind and the scarcity of land in Bihar, the State government has taken an initiative for the installation of a Floating Solar Power Plant in the Supaul and Darbhanga districts under *Neeche Machhli Upar Bijlee* concept. The Floating Solar Power Plant with a capacity of 525 KWp has been installed under the state plan at Rajapokhar (Supaul) at the cost of Rs. 3.00 crore, which has been functional since August 2022 and the Floating Solar Power Plant of capacity 1600 KWp has been installed at Naka No. 1 (Darbhanga) at the cost of Rs. 8.55 crore. The plant has been functional since March 2022 and the generated power is purchased by BSPHCL at the rate of 4.15 paise/unit through a PPA effective for 25 years.

(iv) **Solar Water Pumps**: Solar Water Pump is an application of photovoltaic technology that uses solar power to run irrigation pump sets, replacing diesel-operated pumps. Under the 'Mukhyamantri Navin Evam Navikarniya Saur Pump Yojana', 2771 Solar Water Pumps have been installed at the cost of Rs. 77.16 crore.

(v) **50 MW Grid-Connected Ground-Mounted Solar Power Plant**: A Grid-Connected Ground-Mounted Solar Power Plant is an electricity-generating solar Photovoltaic (PV) plant that is connected to the utility grid. A grid-connected PV system consists of solar panels, central inverters and Inverter Duty Transformer (IDT) and other grid-connecting equipment. To fulfil the Renewable Purchase Obligation (RPO) of the State government and to contribute towards the ambitious target of the Central government of generating 500 GW of Renewable Power by 2030, the 50 MW Ground-Mounted Grid-Connected Solar Power Plant was installed and commissioned by M/s Avaada Clean Sustainable Energy in May, 2024. The generated power from the plant is purchased by BSPHCL at the rate of 3.11 paise/unit through a PPA effective for 25 years.

(vi) **Grid-Connected Rooftop Solar Power Plant at Government Buildings under Jal-Jeevan-Hariyali Mission Phase-II**: Under 'Jal-Jeevan-Hariyali Mission' Phase-II, Grid-Connected Rooftop Solar Power Plants are being installed by BREDA, with system capacity of 2 to 500 KWp on government buildings under different departments. A work order for the installation of 108.23 MW Rooftop Solar Power Plant at 13072 government buildings has been issued. The work started in 2022-23 and at present 69 MW Solar Power plants have been installed at 7232 buildings. The total project cost is Rs. 522 crores.

(vi) **Hybrid (Off-Grid) Rooftop Solar Power Plant at Government Buildings**: Installation of Hybrid (Off-Grid) Rooftop Solar Power Plants has been done by BREDA to provide battery backup during grid failure or in emergency at various State government offices, such as BSEIDC (Bihar State Educational Infrastructure Development Corporation) buildings in the Gaya, Kishanganj and Muzaffarpur districts. At present, the total installed capacity of such Solar Power Plants is 409 KWp. The cost for this project is Rs. 3.96 crore.

(vii) **Solar Street Lights:** Solar Street Lights are installed for outdoor illumination that is powered by PV panels. These panels are mounted on poles. The PV panels charge the rechargeable battery during the day. The battery provides power to the LED lamp during the night. The achievements under the scheme are:

(a) Under the 'Shyama Prasad Mukherji Rurban Mission', 1629 Solar Street Light Systems (SSLS) have been installed at various locations in four districts (Gaya, Rohtas, Kaimur and Saharsa). For this, the total expenditure is Rs. 1.66 crore.

(b) Under the 'Mukhyamantri Gramin Solar Street Light Yojana (MGSSLY)', the installation of Solar Street Lights is being done by the Panchayati Raj Department, with technical support from BREDA. In every ward, 10 Solar Street Lights are to be installed, totalling 11.73 lakh Solar Street Lights at identified existing electric poles. Presently, a total of 470,000 Solar Street Lights have been installed in Panchayats across the state.

(c) The Solar Street Lights have the in-built facility of Remote Monitoring System (RMS), through which the working status and different technical data from each light can be monitored remotely on the dashboard.

(d) A central monitoring system will be established at the headquarters of all the districts for all Solar Street Lights.

(e) Six Manufacturers of different components of Solar Street Lights (i.e. Luminary, PV Module and Lithium battery) have been empaneled to set up their manufacturing units in Bihar. Three manufacturing units of Luminary and Lithium batteries and one unit of Solar PV modules have been established.

Solar Plants by Bihar State Power Generation Company Ltd. (BSPGCL)

The State government has also nominated the Bihar State Power Generation Company Limited (BSPGCL) as the Nodal/ Implementing Agency for the installation of solar power projects at Kajra and Pirpainti and on land available alongside Canals and Dams in Bihar. BSPGCL has also been nominated as a Nodal/ Implementing Agency for:

(a) Installation of floating solar power plants above 1 MW in all types of water bodies;

(b) Installation of Ground-Mounted Solar Plants above 1 MW on unused/infertile land in Bihar; and,

(c) Installation of Biomass and Bagasse Power Plants above 1 MW in Bihar.

The progress of Renewable Power Projects taken up by BSPGCL is given below:

(i) **Solar Power Project at Kajra (Lakhisarai):** Kajra (Lakhisarai) was initially earmarked for the construction of a thermal power plant. An adequate land parcel has been successfully identified and acquired at the location. Subsequently, a decision was taken to construct a

solar power plant of 185 MW (AC) with a Battery Energy Storage System (BESS) of 254 MWh instead of the originally planned thermal power plant. This transition was aimed at generating eco-friendly green power. L&T has been awarded the construction contract for renewable energy through engineering, procurement and construction (EPC) for the establishment of a 185-MW (AC) Solar Power plant equipped with 254-MWh BESS. The plant is expected to be commissioned by December 2025. This solar power plant will have the capacity to store 20 percent of solar energy generated during the daytime within the high-capacity batteries. This stored energy will then be readily available for distribution after sunset, meeting the increased energy demand during evening hours.

(ii) **Solar Power Project at Water Bodies**: Bihar is a state with limited land resources, but has abundant solar potential. So, BSPGCL finds various ways to harness solar energy in water bodies, such as canals, dams and reservoirs. BSPGCL has identified Bikram Lakh at Patna for the installation of a 2-MW Solar Power Plant on land available alongside the (Chart Land) Canal as a pilot project. The Water Resource Department has provided the No Objection Certificate (NOC) for this project. BSPGCL has selected a RESCO or Renewable Energy developer for the execution and operation of the project for 25 years. For this project, PPA has been signed with M/s Naw Dharam Energy Private Limited. The entire project is expected to be completed by March 2025. Additionally, 20-MW at five different locations have been identified for developing solar generating parcels at Khatauna, Madhubani (10 MW on the Western Kosi main canal), Indrapuri, Rohtas (5 MW on the Western link canal), Right Kamla Balan Embankment (2 MW at Tardih, Darbhanga), Left Kamla Balan Embankment (2 MW at Madhupur, Madhubani) and Saran Main Canal (1 MW at Gopalganj).

BSPGCL has also identified Phulwaria Dam in the Nawada district as an ideal location for the installation of 10-MW floating solar power plant. This innovative project will serve a dual purpose of nurturing aquatic life below the water surface while harnessing solar energy above it, aligning with the mission for sustainable green energy (as per Jal-Jeevan-Hariyali mission's objective). The NOC has been obtained, from the Water Resources Department, Government of Bihar for further processing. PPA has been done, and the work is in progress. A similar plan is also in the pipeline for Durgawati Dam for a capacity of 10-MW solar project. The NOC is being obtained from the Water Resources Department.

(iii) **24×7 Hybrid Green Power**: To promote the objectives of the Jal-Jeevan-Hariyali Mission in the state, it was decided to select a few towns of the state and make them GREEN Towns in respect of power. In other words, the power supplied to the said towns will be wholly through renewable energy sources and on a round-the-clock basis. For this, Rajgir, Bodh Gaya and some parts of Patna towns were selected. An agreement has been executed with

the Solar Energy Corporation of India (SECI) for supply of 210 MW GREEN Power to these identified towns. As per the terms of the agreement, solar power will be supplied during the day time and for the period of sunset to the next sunrise, the power will be supplied from the Pump Storage Plant run on Solar Power.

(iv) **PM KUSUM Scheme, Component C (FLS-Feeder Level Solarization):** In the first phase, tender was invited for 800 MW distributed solar power plants for solarization of 1235 feeders and 1,36,812 pumps under which 3 agencies have been identified for solarization of 6 PSS (8 Feeder) having the total cumulative plant capacity of 17.68 MW. In the second phase, tender has been invited for 1600 MW.

Solar Plants by NBPDCL and SBPDCL

Residential Solar Rooftop Project

As per the guidelines issued by the Union Ministry of New and Renewable Energy (MNRE) under the Grid-Connected Rooftop System (GCRT) Phase-II scheme, the distribution companies are designated as the nodal agencies for implementing Residential Solar Rooftop projects in the state. The Ministry allocated 5 MW Rooftop Solar capacity for Bihar (3 MW for SBPDCL and 2 MW for NBPDCL) in 2019-20. Additional 20 MW capacity has been sanctioned for the installation of rooftop solar plants, which is under progress. Apart from the Central government subsidy, the State government has also allowed an additional 25 percent subsidy for all loads for installation of Solar Rooftop Plants that are grid-connected. Online applications were invited from interested consumers through the web portal for its installation. Till September 2023, solar panels have been installed on the premises of 1780 households with a capacity of 6630 KW and the works are still in progress. District-wise installation of Grid-Connected Rooftop Solar Plants is given in Appendix Table A 8.3. Additionally, solar rooftops have been installed and commissioned for more than 2252 consumers under SBPDCL (1640) & NBPDCL (612) under the PM Surya Ghar Muft Bijlee Yojana.

Hydel Power

Bihar faces challenges in harnessing its substantial hydel power potential due to the shifting paths of rivers and the flood-prone nature of North Bihar. The rivers in South Bihar do not provide sufficient flow throughout the year and lack the necessary height for the effective use of hydel power. As a result, the development of large hydroelectric power projects proves to be financially unfeasible because of the area's geographical features. Nonetheless, mini and small hydroelectric power plants are being developed at various suitable sites to tap into the hydel potential. The Bihar State Hydroelectric Power Corporation (BSHPC) has been created to manage the growth of hydroelectric power initiatives in the state. Currently, there are 13 operational mini and small hydel projects in Bihar, boasting a combined capacity of 54.3 MW (Table 8.6). BSHPC is also in the process of constructing 11 more mini hydel power projects, which together have a capacity of 9.3 MW (Table 8.7).

Table 8.6 : Total Installed Capacity of Mini and Small Hydel Projects

Hydroelectric Projects	Status	Capacity	
Kosi Hydel Power Station (KHPS), (Kataiya, Birpur)	This project was handed over to BSHPC in November 2003. The restoration work of all the units has already been completed and they have started power generation. It was commissioned during 1970-78.	(4x4.8 MW)	19.2
Eastern Gandak Canal HE (Hydroelectric) Project	The Eastern Gandak Canal HE Project in Valmikinagar, West Champaran was commissioned during 1996-97.	(3x5 MW)	15.0
Sone Western Link Canal HE Project	Sone Western Link Canal HE Project in Dehri-on-Sone (Rohtas) was commissioned during 1991-92.	(4x1.65 MW)	6.6
Sone Eastern Link Canal HE Project	Sone Eastern Link Canal HE Project in Barun (Aurangabad) was commissioned during 1996-97.	(2x1.65 MW)	3.3
Agnoor HE Project	Agnoor HE Project in Arwal district was commissioned during 2004-05.	(2x0.5 MW)	1.0
Dhelabagh HE Project	Dhelabagh HE Project in Rohtas district was commissioned during 2006-07.	(2x0.5 MW)	1.0
Triveni Link Canal HE Project	Triveni Link Canal HE Project in West Champaran district was commissioned during 2007-08.	(2x1.5 MW)	3.0
Nasriganj HE Project	Nasriganj HE Project in Rohtas district was commissioned during 2007-08.	(2x0.5 MW)	1.0
Sebari HE Project	Sebari HE Project in Rohtas district was commissioned during 2008-09.	(2x0.5 MW)	1.0
Jainagra HE Project	Jainagra HE Project in Rohtas district was commissioned during 2007-08.	(2x0.5 MW)	1.0
Shirkhinda HE Project	Shirkhinda HE Project in Rohtas district was commissioned during 2009-10.	(2x0.35 MW)	0.7
Belsar HE Project	Belsar HE Project in Arwal district was commissioned during 2011-12.	(2x0.5 MW)	1.0
Arwal HE Project	Arwal HE Project in Arwal district was commissioned during 2011-12.	(1x0.5 MW)	0.5

In addition to the above, the BSHPC is engaged in exploring the possibilities of the following projects in the state:

(i) **Mahananda River, Burhi Gandak and Gandak River Basin**: To assess the possibility of constructing Hydro Power projects in the Mahananda river, Burhi Gandak and Gandak River Basin, a survey has been completed in these regions. According to the feasibility report, the sites and capacity of the projects have been identified, which together have an installed capacity of 160.1 MW. The details of the sites with capacity are presented in Table 8.8.

Table 8.8 : Site and Capacity of Gandak, Burhi Gandak and Mahananda River Basin Projects

Name of Project	Location	Capacity
Mahananda River		
Basantpur SHP	Araria	(2x1.05 MW) = 2.10 MW
Sonapur SHP	Purnea	(3x3.80 MW)=11.40 MW
Dalkhola SHP	Kishanganj	(2x3.85 MW)=7.70 MW
Rupadhar SHP	Kishanganj	(2x1.25 MW)=2.50 MW
Burhi Gandak River		
Raghunathpur SHP	East Champaran	(2x1.0 MW) =2MW
Baragovindpur SHP	East Champaran	(2x2.2 MW)=4.4 MW
Gandak River		
Bettiah H.E.P	West Champaran	(80 MW)
Bagaha H.E.P	West Champaran	(50 MW)
Total Capacity		**160.1 (MW)**

Source: Bihar State Hydroelectric Power Corporation Limited

(ii) **Solar Plants on Vacant and Unused Spaces of Hydel Projects**: The BSHPC has decided to install solar plants on the rooftops of buildings of powerhouses, vacant lands, power distribution channels and tailrace channels for generation of 10 MW of solar power through BREDA.

8.5 Distribution Companies (DISCOMs)

The two DISCOMs in Bihar have implemented several schemes to expand and strengthen their distribution networks. These schemes include construction of new Power Sub-Stations, HT/LT lines and Distribution Sub-Stations. There has been augmentation of the capacity of existing Power Sub-Stations and Distribution Sub-Stations and implementation of Information Technology in revenue management and other activities of the power distribution sector. The existing old and damaged conductors have also been replaced for smooth supply of power.

The state has witnessed a steady growth in new electricity connections, which has recorded a increase of 17 percent during the period of 2011-12 to 2023-24. A total of 38 lakh electricity consumers existed in 2012, which increased by nearly 7 times in the same period (Chart 8.7). The sector-wise number of electricity consumers is given in Table 8.9, which reveals that the domestic sector has the largest consumers of electricity that accounts for 88.5 percent of the total consumers,

followed by commercial consumers (7.5 percent). It is also observed from the Chart 8.8 that the share of domestic consumers has started declining and that of commercial and industrial consumers is increasing from the year 2019-20, which is a positive indication of the economic growth of the state. The number of agriculture consumers has also increased appreciably due to implementation of the Mukhyamantri Krishi Vidyut Sambandh Yojana (MKVSY). It increased by 289 percent during the four years, from 2.28 lakh in 2018-19 to 6.61 lakh in 2023-24.

8.6 Operational and Financial Status of DISCOM

An overview of the financial status of the two DISCOMs is presented in Table 8.10. The generation and purchase of power (net of central transmission loss) in Bihar increased from 32,071 MU in 2020-21 to 47,295 MU in 2023-24, implying an increase of 15,224 MU in three years. With increase in power consumption, the revenue realization has also increased. The cost coverage was 88.1 percent in 2020-21, which increased to 95.1 percent in 2023-24. The DISCOM has improved its financial and operational efficiency as shown in Table 8.10.

Table 8.10 : Financial Status of Distribution Companies (2020-21 to 2023-24)

Item	Generation and Purchase (Available for sale) (MU)	Sales (MU)	Loss (percent)	Average Revenue (Rs./ Unit)	Sale of Power (Rs. crore)	Total Income (including subsidies) (Rs. crore)	Total Cost (Rs. crore)	Cost Coverage (Total Income/ Total cost) (percent)	Financial Loss (percent)

The DISCOMs made efforts to address the issue of Aggregate Technical and Commercial (AT&C) loss and gradually moving towards reduction in AT&C loss from 45 percent in 2011-12 to 21.74 percent in 2023-24 (Chart 8.9). The two DISCOMs are striving hard to bring down the AT&C loss further to 15 percent.

Chart 8.9 : Aggregate Technical & Commercial Losses (in percent)

8.7 Transmission

In order to improve the power supply position, the State government has adopted various measures for capacity enhancement, improvement in the Transmission & Distribution (T&D) network and energy conservation. The robust transmission system supports the increasing requirement of generation and distribution. To meet the growing demands of power, there is a requirement for a strong and reliable network of inter-state as well as intra-state transmission. The existing transmission system, therefore, needs to be strengthened with a proper planning. The required capacity for 24-hour power supply for 2024-25 and 2025-26 is presented in Table 8.11. The transmission network is being continuously strengthened over the last two decades to reduce the T&D loss. The grid substations grew by almost three times from 45 in 2005 to 170 in 2024, while the length of transmission line has increased by more than 4 times, from 5000 CMS to 20393 CMS during the same period (Chart 8.10). Further, a total of 14888 MW has been evacuated in 2024, compared to only 1000 MW in 2005 (Chart 8.11).

Table 8.11 : Projected Required Capacity for Power

Year	Peak Demand (MW)	Transformation Capacity needed to meet Peak Demand (MW)	Available Capacity in MVA at		
			400/220/132 KV level	220/132 KV & 220/33 KV level	132/33 KV level
2024-25	8908	6030	3000	15120	20190
2025-26	9743	17540	4000	15520	20290

Implementation of new technologies in Transmission Projects

The Bihar State Power Transmission Corporation Limited (BSPTCL) has been implementing large number of transmission projects which not only include extension and strengthening of the existing transmission system but also have adopted latest technologies apart from spreading its network and coordination with the Central Transmission Utility (CTU) and various other bodies. The

several automation related initiatives are: (i) Sub-station Automation System (SAS) for fully automated grids; (ii) evacuate around 750 MW renewable energy; (iii) Geographical Information System (GIS) mapping of all its operational including under-construction Grid Sub-stations; (iv) Upgraded Unified Load Dispatch and Communication (ULDC); (v) Supervisory Control and Data Acquisition (SCADA) system installed in State Level Dispatch Center (SLDC); (vi) Optical fiber link has been established throughout the transmission network for ensuring faster communication of real-time data flow; (vii) Enterprise Resource Planning (ERP) for intra-state power transmission business; (viii) Availability-based Tariff (ABT) Meters; (ix) use of High Temperature and Low Sag (HTLS) Conductors; (x) Replacement of Earth wires and Power-line Carrier Communication (PLCC) equipment of old lines with Optical Ground Wire (OPGW) on hotlines; (xi) Capacitor Banks and Reactors are installed for automatic compensation of reactive power to reduce Transmission loss; (xii) Cyber security; and, (xiii) Uses of drones for line survey. Apart from these, Monopole/ Narrow Base Tower are being used in Transmission lines which has the benefit of: (i) Less right-of-way, (ii) Better visual appearance, (iii) Less area requirement in congested areas, (iv) Less components for faster installation, (v) Lower Installation Cost, (vi) Design flexibility for easy installation, (vii) Better reliability even in extreme weather conditions, (viii) Less expenses on maintenance and repairs, and (ix) Better safety for future.

8.8 Power Sector Schemes

Central Government Schemes

To extend the electricity supply coverage throughout the state, the Central government recently initiated several programmes in Bihar. Six of them have already been completed, which are —

(i) Deen Dayal Upadhyaya Gram Jyoti Yojana (DDUGJY),

(ii) Rural Electrification-Deen Dayal Upadhyaya Gram Jyoti Yojana (RE-DDUGJY); erstwhile Rajiv Gandhi Grameen Vidyutikaran Yojana (RGGVY) during 2007-12 (Phase II) and 2012-17,

(iii) Restructured Accelerated Power Development and Reforms Program (R-APDRP), for strengthening of system with IT implementation,

(iv) Integrated Power Development Scheme (IPDS),

(v) Real-Time Data Acquisition System (RT-DAS) &

(vi) Pradhan Mantri Sahaj Bijlee Har Ghar Yojana (SAUBHAGYA).

Recently, two new schemes namely: (i) Grid-Connected Rooftop (GCRT) Solar Power Plant, and (ii) Loss Reduction component of Revamped Distribution Sector Scheme (RDSS) are under

process for execution. The Grid-Connected Rooftop Solar Power Plant is discussed in the section on Renewable Energy.

Revamped Distribution Sector Scheme (RDSS): The Central government has introduced the Revamped Distribution Sector Scheme (RDSS), aimed at enhancing the operational effectiveness and financial viability of DISCOMs through a reform-focused and outcome-oriented approach. The objectives of the scheme are to:

(a) Improve the quality, reliability and affordability of power supply to consumers through a financially sustainable and operationally efficient Distribution Sector,

(b) Reduce the AT&C losses to pan-India levels of 12-15 percent by 2024-25, and

(c) Reduce the gap between Average Cost of Supply (ACS) and Average Revenue Realised (ARR) to zero by 2024-25 (Chart 8.12 and Chart 8.13).

A scheme amounting to Rs. 7081.05 crore has been sanctioned under the Loss Reduction component of RDSS for NBPDCL and SBPDCL, out of which 60 percent of the amount is being provided by the Central government as grant and the balance 40 percent is being arranged by the State government. The State government has further sanctioned an additional amount of Rs. 224.00 crore for the unsanctioned part of the work under Information Technology/Operational Technology (IT/OT). The scope of work under this scheme is — (a) Construction of Agriculture feeders, (b) Bifurcation of long feeders, (c) Replacement of bare conductor of LT lines by Aerial Bunched Cable (AB Cable), (d) High Voltage Distribution System (HVDS), (e) IT/OT, and (f) Installation of Smart Meters in urban areas. These works are presently under progress.

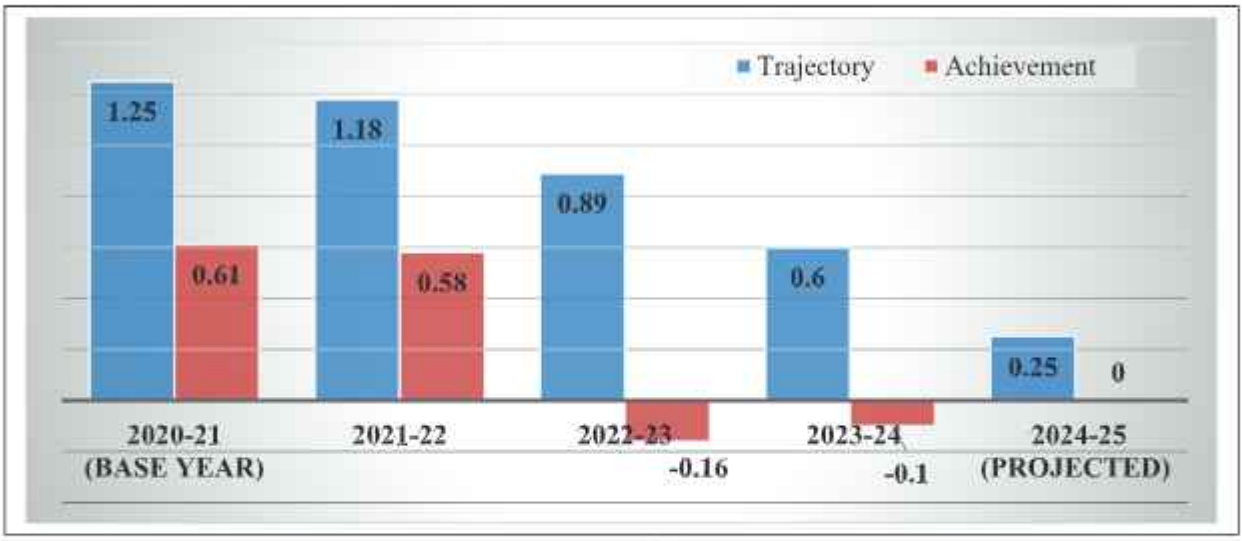
Source : Department of Energy, GoB

Chart 8.13 : ACS-ARR (Rs./Kwh) Trajectory and Achievement of SBDCL



Source : Department of Energy, GoB

One Nation, One Tariff

To enhance the financial viability of the DISCOMs, the State government has been advocating for the implementation of a 'One Nation, One Tariff' policy. With the State government having transferred its generation units to NTPC, Bihar now relies predominantly on power supplies from the Central government. However, this power is supplied to Bihar at a rate higher than what other states pay. The simultaneous provision of subsidies to consumers, combined with the higher cost of purchasing power from the Central government, places significant financial strain on the DISCOMs. Previously, the Central government defended the differences in power tariffs across the country by citing varying transmission congestion in different areas. However, given that the country has now synchronized its power grids, there are no barriers to implementing a rational 'One Nation, One Tariff' policy. By complementing the benefits achieved through the installation of smart meters by DISCOMs with a uniform tariff from the Central government, the financial health of the DISCOMs can gradually improve. Chart 8.14 shows the status of power purchase and sale.

Chart 8.14 : Status of Power Purchase and Sale (in MU)

Source : Department of Energy, GoB

PM Surya Ghar: Muft Bijlee Yojana

The PM Surya Ghar: Muft Bijlee Yojana, the domestic rooftop solar initiative to supply solar power to one crore households by March 2027 is another ambitious scheme of the Central government. This scheme is discussed in the RE section.

State Government Schemes

Smart Metering with Prepaid Functionality: Since their establishment in November 2012, the two distribution companies in Bihar, NBPDCL and SBPDCL, have made significant progress in achieving universal electrification within the state and offering electricity connections to all households that are interested. Nevertheless, the composition of consumers and sales for these two distribution companies remains challenging and differs considerably from that of most distribution companies across the country. In Bihar, out of 1.90 crore consumers, around 88 percent are domestic and therefore there is a constant challenge of timely billing and payments, especially in rural areas. During the last few years, both DISCOMs have successfully implemented the practice of spot-billing. However, the dependency of quality meter-reading is another constant challenge for success of spot-billing. Coupled with this, there have been considerable challenges due to wrong billing, non-payment by consumers, non-recording of consumer loads and theft, etc., thus resulting in high AT&C loss.

Initially, both Discoms began installing basic prepaid meters at certain locations during 2013-14. This led to positive outcomes regarding billing and revenue collection. Nonetheless, there were constraints and difficulties associated with accounting and the execution of tariff alterations. To address these issues, the State government decided to implement smart metering with prepaid functionality in 2019, which started from urban areas, covering 23.50 lakh consumers. An agreement was signed in January 2021 with M/S Energy Efficiency Services Ltd. (EESL) for the installation of smart meters with prepaid functionality for 23.50 lakh consumers in urban areas and consumers under 'Har Ghar Nal ka 'Jal' category and agriculture consumers. After successful implementation of the scheme in urban areas, the State government also decided to start its implementation in rural areas in a time-bound manner to cover consumers of both urban and rural areas. Accordingly, approval was accorded by the State government in October 2022 for the installation of 1.48 crore smart prepaid meters to rural and left-over urban consumers of NBPDCL and SBPDCL at the cost of Rs. 15,074.12 crore, which is targeted to be completed by 2025-26.

Mukhyamantri Krishi Vidyut Sambandh Yojana (MKVSY) : To enhance the sub-transmission and distribution (ST&D) infrastructure in rural regions and to establish separate networks for agricultural and non-agricultural activities, the DDUGJY scheme was introduced in the state. The successful rollout of DDUGJY has led to an increased demand for electricity connections for agricultural pump sets. As a result, there has also been a rise in load within rural areas. The State

government has set up camps at the Panchayat level to collect application forms for new service connections aimed at agricultural purposes. During the process of installing these service connections, it became evident that there is a significant need for infrastructure development, including dedicated feeders for agricultural water pump sets. Nevertheless, the DISCOMs encountered challenges due to the limited work scope regarding feeder segregation as outlined in DDUGJY. To tackle this problem, the State government planned a new initiative called the 'Mukhyamantri Krishi Vidyut Sambandh Yojana' (MKVSY) in August 2020 and allocated Rs. 1329.61 crore to accommodate the additional applicants under both DISCOMs. The no. of connections released and the infrastructure created under MKVSY are detailed in Table 8.12.

Further, the State government in its fourth Agriculture Road Map (2023-2028) has formulated a new scheme amounting to Rs. 2190.75 crore. for the creation of electrical infrastructure including dedicated feeders for agriculture and providing around 4.80 lakh new agriculture connections under the Mukhyamantri Krishi Vidyut Sambandh Yojana (MKVSY) Phase-2. In addition, the work of solar electrification of the existing 1354 dedicated agriculture feeders is also covered in the scheme. A subsidy is being provided by the State government to different categories of consumers under the Mukhyamantri Vidyut Upbhokta Sahayata Yojana (MVUSY). At present, electric power to agricultural consumers is being supplied at a highly subsidized rate of Rs. 0.55 per unit.

8.9 Citizen Friendly Services

Bihar DISCOMs have consistently prioritized delivering online services to their customers to enhance satisfaction. Below are some key services offered to consumers:

Bill through SMS on Missed Call: Through SMS, the consumer can now get information about the current due payment and due date against the electricity connection, by just giving a missed call. Additionally, the Uniform Resource Locator (URL) is also being provided by the system for downloading the latest electricity bill. This service has significantly decreased the number of customer visits to the electricity office and has minimized paper usage by providing e-duplicate energy bills via a PDF link sent through SMS.

Suvidha Mobile App: The DISCOMs have launched a mobile app called SUVIDHA to provide various services to consumers. These services encompass applying for new service connections, paying bills online, downloading bills, checking recent payment transactions, registering complaints, reporting electricity theft, changing load, and updating personal information such as name, address, and mobile number. Consumers can also monitor the status of their service requests through the SUVIDHA App. Additionally, all supply divisions have established SUVIDHA counters. These counters serve as a single-window interface between service providers and consumers.

Social Media: To create an enabling environment, DISCOMs have established a dedicated cell to answer issues or concerns raised in social media. They have created official accounts on Facebook, Twitter and YouTube to promote various schemes through these platforms to keep the consumers updated on any policy issues.

Grievance Redressal: Consumers can lodge complaints or grievances by calling the toll-free number 1912. Additionally, an Online Grievance Page is accessible on the company's website, allowing the complainant to file complaints or grievances directly. They can also track the progress of the actions taken regarding their complaints or grievances on the portal.

Self-Generation of Electricity Bill: A new facility has been added the 'Suvidha' App', through which consumers can generate and print their electricity bill by just sending a self-meter reading. The bills are generated by the system without manual intervention. This facility is available to the consumers whose regular bill is not served/ generated within 35 days from the previous bill.

RAID and FIR Management System: A separate WhatsApp number has been provided for lodging complaints exclusively related to power theft. A new facility has been introduced from August, 01 2023 for maintaining RAID and FIR records through online mode which was being done manually earlier and was difficult for tracking and monitoring of the records at the central level. A unique system-generated reference number is being provided for each RAID/FIR entry done by DISCOM officials. This application is directly linked with collection counters for centralised cash collection under this head. Tracking and monitoring of records are made easy through various MIS reports generated in this module. By utilizing this application, it has become easy to find how many RAID/FIRs have been conducted by field officials in their respective Circle/Division/Sub-Division/Sections. Consumers for whom RAID/FIR has been conducted will get an SMS at every stage of the process to make them aware of the process and can also pay the RAID/FIR amount using their reference number at the Collection Counter. This application has also significantly helped in revenue generation.

CHAPTER - IX

RURAL DEVELOPMENT

Abstract

Bihar's progress is deeply tied to the social and economic advancement of its rural areas, which house a significant portion of the state's population. In recent years, the State government has launched numerous initiatives aimed at the holistic development of these regions. Collaborative efforts from various departments have significantly improved the livelihood opportunities for the ultra-poor and marginalized communities. JEEVIKA has been a key driver in creating livelihoods for rural women. Similarly, the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) has provided vital employment opportunities for the unskilled and manual labourers. Housing schemes like the Indira Awas Yojana/Pradhan Mantri Awas Yojana-Grameen (IAY/PMAY-G) and the distribution of homestead land have been instrumental in providing shelter to the disadvantaged rural populations. The Public Distribution System (PDS) has bolstered food security and improved the nutritional well-being of rural residents. These diverse initiatives reflect the government's commitment to uplifting rural communities and driving inclusive development.

Introduction

Rural development is crucial for inclusive growth in Bihar, where nearly 90 percent of the population resides in rural areas. It is vital for the state's progress as agriculture, a cornerstone of the rural economy, is the second-largest contributor to Bihar's Gross State Domestic Product (GSDP) after the services sector. While rural development initially focused on agriculture and allied sectors, it has evolved into a multi-dimensional approach encompassing economic, social, and cultural aspects to improve the quality of life in rural areas. It now aims to empower rural communities to set their priorities through democratic institutions, focusing on economic growth, infrastructure, social justice, and human capacity development. Recognizing these needs, the State government has introduced various initiatives to address poverty, improve livelihood options, and ensure development.

This chapter discusses key rural development programmes in Bihar. Initiatives like JEEVIKA and MGNREGS focus on employment generation, while PMAY-G and land distribution address housing and sanitation needs. The Public Distribution System ensures food security for rural households. Additionally, Panchayati Raj Institutions (PRIs) are vital in implementing these

programmes and mobilizing communities for social, economic and political development to foster inclusive growth in the State.

Table 9.1 : Trends of Rural Development Expenditure in Bihar and India (2019-20 to 2024-25, BE)

(Rs. crore)

Years	Bihar			India

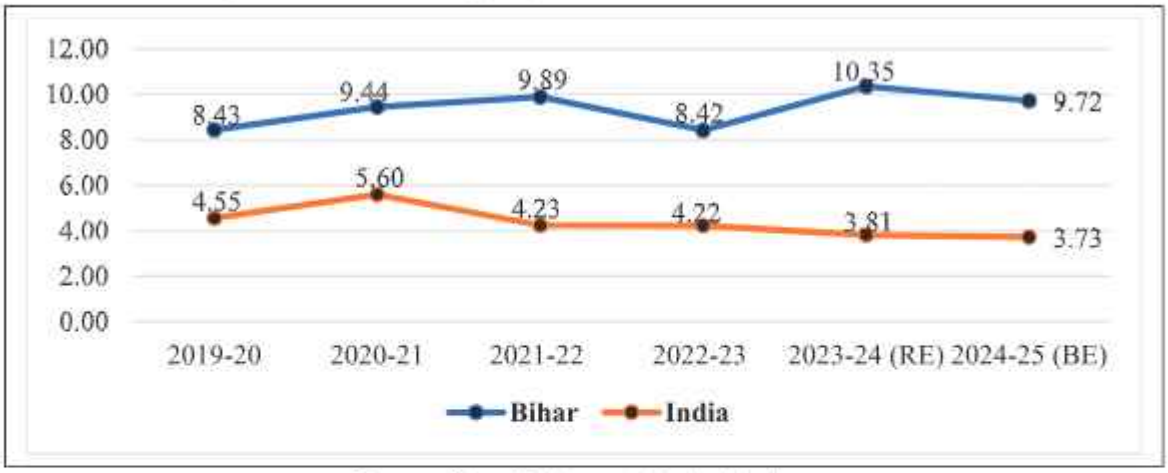
Note: RE = Revised estimate, BE = Budget estimate
Source: State Budget and Union Budget

Expenditure on rural development serves as a crucial indicator of the government's commitment to enhancing rural livelihoods and infrastructure. Substantial investments have been directed towards various rural development programmes in Bihar. Table 9.1 provides an overview of expenditure on rural development in Bihar and India from 2019-20 to 2024-25. The data reveals that Bihar's share of expenditure on rural development in total expenditure consistently surpasses the national average, as illustrated in Chart 9.1.

Chart 9.1: Percentage of Rural Development Expenditure in Total Expenditure in Bihar and India (2019-20 to 2024-25) (BE)



Source: State Budget and Union Budget

9.1 JEEVIKA

The Bihar Rural Livelihoods Promotion Society (BRLPS), or JEEVIKA, is a registered body working under the Rural Development Department of the Government of Bihar. Since its establishment in 2006, JEEVIKA has played a transformative role in enhancing the socio-economic status of the marginalized rural communities in Bihar. As of September 2024, 1,063.5 thousand Self-Help Groups (SHGs) and 71.1 thousand Village Organizations (VOs) have been

formed. Additionally, through 2,198.4 thousand SHGs credit linkages (inclusive of 1st, 2nd, 3rd and 4th credit linkage of SHGs) a cumulative amount of Rs. 46.9 thousand crore has been extended as bank credit (Table 9.2).

Table 9.2 : Progress under JEEVIKA (2020-21 to 2024-25)

(Fig. in 000')

Indicators	2020-21	2021-22	2022-23	2023-24	2024-25 (Sept. 30, 2024)
Number of SHGs formed	1028.1	1035.2	1046.0	1058.6	1063.5
Number of VOs formed	64.6	67.6	68.6	70.8	71.1
Number of CLFs formed	1.2	1.4	1.5	1.7	1.7

Number of Didi Ki Rasoi opened across Bihar	214
Grameen Bazaar intervention	
Number of Grameen Bazaar established	143
Avg. annual turnover per Grameen Bazaar (Rs. lakh)	38.52

Source: JEEVIKA, GoB

JEEVIKA's grassroots initiatives for integrated rural development are reflected in income-generating activities and the inclusion of rural poor through community-based organizations. Table 9.3 outlines the progress of key components up to September 2024.

Alternate banking through Customer Service Points (CSPs) has become vital tool for providing financial services to SHG and non-SHG members in rural areas. Under the 'One GP One BC' strategy, the Banking Sakhi model has been expanded to promote digital transactions, aiming for at least one CSP per panchayat. JEEVIKA collaborates with business correspondents from major banks such as BOB, BOI, Canara Bank, CBI, CSC/Digipay, DBGB, FINO, ICICI, IDFC, PNB, RBL, SBI, Spice, and UBI. It supports the identification, training, and technical assistance of Bank Sakhis while offering financial aid to establish CSPs. These IIBF-certified Bank Sakhis receive initial handholding support to operate CSPs effectively. Presently, 5,878 Bank Sakhis are managing CSPs across the region.

To promote goat rearing 5,792 community cadres have been developed as Pashu Sakhis to deliver essential goat-rearing services to SHG and non-SHG households. These services include vaccination, deworming, insemination, castration, azolla pit development, shed construction, and feed preparation. The Pashu Sakhi model currently supports 5,90,827 households.

Under the Jal-Jeevan-Hariyali Abhiyaan, the Government of Bihar has designated ponds for maintenance and fishery activities by SHG members. Additionally, 86 Matsya Sakhis are engaged, supporting 714 households through livestock interventions.

The Didi Ki Rasoi initiative by JEEVIKA promotes a community-based canteen model in Bihar, operated entirely by women. This initiative ensures the supply of quality, hygienic food while creating livelihood opportunities for rural communities. Initially serving patients, doctors, nurses, and visitors, it has expanded significantly. Currently, 214 Didi Ki Rasoi units operate across the state. Ninety-five Didi ki Rasoi are functional in divisional and subdivisional hospitals, medical colleges, 88 units in SC/ST residential schools, and 31 units in banks, registrar offices, and the Bihar Institute of Mental Health and Allied Sciences (BIMHAS).

JEEVIKA also seeks to improve the livelihoods of SHG members running kirana stores and grocery shops by establishing a network of 100 stores and forming direct partnerships with market companies. This initiative ensures SHG members have access to quality grocery items while providing profit margins for SHG-run kirana stores and Grameen Bazaars. Grameen Bazaar also serves as a platform to market the products made by SHG members.

Table 9.4 : Livelihood-related Activities, including skilling and vulnerability reduction by SHGs Under JEEVIKA

(In Lakh)

Interventions	2022-23	2023 -24	2024 -25 (Till Sept. 2024)
Farms Livelihoods			
Number of farmers undertaking paddy cultivation	16.64	14.72	14.72
Number of farmers who undertook wheat cultivation	14.26	13.01	13.01
Number of farmers who undertook vegetable cultivation	9.92	9.92	10.78
Number of farmers who undertook kitchen gardening	20.61	15.61	17.76
Off-farm and Non-farm Livelihoods			
Number of SHG members involved in Poultry intervention	1.86	2.00	2.00
Number of SHG members involved in Dairy intervention	1.16	1.31	1.42
Number of houscholds involved in goat intervention	3.03	5.04	5.91
Number of SHG members involved in non-farm interventions	2.32	2.48	2.63
Skill Training and Placement			
Number of Rural Youths trained (PIAs, RSETIs & others)	3.62	3.98	4.23
Number of Rural Youths placed (PIAs, RSETIs, Job Fair, etc.)	4.05	4.51	4.68
Vulnerability Reduction			
Number of Village Organizations received Food Security Fund (FSF)	0.48	0.48	0.48
Number of Village Organizations received Health Security Fund (HSF)	0.52	0.52	0.56

Source: JEEVIKA, GoB

In 2024-25 (up to September 2024), through different forms of intervention, JEEVIKA has achieved significant milestones in agriculture, livestock, and allied sectors. 14.72 lakh farmers have adopted better paddy cultivation practices, 13.01 lakh farmers for wheat, and 10.78 lakh farmers for vegetables. Kitchen gardening has gained popularity, benefiting 17.76 lakh farmers by enabling year-round, low-cost production of vegetables and fruits that help in improving nutrition for SHG members. Additionally, 5.84 lakh farmers were engaged in maize cultivation, and 2.11 lakh were focused on pulses, boosting production and income opportunities.

Under the Integrated Poultry Development Scheme (IPDS), backyard poultry interventions are being implemented across 310 blocks of 38 districts in Bihar. Beneficiaries receive 45 chicks in two batches, reared at Mother Units for 28 days. As of September 2024, 2 lakh SHG members were involved in this initiative.

In collaboration with COMFED, JEEVIKA is linking cattle-rearing SHG members to Dairy Cooperative Societies (DCSs) and establishing new women-run DCSs. By September 2024, 1,041 women DCSs were formed, connecting 76,130 households. The Kaushikee Mahila Milk Producer Company operates 836 milk pooling points, procuring an average of 77,087 litres of milk daily.

The Seemanchal JEEVIKA Goat Producer Company Limited supports goat rearers in Purnea, Araria, and Katihar districts. It has mobilized 19,956 members into goat producer company and covered 5.91 lakh households across 27 blocks. The company has started selling inputs and trading goats in these three districts, and realised a turnover of Rs. 568.70 lakh.

Under the Food Security Fund (FSF) initiative, a one-time revolving fund of Rs. 1 lakh is provided to Village Organizations (VOs) based on project triggers. This community-driven credit product enables SHG members to collectively demand, procure, and distribute quality food grains and edible items at fair prices from local producers and retailers. It targets vulnerable households including SC and ST communities to address nutritional gaps during lean seasons. By September 2024, 0.48 lakh VOs had effectively utilized this fund to benefit SHG members.

The Health Security Fund programme offers low-cost funds for medical emergencies to households within the SHG fold. VOs with at least four months of existence and a bank account can access this fund. By September 2024, 0.56 lakh VOs have received the fund, providing critical support during health crises (Table 9.4).

Farm Interventions

(a) **Enhancing Agricultural Productivity:** Since its inception, JEEVIKA has focused on boosting agricultural productivity through implementing cost-effective, sustainable technologies. Integrating scientific methods with traditional knowledge promotes soil improvement and water, plant, and nutrient management, enhancing food security and incomes for farming households.

In 2024-25 (up to September 2024), the improved production practices were adopted by 14.72 lakh paddy farmers and 10.78 lakh vegetable farmers. Kitchen gardens gained popularity, with 17.76 lakh farmers growing seasonal vegetables like ladyfinger, tomatoes, and leafy greens, improving nutrition at low costs. Additionally, 5.84 lakh farmers cultivated maize, and 2.11 lakh focused on pulses, further expanding agricultural output and income opportunities.

(b) **Farm Value Chain Intervention:** JEEVIKA empowers small and marginal women farmers by establishing Women Farmer Producer Companies (WFPCs), creating sustainable farmer-owned institutions. These WFPCs aggregate produce, streamline input supplies, and gain better market access, enabling higher returns and reduced costs for farmers. WFPCs engage in crop aggregation and marketing (e.g., maize, wheat, paddy, vegetables, mustard, and lentils) and distribute essential inputs like seeds and fertilizers. They also diversify into fertilizer distribution, certified seed production, and value-added processing. Products are marketed under the brand "Green Delights," integrating WFPCs into significant crop value

chains in Bihar. By 2023-24, 26 WFPCs across Bihar achieved a turnover of Rs. 4576.20 lakh, trading and processing crops through various channels. Of these, 15 WFPCs were promoted under the "10K FPO Scheme," operational for two years, extending their reach and impact.

(c) **Neera Intervention:** Launched in 2017-18 in partnership with the Industries Department, Government of Bihar, JEEVIKA's Neera initiative promotes the production and sale of Neera, a traditional drink made from palm sap, along with by-products like jaggery and peda. By 2018, it was scaled across all 38 districts of Bihar. As of September 2024, 1.53 crore litres of Neera were collected, and 1.48 crore litres were sold, reflecting high demand, robust operations and market linkage. Under this intervention, 16,200 toddy tapper trainers were trained and provided with licenses to maintain quality standards. Additionally, 516 Neera Producer Groups were formed, boosting collective production and rural incomes. Producers were also enrolled in social security schemes like Pradhan Mantri Jeevan Jyoti Bima Yojana (PMJJBY) and Pradhan Mantri Suraksha Bima Yojana (PMSBY), providing life and accident insurance, ensuring livelihood enhancement alongside social security.

(d) **Custom Hiring Centers (CHCs) and Village Tool Banks:** JEEVIKA, in collaboration with the Agriculture Department, operates 513 CHCs across Bihar to provide farmers with essential machinery for efficient harvesting and post-harvesting activities. These centers address labour shortages and enhance agricultural productivity through the timely performance of agricultural operations. An upgraded CHC mobile app simplifies machine booking, optimizes logistics, and ensures financial transparency. By 2023-24, 55,852 farmers were registered on the CHC portal, with 53,727 accessing services, bridging resource gaps and promoting mechanized farming for smallholder farmers.

(e) **Agri-entrepreneurs Initiative:** This initiative empowers rural youth by training them as Agri Entrepreneurs (AEs) to provide essential agricultural services to local farmers. AEs supply quality inputs, offer crop advisory services, facilitate financial transactions, and connect farmers in markets, enhancing productivity and profitability. Each AE supports 200-300 farmers across 3-4 villages, leveraging digital tools to streamline agricultural operations.

Table 9.5 : Progress on Agri-Entrepreneurs intervention

Particulars	Progress till March 2024	Cumulative progress till Sept. 2024
Number of Agri-Entrepreneurs	5,232	5,302
Number of farmers' data collected	10,28,927	10,59,986
Cumulative transaction of various businesses* (Rs. crore)	195.4	250.3

Note: *Input, Output, Nursery, Organic Manure, Mushroom, Digital Banking by AES, etc.
Source: JEEVIKA, GoB

Up to September 2024, JEEVIKA had mobilized 5,302 AEs, who collectively facilitated transactions worth Rs. 250.33 crore. These AEs engage in diverse ventures like input/output supply, nursery management, organic manure production, mushroom cultivation, and digital banking. They have also collected data from 10,59,986 farmers to improve planning and outreach. The AE model demonstrates effective decentralized service delivery, driving grassroots economic growth and sustainable agriculture (Table 9.5).

Non-farm interventions

(a) **Incubation Programme:** Funded by the World Bank under NRLM, this initiative supports 450 women-owned, growth-oriented micro and nano enterprises in Assam, Bihar, and West Bengal. Bihar, the first to partner with IIM Calcutta Innovation Park, launched the programme with 27,000 applicants, selecting 150 enterprises through rigorous evaluation. Over an 18-month incubation, these enterprises received Rs. 5 crore in soft loans, grants, mentoring, training, and business linkages. Over 80 percent of the enterprises achieved revenue growth of over 15 percent, with some surpassing Rs. 1 crore in earnings and expanding their offerings, significantly boosting livelihoods. Details of linkages and compliances are given in the table below.

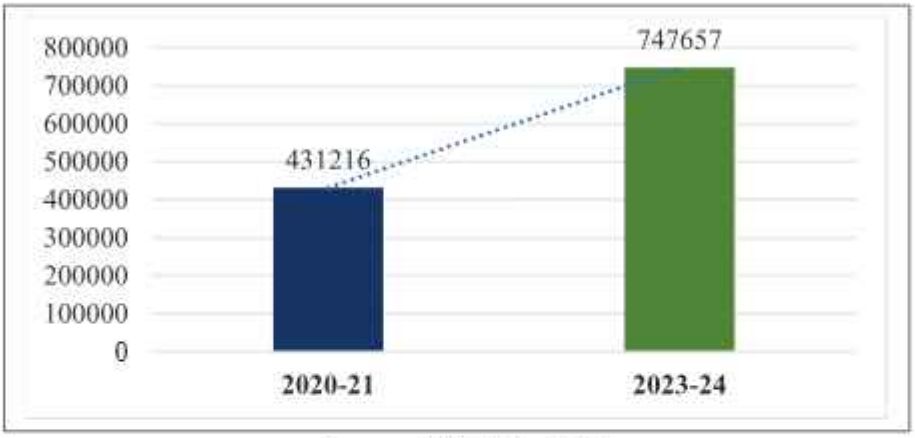
Table 9.6 : Linkages and compliances under Incubation

Interventions	No. of Enterprises
E-commerce onboarding - B2C & B2B (amazon, meesho)	17
Institutional buyer & wholesaler (Taneira, Fab India, Kadam Haat, SARAL)	30
Fair and Exhibition (SARAS @ Bihar, HP, Rajasthan, Karnataka; Upendra Maharathi Shilp Anusandhan Bihar Connect; KRISHISAH BAAGWANI VISTAR; Borivelli Art Festival by Athrav Foundation; Khadi India at Lucknow, Cuttack and Puri)	41
Buyers & Sellers meet	6

Source: JEEVIKA, GoB

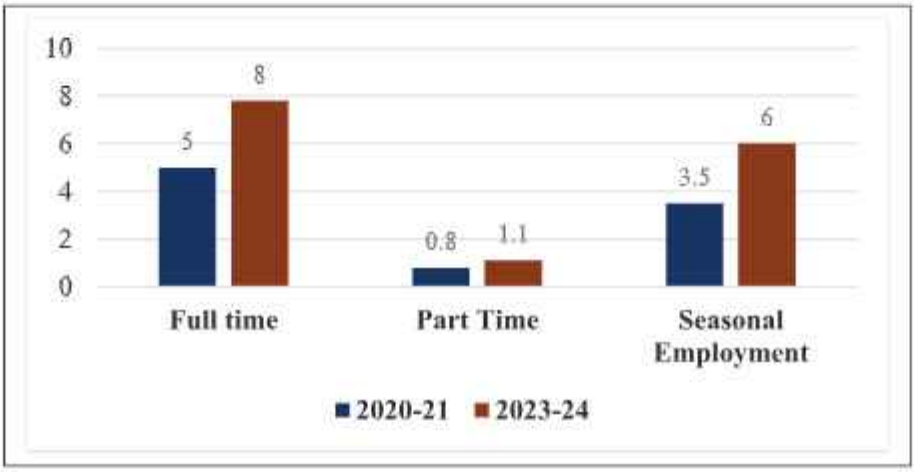
Of 150 incubated enterprises, 125 were analysed, revealing that 30 percent operate in food processing, 26 percent in manufacturing, 9 percent in metal, 7 percent each in garments and apparel, and 6 percent each in restaurant/catering and services. The average annual income of entrepreneurs rose by 73 percent, from Rs.4,31,216 in 2020-21 to Rs. 7,47,657 in 2023-24. This programme has also generated employment as full-time jobs increased by 56 percent, part-time jobs increased by 38 percent, and seasonal employment increased by 71 percent, showcasing significant growth (Chart 9.2 and 9.3).

Chart 9.2: Average Annual Income of Enterprises (Rs.)



Source: JEEVIKA, GoB

Chart 9.3: Employment Generation in Enterprises



Source: JEEVIKA, GoB

(b) **Pradhan Mantri Formalization of Micro Food Processing Enterprises (PMFME) Scheme**: Launched under the Aatmanirbhar Bharat Abhiyan by the Ministry of Food Processing Industries, the Pradhan Mantri Formalization of Micro Food Processing Enterprises (PMFME) Scheme aims to enhance competitiveness and formalize the unorganized food processing sector. With a budget of Rs.10,000 crore for 2020-25, it supports agri-food processing groups, including FPOs, SHGs, and cooperatives. In 2023-24, BRLPS met its seed capital target, benefiting 12,637 SHG members with Rs. 45.81 crore disbursed through the State Nodal Agency.

(c) **One Stop Facility Centre (OSFC)**: The OSFC promotes entrepreneurship by offering a single-window assistance model for growth-oriented enterprises (with a turnover of Rs. 6 lakh+). It provides access to finance (Rs. 50 lakh per block) for markets, mentorship, branding, and packaging. This scheme has been implemented in 50 blocks across 12 districts. The scheme has funded 7,298 enterprises with a total disbursement of Rs. 30.04 crore.

(d) **Micro Enterprise Development (MED)** : Under the Deendayal Antyodaya Yojana – National Rural Livelihoods Mission, the MED scheme supports SHGs in establishing non-

farm micro-enterprises. A total of 2,671 enterprises have been financed across 13 blocks in 5 districts.

(e) **Start-Up Village Entrepreneurship Programme (SVEP)**: SVEP assists SHG members in establishing small non-farm enterprises, offering financing through the Community Enterprise Fund and business support services. In the third phase, 10 new blocks were added, and 266 trained cadres provided ongoing enterprise development support. By September 2024, 4,861 business plans were approved under the programme.

(f) **Bag Cluster Unit in Muzaffarpur**: The Bag Manufacturing Cluster in Bela, Muzaffarpur, is a successful public-private partnership involving the Department of Industries, JEEVIKA, and corporate partners. The cluster employs 42 JEEVIKA entrepreneurs, who have set up 24 machines, resulting in the production of bags worth Rs. 16.55 lakh, providing direct and indirect employment to over 1,100 workers. Introducing Bartack machines has improved the quality and durability of bags — 40 Bartack entrepreneurs are offering services. The initiative has generated Rs. 86.27 lakh in revenue for micro-entrepreneurs.

(g) **Art & Craft**: JEEVIKA has mobilized over 4,100 artisans into producer groups across 20 districts, supporting them with finance, training, and marketing. In 2018, JEEVIKA established the 'Shilpgram Mahila Producer Company Limited,' which includes over 500 women artisans from Darbhanga, Madhubani, and Muzaffarpur. Shilpgram has generated Rs. 7.78 crore in business in 2023-24, selling products through online market platforms. JEEVIKA also promotes direct sales at various fairs and events across India.

Women-led Individual Financing for Enterprise Promotion

To encourage women's entrepreneurship, JEEVIKA initiated a pilot project in 2023-24 to promote individual financing for women-led enterprises. This intervention is critical for enabling SHG members to access the funds needed to expand their businesses and improve their livelihoods. The initiative was piloted in Patna, Vaishali, and Nalanda and extended to 70 blocks across 14 districts. By September 2024, 4846 enterprises had been sanctioned loan by the banks.

Housekeeping and Laundry

JEEVIKA has signed two key Memorandums of Understanding (MoUs) to broaden its service offerings. The first, signed in 2023, with the SC/ST Welfare Department, introduced cleanliness services in 87 SC/ST Residential Schools, benefiting around 700 households. The second, signed in 2024, with the Health Department, expanded these services to Maternal and Child Health Centers, District Hospitals, and Sub-Divisional Hospitals.

To support these initiatives, District Project Managers and Non-Farm Managers visited the BIMHAS Centre for Excellence in Cleanliness and Laundry Services in Koilwar. Operational since 2022, BIMHAS serves as a training and knowledge hub for these services. Additionally, district teams have assessed health institutions and SC/ST residential schools to ensure the effective rollout of cleanliness and laundry services.

Satat Jeevikoparjan Yojana

The State government launched the Ultra-Poor Graduation Programme in 2018. This initiative aims to create sustainable livelihood opportunities for ultra-poor households traditionally involved in producing, transporting and selling country liquor/toddy, as well as for ultra-poor individuals from SC/ST and other communities. The programme emphasizes livelihood diversification, capacity building and enhanced financial access.

Under the scheme, 2,01,218 households have been identified and trained to undertake income-generating activities, as illustrated in the table below. The initiative emphasizes building confidence and developing enterprise skills among these households. Upon completion of training, a Livelihood Investment Fund of up to Rs. 2 lakh is allocated to each targeted household for asset creation. A Livelihood Gap Assistance Fund is also provided as consumption support to meet the households' essential needs until their new livelihood ventures generate income.

Particulars	Cumulative Progress (Till Sept. 2024)
Number of endorsed ultra-poor HHs	2,01,218
Number of households trained on Confidence Building	1,96,107
Livelihood Investment Fund	1,85,646
Livelihood Gap Assistance Fund	1,71,603

The sustainability of this approach is reinforced through strategic integration with government programmes, ensuring that ultra-poor households gain access to essential entitlements, especially during crises like the COVID-19 pandemic. JEEVIKA has ensured that 100 percent of beneficiaries possess key documents, such as Aadhaar cards and bank accounts while securing food security through PDS and providing financial protection via insurance coverage, housing, drinking water and health care. As of September 2024, over 1.52 lakh households were considered safe and secure, with 17.42 lakh households ensuring access to safe drinking water. Additionally, around 1.61 lakh households were food secure under the PDS, and 1.69 lakh households were covered under Pradhan Mantri Suraksha Bima Yojana (PMSBY) and Pradhan Mantri Jeevan Jyoti Bima Yojana (PMJJBY).

The Graduation Indicators Assessment Survey, conducted in June-July 2023, assessed the progress of the second cohort of SJY beneficiary households after 18–24 months of asset-based enterprise support. Covering 1,917 households (79.87 percent of the target sample) across 35 districts, the survey used telephonic and in-person methods to ensure accuracy.

The survey confirmed the programme's sustainability by evaluating core and additional indicators six months after household graduation, which are as follows:

- **Livelihoods**: 57 percent pursued micro-enterprises, 21.68 percent mixed enterprises, 0.3 percent agriculture, and 20.95 percent livestock.
- **Income**: Annual incomes averaged Rs. 1 lakh for micro-enterprise households, Rs. 84,840 for mixed enterprises, Rs. 33,667 for agriculture, and Rs. 15,720 for livestock.
- **Savings**: 87.63 percent of households saved in bank accounts, with average monthly savings of Rs. 3,405.
- **Scheme Access**: Households accessed key schemes, including ration cards (82 percent), Nal-Jal Yojana (67 percent), E-Shakti/E-Shram (61 percent), pension schemes (60 percent), and PMAY (43 percent).

9.2 Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS)

The Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) aims to guarantee the right to work. The scheme annually ensures at least 100 days of unskilled wage employment to rural households. MGNREGS has been instrumental in addressing seasonal unemployment and providing social security, especially for marginalized communities, including SC and ST communities. The success of any scheme relies on its effective implementation, and the State government has ensured adherence to the operational guidelines and provisions of MGNREGS for its proper execution.

Table 9.7 : Performance of MGNREGS (2019-20 to 2023-24)

Indicators	2019-20	2020-21	2021-22	2022-23	2023-24
No. of households with Job Cards issued (lakh)	171.6	193.8	235.3	167.0	136.0
No. of households provided with employment (lakh)	33.7	51.0	48.0	50.2	48.2
No. of households obtaining 100 days of employment (lakh)	0.2	0.4	0.2	0.4	0.3
Employment generated (lakh person-days)	1416.2	2276.3	1811.8	2365.7	2205.3
Percentage share of women in total employment generated	55.9	54.6	53.2	56.4	54.3
Average employment per household (person-days)	42.0	44.7	37.8	47.2	45.8
Number of completed works (lakh)	4.6	9.9	13.0	10.9	6.3
Fund utilisation (percentage) as per MIS	93.5	97.9	98.1	97.4	96.5
No. of accounts opened (lakh)	83.1	87.4	104.9	92.4	88.4

Source: Department of Rural Development, GoB

The relevant information related to MGNREGS is provided in Table 9.7. It is clear from the data that job cards issued to households have decreased from 171.6 lakh in 2019-20 to 136.0 lakh in 2023-24. The number of households provided with employment has increased from 33.7 lakh in 2019-20 to 48.2 lakh in 2023-24. Employment generated has also massively increased from 1416.2 lakh person-days in 2019-20 to 2205.3 lakh person-days in 2023-24, an increase of 55.7 percent. The average number of days of employment per household (person-days) has fluctuated in the past five years.

The number of completed works under MGNREGS has constantly improved from 4.6 lakh in 2019-20 to 13.0 lakh in 2021-22. However, the same has declined from 10.9 lakh in 2022-23 to 6.3 lakh in 2023-24. The fund utilization under the scheme and the number of accounts opened have also fluctuated between 2019-20 and 2023-24. Fund utilization was highest in 2021-22 with 98.1 percent as per MIS and 96.5 percent in 2023-24. Similarly, 104.9 lakh accounts (the highest) were opened under the MGNREGS in 2021-22 and 83.1 lakh (the lowest) in 2019-20. The number of accounts opened further dropped from 92.4 lakh in 2022-23 to 88.4 lakh in 2023-24.

Source: Department of Rural Development, GoB

The progress of MGNREGS at the district level from 2021-22 to 2023-24 is detailed in the Statistical Appendix (Tables A 9.1 and A 9.2). East Champaran (7.4 lakh) and Samastipur (7.0 lakh) issued the highest number of job cards among all the districts (2023-24). The number of job cards issued declined from 189 lakh in 2021-22 to 136 lakh in 2023-24, reflecting a 28 percent decrease. Gaya (36.2 percent), Aurangabad (32.7 percent), and Supaul (31.2 percent) recorded the highest percentage share of SC households among those with job cards. There was an overall 1.5 percent decline in the share of SC households with job cards from 2021-22 to 2023-24. The share of households with job cards demanding employment surged significantly from 20.7 percent in

2021-22 to 45.4 percent in 2023-24. Jehanabad (65.1 percent), Sheohar (61.6 percent), and Saharsa (68.2 percent) exhibited high demand for employment among households with job cards.

The share of households obtaining 100 days of employment increased from 0.1 percent in 2021-22 to 0.7 percent in 2023-24. Sheohar and Saharsa districts achieved the highest proportion (1.8 percent) of households getting 100 days of employment. The total person-days of employment generated in the state rose significantly from 954.3 lakh in 2021-22 to 2205.4 lakh in 2023-24, showing an increase of 131.1 percent. Gaya (127.5 lakh) and East Champaran (114.7 lakh) recorded the highest person-days of employment generated, while Nalanda, Samastipur, and Saharsa each generated more than 90 lakh person-days of employment. The share of women in the total employment generated exceeded 50 percent in most districts, with exceptions such as Patna, Bhojpur, Buxar, Rohtas, Kaimur, Arwal, Aurangabad, Gopalganj, and Bhagalpur. Overall, the share of women in the total employment generated improved from 53.4 percent in 2021-22 to 54.3 percent in 2023-24. The data indicates significant progress in several metrics under MGNREGS, despite declines in some areas. Notable increases in employment demand and person-days of employment generated underscore the programme's critical role in supporting rural livelihoods.

The data show that the implementation of MGNREGS is consistent across districts, with most districts effectively utilizing the available funds. The overall fund utilization in the state from 2021-22 to 2023-24 exceeded 97.0 percent. Additionally, the availability of funds has shown an improvement, increasing from Rs. 4,31,117.8 lakh in 2021-22 to Rs. 8,04,331.4 lakh in 2023-24, reflecting a growth of 86.6 percent (Table A 9.3).

Note : Figure in parenthesis indicate percentage share to total.
Source: Department of Rural Development, GoB

Table 9.8 details the completed works under MGNREGS. The majority of the work was carried out under the category of individual land development (73.9 percent), followed by rural connectivity (6.5 percent), water conservation and harvesting (5.3 percent), and micro-irrigation works (5.2 percent). All other categories of work under MGNREGS had a marginal share in the total work completed in 2023-24 (Chart 9.6).

9.3 Pradhan Mantri Awas Yojana-Gramin (PMAY-G) and Homestead Land Distribution Scheme

The Pradhan Mantri Awas Yojana - Gramin (PMAY-G) was launched in 2016 to provide "Housing for All" in rural India by 2024. The scheme focuses on constructing pucca houses with basic amenities for households living in kaccha houses. Beneficiaries are identified through the Socio-Economic and Caste Census (SECC) 2011 data, ensuring targeted and inclusive implementation.

Under PMAY-G, the Central and the State governments share the cost of housing in a 60:40 ratio. Each beneficiary receives financial assistance of Rs.1.20 lakh in plains and Rs.1.30 lakh in hilly or difficult areas (North-Eastern Region States and Hill States of Himachal Pradesh, Uttarakhand, Union Territories of Jammu & Kashmir, and Ladakh). The scheme also promotes convergence with other government programmes to provide facilities such as toilets, electricity, and clean cooking fuel.

Further, Access to land and secure ownership, including the right to build a house on that land, is a fundamental human right. Providing homestead land to landless individuals, particularly those from backward classes, ensures their right to own land and empowers them to construct their homes, fostering dignity and socio-economic stability. Table 9.9 presents the budget allocation and expenditure for the distribution of homestead land.

Table 9.9 : Budget Allocation and Expenditure for Distribution of Homestead Land (2021-22 to 2023-24)

Information	2021-22	2022-23	2023-24

For 2023-24, a budgetary provision of Rs. 200 lakh was made, with Rs. 197 lakh allocated. Under the scheme, 18,297 homeless families from the Extremely Backward Classes (EBC) and 10,058 from the Backward Classes (BC) were surveyed. Among them, 14,617 EBC and 7,789 BC families have been provided land.

In 2023-24, Rs. 204.56 lakh was allocated for the Scheduled Caste Sub Plan (SCSP). A total of 15,075 Scheduled Caste and 69,658 Mahadalit homeless families were surveyed. Of these, 11,436 and 59,003 families, respectively, were provided land, leaving 3,639 and 10,655 families landless.

Similarly, Rs. 21.7 lakh was allocated under the Tribal Sub-Plan for 2023-24. Of the 4,225 surveyed homeless ST families, 3,352 were provided with land.

The Abhiyan Basera Programme in Bihar is an initiative to provide housing rights to economically weaker sections, particularly landless and homeless families. The programme ensures secure ownership of homestead land, enabling beneficiaries to construct their homes. It emphasizes addressing the socio-economic challenges of marginalized groups, including SC / ST / BC (schedule 1) and BC schedule II).

Table 9.10 : Category–wise Eligible Households and Beneficiaries of Abhiyan Basera (2019-20 to 2023-24)

Source: Department of Revenue and Land Reforms, GoB

Currently, the department is implementing the Abhiyan Basera-2 programme, which involves conducting a fresh survey of eligible landless families. Details of eligible households and beneficiaries under the Abhiyan Basera scheme from 2019-20 to 2023-24 are presented in Table 9.10. The share of beneficiaries in percentage across different scheme components has consistently

increased over the past five years. Among Backward Castes I and II, the share of beneficiaries rose from 69.7 percent and 64.5 percent in 2019-20 to 79.9 percent and 77.4 percent in 2023-24, respectively. For SC and ST, the share grew from 63.9 percent and 64.9 percent in 2019-20 to 75.9 percent and 84.7 percent in 2023-24, with the highest improvement observed among Scheduled Tribes. For the Mahadalit category, there was an increase of nearly 9 percent, from 70.9 percent in 2019-20 to 79.3 percent in 2023-24.

The land revenue collected in the State has nearly doubled, rising from Rs. 208.7 crore in 2019-20 to Rs. 410.1 crore in 2023-24, reflecting an impressive increase of 96.5 percent. Additionally, the number of beneficiaries has consistently grown. Notably, the land area distributed by the State government under the scheme has significantly expanded from 433.1 acres in 2019-20 to 4,829.7 acres in 2023-24. This demonstrates the State government's strong commitment to uplifting vulnerable sections of society (Chart 9.7).

Table 9.11 : Land Revenue and Area distributed to the beneficiaries by the State Government for Homestead Land (2019-20 to 2023-24)

Items	2019-20	2020-21	2021-22	2022-23	2023-24

9.4 Public Distribution System (PDS)

The Bihar State Food and Civil Supplies Corporation Ltd., established in 1973 under the Companies Act of 1956, operates under the Food and Consumer Protection Department of the Government of Bihar. It manages one of India's largest Public PDS with 49,400 outlets, distributing essential commodities like wheat and rice to beneficiaries under the Antyodaya and National Food Security Act. As the nodal agency for implementing PDS in Bihar, the corporation has introduced the e-PDS system to enhance transparency, ensure accountability, and prevent irregularities in the distribution process.

The Public Distribution System is a shared responsibility between the Central and State governments. It was introduced to manage and distribute essential food grains, addressing malnutrition among the poor. Designed as a supplementary scheme, PDS provides basic commodities at subsidized rates, including wheat, rice, and pulses. The Central government oversees the procurement, storage, transportation, and allocation of commodities to the states. In contrast, State governments are tasked with identifying eligible families, issuing ration cards, and managing the operation of Fair Price Shops.

Considering social and economic backgrounds, the strategic allocation of Fair Price Shops (FPS) and PDS benefits is critical for promoting social harmony and uplifting marginalized and disadvantaged communities within the State. Ensuring the allotment of FPS according to social background helps maintain societal harmony and fosters inclusivity. Data presented in Table 9.12 provides aggregated information on PDS shop ownership by social background within the State. The number of PDS outlets increased from 48,512 in 2021 to 49,400 in 2024. The share of SC and BC PDS outlet ownership has risen from 18.7 percent and 27.5 percent in 2022 to 19.0 percent and 27.9 percent in 2024, respectively. For other categories, the percentage share remains largely unchanged compared to previous years.

Appendix Table A 9.4 provides district-wise details of the social profile of PDS dealers. The total number of sanctioned FPS in the State is 53,165, out of which 49,400 are operational. 3,765 sanctioned FPS were vacant, accounting for 7 percent of the total sanctioned FPS. Notably, Bhojpur, Saran, and Sheohar districts have no vacant fair-price shops, whereas Bhagalpur (387) and West Champaran (318) have the highest number of vacant FPS in the State.

Table 9.12 : Social Background of PDS Dealers (2022 to 2024)

Social Groups of PDS Dealer	No. of PDS Outlets			Percentage Distribution		
	2022	2023	2024	2022	2023	2024
Scheduled Caste	9058	9113	9407	18.7	18.6	19.0

The Food Corporation of India (FCI) ensures the food quality and quantity of supply in the state. Data on allotment and lifting of wheat and rice between 2019-20 and 2023-24 is presented in Table 9.13. Overall, in the last five years, the average lifting was more than 97 percent recorded in the State. The highest lifting was in 2019-20 and 2023-24, more than 99 percent of total lifting. A total of 1086.7 and 3924.9 thousand tonnes of wheat and rice has been allotted in 2023-24, in which 1079.9 and 3911.5 thousand tonnes of wheat and rice have been lifted, which is around more than 99 percent of the total allotment.

Table 9.13 : Allotment and Lifting of Wheat and Rice under PHH+AAY (2019-20 to 2023-24)

(Fig. in '000, tonnes)

Year	Total allotment (PHH+AAY)			Total lifting (PHH+AAY)			Total lifting (%) (PHH+AAY)
	Wheat	Rice	Total	Wheat	Rice	Total

The Food Corporation of India (FCI) ensures an adequate supply of food grains to the State government. District-wise allotment and lifting of wheat and rice for 2023-24 are detailed in Appendix Table A 9.5. Among the 38 districts of the State, 28 districts achieved a 100 percent

lifting of wheat, while 27 districts reached the same for rice. The lowest lifting of wheat was recorded in Kaimur (90.4 percent), Arwal (94.2 percent) and Vaishali (95.4 percent). For rice, the lowest share of lifting was observed in Arwal (95.9 percent) and Vaishali (94.4 percent).

The Food Corporation of India (FCI) is crucial in ensuring food security by consistently supplying food grains to the state governments. It procures wheat and rice from farmers at Minimum Support Prices (MSP), ensuring fair prices and stabilizing incomes. FCI allocates food grains to PDS and welfare schemes, ensuring efficient transportation and timely distribution. It stabilizes market prices during shortages and acts as a buffer stock provider during emergencies, thereby supporting the nation's food security.

To combat malnutrition across the country, the Government of India has incorporated Fortified Rice into the PDS and welfare schemes such as the Integrated Child Development Services (ICDS) and the Mid-Day Meal Scheme. Fortified Rice Kernels (FRK), enriched with essential nutrients like iron, folic acid, and vitamin B-12, are blended with regular rice in a 1:100 ratio during milling. This initiative aims to ensure the delivery of vital nutrients to beneficiaries, thereby improving overall health outcomes.

To enhance efficiency and transparency in the PDS, several measures have been implemented:

- Fully autonomous creation of store issue orders and automated matching of shopkeepers' payments with the bank account for food grain purchases.
- Electronic weighing machines are installed for accurate measurement of food grains supplied to shopkeepers.
- Use of GPS and load cells in transport vehicles as per Section 12(2)(e) of the National Food Security Act, with real-time monitoring from control rooms at district offices and headquarters.
- Automatic SMS notifications to inform beneficiaries about food distribution.
- Ensuring transparency and accountability through the Management Information Systems (MIS) under Article 12(2)(a) of the National Food Security Act.
- A dedicated help desk for resolving technical issues and computerized management of food grain inventory in warehouses.

9.5 Panchayati Raj Institutions (PRI)

Panchayati Raj Institutions (PRIs) play a crucial role in decentralized governance in Bihar, ensuring participation at the grassroots level. Bihar implemented the three-tier PRI system, which focused on rural development, poverty alleviation, education, health, and infrastructure

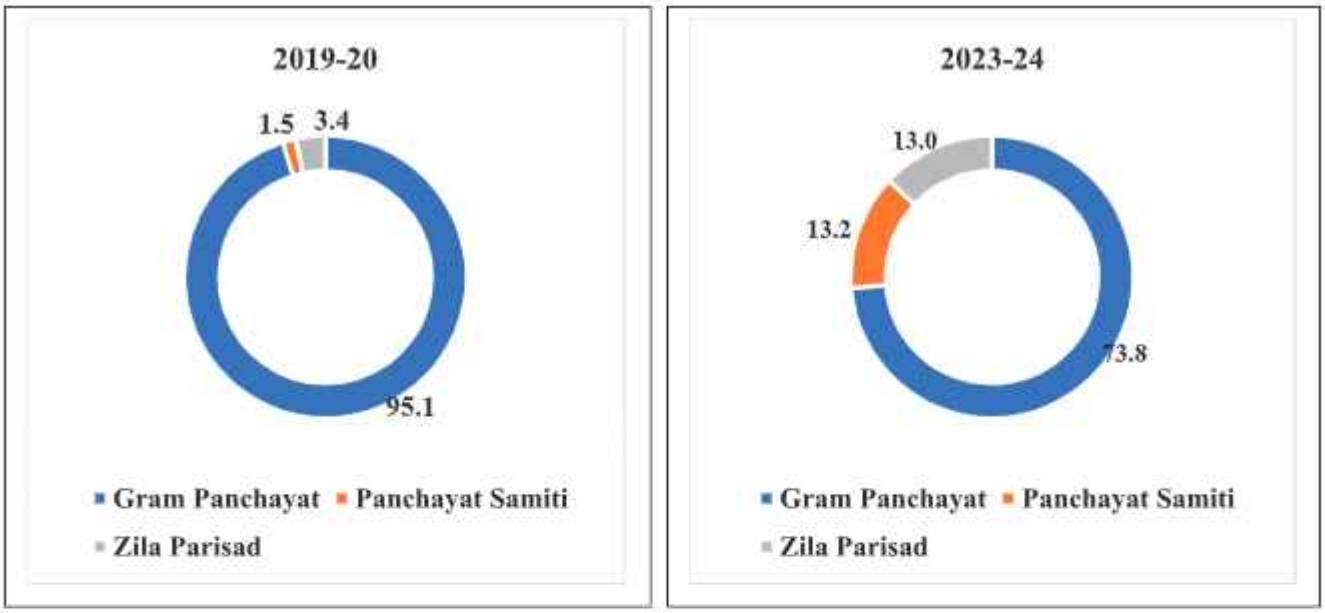
enhancement. Regular elections ensure democratic functioning, with reservations for SC, ST, BC and women to ensure inclusivity. Participation of local people from different social categories improves transparency and efficiency in the functioning of PRIs. These institutions act as a bridge between the government and rural communities, driving development and empowering local populations. Table 9.14 shows the number of Zila Parishad (38), Panchayat Samiti (533), and Gram Panchayat (8053), including other functionary members of PRIs in 2024.

Table 9.14 : Overview of Panchayati Raj Institutions in Bihar (2024-25, up to Sept. 2024)

Item	No.	Item	No.
Zila Parishad	38	Gram Panchayat Secretary	8053
Panchayat Samiti	533	Nyaya Mitra	5826
Gram Panchayat	8053	Gram Kachahari Secretary	6656
Gram Panchayat Members	109321	Zila Panchayati Raj Officers	38
Panchayat Samiti Members	11094	Block Panchayati Raj Officers	442
Zila Parishad Members	1160	Gram Kachahari Members	109321

Source: Department of Panchayati Raj, GoB

Chart 9.8: Percentage share of Expenditure at different Levels of PRIs (2019-20 to 2023-24)



Source: Department of Panchayati Raj, GoB

Expenditure at different PRI levels is a vital indicator of the scope of work undertaken and fund utilization at each level. Previously, most expenditure was concentrated at the Gram Panchayat level. Over the years, however, it has become more evenly distributed across all three system levels.

As depicted in Chart 9.8, in 2019-20, Gram Panchayats utilized 95.1 percent of the total funds, while Zila Parishads and Panchayat Samitis accounted for only 3.4 percent and 1.5 percent,

respectively. By 2023-24, the distribution had shifted significantly, with Gram Panchayats utilizing 73.8 percent, Zila Parishads 13.0 percent, and Panchayat Samitis 13.2 percent of the total funds. Table 9.15 illustrates the expenditure and percentage share across different levels of PRIs from 2019-20 to 2023-24. The data reveals a significant increase in total spending after 2021-22, rising by 38.3 percent from Rs. 7,234.7 crore in 2021-22 to Rs. 10,007.6 crore in 2023-24.

Table 9.15 : Level of Expenditure in PRIs at Different Levels (2019-20 to 2023-24)

(Rs. crore)

Level of PRIs	2019-20	2020-21	2021-22	2022-23	2023-24
Gram Panchayat	8124.3 (95.0)	5898.9 (75.2)	4793.0 (66.3)	5804.1 (72.0)	7383.9 (73.8)
Panchayat Samiti	131.3 (1.5)	1163.6 (14.8)	922.0 (12.7)	1123.5 (13.9)	1321.91 (13.2)
Zila Parishad	294.0 (3.4)	779.9 (9.9)	1519.7 (21.0)	1130.7 (14.0)	1301.78 (13.0)
Total	**8549.6 (100.0)**	**7842.4 (100.0)**	**7234.7 (100.0)**	**8058.3 (100.0)**	**10007.6 (100.0)**

Note: Figures in the parentheses indicate percentage share to total
Source: Department of Panchayati Raj, GoB

The expenditure at various PRI levels serves as a crucial indicator of fund utilization and the extent of work accomplished at each respective level. It reflects the effective utilization of allocated funds and the scope of developmental activities.

1. **Gram Panchayat**: At the grassroots level, Gram Panchayats primarily focus their expenditure on local infrastructure, drinking water supply, sanitation, and rural development programmes. Between 2019-20 and 2023-24, expenditure at the Gram Panchayat level declined by 9.1 percent. However, from 2021-22 to 2023-24, it saw a significant increase of 54.0 percent (Table 9.16).
2. **Panchayat Samiti**: This intermediate tier concentrates on block-level schemes such as education, health, and agricultural support, ensuring effective coordination among multiple Gram Panchayats. Expenditure at the Panchayat Samiti level witnessed a substantial increase of 906.8 percent from 2019-20 to 2023-24 (Table 9.17).
3. **Zila Parishad**: At the district level, Zila Parishads manage larger projects such as road connectivity, district-wide welfare initiatives, and monitoring resource allocation for subordinate tiers. Expenditure at this level also increased significantly, by 342.8 percent from 2019-20 to 2023-24 (Table 9.18).

Efficient expenditure at each level is essential for achieving developmental goals and addressing local needs effectively.

Table 9.16 : Details of Expenditure in PRIs at Gram Panchayat Level (2019-20 to 2023-24)

(Rs. crore)

			2019-20	2020-21	2021-22	2022-23	2023-24

Panchayat Sarkar Bhawan

To provide efficient services (both online and offline) to rural citizens at their doorstep while minimizing costs and delays, improving infrastructure at Panchayat Sarkar Bhawans (PSBs) is of paramount importance. This is particularly crucial in Bihar, where Gram Panchayats have limited revenue sources and require infrastructural support to deliver services that meet the expectations of rural citizens. The installation of 10 kW rooftop solar plants on each PSB is proposed to promote clean and green energy and reduce pollution. The surplus electricity generated will be fed directly into the grid network. The credits earned from this excess electricity generation will help offset future electricity bills, thereby contributing to Panchayats' own source revenue. A total amount of Rs. 1000.00 crore is being provided to the Local Area Engineering Organization (LAEO) from the State Plan head in 2023-24 to construct PSBs. Further, for the implementation of this scheme, Rs. 636.00 crore has been made available from the State Plan head in 2024-25. Simultaneous efforts are being made to construct PSBs and develop adequate infrastructure. As of September 2024, 1,474 PSBs have been completed, and 1,463 have been handed over to the respective Panchayats (Table A 9.7).

Gram Kachaharis in Bihar

Following the 73rd Constitutional Amendment in 1992, the Bihar government enacted the Bihar Panchayat Raj Act, 1993, and later the Bihar Panchayat Raj Act, 2006. These Acts introduced a three-tier Panchayati Raj structure, comprising Gram Panchayat, Panchayat Samiti, and Zila Parishad. Additionally, Bihar has taken a progressive step by establishing Gram Kachaharis (village courts) at the Gram Panchayat level to provide affordable and accessible justice for rural communities.

To empower Gram Kachaharis and strengthen the judicial system at the grassroots, the State government has implemented continuous measures. With the assistance of village court secretaries and Nyaya Mitras (legal friends), many local disputes are resolved effectively. Most local disputes in villages are now being settled through Gram Kachaharis which are authorized under the Bihar Panchayat Raj Act, 2006, to handle specific civil and criminal cases.

- **Criminal Jurisdiction**: Under Section 106 of the Act, Gram Kachaharis can adjudicate offenses under 40 bailable sections of the Indian Penal Code.
- **Civil Jurisdiction**: As per Section 110, Gram Kachaharis are empowered to hear and resolve civil disputes.

Between 2021-22 and 2023-24, Gram Kachaharis successfully executed 69,725 out of 83,657 civil cases and 62,111 out of 71,160 criminal cases.

Providing 50 percent reservation to women in PRIs has significantly increased the representation of women Panchayats in Gram Kachaharis. In 2006, women comprised 46.99 percent of total Panchs and Sarpanchs, which rose to 59.55 percent in 2021, strengthening the protection of women's rights at the Panchayat level.

For the honorarium of elected representatives of the three-tier PRIs and Gram Kachaharis, Rs. 266.00 crore was allocated in 2023-24. Additionally, Rs. 201.00 crore was provided for the honorarium and ex-gratia grants for Gram Kachahari Secretaries and Nyaya Mitras. Further, Rs. 8.00 crore was allocated for contingency expenses of Gram Panchayats and Gram Kachaharis during the same period.

Implementation of Saat Nishchay-2 of Atmanirbhar Bihar-2 (2020-2025)

Saat Nishchay-2 (Seven Resolves) of Atmanirbhar Bihar-2 (2020-2025) programmes are currently under implementation. They include:

(a) **Solar street light scheme:** The scheme emphasizes on creating clean and prosperous villages by providing solar street lights in all villages of the State to ensure better lighting and promote sustainable energy. A robust maintenance mechanism will also be established to ensure uninterrupted functionality. In 2023-24, a total allocation of Rs. 392 crore has been approved for the scheme.

(b) **Solid and liquid waste management**: Comprehensive arrangements for managing solid and liquid waste will be implemented at the village level. Regular cleaning of drains and streets will be conducted at the ward level. Solid waste will be collected from households and disposed of using modern and appropriate technologies.

(c) **Solar water pump system**: Under the Mukhyamantri Grameen Peyajal Nishchay Yojana, the goal is to provide safe drinking water to all rural households through individual tap connections. Infrastructure such as water tanks, pumps, and distribution networks has already been developed. Initially managed by the Ward Implementation and Management Committee (WIMC), the scheme is now overseen by the Public Health Engineering Department (PHED). The Panchayati Raj Department is responsible for electricity to operate the pumps. Solar-powered water pump systems are proposed to address the rising costs of conventional energy sources. These systems offer significant advantages, including reduced dependence on diesel and electricity, low maintenance costs and long operational life, ensuring sustainability and cost-effectiveness for rural water supply.

(d) **Maintenance of existing infrastructure**: Under this programme, infrastructure developed under Saat Nishchay-1, including household tap water connections, paved lanes and drains, and household toilets, will be fully maintained and remain operational. For 2023-24, Rs. 200 crore has been allocated to Gram Panchayats for implementation, maintenance and monitoring of Mukhyamantri Gramin Gali-Nali Pakkikaran Nishchay Yojana and Mukhyamantri Gramin Peyajal Nishchay Yojana. The progress achieved under the Ghar Tak Pakki Gali-Nali (Gramin) initiative, as given in Table A9.6, highlights the State government's efforts to enhance the quality of life in rural areas.

9.6 Shyama Prasad Mukherjee Rurban Mission (SPMRM)

The "Shyama Prasad Mukherjee Rurban Mission" was launched in 2015-16 to develop 300 Rurban clusters across India, with 11 clusters identified in Bihar. These clusters, located in rural areas, are experiencing urban-like growth but lack civic facilities. They aim to foster economic and infrastructural development by creating robust infrastructure, reducing unemployment, and encouraging investment.

In Bihar, the Integrated Cluster Action Plan (ICAP) and Detailed Project Reports (DPRs) for most clusters have been approved. Supplementary funding is provided through the Critical Gap Fund (CGF), capped at 30 percent of project costs or Rs. 30 crore, with a 60:40 cost-sharing between the Centre and State.

From 2020-21 to 2024-25 (up to September 2024), the number of proposed works surged from 579 to 2,623, with Rs. 52.3 crore spent under the CGF in 2024-25. Notable initiatives include constructing science and computer labs, kitchen sheds, solar streetlights, and RO water filters. Till September 2024, 827 projects were completed, reflecting significant progress in the mission (Table 9.19).

Table 9.19 : Physical and Financial Progress of Rurban Mission in Bihar (2020-21 to 2024-25, up to September 2024)

CHAPTER - X

URBAN DEVELOPMENT

Abstract

Bihar, one of India's most populous states, is undergoing rapid urbanization, although its urbanization rate remains at 11.3 percent (Census 2011), which is significantly lower than the national average of 31.2 percent. To tackle urban challenges and improve infrastructure, the State government has substantially increased the budget by 227.3 percent. Key initiatives include projects under Atmanirbhar Bihar Saat Nishchay-2, such as storm water drainage systems, Mokshdham construction, shelters for the elderly, and the Mukhyamantri Shahri Peyajal Nishchay Yojana. The State government initiated the Mukhyamantri Samagra Shahari Vikas Yojana in 2024-25. Additionally, the Patna Master Plan 2031 — covering an area of 1,167 square kilometers and encompassing seven urban areas — aims to improve urban planning and infrastructure. Other major projects include the expansion of the Metro Rail system in four key cities of the state. The Smart City Mission has been allocated Rs. 640 crore for 2024-25. The Central government programmes such as DAY-NULM (Deendayal Antyodaya Yojana - National Urban Livelihoods Mission), and the National Mission for Clean Ganga are being implemented. Furthermore, Bihar is committed to achieving the objectives of the Swachh Bharat Mission Urban 2.0 and AMRUT 2.0 to improve urban sanitation, cleanliness, and infrastructure. These comprehensive efforts underscore Bihar's dedication to fostering sustainable and inclusive urban development.

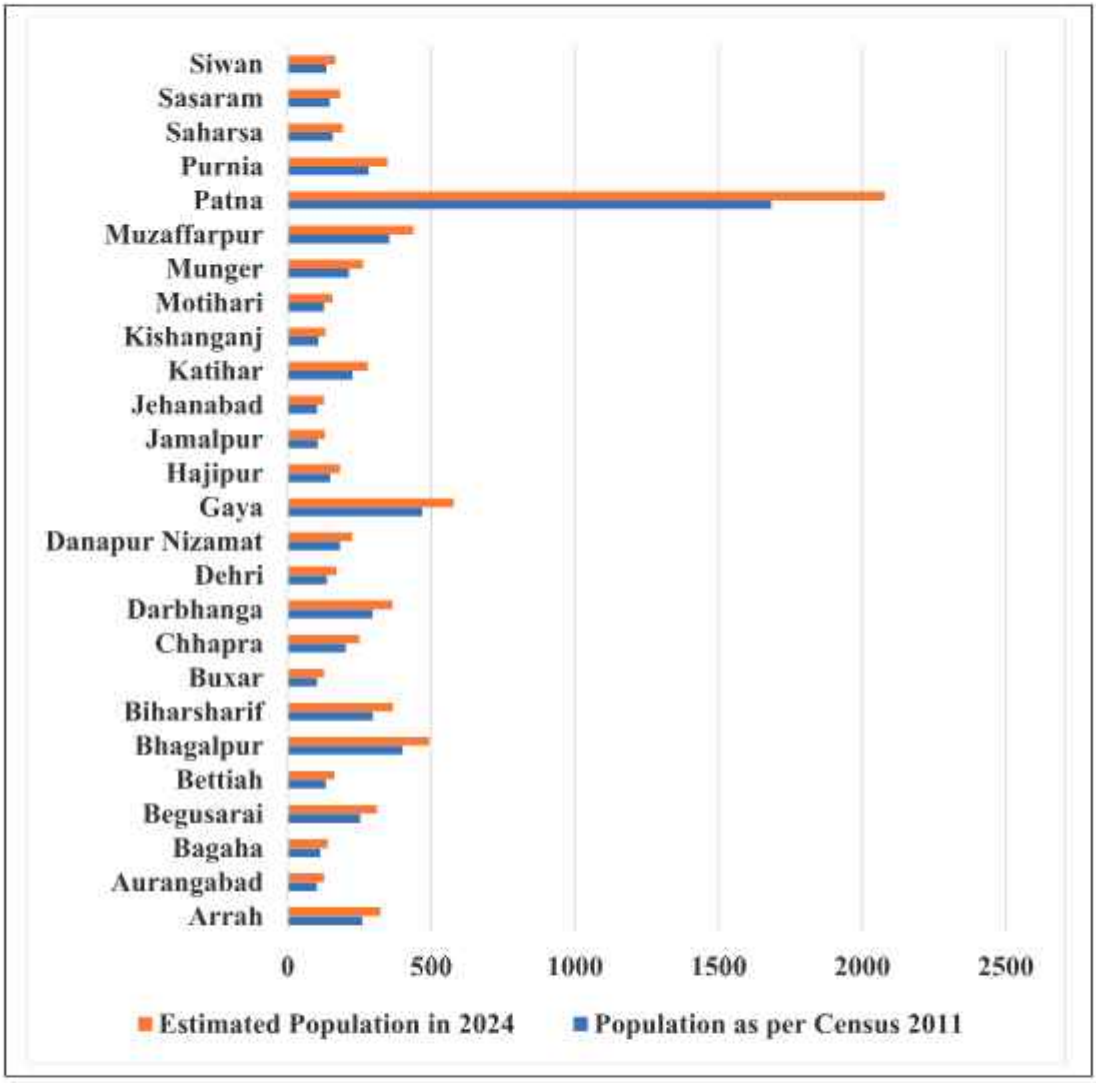
Introduction

In recent years, several initiatives of the State government have given a strong impetus to the urbanisation process in Bihar. The first step in this process was the major reorganisation of jurisdictions of Urban Local Bodies (ULBs), followed by the adoption of multiple developmental activities started in the reorganised ULBs. Along with different Centre-sponsored schemes of urban development, the State government's Saat Nishchay-2 has envisaged many schemes to create amenities and infrastructure for urban dwellers. In this chapter, a detailed account of the recent developments related to urbanisation is presented.

Urban development is critical for fostering economic growth, improving quality of life, and alleviating poverty. However, due to geographic and economic factors, the level of urbanization varies significantly across different districts of Bihar.

Chart 10.1 illustrates the city-wise projected urban population in Bihar, showing that Patna has the highest increase in urban population in numbers, rising by 395 thousand (from 1684 thousand to 2079 thousand) between 2011 and 2024, followed by Gaya where the population grew by 110 thousand (from 469 thousand to 578 thousand) (Appendix Table A 10.1).

Chart 10.1 : City-wise Urban Population in 2024 Projected from Census 2011



Source : Office of the Registrar General & Census, GoI

10.1 Reorganization of Urban Local Bodies

In Bihar, a major reorganization occurred in 2021 and this process has continued alongside the establishment of relevant institutional structures. As of 2024, 116 Gram Panchayats have been fully incorporated into Nagar Panchayats, while 25 Gram Panchayats have been included in Nagar Parishads. Additionally, 45 Gram Panchayats have been partially integrated into Nagar Panchayats, and 12 Gram Panchayats have been partially included in Nagar Parishads. This reorganization has resulted in an increase of 3.85 lakh people in urban areas.

During February 2021 to June 2021, in Bihar, one Nagar Panchayat has been fully upgraded into Nagar Nigam, while 33 Nagar Panchayats have been upgraded into Nagar Parishads, seven Nagar Parishads have been upgraded into Nagar Nigam. Nine Nagar Parishads and 111 Nagar Panchayats

have been newly created. Now there are 261 Urban Local Bodies (19 Nagar Nigams, 88 Nagar Parishads, and 154 Nagar Panchayats) in Bihar. This reorganization has altered the jurisdiction for 10.8 lakh people in Bihar. The population of various municipal bodies in Bihar is presented in Chart 10.2. Following the reorganisation, based on the population data of the 2011 Census, 66.1 lakh people fell under the jurisdiction of Nagar Nigams, 58.4 lakh people came under the jurisdiction of Nagar Parishads, and 33.9 lakh people began residing in Nagar Panchayats (see Chart 10.2). Details regarding the district-wise establishment of 120 new Nagar Panchayats and Parishads are provided in Appendix Table A 10.2.

Table 10.1 : Number and Population of Gram Panchayats Upgraded to New Area Council or Included in Existing Notified Area Councils (2023-24)

10.2 Atmanirbhar Bihar Saat Nishchay-2

Storm Water Drainage Scheme

Waterlogging in urban areas poses significant challenges for residents. To tackle this issue, the State government has implemented the Storm Water Drainage Scheme. The Department of Urban Development and Housing is actively addressing the problem through the construction of drainage systems. Under the Chief Minister's Urban Drainage and Lane Paving Scheme, small drains are being constructed throughout the cities.

In the initial phase of the scheme, priority was given to municipal corporation areas. Consequently, administrative approval has been granted for nine projects designed to alleviate the waterlogging problem in Patna and its surrounding regions. To address the waterlogging issue in Patna city, projects have been approved for the installation of new drainage pumps, construction of drains, cleaning of existing drains, and the installation of pumps and motors at drainage pumping stations. The estimated cost of implementing the Storm Water Drainage Scheme is Rs. 957.51 crore. To further expand this initiative, 11 additional cities have been included. The approved budget for these projects amounts to Rs. 1,034.68 crore.

This scheme is currently being implemented at various locations in Bihar. In this context, stormwater drainage plans have been approved to resolve waterlogging issues in the cities of Saharsa, Sasaram, Madhubani, Supaul, Chhapra, Katihar, Darbhanga, Phulwarisharif, Barh, and Mokama, with implementation overseen by the Bihar Urban Infrastructure Development Corporation (BUIDCO).

Under the Saat Nishchay-2, the implementation of the scheme is sourced from two primary channels: allocations designated by the 6th State Finance Commission and allocations made within the State Plan. According to Table 10.3, the total project cost for 25 projects amounts to Rs. 2646.37 crore, of which Rs. 1218.11 crore has been disbursed. Additionally, a total provision of Rs. 145.12 crore has been allocated for drain construction in the financial year 2024-25.

Mokshdham Yojana

The State government has approved the construction of crematoriums in 39 cities and at important river ghats. For this purpose, the State government has allocated Rs. 234.16 crore for 39 ULBs. Of this, Rs. 67.51 crore has already been released. Table A 10.3 provides a detailed breakdown of the allocated and released amounts.

Table 10.3 : Details of the Stormwater Drainage Scheme for Water Drainage from Patna and nearby areas under the Atmanirbhar Bihar Saat Nishchay-2 (2023-24)

Construction of Stormwater Drainage System		Source of Funding	Total Project Costs (Rs. crore)	Fund released (Rs. crore)

Construction of Shelter for Old-age People

The State government has launched the Mukhyamantri Vruddhajan Ashray Sthal Yojana. This scheme aims to provide a healthy and dignified life for destitute, neglected, and helpless elderly individuals in urban areas by offering shelter and other amenities. For this, in 2023-24, the State government has allocated Rs. 19.68 crore to the municipal bodies across the state. The scheme aims to offer comprehensive solutions to the challenges encountered by elderly citizens in need, regardless of their economic status. This initiative ensures that they have access to essential services such as healthcare, entertainment, yoga, skill development for livelihood, and opportunities for participation in various activities.

(i) Under this scheme, each district headquarters will operate a shelter for the elderly, with 100 beds divided into two units of 50 beds each.

(ii) A government building will be selected for the shelter. If no government building is available, a rented facility will be chosen.

(iii) The shelter will operate 24 hours a day, 365 days a year. Beneficiaries will be provided with food that ensures an average intake of 1,700 calories and 50 grams of protein each day, focusing on quality and variety. Additionally, the residents will receive clothing and other daily essentials, which will be given within 24 hours of their arrival.

A total provision of Rs. 20.00 crore has been made under the scheme for the financial year 2024-25.

Mukhyamantri Samagra Shahari Vikas Yojana

With rapid urbanization in the state, the need for robust infrastructure development has become critical. Although the 74th Constitutional Amendment empowered ULBs and facilitated some progress, current efforts remain inadequate. To address this issue, the State government is launching the Mukhyamantri Samagra Shahari Vikas Yojana in 2024-25. This initiative emphasises on an integrated approach, prioritizing the construction and renovation of wide roads equipped with drainage systems, development of parks, beautification of ghats, and improvements of reservoirs. The goal is to achieve holistic and accelerated urban development throughout the state. Priority will be given to municipal roads that connect highways and serve larger populations, and drainage systems in waterlogged areas that link to the outfall channels.

Additional features will include tree planting, constructing parking spaces, footpaths, street lighting, underground cabling, and installing dividers where feasible. The renovation of lakes, ponds, parks, and ghats will also be prioritized.

A district-level action plan will allocate three times the budget during the first two years (2024-25 and 2025-26). Starting in the third year, annual guidelines will be aligned with the available

funding. Roads in proximity to tourist attractions, hospitals, and educational institutions will be prioritized, and public transport facilities will be integrated.

Under the scheme, an allocation of Rs. 500 crore will be made annually for 2024-25 and 2025-26 from the state plan. The Urban Development and Housing Department will distribute these funds on a district basis and further allocate them among urban bodies according to their population. The funds will be utilized through the Bihar Urban Development Agency (BUDA) or BUIDCO, with the procedures established in consultation with the Finance Department.

To prevent duplication, 251 selected schemes under the scheme will exclude those that are already included in other departmental or scheme proposals. If any work listed as a priority is executed under another scheme during a financial year, it will be removed from the priority list.

Mukhyamantri Shahri Peyajal Nishchay Yojana : The Mukhyamantri Shahri Peyajal Nishchay Yojana aims to provide access to potable water within the household premises in the urban areas of Bihar. The scheme has nearly achieved its target. As of September 2024, 18.47 lakh households have received water connections within their premises, and only 75,000 households remain to be connected. It is important to note that, in the past, 4000 households have declined the water pipeline connections offered under this scheme. The primary responsibility for implementing the scheme rests with the ULBs and BUIDCO. Together, these two agencies have executed the scheme in 3158 wards out of 3398, providing piped water connections to 14.58 lakh households. The Public Health Engineering Department (PHED) also served as an implementing agency for the scheme.

Table 10.4 : Some Features of Mukhyamantri Shahri Peyajal Nishchay Yojana (2020-21 to 2024-25, up to September 30, 2024)

(in lakh)

Year	Total no. of household	No. of households in which water pipeline			No. of households connected to water pipeline	Work started (out of 3398 wards)
		was available before the implement-ation of Yojana	is to be connected under the Yojana	has been installed under the Yojana (cumulative)

2022-23	19.22	3.26	15.85	14.82	17.78	3370
2023-24	19.22	3.26	15.81	15.17	18.43	3370
2024-25 (up to September, 2024)	19.22	3.26	15.81	15.21	18.47	3370

Source : Department of Urban Development and Housing, GoB

Bihar State Housing Board

The Bihar State Housing Board is governed by the Bihar State Housing Board Act, 1982 and the Bihar State Housing Board (Management and Disposal of Residential Real Estate) Rules, 1983.

The Housing Board has made significant progress in revenue collection over the past year, leading to a substantial increase in its income. In 2021-22 and 2022-23, the total revenue receipts were Rs. 49.15 crore and Rs. 51.41 crore, respectively. In 2023-24, revenue receipts reached Rs. 63.26 crore. For 2024-25, the revenue target is set at Rs. 73.80 crore. Furthermore, the Board contributed Rs. 2.00 crore to the Chief Minister's Relief Fund in 2021-22 and Rs. 5.00 crore in 2022-23.

In line with the Affordable Housing Project (AHP), the construction of housing for the Economically Weaker Sections (EWS) and the Lower Income Group (LIG) is mandatory, and shelter fund fees are collected. The number of houses approved for EWS is 2,430 and that for LIG is 855. Moreover, 192 building plans have been approved, and 52 No Objection Certificates (NoCs) have been issued for petrol pump installations. The authority has collected Rs. 2.12 crore in shelter fees and Rs. 4.15 crore in building fees.

Town and Country Planning Organisation (TCPO)

The State government has commenced the preparation of master plans for all district headquarters, cities with populations exceeding one lakh, and other significant cities within the state. In this context, planning areas have been designated, and Planning Area Authorities have been established to develop GIS-based master plans for 44 cities.

Out of the 44 designated Planning Areas in the state, the GIS-based Master Plan for the Patna Planning Area has been officially notified. It is currently being implemented by the Patna Metropolitan Area Authority. The master plans for the remaining 25 notified Planning Areas are in the process of development.

The State government has completed GIS-based mapping for 29 cities. Additionally, it will prepare GIS-based maps for 26 municipal areas and conduct property surveys in those regions. Currently, the preparation of GIS-based maps for 28 cities is underway. Simultaneously, GIS-based property surveys have been conducted in 15 cities. The government is also getting 183 cities mapped. Furthermore, the Department of Urban Development and Housing has designated 82 assistant town planning supervisors to assist in the preparation of GIS-based mapping and the development of GIS-based master plans.

Patna Metropolitan Area Authority

The Patna Master Plan 2031 is being implemented by the Patna Metropolitan Region Authority. The plan encompasses an area of 1,167 square kilometers, which includes seven urban areas:

Patna Municipal Corporation, Danapur Municipal Council, Khagaul Municipal Council, Phulwari Municipal Council, Maner Nagar Panchayat, Naubatpur Nagar Panchayat, and Fatuha Nagar Panchayat, along with 575 revenue villages. Additionally, it comprises 13 CD blocks, of which 3 are complete blocks (Danapur Khagaul, Patna Rural, and Phulwari) and 10 are partial blocks (Bihta, Dhanarua, Daniyawan, Fatuha, Khusrupur, Maner, Masaurhi, Naubatpur, Punpun, and Sampatchak).

As part of the map approval process in the Patna Metropolitan Region, 6,401.14 square meters of land have been transferred to the relevant authority.

Rainwater Harvesting and Artificial Recharge of Ground Water

Rainwater harvesting involves the collection and storage of rainwater for future use, which helps reduce surface runoff and conserve water. This sustainable method effectively addresses water scarcity, particularly in regions with irregular rainfall patterns. Common techniques for rainwater harvesting are rooftop harvesting, soak pits, and storage tanks. Artificial recharge of groundwater enhances the natural replenishment of aquifers. This method helps mitigate declining groundwater levels, prevents over-extraction, and supports sustainable water management, particularly in urban and drought-prone areas. Such practices are essential for ensuring water security and promoting environmental sustainability.

The Department of Urban Development and Housing has implemented several measures to enhance groundwater levels in urban areas. Table 10.5 highlights initiatives such as renovation of wells, construction of soak pits, and installation of rooftop rainwater harvesting systems in municipality-owned buildings. Among these initiatives, the highest achievement against the target was recorded for the construction of soak pits near public hand pumps, reaching 84.8 percent. This was followed by the installation of rooftop rainwater harvesting systems in 76.4 percent of municipal buildings, and renovation was done in 75.6 percent of the public wells (see Chart 10.3).

Table 10.5 : Achievements under Rainwater Harvesting and Artificial Recharge of Ground Water in 38 ULBs (2019-24)

Particular	Target	Achievement	Achievement (%)
Renovation of public wells (number)	5087	3845	75.6
Construction of soak away near public wells (number)	4723	3002	63.6
Construction of soak away near public hand pump (number)	12105	10263	84.8
Rooftop rainwater harvesting work in buildings owned by the municipal body (number)	513	392	76.4

10.3 Centre and State-specific Urban Development Programme

Deendayal Antyoday Yojana – National Urban Livelihoods Mission (DAY-NULM)

Deendayal Antyodaya Yojana – National Urban Livelihoods Mission (DAY-NULM) has been implemented in all municipal bodies since 2016. This initiative provides free skill training to urban poor youth, along with shelter for the urban poor and designated vending zones for street vendors. The primary objective of the scheme is to create self-employment opportunities for poor people. Since 2015-16, 51,560 young men and women have received training. Of these, 37,296 trainees have undergone assessment and certification, and 12,214 trainees have successfully secured employment.

The number of SHGs formed under DAY-NULM was 5154, with 48296 new members added in 2023-24. Furthermore, during the same period, 181 Area-Level Federations (ALFs) and four City-Level Federations were established. Moreover, 3,653 SHGs have received a Revolving Fund (RF). The achievement under the Financial Inclusion and Self-Employment Programme is presented in Table 10.7.

Table 10.6 : Achievement under DAY-NULM (2019-20 to 2023-24)

Parameter	2019-20	2020-21	2021-22	2022-23	2023-24

Support to Urban Street Vendors (SUSV)

Apart from identifying street vendors in urban areas through a socio-economic survey, the Support to Urban Street Vendors (SUSV) programme aims to provide logistical and financial assistance to street vendors. The activities undertaken by SUSV include helping vendors open savings accounts, organising financial literacy camps and conducting various training programmes. Furthermore, through SUSV, street vendors have also benefited from credit card access and insurance schemes.

To safeguard the interests of footpath vendors, the "Bihar State Footpath Vendors (Livelihood Protection and Sale Regulation) Rules, 2017" and the "Bihar State Footpath Vendors (Livelihood Protection and Sale Regulation) Scheme, 2017" have been enacted. Town Vending Committees (TVCs) have been established in all municipal bodies. Vending zones have been approved in 17 municipal bodies to accommodate the surveyed shopkeepers. Currently, one vending zone is operational in Bhagalpur, 16 in Patna, and one each in Buxar, Motihari, Darbhanga, and Bihiya, with three zones in Sitamarhi.

The State government has been conducting a biometric socio-economic survey of street vendors in 141 cities, which continued in 2023-24. As of 2023-24, the survey has been completed for 1,91,978 street vendors, and 1,66,436 vendors have received their ID cards. During this period, 4,512 savings accounts were opened, and 120 financial literacy camps were organised. Additionally, 5,875 vendors have been trained through capacity-building initiatives. Furthermore, 8,321 street vendors have been linked to the insurance scheme.

The stated objectives of Prime Minister Street Vendor's AtmaNirbhar Nidhi (PM SVANidhi) are: (i) to facilitate working capital loans of up to Rs. 10,000; (ii) to incentivise regular repayment; and (iii) to reward digital transactions. For the first loan, the total number of eligible applications was 1,97,130 (cumulatively), and loans were disbursed for 1,23,694 eligible applications. As of September 2024, the number of second and third loans obtained by eligible applicants was 24,575 and 3,257, respectively.

Table 10.8 : Details of Support to Urban Street Vendors (2019-20 to 2023-24)

Parameter	2019-20	2020-21	2021-22	2022-23	2023-24
Survey of Street Vendors (Cumulative data)					
No. of cities to be covered for Street Vendor Survey	98	98	141	141	141

Housing for All (Urban) HFA

To address the housing problem, the Pradhan Mantri Awas Yojana offers financial assistance to the families living in urban areas to construct houses. Under the Beneficiary-led Individual Housing (BLC) scheme, financial support is offered to the beneficiaries, who privately own land, to construct a new house. Each beneficiary receives a grant of Rs. 2.00 lakh, shared in a 75:25 ratio, with Rs. 1.50 lakh contributed by the Central government and Rs. 50,000 by the State government. The construction of the house is to be carried out by the beneficiary. Table 10.11 indicates that the total expenditure was Rs. 3893.21 crore up to September 2024.

Table 10.10 : Physical Achievement of Work under Pradhan Mantri Awas Yojana (Up to September, 2024)

Physical Details	Number
Towns Covered	142

Approval has been granted for the construction of 69 new shelters for homeless individuals across various municipal bodies. Of these, 54 are currently operational, and five are under construction. Tenders for the remaining 10 shelters have been issued.

The State government has allocated Rs. 46.45 crore to municipal bodies for the repair and operationalization of existing night shelters and the construction of new ones. Renovation work has already been completed in 54 night shelters, which are now operational. Additionally, in urban areas, the operation of these shelters has been integrated with the Area-Level Organization (ALO) for women to ensure better management and support.

National Mission for Clean Ganga

In Bihar, solid waste management, sewerage networks, interception and diversion systems, drainage (including STP), riverfront development, and crematoria were funded under the National Mission for Clean Ganga (NMCG). Among these projects, only the ones related to interception and diversion drainage (including STP) received Rs. 139.49 crore in 2023-24 and Rs. 356.99 crore in 2024-25 (up to September 2024). However, work on the other projects in 2023-24 was funded through allocations made in the previous years. The total expenditure for 2023-24 amounted to Rs. 473.77 crore. Specifically, the expenditures for the sewerage network and the interception and diversion drainage (including STP) work were Rs. 279.95 crore and Rs. 190.74 crore, respectively. In 2024-25 (up to September 2024), the total expenditure was Rs. 188.90 crore.

Table 10.12 : Sanctioned Amount under Different Projects of National Mission for Clean Ganga (2019-20 to 2024-25, up to September 2024)

(Rs. crore)

Project	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25 (up to September 2024)

Swachh Bharat Mission Urban 2.0

The Swachh Bharat Mission (Urban) 2.0 was launched on October 2, 2019, and will continue until October 1, 2026, with the goal of making municipal bodies garbage-free. The mission comprises five crucial components: first, construction of Individual Household Latrines (IHHL), Community Toilets (CT), Public Toilets (PT), and Aspirational Toilets/Urinals; second, Solid Waste Management; third, Used Water Management; fourth, providing Information, Education, and Communication; and lastly, Capacity Building. In the first phase of the Swachh Bharat Mission Urban Scheme, 4,23,800 toilets were constructed.

IHHL/Community/Public Toilet : The construction of Individual Household Latrines (IHHL), Community Toilets, Public Toilets, Aspirational Public Toilets, and Urinals are vital parts of this mission. These projects aim to ensure that urban populations have access to safe and hygienic sanitation facilities, essential for public health and dignity.

Solid Waste Management : Under the Solid Waste Management Rules of 2016, various initiatives are being implemented across all urban bodies. Significant advancements in waste management and sanitation have been achieved through the Swachh Bharat Mission and related programmes. Waste segregation at the source is actively practised, with specialized vehicles designated for the separate collection of dry and wet waste. Material Recovery Facilities (MRFs) and composting units have been established in several municipal bodies to facilitate waste processing. Public awareness campaigns engage women from SHGs to promote community participation. Six cities, including Muzaffarpur and Bodh Gaya, are being developed as Model Towns for comprehensive waste management. Efforts to remediate legacy waste are ongoing in several cities, and the 'Swachhangini Project' empowers women in slums by providing them with sewer cleaning training and equipment. All municipal bodies have now achieved Open Defecation-Free (ODF) status.

The Safai Mitra Suraksha Challenge was launched to safeguard sanitation workers, with an allocation of Rs. 16.52 lakh per entity designated for the construction of Material Recovery Facilities (MRF) and compost plants. Plans have been submitted to secure additional funding for sanitation and waste management projects. Proposals under the Integrated Solid Waste Management (ISWM) project include the establishment of waste-processing facilities through public-private partnerships, involving 161 entities organized into 20 clusters, while 100 others are managed independently.

Wastewater Management : Wastewater management under the Swachh Bharat Mission (Urban) 2.0 is another crucial area. This involves the development of infrastructure like Sewage Treatment Plants (STPs) and Faecal Sludge Treatment Plants (FSTPs) for cities with populations below one lakh. In addition, cesspool tankers are being introduced to facilitate emptying of septic tanks, which helps manage wastewater in areas lacking direct sewer connections.

Publicity and awareness drives/activities are designed to educate and inform the community about sanitation practices. Various media channels, including mass media, mid-media, digital platforms, and interpersonal communication, foster behavioural change and enhance public engagement.

Capacity Building : Capacity building is also an integral aspect of the mission, aimed at equipping sanitation workers, municipal officials (including Junior Engineers and Assistant Engineers), and women Self-Help Groups (SHGs) with the skills needed for effective waste management. This training focuses on improving their ability to perform their duties efficiently, ultimately strengthening the overall sanitation infrastructure and practices in urban areas.

Plastic Waste Management : In response to the Ministry of Environment, Forest and Climate Change's gazette notification banning single-use plastics, the Model Bihar Municipal Plastic Waste Management Bye-laws of 2018 have been revised to the Bihar Municipal Plastic Waste Management (Revised) Bye-laws of 2022, which all municipal bodies are required to adopt. The revised bye-laws prohibit the manufacturing, import, storage, transport, sale, and use of plastic carry bags and single-use plastics, including items such as plastic balloon sticks, cutlery, thermocol decorations, and plastic wrapping films. Violators will face fines for non-compliance.

Special Environmental Squads have been established in 138 municipal bodies to enforce a ban on the dumping of plastic in historical, religious, public places as well as along rivers and drains, and to prohibit the open burning of plastic waste. Additionally, 141 city squads are actively working to prevent the production and sale of plastic by conducting raids and seizing plastic waste.

National Action for Mechanized Sanitation Ecosystem (NAMASTE) : The National Action for Mechanized Sanitation Ecosystem (NAMASTE) project was launched in 2023. This project aims to prioritize the safety, dignity, and well-being of sewer and septic tank workers (SSWs). The

components of NAMASTE are: health insurance coverage under the Ayushman Bharat - Pradhan Mantri Jan Arogya Yojana (AB-PMJAY), occupational safety training for SSWs; upfront capital subsidies for the procurement of sanitation-related vehicles and equipment, provision of personal protective equipment (PPE) kits for SSWs, safety devices for Emergency Response Support Units (ERSUs), and an information, education, and communication (IEC) campaign to raise awareness about the safety and dignity of SSWs.

Clean Survey 2023

The Patna Municipal Corporation has secured first place in the Cleanest City category among cities with populations exceeding one lakh in the state. Additionally, it has been awarded the highest *Water+* certification under the Open Defecation-Free category and has received a one-Star Rating under the Garbage-Free City initiative. In 2022, Patna ranked 38th out of 45 cities in India with populations over 10 lakh. However, in 2023, it improved to 77th place out of 446 cities nationwide. Among the cities along the Ganges river, Patna ranked 12th, Barhaiya 14th, and Sultanganj 15th. The Supaul Municipal Council, which has a population of under one lakh, was recognized in the Cleanest City category and received a one-Star Rating under the Garbage-Free City initiative. Overall, 85 municipal bodies in Bihar have been certified ODF, 56 have received ODF certification, and Patna is the only municipal body to have earned the Water+ certification.

Atal Mission for Rejuvenation and Urban Transformation (AMRUT)

The AMRUT (Urban) 2.0 scheme, launched in 2021, aims to promote a self-reliant India. This scheme focuses on providing a continuous drinking water supply to every household in all municipal bodies across the state. Additionally, it emphasizes on water conservation, the revival of water sources, the recycling and reuse of treated wastewater, rainwater harvesting, and enhancing the aesthetics of cities by developing green spaces and well-organized open areas, such as parks. Sewerage and septage connections will also be provided in the older AMRUT cities of the state. The total project fund for AMRUT 2.0 is Rs. 2628.00 crore. The funding criteria are based on the size of the city population. The State government's contributions to AMRUT 2.0 are as follows: for cities with populations exceeding 10 lakh, the State government will cover 75 percent of the project cost. For cities with populations between 1 lakh and 10 lakh, two-thirds of the project cost will be borne by the State government. For cities with population below one lakh, the State government will provide 50 percent of the project costs. Under AMRUT Mission 2.0, master plans can be developed for 50 cities in the state with populations ranging from 50,000 to 1,00,000. Currently, planning areas for 16 cities within this category have been designated, and efforts are underway to make the Planning Area Authorities operational.

Under the AMRUT scheme, 36 water supply projects have been approved across 21 municipal bodies, with an estimated cost of Rs. 2260.06 crore. Of these, 20 projects have been completed. To date, Rs. 2117.0 crore has been spent on implementing these water supply schemes.

Three stormwater drainage schemes have been approved for Patna, Bhagalpur, and Muzaffarpur, with an estimated cost of Rs. 237.99 crore. The stormwater drainage projects in Bhagalpur and Patna, specifically the section from Beur to Mithapur, have been completed. To date, Rs. 109.20 crore has been spent on the implementation of these schemes.

Stormwater drainage projects were implemented in three cities, with a financial outlay of Rs. 240.03 crores. Out of these three projects, two have been completed. Under the state plan, work on the stormwater drainage scheme was initiated in 15 other cities, with a total administrative approval of Rs. 859.63 crores, of which two projects have been completed. Under the Atmanirbhar Bihar Saat Nishchay-2, stormwater drainage schemes were implemented in 13 cities, with an administrative approval of Rs. 2,031.32 crore. The work on these projects is under various stages of completion.

Under AMRUT 2.0, all municipal bodies have prepared City Water Balance Plans (CWBP) and uploaded them to the AMRUT-2.0 portal. For the financial year 2024-25, an allocation of Rs.1382.00 crore has been made under AMRUT 2.0 to facilitate the implementation of this ambitious initiative.

In 2023-24, total financial allocations made for the water supply scheme (Phases I and II), park development, and drainage scheme was Rs. 2586.3 crore. Of this allocated fund, 89.7 percent was spent on the water supply scheme (Phases I and II), implemented in 21 towns. The park development scheme was executed in 20 towns across Bihar, with a total cost of Rs. 31.1 crore (Table 10.14). The State government has allocated Rs. 30.48 crore for the same. As in some instances, land-related issues prevented the State government from implementing the project, resulting in the surrender of allocated funds. For the drainage scheme, the total allocation was Rs. 234.3 crore, representing nine percent of the overall allocation under AMRUT. The town-wise distribution of funds for the water supply schemes across AMRUT and AMRUT 2.0 is presented in Table A 10.4.

Table 10.14 : Allocations under AMRUT (2019-20 to 2023-24)

Year	Total Project Cost (Rs. crore)			
	Water Supply Schemes	Parks	Drainage Schemes	Total
2019-20	2320.9	36.3	234.3	2591.4
2020-21	2339.6	20.8	242.8	2603.2
2021-22	2219.9	30.8	234.3	2485.0
2022-23	2320.9	31.1	234.3	2586.3
2023-24	2320.9	31.1	234.3	2586.3

Smart City Mission

In Bihar, four cities - Bhagalpur, Muzaffarpur, Patna, and Biharsharif - have been designated for development as Smart Cities under the Smart City Mission. Development activities are currently underway in all four cities. For 2024-25, an allocation of Rs. 640.0 crore has been made. Under the Smart City Mission, the Central and State governments will share the costs equally, with each contributing Rs.100.00 crore per smart city over five years.

A total of Rs. 826.82 crore has been released to the Bhagalpur Smart City, which includes contributions from both Central and State governments. Patna has received Rs. 497.53 crore, Muzaffarpur has received Rs. 773.64 crore, and Biharsharif has received Rs. 729.40 crore. The details of the fund allocation across various towns and components are presented in Table 10.15.

Table 10.15 : Progress under SMART City (Up to September 30, 2024)

Towns/Components	Amount (Rs. crore)	Towns/Components	Amount (Rs. crore)
Patna		**Biharsharif**	
(i) Integrated Command Control Centre	288.24	(i) Integrated Command Control Centre	102.94
(ii) Construction of ICCC cum-PSCL Building		(ii) Construction of Flyover at Bharaopar	89.71
(iii) Adalatganj lake redevelopment	13.41	(iii) Strengthening of Road in ABD Area (Package-1,2,3)	52.91

10.4 Patna Metro Rail Project

The Patna Metro Rail Project has been initiated under a tripartite agreement signed between the Central government, the State government, and the Patna Metro Rail Corporation Limited. Both Central and State governments bear 20 percent each of the total project cost, while remaining 60 percent will be financed through a soft loan from an external financial institution, the Japan International Cooperation Agency (JICA). The cost associated with land acquisition, rehabilitation, and resettlement will be solely borne by the State government. Under this proposed project, two corridors have been selected for the Patna Metro. Corridor-I has a total length of 17.93 km, while Corridor-II is 14.57 km long.

The Patna Metro Rail project has made significant progress, as 78.02 acres of private land has been acquired, and the acquisition of the remaining 2.75 acres is underway. Additionally, NoC has been received for 17.15 acres of land owned by various departments of the Government of India and the State government.

As of now, Rs. 3402.09 crore has been allocated for the project, comprising Rs. 872.50 crore from the Central government and Rs. 2529.59 crore from the State government. For 2024-25, a provision of Rs. 380.00 crore has been made for the Project.

Metro Rail Proposal for four important cities of the state, namely, Muzaffarpur, Gaya, Darbhanga and Bhagalpur

Bihar's densely populated cities — Muzaffarpur, Gaya, Darbhanga, and Bhagalpur — are significant commercial, historical, and educational centers. The rapid population growth in these urban areas has intensified pressure on their transportation systems, leading to frequent traffic congestions and delays. To tackle these challenges, metro rail projects are proposed to enhance transportation efficiency, reduce pollution, and offer affordable mobility options in these urban centers. The proposed metro projects will adopt a funding model akin to that of the Patna Metro Rail Project, with the contribution of 20 percent each from the Central and State governments and 60 percent from external financial institutions.

The feasibility of operating metro rail systems in the four cities proposed by the department has been thoroughly studied and the State government approved the proposal in September 2024. The decision underscores the necessity for a safe, reliable, and cost-effective transportation system in these cities.

10.5 Expenditure on Urban Development

The financial allocation and expenditure of the Department of Urban Development and Housing are detailed in Table 10.19. The department's budget has substantially increased by 227 percent, rising from Rs. 3587.6 crore in 2019-20 to Rs. 11742.6 crore in 2023-24. Over the last five years,

the percentage of expenditure relative to the allocated budget has also shown significant improvement, increasing from 34.3 percent in 2019-20 to 77.4 percent in 2023-24, as illustrated in Table 10.16.

Table 10.16 : Financial Allocation and Expenditure of the Department of Urban Development and Housing (2019-20 to 2023-24)

(Rs. crore)

Year	Budget	Expenditure	Utilisation (percent)
2019-20	3587.6	1231.9	34.3
2020-21	4450.1	1949.7	43.8
2021-22	5786.6	2675.2	46.2
2022-23	4380.3	2345.2	53.5
2023-24	11742.6	9091.4	77.4

10.6 Municipal Finance

For municipal bodies, self-generated income and income from external sources are two major sources of revenue. Self-generated income can be derived from holding taxes, other taxes, and non-tax sources. Among these, holding taxes represent the largest contribution to the self-generated income. In 2023-24, holding taxes accounted for 70.9 percent of the total self-generated

income. The most significant external source of revenue was revenue grants, which contributed 76.8 percent to the total income from external sources in 2023-24. The data also suggest that the income-generating capacity of the municipal bodies is still limited, as only 20.5 percent of the total income of the municipal bodies was generated from their own sources in 2023-24. Major revenue expenditure heads are establishment cost and cost of operations or maintenance. In 2023-24, the share of revenue expenditure on establishment and operation in the total revenue expenditure was 68.5 percent. Furthermore, the municipal bodies received a capital grant of Rs. 1,45,209.6 lakh in 2023-24. The total capital expenditure incurred was Rs. 52014.4 lakh. Municipal bodies are far from achieving the goal of self-sufficiency in meeting the expenditure on establishment. The data suggests that the self-generated income could meet only 54.3 percent of the revenue expenditure on establishment.

Table 10.17 : Municipal Finances for 35 Towns in Bihar (2019-20 to 2023-24)

(Rs. lakh)

Indicator	2019-20	2020-21	2021-22	2022-23	2023-24

Advertisements and Other Policies

The Bihar Mobile Tower, Optical Fibre Cable (OFC), and related Telecommunication Infrastructure Rules, 2020, have been enacted to regulate and expand mobile towers, optical fibre cables, and telecommunication infrastructure within the state. Moreover, these rules aim to collect taxes and fees from telecom companies. As a result, there has been an improvement in telecommunication services and high-speed internet access for citizens. This development is also expected to boost the State government's revenue collection.

According to Section 127, sub-section (1)(g) of the Bihar Municipality Act, 2007, municipalities are permitted to levy taxes on advertisements, except those published in newspapers. To implement the provisions of the Bihar Municipality Act, 2007, and in accordance with Section 419 of the Act, the Bihar Municipal Area Advertisement Rules, 2023 have been finalized to regulate the display of advertisements and similar devices within the municipal areas throughout the state.

With the enactment of the Bihar Municipal Area Advertisement Rules, 2023, the display of advertisements in urban areas of the state will be regulated, resulting in increased revenue for municipalities.

CHAPTER - XI

FINANCIAL INSTITUTIONS

Abstract

Financial institutions play a crucial role in the economy by providing the necessary capital for growth and investment while facilitating financial transactions. With advancements in technology, these institutions have improved access to financing across the state through both bank branches and digital platforms. Between March 31, 2020, and March 31, 2024, the number of Customer Service Points (CSPs) in Bihar increased significantly from 20,994 to 57,589. During the same period, the number of full-service bank branches rose from 7,589 to 8,045. As of September 2024, banks in Bihar had collected deposits amounting to Rs. 5.27 lakh crore, while advances made by these institutions reached Rs. 2.97 lakh crore, resulting in a credit-deposit (CD) ratio of 56.3 percent. Furthermore, the Credit-to-Gross State Domestic Product (GSDP) ratio in Bihar has consistently increased over the past five years, rising from 27.5 percent in 2019-20 to 39.9 percent in 2023-24. For the 2023-24 financial year, banks in Bihar set a target for the Annual Credit Plan (ACP) at Rs.2.6 lakh crore, and the achievement was 96.3 percent. As of March 31, 2024, the percentage Non-Performing Asset ratios for the two largest bank groups in Bihar, Commercial Banks and Regional Rural Banks, stood at 5.9 percent and 23.8 percent, respectively.

Financial institutions play a crucial role in the economy, acting as the backbone that supports various financial activities. They provide essential capital at lower costs, facilitating investment opportunities across sectors and, thus, stimulating economic growth. Besides lending money, these institutions offer a range of services that streamline financial transactions, ensuring they are conducted through safe and regulated channels.

Technological advancements have significantly transformed the financial landscape, making it easier for individuals and businesses to access financing from formal sources. This digital revolution has simplified financial transactions and has profoundly impacted daily life by integrating financial services. Additionally, this has led to a substantial reduction in the costs associated with delivering banking services.

Financial institutions have increasingly shifted from traditional brick-and-mortar locations to a more versatile digital infrastructure. This transition allows them to serve a larger consumer base,

including those in remote areas while maintaining lower operational expenses. A notable example of this shift is the rapid increase in the use of the Unified Payments Interface (UPI), a real-time mobile payment system in India. Other advancements include the widespread adoption of Internet and mobile banking.

While credit availability from banks has increased in recent years due to the growth of economic activities in the state, financial institutions must continue to provide even more credit support. Formal financial institutions must enhance their credit availability for economic activities in Bihar, which will contribute to the region's overall development.

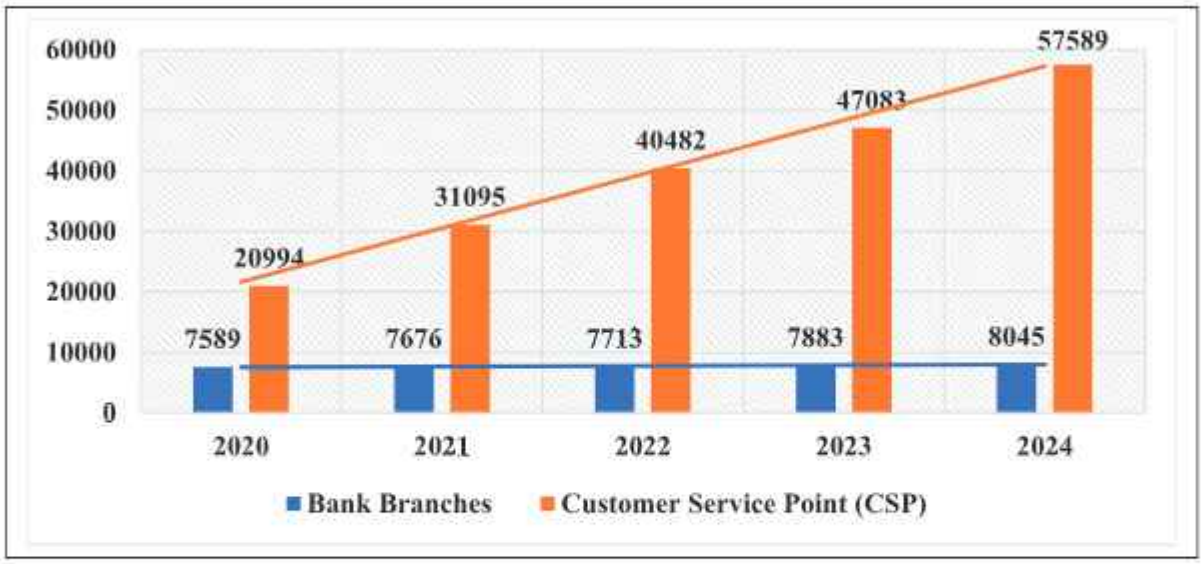
This chapter provides a comprehensive overview of financial institutions, including banks, in Bihar. It discusses their infrastructure and credit-deposit activities for the following types of institutions: (i) Public Sector Banks, (ii) Private Sector Banks, (iii) Regional Rural Banks (RRBs), (iv) Cooperative Banks, (v) Small Finance Banks (SFBs), (vi) Payments Banks, and (vii) Microfinance Institutions (MFIs). Additionally, the chapter presents the achievements of the Annual Credit Plans and the status of Non-Performing Assets (NPAs) for banks in the state. It also highlights the contributions of NABARD (National Bank for Agriculture and Rural Development) in Bihar.

11.1 Banking Infrastructure

The banks in Bihar have introduced innovative practices that have resulted in an improved access to their services. Customer services are provided through both physical and digital infrastructure. While the bank branches, ATMs and Customer Service Points (CSP) continue to deliver services through the physical presence of these institutions, the role of technology-based platforms like UPI, Mobile Banking, and Internet Banking has increased manifold. The low-cost extension of select banking services through the CSPs has increased manifold in the state.

The state's banking landscape is being driven primarily by a substantial rise in the number of CSPs or Bank Mitras rather than by the establishment of traditional full-service bank branches. Between March 31, 2020 and March 31, 2024, the number of CSPs in Bihar surged impressively from 20,994 to 57,589, marking an astounding growth rate of 174.3 percent over these five years (as illustrated in Chart 11.1). In stark contrast, the increase in full-service bank branches has been relatively modest, with their numbers climbing just 6.0 percent during the same timeframe - shifting from 7589 branches to 8045. These developments highlight a significant shift in how banking services are delivered, with CSPs as the primary means of expanding access to financial services across the state.

Chart 11.1 : No. of Bank Branches and CSPs in Bihar (as of March 31)



Source : State Level Bankers' Committee Report

Table 11.1 summarises banking infrastructure like Bank branches, CSPs, ATMs (Automated Teller Machines) and POS (Point of Sale) in Bihar from 2020 to 2024. In addition, the number of Internet Banking users, Mobile Banking users and ATM cards being used during the same period is also presented.

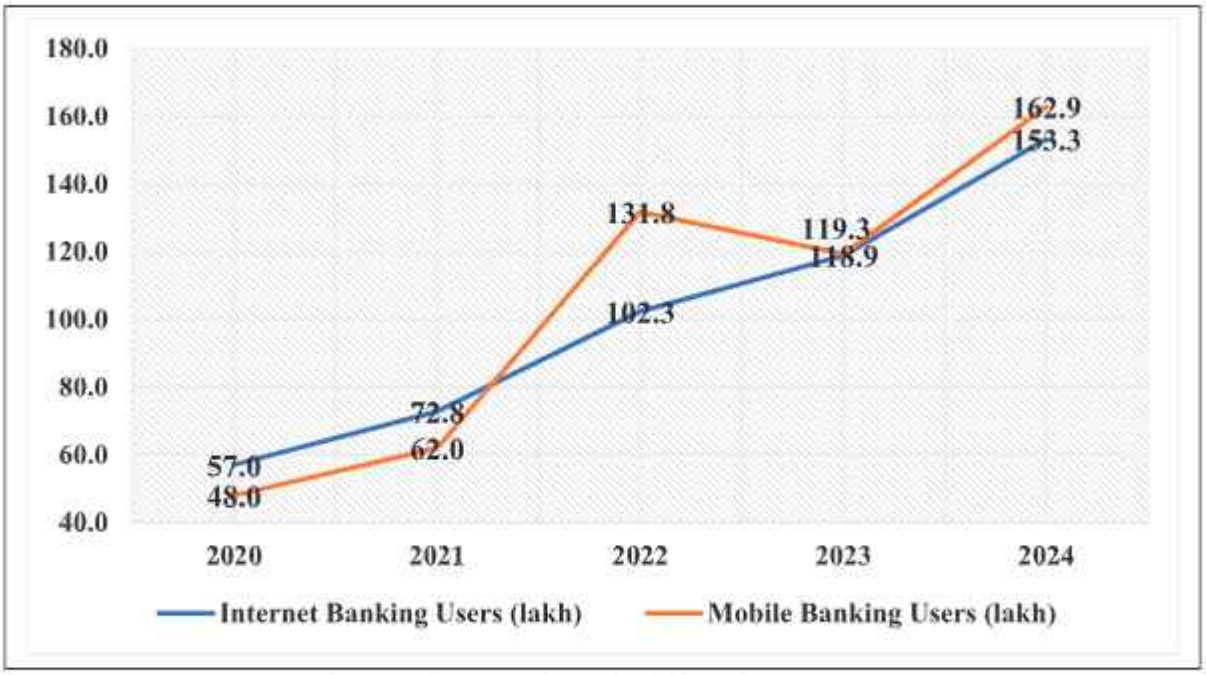
Table 11.1 : Banking Infrastructure in Bihar (2020 to 2024)

Heads	As of March 31,					Percentage change (2020 to 2024)
	2020	2021	2022	2023	2024	
Bank Branches	7589	7676	7713	7883	8045	6.0
Customer Service Point (CSP)	20994	31095	40482	47083	57589	174.3
Automated Teller Machine (ATM)	6529	6608	6744	7124	7052	8.0
Point of Sale (POS)	56832	58331	86489	82002	82907	45.9
Internet Banking Users (lakh)	57.0	72.8	102.3	118.9	153.3	168.9
Mobile Banking Users (lakh)	48.0	62.0	131.8	119.3	162.9	239.3
ATM cards (lakh)	609.1	650.0	729.1	720.1	864.0	41.9

Source : State Level Bankers' Committee Report

The data indicates a significant adoption of digital infrastructure-based banking services in Bihar over the past five years. The number of mobile banking users in the state rose from 48.0 lakhs on March 31, 2020 to 162.9 lakhs on March 31, 2024, reflecting an increase of 239.3 percent. Internet Banking users grew by 168.9 percent during the same period, from 57.0 lakhs to 153.3 lakhs. Additionally, the number of ATM cards issued and the number of POS machines operated by banks in Bihar increased by 41.9 percent and 45.9 percent, respectively. These trends demonstrate a growing reliance on technology-based banking services in the state compared to the earlier practice of visiting Bank branches or ATM centers.

Chart 11.2 : Internet Banking and Mobile Banking users in Bihar (2020 to 2024)



Source : State Level Bankers' Committee Report

Table 11.2 illustrates the bank category-wise distribution of Bank branches and the fixed CSPs engaged in the last four years. Bank category-wise distribution of Bank branches and CSPs as of March 31, 2024 is shown in chart 11.3. As of March 31, 2024, Commercial Banks have the largest network, with 5,308 branches in the state, followed by Regional Rural Banks (RRBs) with 2,105 branches. Cooperative Banks have 290 branches, and Small Finance Banks (SFBs) have 342 branches. The banking operations of India Post Payments Bank are conducted from post office premises or through 10,554 fixed CSPs as of the same date. On an average, Commercial Banks had 7.7 CSPs engaged per branch, while RRBs engaged 3.0 CSPs per branch.

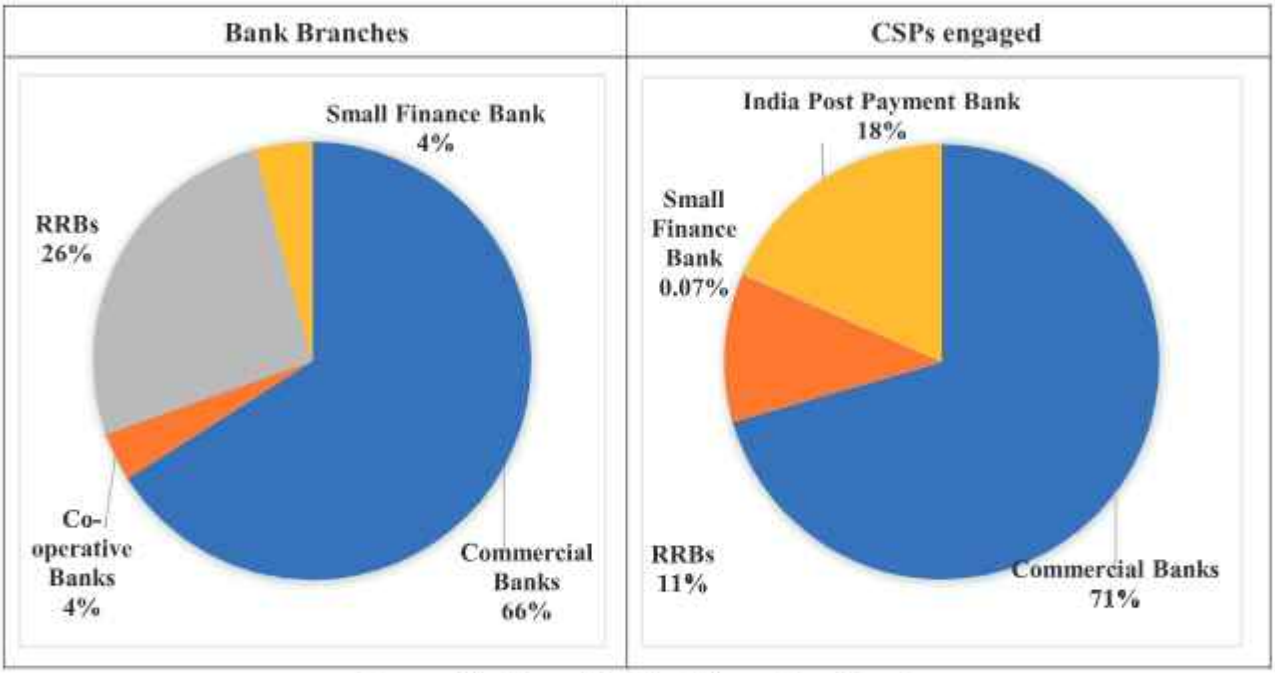
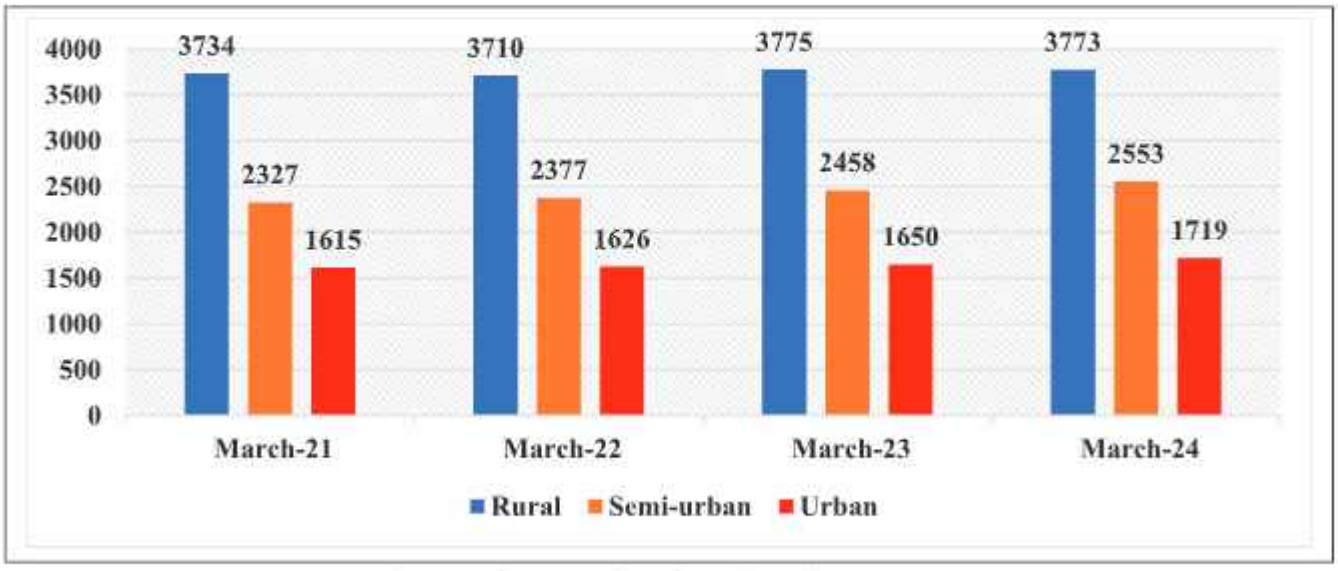
Chart 11.3 : Bank category-wise Distribution of Bank Branches and CSPs as on March 31, 2024



Source : State Level Bankers' Committee Report

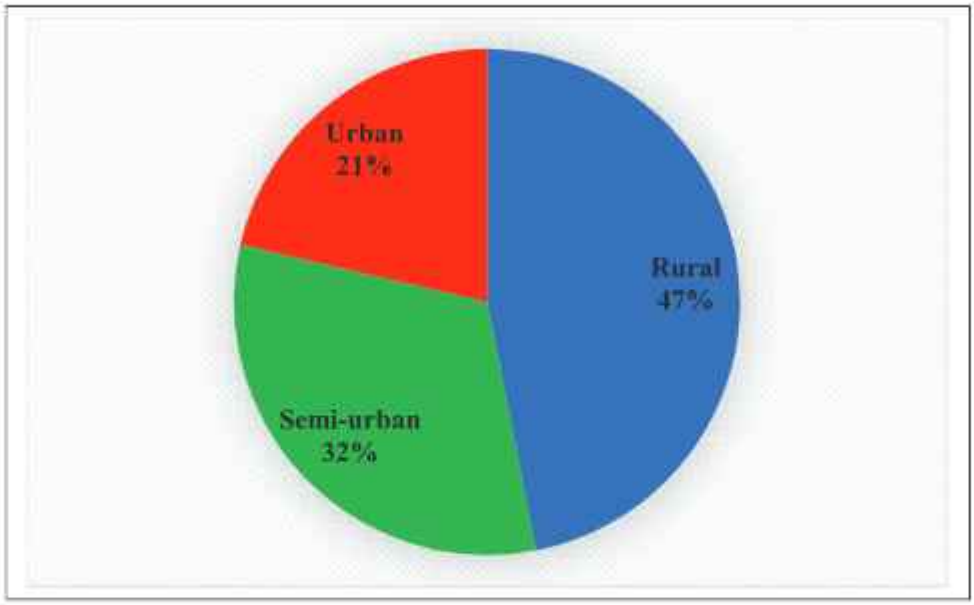
The area-wise distribution of Bank branches in Bihar from March 2021 to March 2024 is illustrated in Chart 11.4. As of March 31, 2024, the state has 8,045 Bank branches. Notably, 46.9 percent of these branches are located in rural areas, 31.7 percent are in semi-urban areas, and 21.4 percent are in urban areas. This distribution pattern reveals that banks have primarily expanded their presence in Bihar by opening new branches in semi-urban areas, followed by urban areas. The number of Bank branches in semi-urban areas has increased from 2,327 in March 2021 to 2,553 in March 2024, representing a growth of 9.7 percent. Meanwhile, the number of Bank branches in urban areas has risen 6.4 percent, from 1615 branches in March 2021 to 1719 branches in March 2024. The number of branches in rural area has increased by one percent during these years.

Chart 11.4 : Area-wise Distribution of Bank Branches in Bihar (March 2021 to March 2024)



Source : State Level Bankers' Committee Report

Chart 11.5 : Area-wise percentage distribution of bank branches in Bihar (as on March 31, 2024)



Source : State Level Bankers' Committee Report

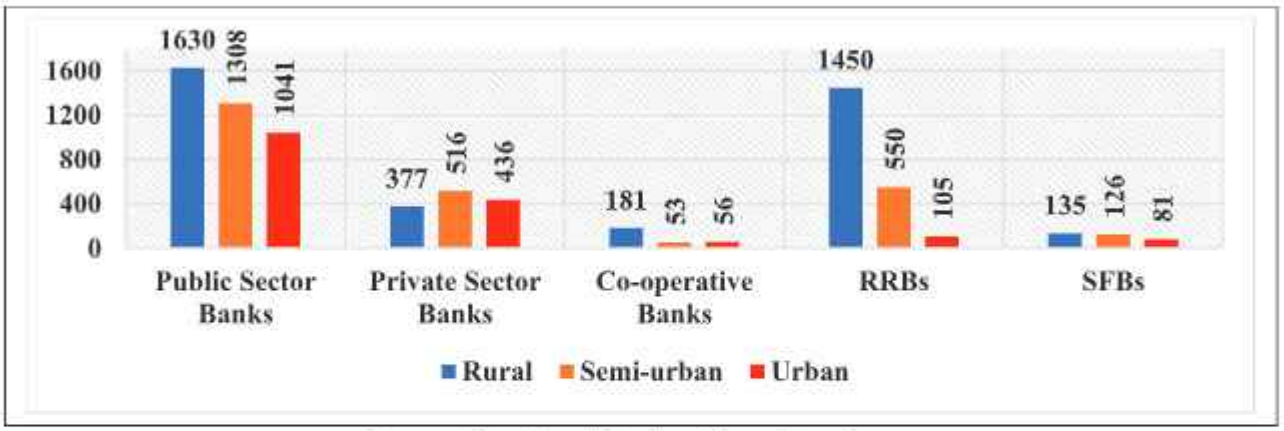
As of March 31, 2024, the distribution of Bank branches in Bihar across urban, semi-urban, and rural areas is presented in Chart 11.5. Rural areas account for 47 percent of the total Bank branches, followed by semi-urban regions with 32 percent and urban areas with 21 percent. Chart 11.6 details the Bank group-wise distribution of branches in the rural, semi-urban and urban areas as of March 31, 2024.

Public Sector Banks have the largest network in the state, comprising 3,979 branches. This is followed by Regional Rural Banks (RRBs) with 2,105 branches and Private Sector Banks with 1,329 branches. Co-operative and Small Finance Banks (SFBs) have 290 and 342 branches, respectively. In rural Bihar, Public Sector Banks own 43.2 percent of the branches, while RRBs account for 38.4 percent. In urban areas, 60.6 percent of branches belong to Public Sector Banks, and 25.4 percent are of Private Sector Banks.

The distribution of Bank branches by bank group in rural, semi-urban and urban of the state is as follows:

- Public Sector Banks have 41.0 percent of their branches in rural areas, 32.9 percent in semi-urban areas, and 26.2 percent in urban areas.
- RRBs focus significantly on rural areas, with 68.9 percent of their branches located there and 26.1 percent in semi-urban areas.
- Co-operative Banks have 62.4 percent of their branches in rural areas, 18.3 percent in semi-urban areas, and 19.3 percent in urban areas of the state.
- Private Sector Banks have 28.3 percent of their branches in rural areas, 38.9 percent in semi-urban areas, and 32.8 percent in urban areas.

Chart 11.6 : Area and Bank Group-wise Distribution of Bank Branches in Bihar (as on March 31, 2024)



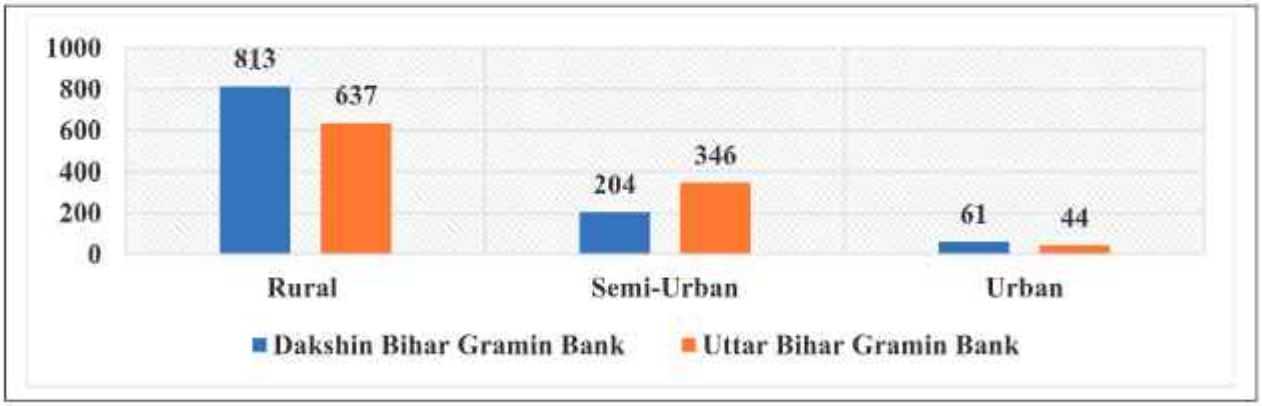
Source : State Level Bankers' Committee Report

Regional Rural Banks (RRBs)

Regional Rural Banks (RRBs) provide essential banking services to underserved populations, particularly in rural areas of Bihar. These regions often need more adequate access to the banking facilities offered by Scheduled Commercial Banks and other financial institutions. RRBs play a crucial role in supporting the economic activities of small and marginal farmers, artisans, and other economically weaker sections of society in these areas. Bihar has two Regional Rural Banks: Dakshin Bihar Gramin Bank and Uttar Bihar Gramin Bank. These banks offer various services, including savings accounts, loans, and financial literacy programs, which contribute to empowering the local population.

As of September 2024, the distribution of branches for Dakshin Bihar Gramin Bank and Uttar Bihar Gramin Bank across the state is illustrated in Chart 11.7. Out of a total of 2,105 branches of RRBs in Bihar, 1,078 branches (51.2 percent) belong to Dakshin Bihar Gramin Bank, while 1,027 branches (48.8 percent) belong to Uttar Bihar Gramin Bank. Among these two RRBs, Dakshin Bihar Gramin Bank has a more extensive network of branches in rural areas, with 813 branches compared to the 637 branches of Uttar Bihar Gramin Bank. In contrast, Uttar Bihar Gramin Bank has a larger presence in semi-urban areas, with 346 branches, while Dakshin Bihar Gramin Bank has 204 branches in these regions.

Chart 11.7 : Number of RRB Branches in Bihar (September, 2024)



Source : State Level Bankers' Committee Report

Although the rise of digital banking platforms has reduced the need for in-person visits to bank branches, having a local branch remains essential for meeting the credit requirements of individuals and businesses. Table 11.3 illustrates the distribution of the bank branch network among Scheduled Commercial Banks in major states of India from 2020 to 2024. As of March 31, 2024, Bihar accounts for only 4.9 percent of the total bank branches in India, which is less than its share of the national population. Additionally, the percentage of total bank branches in Bihar has remained unchanged over the past five years. This lower share of bank branches indicates that there are more people per branch in Bihar than in other states, underscoring the necessity of expanding the banking network in the state.

Table 11.3 : Distribution of Branches of Commercial Banks by States (2020 to 2024)

States	2020	2021	2022	2023	2024

ATM infrastructure

Technological advancements have improved access to cash and reduced the need to visit bank branches. While the use of mobile and internet-based banking services has increased, Automated Teller Machines (ATMs) continue to play a vital role in providing various banking services

through ATM cards. These services include cash withdrawals, cash deposits, PIN changes, and money transfers. Additionally, ATM cards can be used for both online and offline purchases. Other banking tasks, such as updating mobile numbers, can also be completed at ATMs.

The ATM infrastructure in Bihar, measured as the number of ATMs per bank branch over the last five years, from September 2020 to September 2024, is shown in Table 11.4. The average number of ATMs per branch for banks in Bihar has decreased from 0.9 to 0.8. However, the number of ATMs per branch for the State Bank of India (SBI) has increased from 2.3 to 2.7 during the same period. In contrast, the number of ATMs per branch for other major Public Sector Banks has remained the same or declined. For Private Sector Banks, the average number of ATMs per branch has changed slightly from 1.1 in September 2023 to 0.9 in September 2024.

Table 11.4 : ATMs per Bank Branch in Bihar (September 2020 to September 2024)

Banks	ATMs per Branch				
	Sep-20	Sep-21	Sep-22	Sep-23	Sep-24
State Bank of India	2.3	2.5	2.9	2.9	2.7

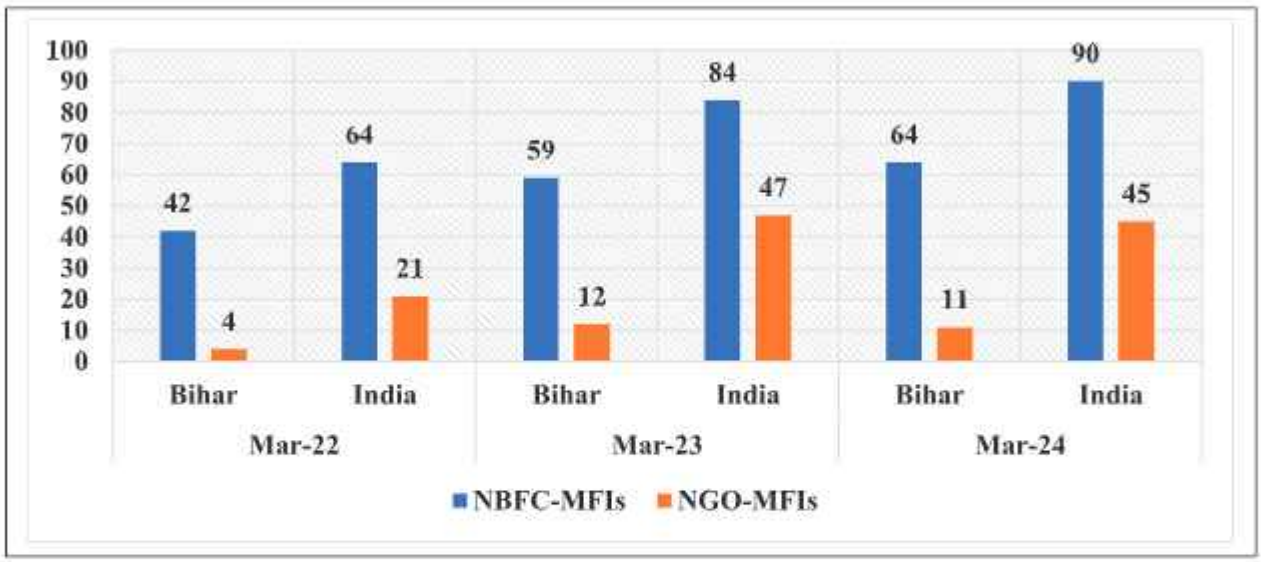
Microfinance Institutions (MFI)

Microfinance Institutions (MFIs) offer small loans to low-income households at the bottom of the economic pyramid. While their interest rates are higher than those of Scheduled Commercial Banks (SCBs), MFIs provide essential access to credit, often with minimal collateral. They support income-generating activities in both rural and urban areas, promoting economic growth.

By expanding credit facilities, MFIs enhance financial inclusion, especially in areas lacking access to SCBs. Various entities involved in microfinance in India include NBFC-MFIs, Banks, Small Finance Banks, and nonprofit MFIs. The National Rural Livelihood Mission (NRLM) plays a crucial role through its Self-Help Group-Bank Linkage Programme. In Bihar, MFIs have successfully collaborated with Self-Help Groups (SHGs) to provide small to moderate loans, significantly improving financial inclusion through the State government's JEEVIKA initiative.

Chart 11.8 : Number of MFI lenders in Bihar and India (March 31, 2022 to March 31, 2024)



Source : NABARD Report on Status of Microfinance in India, 2021-22 to 2023-24

A summary of the loans provided by MFI lenders in Bihar and across India from 2022 to 2024 is presented in Table 11.5. Chart 11.8 illustrates the changes in the number of NBFC-MFI and NGO-MFI lenders during these years. In Bihar, the number of NBFC-MFI lenders rose from 42 in March 2022 to 64 in March 2024. Meanwhile, at the national level, the number of NBFC-MFI lenders increased from 64 to 90. Additionally, the number of NGO-MFI lenders in Bihar grew from 4 in March 2022 to 11 in March 2024. At the all-India level, the number of NGO-MFI lenders also saw significant growth, rising from 21 to 45 during the same period.

Table 11.5 : Summary of the Loans by MFI Lenders in Bihar and India (March 31, 2022 to March 31, 2024)

MFIs		No. of Lenders			No. of Active Loans (in lakh)			Outstanding Balance (Rs. crore)		
		2022	2023	2024	2022	2023	2024	2022	2023	2024
Bihar	NBFC-MFIs	42	59	64	12	73	88	4503	19714	25458
	NGO-MFIs	4	12	11	1	4	0.004	319	1016	1

Source : NABARD Report on Status of Microfinance in India, 2021-22 to 2023-24

In recent years, Bihar has witnessed a remarkable surge in the number of active loans facilitated by MFIs. Over the last three years, the volume of active loans disbursed by MFI lenders has

increased 6.7 times. Specifically, the number of active loans grew from 13 lakh as of March 31, 2022 to 88 lakh by March 31, 2024. This increase highlights the expanding reach of microfinance as a credit provider in the state.

Furthermore, Bihar's share in the total active MFI loans across India has increased from 14.4 percent on March 31, 2023 to 15.0 percent by March 31, 2024. With the rise in the number of active loans, the outstanding balance of loans from MFI lenders in Bihar has also experienced remarkable growth. As reported, this balance surged from Rs. 4822 crore on March 31, 2022 to a substantial Rs. 25,459 crore by March 31, 2024. This nearly five-fold increase reflects a robust demand for credit and showcases the increasing presence of microfinance as a viable option for financial needs. As of March 31, 2024, Bihar accounted for 15.5 percent of the total outstanding loans provided by MFI lenders nationally.

11.2 Deposits, Credits and Credit-Deposit Ratio

Banks are essential financial institutions that mobilize deposits and provide credit for consumption and investment. However, deposit mobilisation and lending do not occur simultaneously in a specific area, leading to an inconsistent relationship between the amount of deposits and the credit extended within the same state. The Credit-Deposit (CD) ratio for a state represents the proportion of deposits collected within that state that are also lent out within the same area. This ratio indicates how much of the money that banks have gathered from deposits in a region is being approved as loans in the same region. Additionally, the CD ratio is one of the indicators of banks' involvement in the state's economic development. While this ratio is influenced by the level of economic activity and the capacity of the state to absorb credit, it also depends on the willingness of banks to extend loans to potential borrowers.

As of March 31, 2024, the state-wise deposits and credit of Scheduled Commercial Banks and the credit-deposit (CD) ratio are presented in Table 11.6. Table also shows the percentage share of each state in the country's total deposit and credit by these banks. Bihar's share of total deposits mobilised by Scheduled Commercial Banks in India was 2.5 percent, while its share in the credit provided by these banks was slightly lower at 1.6 percent. These banks in Bihar accumulated total deposits of Rs. 524.3 thousand crore, with outstanding advances amounting to Rs. 276.8 thousand crore. Consequently, the CD ratio for these banks in Bihar stood at 52.8 percent, which is lower than the all-India average CD ratio of 79.6 percent. Among the states, Andhra Pradesh recorded the highest CD ratio at 158.9 percent, followed by Telangana at 119.4 percent and Tamil Nadu at 117.7 percent.

Table 11.6 : State-wise Deposits and Credit of Scheduled Commercial Banks (March 31, 2024)

States	Deposits (Rs. '000 crore)	Credits (Rs. '000 crore)	CD Ratio
Andhra Pradesh	480.6 (2.3)	763.5 (4.5)	158.9
Assam	220.5 (1.0)	133.6 (0.8)	60.6
Bihar	**524.3 (2.5)**	**276.8 (1.6)**	**52.8**
Chhattisgarh	244 (1.1)	193.6 (1.1)	79.3
Gujarat	1195.4 (5.6)	994.3 (5.9)	83.2
Haryana	788.8 (3.7)	582.1 (3.4)	73.8
Jharkhand	336.7 (1.6)	130.9 (0.8)	38.9
Karnataka	1682.4 (7.9)	1239 (7.3)	73.6
Kerala	803.4 (3.8)	580.7 (3.4)	72.3
Madhya Pradesh	617.8 (2.9)	489.3 (2.9)	79.2
Maharashtra	4667.8 (22)	4030.7 (23.8)	86.4
Odisha	522.5 (2.5)	266.5 (1.6)	51.0
Punjab	617.5 (2.9)	376.2 (2.2)	60.9
Rajasthan	671 (3.2)	615.9 (3.6)	91.8
Tamil Nadu	1344.6 (6.3)	1582.9 (9.4)	117.7
Telangana	788.1 (3.7)	940.9 (5.6)	119.4
Uttar Pradesh	1745.8 (8.2)	924.6 (5.5)	53.0
West Bengal	1143.5 (5.4)	601.9 (3.6)	52.6
All-India	**21253.4 (100.0)**	**16913.7 (100.0)**	**79.6**

Note : Figures in Parenthesis indicate share of the states
Source : Basic Statistical Returns of Scheduled Commercial Banks in India, 2024, DBIE, RBI

The bank group-wise data, as of September 2024, on deposits mobilized, advances made (including those from bank branches outside Bihar), and the Credit-Deposit (CD) ratio in Bihar is presented in Table 11.7. The deposits collected by the banks in Bihar was Rs. 5.27 lakh crore, whereas the advances made by these institutions was Rs. 2.97 lakh crore, as of September 30, 2024. As a result, the CD ratio of the banks in Bihar was 56.3 percent.

Table 11.7 : Deposit, Advance and CD Ratio of Bank-groups in Bihar (as on September 2024)

Banks	Public Sector Bank	Private Sector Bank	Cooperative Bank	RRBs	SFBs	Total
Deposit (Rs. crore)	395829	79225	5548	44589	2238	527429
Advance* (Rs. Crore)	175797	82538	2528	27100	9193	297156
CD Ratio (in percent)	**44.4**	**104.2**	**45.6**	**60.8**	**410.7**	**56.3**

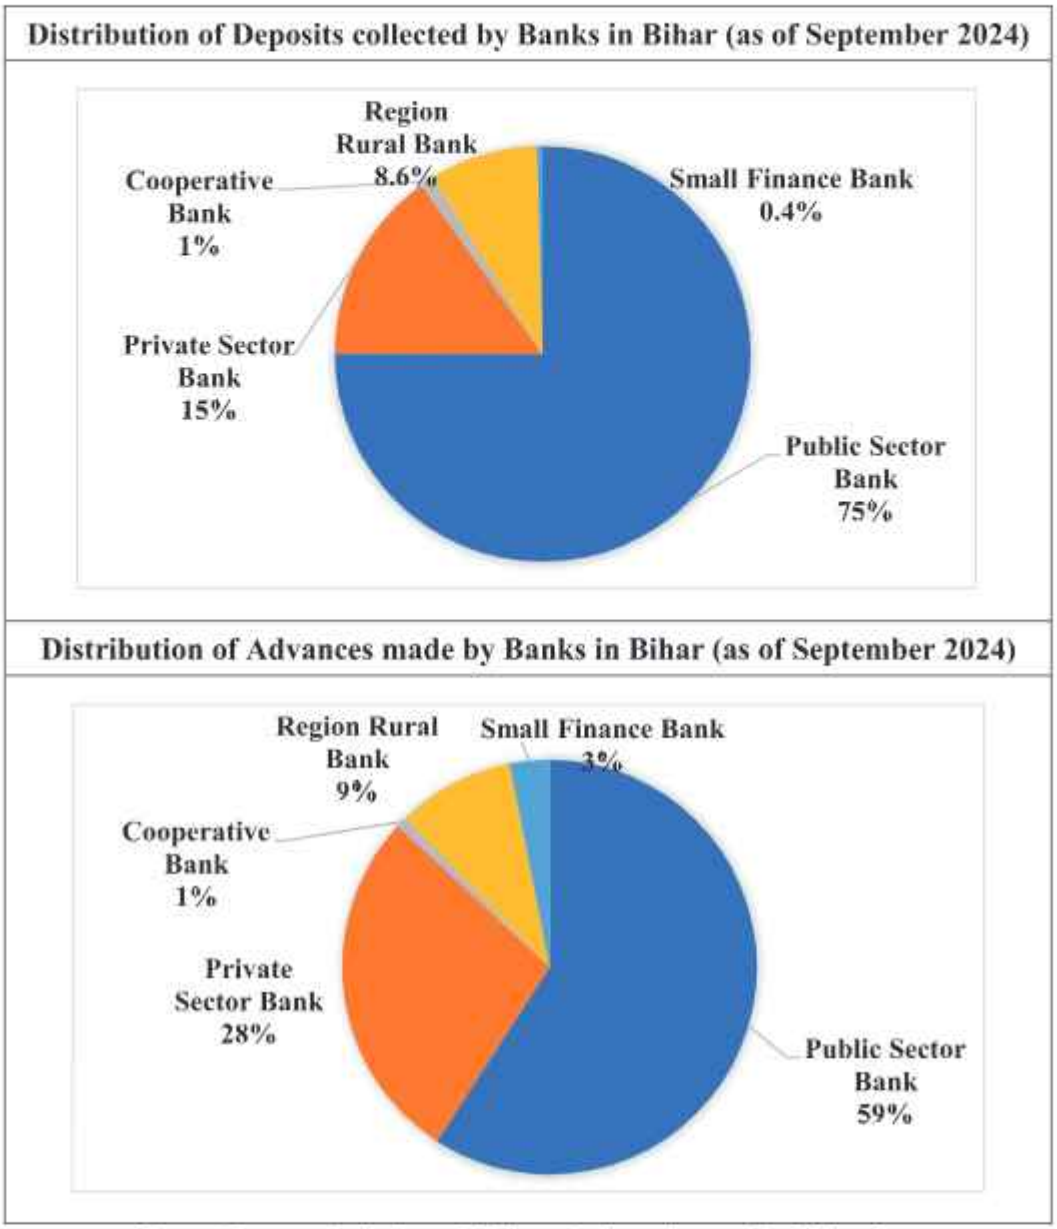
Chart 11.9 : Bank Group-wise Percentage Share in Deposit and Advances in Bihar (September 2024)



Note : Advances include credit from the branches outside Bihar also.
Source : State Level Bankers' Committee Report

The distribution of deposits collected and advances made by different bank groups in Bihar as of September 30, 2024, is illustrated in Chart 11.9. Public Sector Banks hold the largest share of deposits mobilised in the state, and the credit extended. As of this date, these banks collected deposits totaling Rs. 3.96 lakh crore, which accounts for 75 per cent of the total deposits collected by all banks in Bihar. However, they extended credit of Rs. 1.76 lakh crore, representing only 59 per cent of the total advances made by all banks in the state. Consequently, the credit-deposit (CD) ratio for Public Sector Banks stands at 44.4 per cent, significantly lower than the average CD ratio of 56.3 per cent for all banks in Bihar.

In contrast, Private Sector Banks have a CD ratio of 104.2 per cent. These banks mobilised deposits amounting to Rs. 0.79 lakh crore and extended credit of Rs. 0.83 lakh crore. Their share in deposit

mobilisation from the state is 15 per cent, while their share of advances made is 28 per cent as of September 30, 2024.

As of September 2024, the credit-deposit (CD) ratio for Regional Rural Banks (RRBs) in Bihar was 60.8 percent, while for Cooperative Banks, it was 45.6 percent. RRBs in Bihar mobilised deposits amounting to Rs. 44,589 crore and made advances totaling Rs. 27,100 crore. Small Finance Banks (SFBs) recorded advances of Rs. 9193 crore and collected deposits of Rs. 2238 crore, resulting in an impressive CD ratio of 410.7 percent. However, the share of SFBs in the total deposits and advances in the state remained relatively low compared to other banks, accounting for only 0.42 percent of total deposits and 3.09 percent of total advances.

A comparison of the deposits mobilised, advances made, and the changes in the credit-deposit (CD) ratio of Public Sector Banks in Bihar between September 2023 and September 2024 is presented in Table 11.8. Among the Public Sector Banks, the State Bank of India (SBI) holds the highest amount of deposits and advances in Bihar, followed by Punjab National Bank (PNB) and Canara Bank.

Table 11.8 : Deposit, Advance and CD Ratio of Public Sector Banks in Bihar (September 2023 and September 2024)

Banks	September 2023			September 2024		
	Deposit (Rs. crore)	Advance (Rs. crore)	CD Ratio (percentage)	Deposit (Rs. crore)	Advance (Rs. crore)	CD Ratio (percentage)
State Bank of India	156123.7	59869.1	38.4	168503.8	70608.1	41.9

The CD ratio of State Bank of India (SBI) increased from 38.4 percent in September 2023 to 41.9 percent in September 2024, representing an increase of 3.5 percentage points. In contrast, Canara

Bank experienced a significant rise in its CD ratio, which surged by 7.0 percentage points, from 53.9 percent to 60.9 percent during the same period. However, Punjab National Bank saw a decline, with its CD ratio decreasing by 0.8 percentage points, from 41.9 percent in September 2023 to 41.1 percent in September 2024. Additionally, the Union Bank of India recorded a notable increase of 5.4 percentage points in its CD ratio. Overall, the CD ratio of Public Sector Banks rose by 1.4 percentage points, increasing from 43.0 percent to 44.4 percent during this period.

The pattern of the Credit-Deposit (CD) ratio of various Public Sector Banks in Bihar over the past five years, from 2019-20 to 2023-24, is presented in Table 11.9. Additionally, Chart 11.10 illustrates the changes in the CD ratio of major Public Sector Banks during this period. The data reveals a mixed trend: some banks have seen an increase in their CD ratios, while others have experienced a decline in certain years. Overall, there has been an improvement in the CD ratios from 2019-20 to 2023-24 in all the state's major banks. Notably, Indian Bank has led this improvement, with its CD ratio rising from 30.7 percent in 2019-20 to 61.0 percent in 2023-24. Similarly, the largest bank in Bihar, the State Bank of India (SBI), has increased its CD ratio from 30.5 percent to 40.9 percent during this time. The second-largest bank, Punjab National Bank (PNB), has also shown progress, with its CD ratio improving from 29.0 percent in 2019-20 to 42.2 percent in 2023-24.

Table 11.9 : Credit-Deposit (CD) Ratio of Public Sector Banks in Bihar (2019-20 to 2024-25, up to September 2024)

(in percent)

Banks	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25 (Sep-24)

A comparison of the Deposits, Advances, and CD Ratio of Private Banks in Bihar on September 30, 2023 and September 30, 2024 is illustrated in Table 11.10. HDFC Bank stands out among Private Sector Banks in Bihar in terms of the size of deposits collected and advances made, followed by ICICI Bank and AXIS Bank. The advances by HDFC Bank in Bihar increased from Rs. 18,463.8 crore in September 2023 to Rs. 22,776.4 crore in September 2024, marking a rise of 23.4 percent. Meanwhile, advances from AXIS Bank and ICICI Bank increased by 26.9 percent and 16.1 percent during the same period.

The CD ratio of HDFC Bank grew by five percentage points, rising from 90.3 percent in September 2023 to 95.3 percent in September 2024. In contrast, AXIS Bank's CD ratio improved from 66.5 percent to 74.0 percent, while ICICI Bank's CD ratio rose from 90.4 percent to 93.1 percent. Notably, RBL Bank reported the highest CD ratio among Private Sector Banks at 1047.8 percent in September 2024, followed by IndusInd Bank at 231.3 percent and Bandhan Bank at 198.8 percent. Overall, the CD ratio for Private Sector Banks in Bihar was 104.2 percent as of September 2024, an increase of 2.1 percentage points compared to September 2023.

The Deposits, Advances, and CD Ratio of Regional Rural Banks (RRBs) in Bihar as of September 30, 2023 and September 30, 2024, are presented in Table 11.11. As of September 30, 2024, RRBs in Bihar extended credit amounting to Rs. 24,099.8 crore and collected deposits totalling Rs. 44,588.6 crore. This represents an 8.3 percent increase in deposits, while the credit extended by these banks rose by 9.8 percent. Consequently, the CD (Credit to Deposit) ratio of RRBs in Bihar increased from 59.9 percent in September 2023 to 60.8 percent in September 2024.

Among the two RRBs, the CD ratio of Uttar Bihar Gramin Bank increased by 2.9 percentage points, while it decreased slightly by 0.6 percentage points for Dakshin Bihar Gramin Bank. As of September 30, 2024, the CD ratios for Uttar Bihar Gramin Bank and Dakshin Bihar Gramin Bank were reported at 75.7 percent and 49.4 percent, respectively.

Source : State Level Bankers' Committee Report

Between September 2023 and September 2024, the deposits mobilized by these banks increased by 18.6 percent, rising from Rs. 1887.9 crore to Rs. 2238.2 crore. Simultaneously, advances also grew, rising from Rs. 7726.9 crore to Rs. 9193.2 crore, which represents a rise of 19.0 percent. This led to an increase in the CD ratio of SFBs from 409.3 percent to 410.7 percent. Among the SFBs, Utkarsh SFB holds the largest share in advances, totaling Rs. 5247.4 crore, followed by Ujjivan SFB with Rs. 1998.0 crore, and Jana SFB with Rs. 1123.3 crore.

The distribution of deposit, credit, and CD (credit-deposit) ratios for banks in Rural, Semi-Urban, and Urban areas of Bihar is presented in Table 11.13 for the periods of September 2023 and September 2024. The CD ratio in Rural areas decreased from 60.2 percent in September 2023 to 59.8 percent in September 2024. In contrast, the CD ratio in Semi-Urban areas increased from 52.0 percent to 54.1 percent, and the CD ratio in Urban areas rose from 52.5 percent to 54.3 percent during this period.

Table 11.13 : Credit-Deposit (CD) Ratio of Banks in Bihar by Areas (September 2023 and September 2024)

Area	Deposit (Rs. '000 crore)		Advance (Rs. '000 crore)		CD ratio (percentage)	
	September 2023	September 2024	September 2023	September 2024	September 2023	September 2024
Rural	108.5	119.7	65.3	71.6	60.2	59.8
Semi-urban	123.3	138.2	64.1	74.8	52.0	54.1
Urban	243.5	269.5	127.8	146.4	52.5	54.3
All	475.2	527.4	257.2	292.8	54.1	55.5

Note : Advances include the advances made by the bank branches within state only.
Source : State Level Bankers' Committee Report

The distribution of deposits, credit, and credit-deposit (CD) ratios in Bihar at the end of 2023-2024 is detailed in Table 11.14. The figures are as of March 31, 2024. It is observed that banks with a limited presence in terms of deposits or credit tend to have a relatively higher CD ratio. For instance, the CD ratio for Small Finance Banks (SFBs) reached 438.3 percent at the end of 2023-2024. Similarly, Cooperative Banks and Regional Rural Banks (RRBs) reported CD ratios of 78.2 percent and 58.2 percent, respectively, higher than the 54.1 percent CD ratio for Commercial Banks. Additionally, there is significant variation in the CD ratios across different areas within the state. For both Commercial Banks and RRBs, the CD ratios are higher in rural areas than in Semi-urban and Urban areas.

Table 11.14 : Credit-Deposit Ratio in Bihar by Bank-Group and Area (2023-24)

Bank Group	Area	Deposits (Rs. '000 crore)	Credits (Rs. '000 crore)	CD Ratio (Percentage)
Commercial Bank	Rural	80.8	49.9	61.8
	Semi-Urban	119.2	60.3	50.6
	Urban	257.7	137.6	53.4
	Total	**457.7**	**247.8**	**54.1**

The district-wise credit-deposit (CD) ratios in Bihar for the years 2022-23, 2023-24, and 2024-25 (as of September 2024) are presented in Table 11.15. Overall, Bihar has seen a significant increase in its CD ratios in recent years, indicating growing credit utilization. However, there is considerable variation in CD ratios among different districts within the state.

As of September 2024, 18 districts in Bihar reported CD ratios exceeding the state average. Among these, Purnea has the highest CD ratio at 92.3 percent, followed by Araria at 89.3 percent and West Champaran at 83.3 percent. In contrast, the three districts with the lowest CD ratios are Munger at 33.5 percent, Bhojpur at 40.7 percent, and Nalanda at 41.3 percent.

Table 11.15 : District-wise Credit-Deposit (CD) Ratio (2022-23 to 2024-25, up to September 2024)

District	2022-23	2023-24	2024-25 (as of Sept 2024)	District	2022-23	2023-24	2024-25 (as of Sept 2024)
Patna	47.0	48.2	48.4	Darbhanga	45.0	49.8	50.9

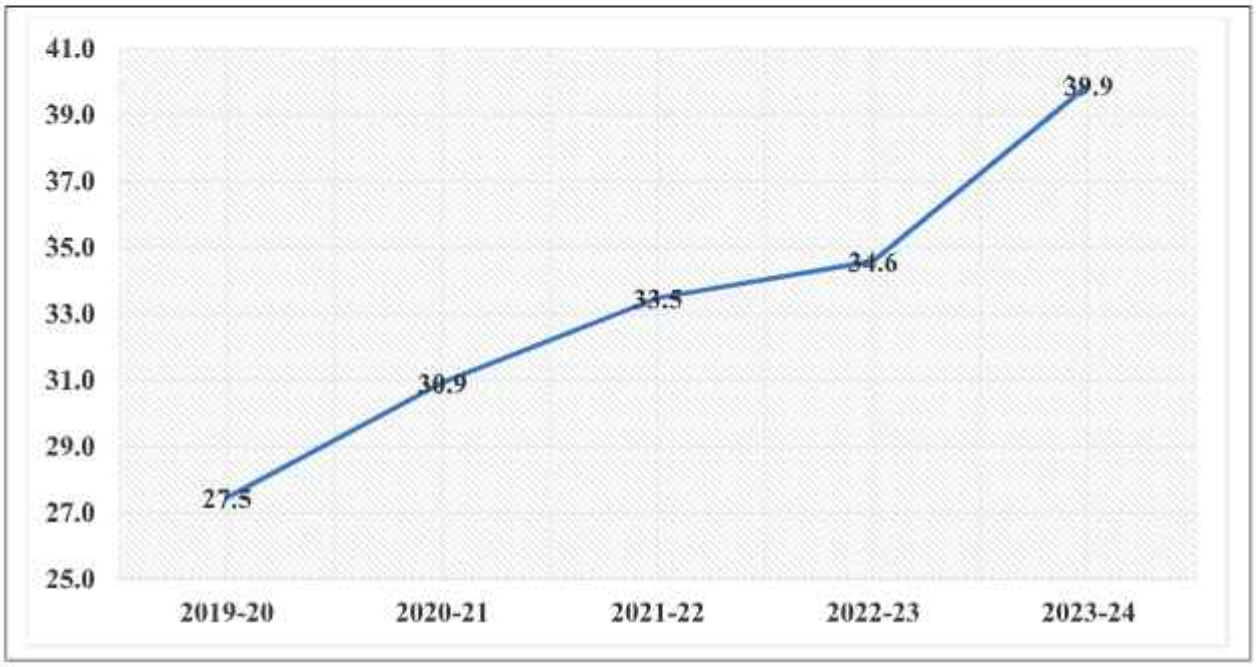
The significant growth in economic activities in Bihar has been supported by an increased level of credit extended by banks. As a result, the Credit-GSDP ratio has consistently risen in the last five years (Chart 11.11). Specifically, this ratio in Bihar increased from 27.5 percent in 2019-20 to 39.9 percent in 2023-24. Notably, there was a considerable jump of 5.3 percentage points in the ratio between 2022-23 and 2023-24, rising from 34.6 percent to 39.9 percent.

Chart 11.11 : Credit-GSDP in Bihar (2019-20 to 2023-24)



Note : Credit includes advances made by the banks outside Bihar and RIDF sanctions by NABARD.

11.3 Achievements under Annual Credit Plan (ACP)

Banks play a vital role in supporting various sectors of the economy through the development of the Annual Credit Plan (ACP). This plan outlines the credit allocation for different sectors and serves as a benchmark for assessing progress. The State Level Bankers' Committee and the Reserve Bank of India review the ACP and its achievements to ensure that credit flows effectively to all regions and sectors.

Table 11.16 presents the sector-wise distribution of ACP targets in Bihar and their accomplishments for the fiscal years 2022-23 and 2023-24. This information highlights banks' commitment to meet the diverse credit needs. Additionally, the table details the sector-wise share of advances provided by banks in Bihar. Table A 11.1 (Appendix) outlines the district-wise ACP targets and the advances made in March 2024, providing a comprehensive overview of the target and its achievement.

Table 11.16 : Sectoral Share of Advances under Annual Credit Plans (2022-23 to 2023-24)

Sector	ACP Target (Rs. crore)		Achievement (Rs. crore)		Achievement (in percent)		Share in Achievement (%)	
	2022-23	2023-24	2022-23	2023-24	2022-23	2023-24	2022-23	2023-24
Agriculture	70000	94150	71002	83631	101.4	88.8	32.2	33.0
Small & Medium Enterprises	70000	89480	55072	76975	78.7	86.0	25.0	30.4
Other Priority Sectors	14145	19520	18887	19747	133.5	101.2	8.6	7.8

Source : State Level Bankers' Committee Report

The total Annual Credit Plan (ACP) target set by various banks in Bihar increased by 28.9 percent, rising from Rs. 2.0 lakh crore in 2022-23 to Rs. 2.6 lakh crore in 2023-24. The achievement of the ACP target was 96.3 percent in 2023-24, which is lower than the 108 percent achievement of the target in the previous year. In 2023-24, the total allocation of the ACP to the Priority Sector was Rs. 2.0 lakh crore, accounting for 77.2 percent of the overall ACP target. In comparison, the allocation to this sector was 75.5 percent in 2022-23.

Among the priority sectors, Agriculture received the largest share of the ACP target at Rs. 0.94 lakh crore, followed by Small and Medium Enterprises (SMEs) with Rs. 0.89 lakh crore in 2023-24. Notably, the achievement rate for non-priority sectors in 2023-24 was significantly higher at 122.0 percent, compared to 88.8 percent for the priority sector. Within the priority sectors, the achievement rates were 88.8 percent for Agriculture and 86.0 percent for Small and Medium Enterprises.

Table 11.17 : Bank Group-wise ACP Target and Achievement in Bihar (2022-23 to 2023-24)

Agencies	Target (Rs. crore)		Achievement (Rs. crore)		Achievement (%)	
	2022-23	2023-24	2022-23	2023-24	2022-23	2023-24
Commercial Banks	164981	215598	179529	211482	108.8	98.1

Source : State Level Bankers' Committee Report

The bank group-wise Annual Credit Plan (ACP) targets and their achievements for Bihar for the years 2022-23 and 2023-24 are summarized in Table 11.17. For the fiscal year 2023-24, the total ACP target is Rs. 2.6 lakh crore. Commercial banks are responsible for 81.9 percent of this total, while regional rural banks (RRBs) contribute 11.9 percent. Cooperative banks account for a small share of only 2.3 percent of the total ACP target. Notably, the achievement rate of cooperative banks was the highest at 125.2 percent for 2023-24. In comparison, the achievement rates for the other bank groups were 98.1 percent for commercial banks, 84.2 percent for RRBs, and 79.1 percent for small finance banks (SFBs).

11.4 Kisan Credit Card (KCC)

Kisan Credit Cards (KCC) are issued to farmers by various financial institutions, including commercial banks, regional rural banks, state cooperative banks, central cooperative banks, and primary agricultural cooperative societies (PACS). KCC holders are provided with loans through a revolving cash credit facility, allowing multiple withdrawals and repayments within a specified limit.

The bank group-wise summary of new Kisan Credit Cards (KCCs) issued by banks in Bihar, along with their targets for the recent five years, is presented in Table 11.18. The pattern of total new KCCs issued in Bihar from 2019-20 to 2023-24 is illustrated in Chart 11.12. In the year 2023-24, a total of 167,709 new KCCs were issued by banks in Bihar. Of these, 90,110 KCCs were issued by Commercial Banks, while Rural Regional Banks (RRBs) issued 75,338 KCCs. Cooperative Banks issued 2,261 KCCs in 2023-24, falling short of their target of 47,906.

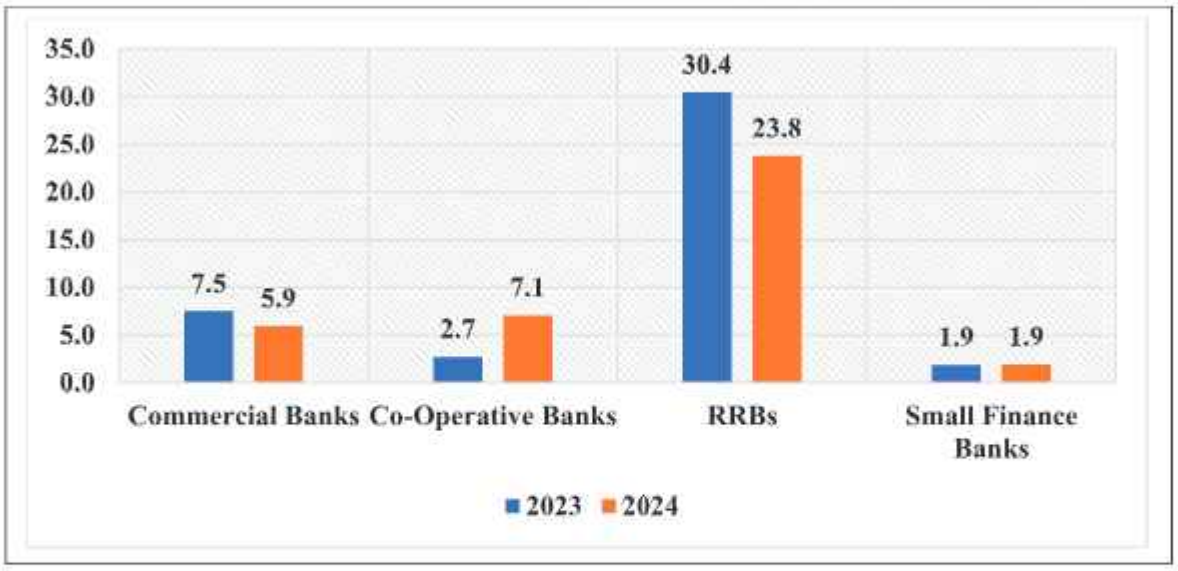
11.5 Non-Performing Assets of Banks

Non-Performing Assets (NPA) refer to loans or advances from banks and financial institutions that are no longer generating income. An asset is classified as non-performing when the borrower fails to pay the principal and interest for at least 90 days. In recent years, the reduction in NPAs of banks in Bihar has shown consistent improvement. This reduction in NPAs can be attributed to the collaborative efforts of both the banks and the government. The government has supported banks in recovering NPAs through the prompt execution of cases under the SARFAESI Act and various certificate cases. Meanwhile, banks have focused on enhancing their asset quality by issuing better loans and advances.

The bank group-wise percentage of Non-Performing Assets (NPA) in Bihar for 2023 and 2024 is illustrated in Chart 11.13. The NPA of commercial banks has decreased from 7.5 percent in March 2023 to 5.9 percent in March 2024. Likewise, there has been a significant improvement in the NPA of Regional Rural Banks (RRBs) in Bihar, which has fallen from 30.4 percent in March 2023 to 23.8 percent in March 2024, representing a reduction of 6.6 percentage points. Although Small Finance Banks hold a small share of total advances in the state, they reported the lowest NPA at 1.9 percent as of March 2024.

Chart 11.13 : Bank Group-wise NPA (in percent) in Bihar (March 2023 and March 2024)

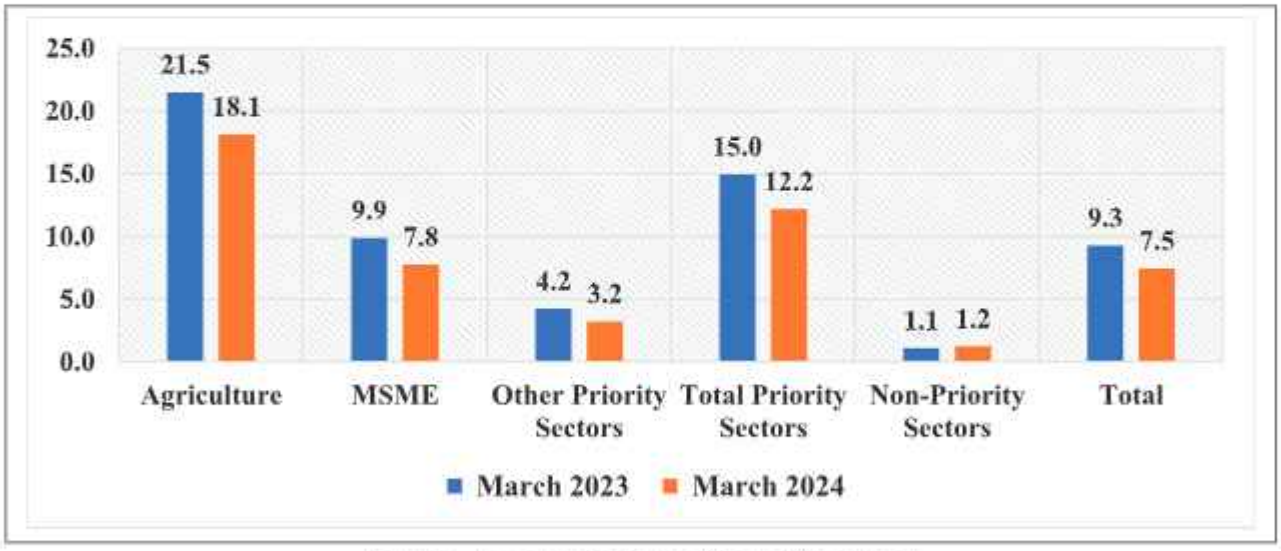


Source : State Level Bankers' Committee Report

A comparison of sector-wise non-performing assets (NPA) of banks in Bihar between March 2023 and March 2024 is illustrated in Chart 11.14. The NPA for outstanding loans to priority sectors in Bihar has decreased, dropping from 15.0 percent in March 2023 to 12.2 percent in March 2024. Specifically, the NPA for agricultural loans has fallen from 21.5 percent to 18.1 percent during the same period. In the micro, small and medium enterprises (MSME) sector, the NPA was relatively lower at 7.8 percent in March 2024, a decrease of 2.1 percentage points compared to the previous year.

Conversely, although still low, the NPA in non-priority sectors increased slightly from 1.1 percent in March 2023 to 1.2 percent in March 2024. Overall, the NPA as a percentage of total outstanding advances by banks in Bihar has declined from 9.3 percent in March 2023 to 7.5 percent in March 2024.

Chart 11.14 : Sector-wise percentage NPAs of Banks in Bihar (March 2023 and March 2024)



Source : State Level Bankers' Committee Report

11.6 National Bank for Agriculture and Rural Development (NABARD)

The National Bank for Agriculture and Rural Development (NABARD) plays an essential role in promoting the development of agriculture, agro-industries, and rural crafts. It provides credit by refinancing lending institutions in rural areas, which helps stimulate growth in village and cottage industries, handicrafts, and various rural crafts. In addition, NABARD offers low-cost loans to state governments and their enterprises for infrastructure development projects. These projects include irrigation, soil conservation, watershed management, drinking water supply, cold storage chains, and other rural infrastructure developments. Moreover, NABARD manages the Rural Infrastructure Development Fund (RIDF), established to address the shortfall in priority sector lending by commercial banks and other eligible financial institutions.

A summary of sector-wise refinancing by NABARD in Bihar from 2019-20 to 2023-24 is presented in Table 11.19. The total financial support provided by NABARD is categorized into three main areas: crop loans, investment credit refinances, and sanctions for credit support to the Rural Infrastructure Development Fund (RIDF), the Warehouse Infrastructure Fund (WIF), and the Food Processing Fund (FPF). The total financial support from NABARD increased significantly, from Rs. 2,992 crores in 2019-20 to Rs. 6,596 crores in 2023-24. For 2023-24, the crop loan disbursement amounted to Rs. 2,300 crores, while investment credit refinances reached Rs. 2,362 crores. Additionally, support through RIDF disbursement was Rs. 1,934 crores in 2023-24.

Table 11.19 : Sector-wise Refinancing by NABARD (2019-20 to 2023-24)

(Rs. crore)

Year	Crop Loan	Investment Credit Refinance	RIDF+ WIF+FPF Sanction	Total Financial Support
2019-20	56	1102	1834	2992
2020-21	859	2424	2116	5399
2021-22	1161	3784	2400	7345
2022-23	1240	3647	1329	6216
2023-24	2300	2362	1934	6596

Source : NABARD, Patna office

The Rural Infrastructure Development Fund (RIDF), managed by NABARD, offers low-cost loans to state governments for rural infrastructure investment. This fund is replenished by contributions from commercial banks that fail to meet RBI's priority sector lending requirements. The interest rate on these loans is set at the bank rate minus 1.5 percentage points. The disbursement of RIDF funds to Bihar for various tranches, including ongoing projects until March 2024, shows that while past tranches often had lower disbursements than sanctions, RIDF tranches XXIV and XXV

exceeded their sanctioned amounts (Table 11.20). For the latest tranche, RIDF XXIX, Rs. 2496.5 crore has been sanctioned, which is higher than the Rs. 2399.8 crore sanctioned for RIDF XXVIII.

Table 11.20 : Sanctions and Disbursement in Bihar under RIDF till March 2024 – NABARD

(Rs. crore)

RIDF Tranche	Sanction	Disbursement	RIDF Tranche	Sanction	Disbursement
RIDF I-X	508.8	351.5	RIDF XX (2014-15)	1085.2	959.0

11.7 Other Development Funds

In addition to the above-mentioned investments that involve credit from banks and other financial institutions, the state also receives funding from the National Housing Bank (NHB) and the Small Industries Development Bank of India (SIDBI). These funds are allocated for development projects through the Urban Infrastructure Development Fund (UIDF) and the SIDBI Cluster Development Fund (SCDF). The loans are regulated by Article 293(3) of the Constitution of India and can only be accessed within the state's borrowing limits for the financial year. Oversight of these loans falls under the Finance Department of the Government of Bihar.

Urban Infrastructure Development Fund (UIDF)

In 2023-24, the Government of India launched the Urban Infrastructure Development Fund (UIDF) to enhance infrastructure, including roads, bridges, water supply, drainage, sewerage, and solid waste management in Tier-2 and Tier-3 cities (populations between 50,000 and 999,999 based on the 2011 Census). Eligible activities for funding support include Urban Water Supply and Sanitation, Urban Connectivity, and Urban Development. However, the fund does not cover administrative expenses, housing, electricity, telecommunications, urban transport, health, educational institutions, and maintenance costs.

The UIDF offers loans at an interest rate of 5.25 percent, which is 1.5 percent lower than the Bank rate set by the Reserve Bank of India. The minimum project size is Rs. 5 crore, while the maximum is Rs. 100 crore. Bihar's allocation for 2023-24 is Rs. 466.29 crore, with a project implementation phase of 2 to 3 years.

SIDBI Cluster Development Fund (SCDF)

The SIDBI Cluster Development Fund (SCDF) has been established to enhance basic infrastructure in the state's Micro, Small, and Medium Enterprises (MSME) clusters. The SCDF supports funding for three main categories of activities: (i) Industrial and Agri-allied sectors within the MSME ecosystem, (ii) Social Sector Projects in and around MSME clusters, and (iii) Connectivity initiatives to improve access to MSME clusters. Loans provided under this fund have an interest rate that is 1.5 percent lower than the Bank rate.

CHAPTER - XII

HUMAN DEVELOPMENT

Abstract

Human Development emphasizes on people and their capabilities to assess development. It covers not only the economic growth and sharing, but also all kinds of human needs. In the contemporary era, human development is the greater need of the hour. There are six basic pillars of human development, namely, equity, sustainability, productivity, empowerment, welfare and security. All these have a profound impact on the quality of life. Therefore, to achieve these goals, the State government has allocated 36.4 percent of its total budget in 2023-24 to the human development-related sectors. Between 2005-06 and 2023-24, the expenditure on the social sector has increased 13 times. Additionally, between 2015-16 and 2023-24, the per capita expenditure on social services grew at the rate of 9.4 percent and the Per Capita Development Expenditure grew at the rate of 6.5 percent annually. A sector-wise analysis shows indicators like institutional delivery, IMR, immunization, etc. have recorded a substantial improvement in the health sector. Similarly, stable enrolment and steady fall in the drop-out rate at primary, upper primary and secondary levels of education also reflect the strengthening of education, a significant pillar of human development. Access to safe drinking water and sanitation are among the eminent goals of human development, which is a major concern for the State government. Along with these agendas, the well-being of SCs, STs, minorities and women are also given high priority in the development policy in Bihar. The recent progress in human development parameters in Bihar is the result of the productive implementation of various programmes by the Government.

Over the last decade, the government has accelerated its efforts toward inclusiveness by ensuring optimum expenditure on social infrastructure to promote human development. It is critical at this juncture to focus on public investments in human capital and strengthen the delivery mechanisms of government interventions to ensure transparency and accountability. With Bihar possessing a demographic edge, enhancing educational quality, equipping the youth with skills, reducing disease burden, uplifting marginalized groups and individuals with disabilities, and integrating women into various sectors will aid in harnessing the potential of a prosperous economy in the future. Thus, to evaluate the progress of a state and develop a comprehensive database this chapter gives a detailed overview of the dimensions of Demography, Health, Drinking Water and

Sanitation, Education (including Art, Culture, Youth and Sports), Social Welfare, Women Empowerment, and Social Security for Old, Widow and Disabled.

Investments in the social sector tend to benefit the poor and potentially improve the human capital, leading to both immediate growth effects and broader economic benefits. In Bihar, government spending on social initiatives is significant because a higher percentage of impoverished households depend on government services and it is important to achieve well-defined goals in the social sector, such as the Sustainable Development Goals (SDGs). Public Expenditure on Social Sector including health and education is a major concern to improve the Human Development Index. Table 12.1 shows the trend of expenditure on social services during the last 18 years. The expenditure has increased 13 times between 2005-06 and 2023-24. Following the same pattern, expenditure on health increased 13 times and that on education increased 10 times. In absolute terms, expenditure on health increased from Rs. 1015 crore in 2005-06 to Rs. 13015 crore in 2023-24, and on education it increased from Rs. 4366 crore to Rs. 44784 crore in the same period. The share of social services in the total expenditure between 2005-06 and 2023-24 recorded an increase of 4.5 percentage points. Showing a positive trend, the Per Capita Expenditure on Social Services and the Per Capita Development Expenditure (PCDE) of the state in these 18 years increased eight times. Interestingly, between 2015-16 and 2023-24, the per capita expenditure on social services grew at the rate of 9.4 percent and the PCDE grew at the rate of 6.9 percent annually (Table 12.1 and Chart 12.1).

Table 12.1 : Trend of Expenditure on Social Services

Year	Total Expenditure (Rs. crore)	Expenditure on Social Services (Rs. crore)	Share of Social Services in Total Expenditure (%)	Expenditure on Health (Rs. crore)	Expenditure on Education (Rs. crore)	Per Capita Expenditure on Social Services (Rs.) 12.1 Demographic Status

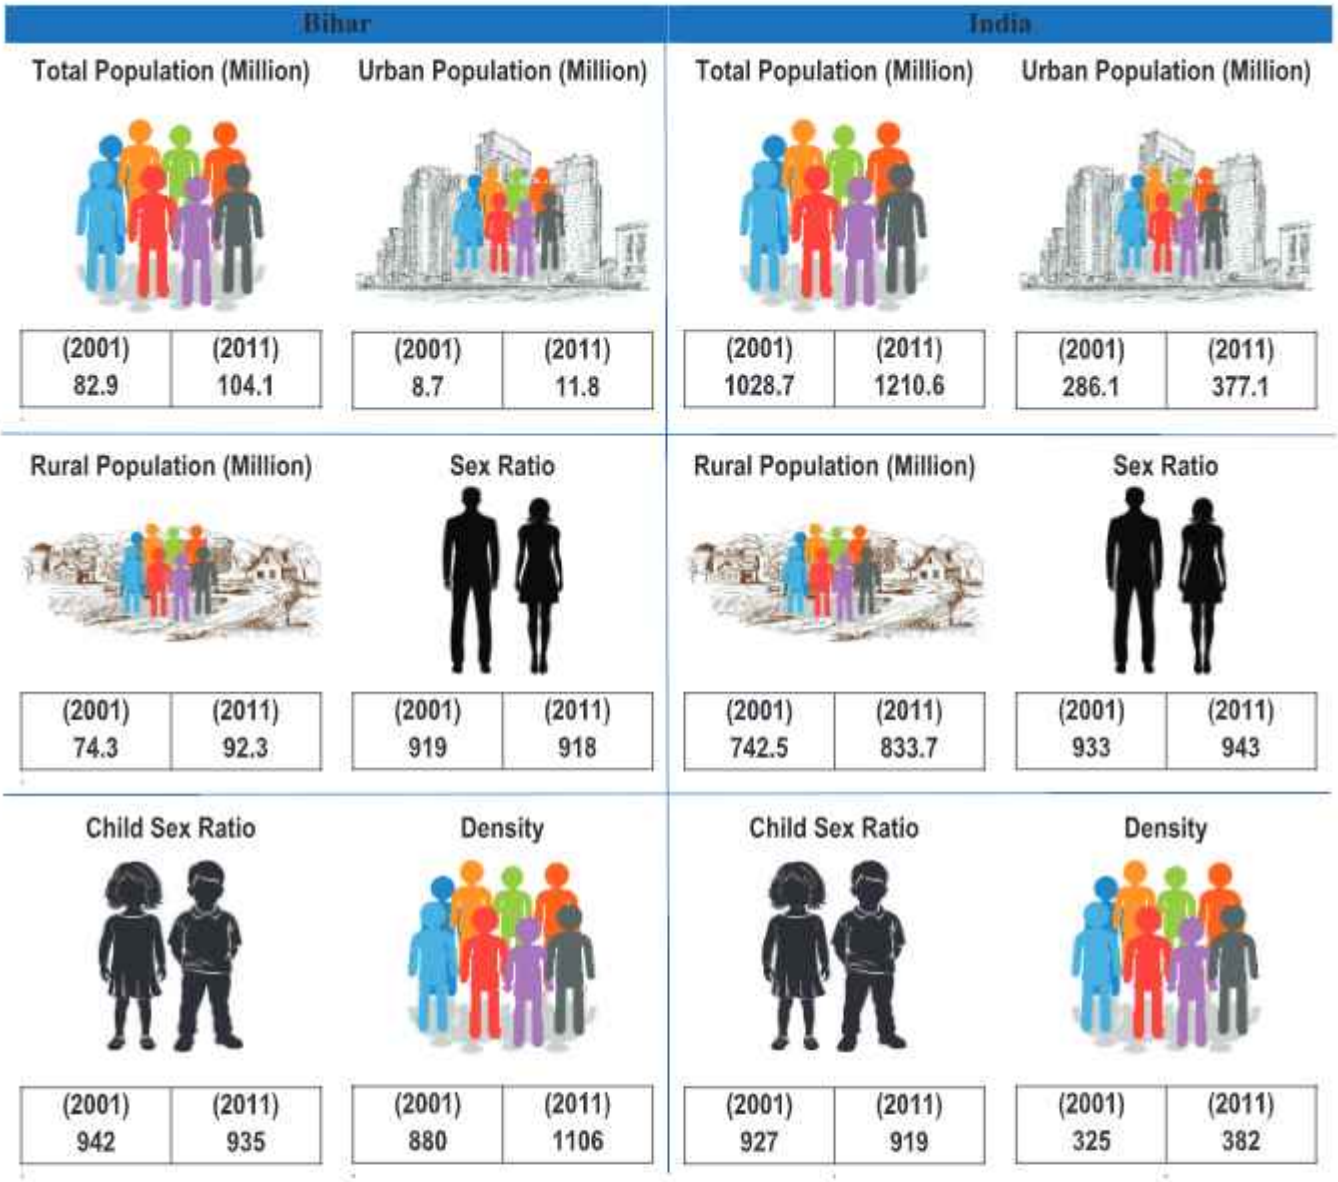
Demographic data are essential for the planning and implementation of state policies, especially those for economic development and public welfare. Significant changes over the centuries have marked the history of population growth in Bihar. The state has experienced periods of rapid population growth and relative stability. The state has witnessed a significant decline in fertility and mortality and began experiencing a demographic transition where birth rates started to decline, with better education and healthcare opportunities, a fast pace of economic growth, etc. The first census was organized around 1872, but it was not synchronal. Since 1881, censuses have been conducted regularly at intervals of 10 years up to 2011. However, the planned 2021 census was delayed due to challenges associated with the Covid-19 pandemic and is now scheduled for 2024.

As per the 2011 census, Bihar's population density stands at 1106 individuals per sq. km, three times higher than India's density of 382 individuals per sq. km. In terms of sex ratio, Bihar's figure is lower (918) compared to the national average (943); however, the child sex ratio in Bihar (935) surpasses the national average (919) (Chart 12.2). Between 2001 and 2011, the population growth rate in Bihar was 25.1 percent, compared to 17.6 percent for the entire country. The variation in decadal growth of population in the districts of Bihar and inter-district variations concerning demographic features are presented in Table A 12.1 and Table A 12.2 (Appendix).

Chart 12.2 : Demographic Profile of Bihar and India (2001 and 2011)



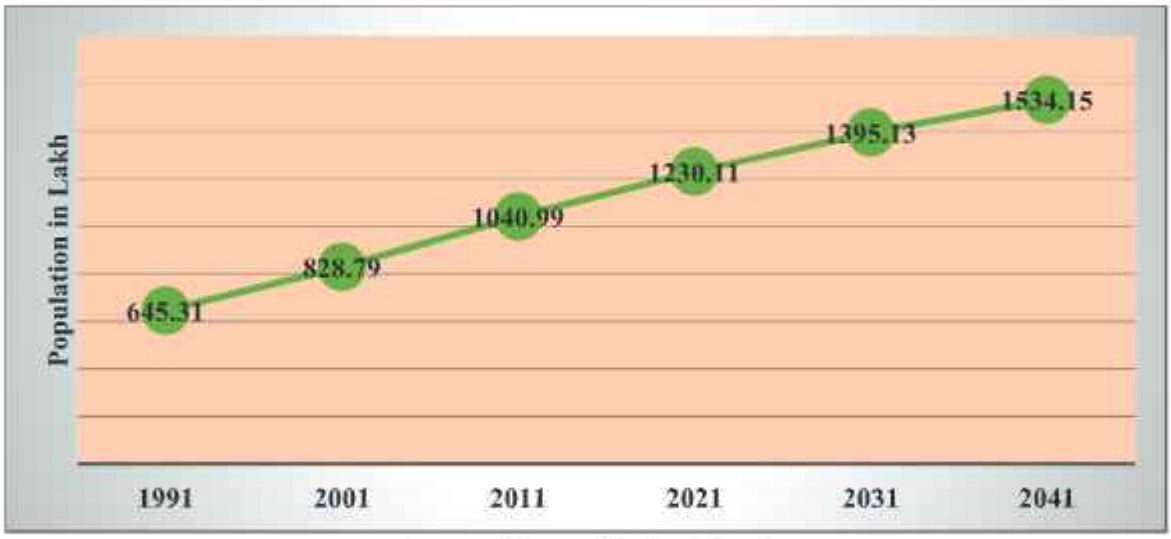
Note : Sex Ratio : females per 1000 males; Density : per sq. km
Source : Census 2001 and 2011

Population Projection for Bihar

Bihar is a densely populated state, and the changes occurring within its population critically influence the overall population dynamics of the country. Therefore, projecting the population is essential for both the state and the country. It is also important to understand their respective populations to formulate policies at the district level. However, there are currently no official projections available for district populations. In light of this, the current survey aims to provide population estimates for each district in Bihar for the years 2011 to 2041. The projections are based on the annual population growth rates of Bihar, as estimated in the Economic Survey of India 2018-19. Bihar's population is anticipated to rise from 1041 lakh in 2011 to 1230 lakh in 2021, reflecting a 1.82 percent annual increase, and then to 1395 lakh in 2031, which represents a 1.34 percent annual increase, and finally to 1534 lakh in 2041, marking a 1.00 percent annual increase. (Chart 12.3). The predicted population figures for each district in 2021, 2031, and 2041 are given

in Table A 12.3 (Appendix). The appendix table reveals that the population growth will be more rapid in north Bihar districts than in the south.

Chart 12.3 : Population of Bihar (1991 to 2041)

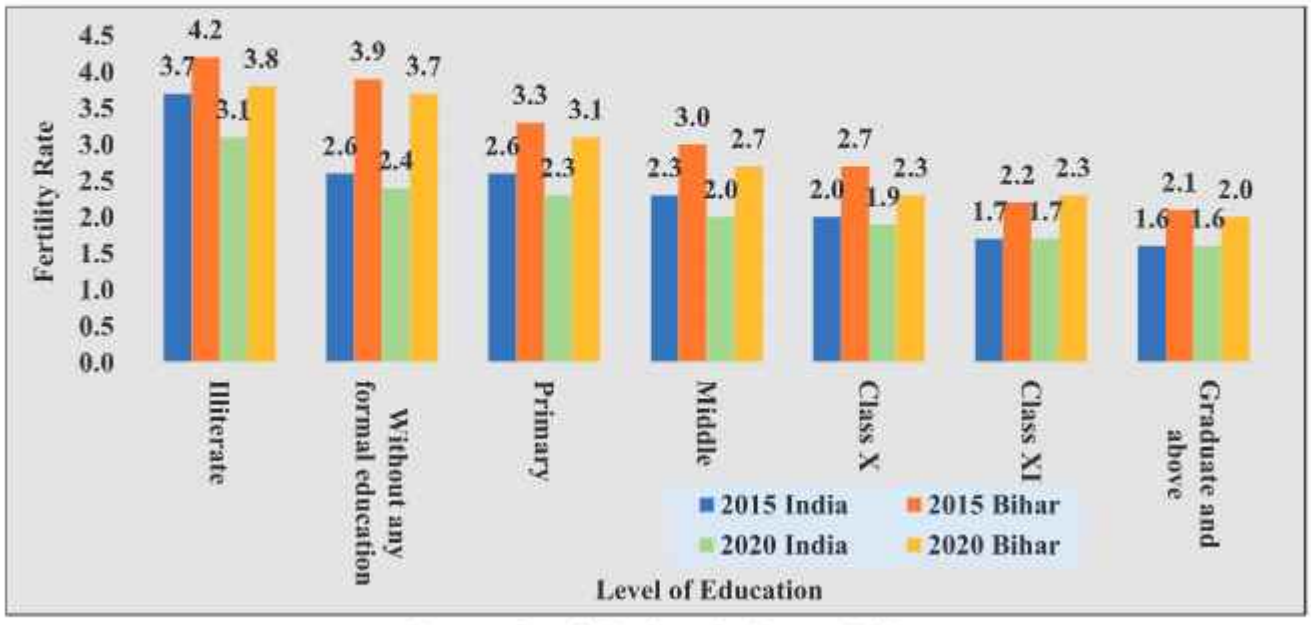


Source : Census (Various Years)

Fertility by Education Level of Women

Total Fertility Rate (TFR) is a measure of the average number of children that would be born to a woman over her entire reproductive period (15 to 49 years). The education level of females has a direct impact on fertility. A significant inverse relationship exists between women's education levels and the TFR. Chart 12.4 reveals that the TFR of women at the national level, as well as in Bihar, is higher among the illiterate group of women. In 2015, it was 3.7 for India and 4.2 for Bihar respectively. Similarly, in 2020, though the overall TFR has decreased it is still high at 3.1 for India and 3.8 for Bihar. The TFR decreases with the rise in education level. It could be seen that in 2015 and 2020, with the increase in educational level the TFR is decreasing.

Chart 12.4 : TFR by Education Levels of Women for India and Bihar



Source : Sample Registration System, RGI

Changing Age Composition

The changes in the age structure are the result of demographic transition, including declines in mortality and fertility. However, the pace of the transition may vary across the country. Chart 12.5 shows the comparative scenario of changes in the age structure of Bihar and India in various age groups viz. 0-19 years, 20 to 59 years, and 60 years and above. The share of the young population of Bihar, i.e. 0-19 years is projected to drop from as high as 49.4 percent in 2011 to 30.1 percent by 2041, registering a decline of 19.3 percentage points. On the other hand, the share of elderly, 60 years and above is projected to increase from 7.4 percent in 2011 to 11.6 percent by 2041, an increase of 4.2 percentage points. Bihar's demographic dividend will peak around 2041, when the share of working-age, i.e. 20-59 years, population is expected to hit 58.3 percent from 43.2 percent in 2011. An increasing working-age population means a demographic dividend, which will help the economy grow. A similar trend is also observed in India. However, the share of the increase of the elderly population is 7.3 percentage points for India, which is 3.1 percentage points higher than that of Bihar. The increase in the elderly population relates to the potential social support requirements and burden on the working population. The district-wise details of the age structure are given in Table A 12.4 (Appendix).

12.2 Health Status

Health and socio-economic developments are so closely entwined that it is impossible to achieve progress on one count, without registering it on the other. Providing equitable, affordable, and high-quality healthcare services to all citizens, with a particular focus on marginalized and vulnerable sections, is the main objective of the government. The healthcare network in the state is well-developed and includes primary, secondary and tertiary care. In the recent past, there has been a tremendous improvement in the quality of healthcare services in Bihar. This is illustrated by the significant improvement in healthcare indicators such as Life Expectancy at Birth (LEB), Infant Mortality Rate (IMR), and Maternal Mortality Rate (MMR) over the period. This section will present the relevant information on various initiatives taken by the State government to improve the health services in the state.

Selected Health Indicators in Bihar

Over the years, there has been a significant improvement in various health parameters of the state. Life Expectancy at Birth (LEB) is one of them, which is a proxy indicator for improvements in nutrition, education, sanitation, and knowledge of diseases. LEB reflects the average number of years a newborn is expected to survive under the current mortality schedule. The LEB for Bihar has significantly changed from 65.8 in 2006-10 to 69.5 years in 2016-20, registering an increase of 3.7 years in a decade, as depicted in Table 12.2. In 2016-20, the life expectancy of females and that of males in Bihar were almost equal at 69 years. In the case of India, the LEB for females was higher at 71.4 years compared to males at 68.6 years. The LEB of Bihar in 2016-20 has increased by 3.5 years in the rural and 4.0 years in the urban areas as compared to 2006-10. For India as a whole, LEB in 2016-20 has increased by 4.0 years for males and 3.7 years for females over 2006-10. Similarly, the LEB for rural areas has increased by 3.7 years and for urban areas by 3.6 years over 2006-10.

Table 12.2 : Life Expectancy at Birth (2006-10 and 2016-20)

(Figure in years)

Bihar/India	2006-10			2016-20		
	Male	Female	All	Male	Female	All
Bihar	65.5	66.2	65.8	69.7	69.2	69.5
India	64.6	67.7	66.1	68.6	71.4	70.0
Bihar/India	Rural	Urban	All	Rural	Urban	All
Bihar	65.6	67.9	65.8	69.1	71.9	69.5
India	64.9	69.6	66.1	68.6	73.2	70.0

Source : Sample Registration System (SRS), Office of the Registrar General, India

In addition to LEB, there are six other health indicators for which comparable data is available: Crude Birth Rate (CBR), Infant Mortality Rate (IMR), Child Mortality Rate (CMR), Under-Five Mortality Rate (U5MR), Neo-Natal Mortality Rate (NMR), and Peri-Natal Mortality Rate (PMR). Table 12.3 presents important data for these indicators for both Bihar and India, covering the years 2015 and 2020. The Crude Birth Rate (CBR) is consistently higher in Bihar; for instance, in 2020, it was recorded at 25.5 per 1000 person for Bihar compared to 19.5 for India, reflecting a difference of 6.0 percentage points. However, over the period from 2015 to 2020, the gap between the CBR in Bihar and that in India has narrowed slightly. When examining the IMR, it is notable that the state figure has considerably dropped from 42 in 2015 to 27 in 2020. In contrast, the decline for India was less pronounced, decreasing from 37 in 2015 to 28 in 2020. By 2020, the IMRs for rural and urban areas in Bihar stood at 27 and 25, respectively, while the corresponding figures for India were 31 for rural and 19 for urban. This significant reduction in IMR can be attributed to the concentrated efforts of the State government. Concerning the Child Mortality Rate (CMR), it saw a decrease of 5.1 percentage points in Bihar, falling from 12.0 in 2015 to 6.9 in 2020. In contrast, India experienced a smaller reduction of 2.0 percentage points, from 10.0 in 2015 to 8.0 in 2020. Concerning the other three indicators, Bihar demonstrates notable declines of 18 and 7 percentage points, respectively. In comparison, this decrease for India was lesser than that of Bihar by 11 and 5 percentage points, respectively. The performance of these indicators in both rural and urban areas followed a similar trend.

Table 12.3 : Selected Health Indicators for Bihar and India (Percentage)

India/Bihar	Year	A/U/R	Crude Birth Rate	Infant Mortality Rate	Child Mortality Rate	Under-Five Mortality Rate	Neo-Natal Mortality Rate	Peri-Natal Mortality Rate

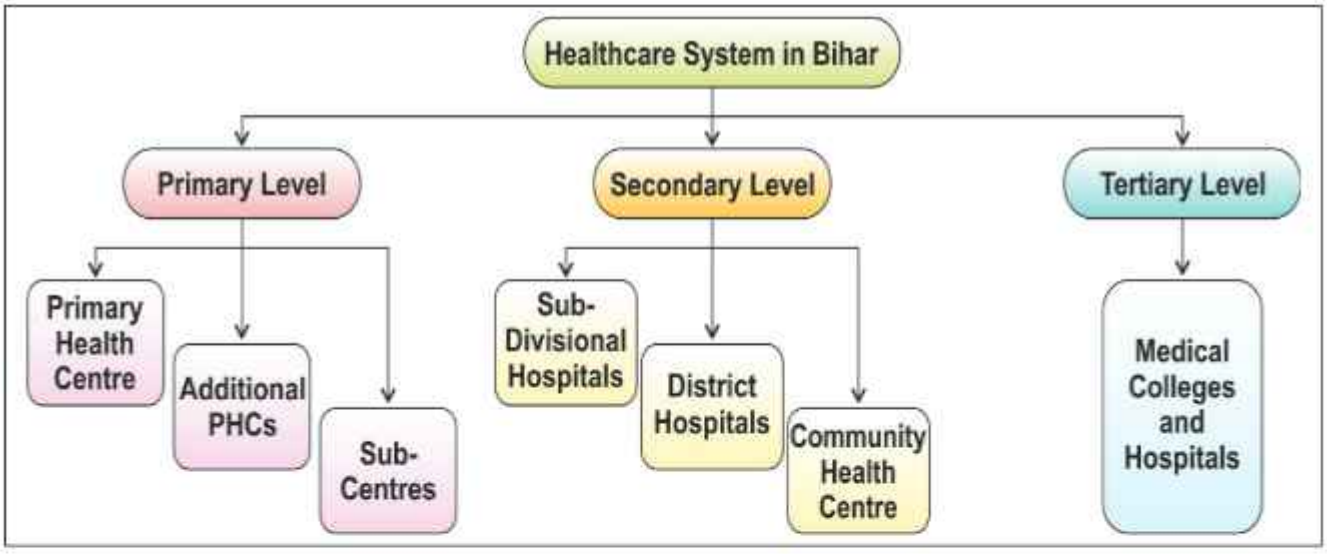
Health Infrastructure

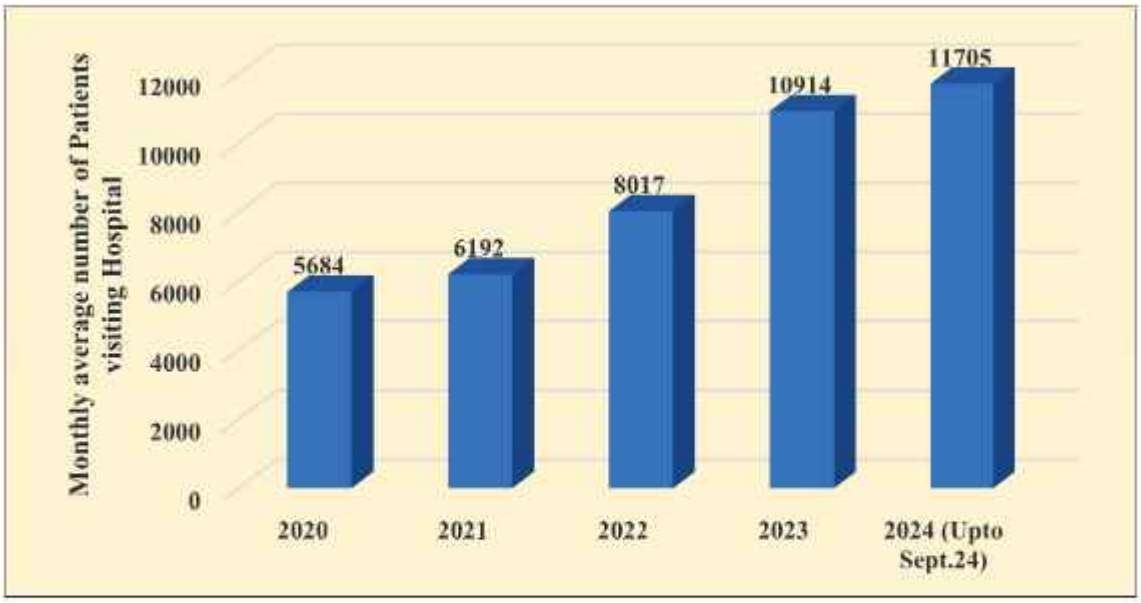
Health care refers to the delivering services aimed at enhancing the overall health of individuals. A robust health infrastructure is undoubtedly essential for the provision of such services. Healthcare infrastructure encompasses a well-balanced combination of physical facilities and human resources, as both components are necessary to provide the required health services. In Bihar, healthcare services are organized into three levels: primary, secondary, and tertiary. Primary healthcare represents the initial point of interaction between individuals and the healthcare system. This level of care is offered through a network of Sub-Centres (SC), Primary Health Centres (PHC), and Additional PHCs (APHC). Secondary healthcare functions as a second tier of the health system, where patients from primary care are referred to specialists in larger hospitals for treatment. The secondary healthcare services consist of District hospitals, Sub-divisional hospitals, and Community Health Centres at the block level. Tertiary care indicates a third level of healthcare, where specialized consultative services are provided, typically following referrals from primary and secondary care. This level includes specialized intensive care units, advanced diagnostic support services, and expert medical personnel. Medical colleges and hospitals deliver the tertiary care services (Chart 12.6).

Chart 12.6 : Three Levels of Health Care System in Bihar



Most of the population in Bihar relies on public health services for preventive and protective healthcare. Recently, the State government has implemented several practical measures to enhance the operations of public health institutions. The recent enhancements in the performance of health care systems in Bihar are reflected in the average monthly patient visits to government hospitals (Chart 12.7). In 2023, the number of patients visiting hospitals per month was 10,914, denoting an increase of 92.01 percent over 5684 in 2020. Moreover, it is remarkable to note that between April and September 2024, the average number of patients visiting hospitals each month was even higher at 11705.

Chart 12.7 : Monthly Average Number of Patients Visiting Government Hospitals



Source : State Health Soceity, GoB

In the public sector, a Health Sub-Centre represents the most remote and initial point of interaction between the primary health care system and the community. A Sub-Centre engages with the community at the grassroots level, delivering all primary health care services. According to government regulations, a Sub-Centre should be established to serve a population of 5,000 in non-tribal rural regions, and a PHC needs to be created for a population of 30,000 in similar areas. Additionally, a CHC is required to function as a Referral Centre for every four to five PHCs, catering to a population ranging from 80,000 to 120,000. In 2023, there are 35 district hospitals, 67 referral hospitals, 54 sub-divisional hospitals, 534 PHCs, 10399 Sub-Centres and 1399 APHCs; the last three types add up to 12332 health centres. Thus, in 2024, for per 10 lakh of population, there are about 122 health centres in the state (Table 12.4). The district-wise details are given in Table A 12.5 (Appendix).

Table 12.4 : Overall Status of Health Infrastructure

(Figures in number)

Year	District Hospital	Referral Hospital	Sub Divisional Hospital	Health Centres				Health centres per ten lakh population
				PHC	Sub Centre	APHC	Total	
2017	36	70	55	533	9949	1366	11848	99
2018	37	70	55	533	9949	1379	11861	114
2019	36	67	45	533	10258	1399	11657	114
2020	36	67	45	533	10258	1399	12190	114
2021	36	67	45	533	10258	1399	12190	114

Note : Health centre per ten lakh of population takes 2011 population as base

Source : State Health Society, GoB

The efficiency of public health facilities can be assessed on the basis of outpatient visits and inpatient services. The hospitals of Bihar collect data on outpatients and inpatients through the Hospital Management Information System (HMIS), which is a Government of India portal. For the state as a whole, the average number of outpatient visits increased 1.2 times from 312 in 2019-20 to 373 in 2023-24. The Bed Occupancy Rates and length of stay are also two measures that reflect the functional ability of a hospital. Between 2019-20 and 2023-24, the overall Bed Occupancy Rate of Bihar decreased from 55 percent in 2019-20 to 47 percent in 2023-24. However, as per data available for the last six months, both indicators show a rise in numbers. The outpatient visits per day till September 2024 in 2023-24 is 382 and the in-patient bed occupancy rate is 54 percent. Table A 12.6 (Appendix) shows that the average number of outpatient visits per day in 17 districts of the state was more than the state average at 373. Also, the bed occupancy rate was more than the state average (47 percent) in 21 districts of Bihar.

Chart 12.8 : Outpatients Visiting Per Day and In-patient Bed Occupancy Rate in Bihar

Health Workforce

Health and well-being are paramount for sustainable development. A sound healthcare system is interconnected with long-term factors responsible for inclusive growth. The health workforce plays an important role in this. The problem of non-availability and uneven distribution of skilled health care providers is the central challenge towards meeting the health goals. Thus, the aim of the government is to guarantee sound health and well-being of people through a preventive and promotive healthcare orientation in all developmental policies and by providing universal access to quality healthcare services. Mainly, the health personnel include — doctors, nurses, Auxiliary Nurse-cum-Midwife (ANM), and Accredited Social Health Activist (ASHA). The availability of

such personnel for the entire state is presented in Table 12.5. Four tables in the Appendix present the same data for different districts — Table A 12.7 (Doctors), Table A 12.8 (Nurses), Table A 12.9 (ANM) and Table A 12.10 (ASHA).

Table 12.5 : Number of Health Personnel in Bihar

Name of the Post	Regular			Contractual		
	Sanctioned Posts	Working		Sanctioned Posts	Working	
		2022-23	2023-24		2022-23	2023-24
Doctor	12895	7144	7144	4751	2702	602

Institutional Delivery

Maternal health is a core function of all public health services. According to the National Family Health Survey (NFHS) data, the rate of institutional deliveries in Bihar rose nearly four-fold from NFHS-3 (2005-06) to NFHS-5 (2019-21). Additionally, it's noteworthy that institutional deliveries in rural regions also saw a four-fold increase, while urban institutional deliveries nearly doubled within the span of 15 years. It is important to mention that this growth was relatively lower for India. From NFHS-3 to NFHS-5, India experienced an increase in institutional deliveries by 49.9 percentage points, rising from 38.7 percent to 88.6 percent. In Bihar, this rise was 56.3 percentage points, going from 19.9 percent in 2005-06 to 76.2 percent in 2019-21. These institutional delivery rates reflect the strength of the state's healthcare system.

Janani Suraksha Yojana (JSY)

JSY is a demand promotion and conditional cash transfer scheme for promoting institutional delivery. The scheme is a safe motherhood intervention under the National Health Mission (NHM) launched in April, 2005 as a Centrally Sponsored Scheme. Reducing maternal and infant mortality is one of the key goals of the NHM. JSY is a 100 percent centrally sponsored scheme that provides cash assistance with delivery and post-delivery care. Under this scheme, the states are divided into Low Performing States (LPS) and High Performing States (HPS) based on their performance in institutional delivery rates. The Yojana has identified ASHA, as an effective link between the government and deprived pregnant women. The Scale of Cash Assistance for Institutional Delivery are shown below.

Table 12.6 : Financial Assistance under JSY (Rs.)

Category	Rural Area	Urban Area	Eligibility Criteria
Institutional Delivery			
LPS	1400	1000	Available to all women regardless of age and number of children for delivery in government and private accredited health facilities
HPS	700	600	Available only to BPL/SC/ST women regardless of age and number of children for delivery in government and private accredited health facilities
Home Delivery			
LPS	500	500	Available to only BPL women regardless of age and number of children who prefer to deliver at home
HPS	500	500	

Note : 1. ASHA's package of Rs. 600 in rural areas includes Rs. 300 for ANC component and Rs. 300 for facilitating institutional delivery
2. ASHA's package of Rs. 400 in urban areas includes Rs. 200 for ANC component and Rs. 200 for facilitating institutional delivery

Source : Ministry of Health and Family Welfare

Between 2018-19 and 2023-24, the number of institutional deliveries in Bihar increased from 16.02 lakh to 16.52 lakh, registering an increase of 3.12 percent (Chart 12.9). Payments under this scheme are being made through the DBT mode. The State government has been providing assistance to JSY beneficiaries through the DBT mode since 2013, using Aadhaar-linked bank accounts. The district-wise details about the scheme are given in Table A 12.11 (Appendix).

Immunisation

Immunization is a proven tool for controlling and eliminating life-threatening transmittable diseases. It is one of the most cost-effective health investments, with proven strategies that make it accessible to even the most hard-to-reach and vulnerable populations. It has clearly defined target groups; it can be delivered effectively through outreach activities; and vaccination does not require

any major lifestyle changes. The proportion of children aged 12-23 months in Bihar who are fully immunized has risen significantly from 11.6 percent (NFHS-2, 1998-99) to 71.0 percent in 2019-20 (NFHS-5), reflecting an increase of 59.4 percentage points. A well-implemented immunization program that targets everyone evenly will significantly help in decreasing the prevalence of vaccine-preventable diseases, thus aiding in the attainment of the Sustainable Development Goal (SDG) to lower the IMR to 25 per 1,000 live births by 2030. The relevant data in this regard is presented in Table 12.7. This data refers to five components of immunisation – Td (Anti-tetanus), BCG, OPV, PENTA and measles. Looking at the most recent figure (2023-24), one notices that Bihar has achieved more than 75 percent in immunization coverage in most of the vaccines, except oral polio vaccine (zero) where coverage is still 59.8 percent.

Table 12.7 : Antigen-wise Immunisation Coverage in Bihar

Antigen name	2021-22		2022-23		2023-24	
	Target ('000)	Achievement ('000)	Target ('000)	Achievement ('000)	Target ('000)	Achievement ('000)
TT 2 + Booster (PW)	3469	2422 (69.8)	3441	2951 (85.8)	3488	2733 (78.4)
BCG	3285	2364 (72.0)	3097	2572 (83)	3143	2567 (81.7)
OPV 0	3285	1631 (49.6)	3097	1822 (58.8)	3143	1881 (59.8)
OPV 1	3285	2471 (75.2)	3097	2887 (93.2)	3143	2674 (85.1)
OPV 2	3285	2332 (71.0)	3097	2954 (95.4)	3143	2598 (82.7)
OPV 3	3285	2153 (65.5)	3097	2885 (93.2)	3143	2499 (79.5)
PENTA-1	3285	2483 (75.6)	3097	2894 (93.4)	3143	2723 (86.6)
PENTA-2	3285	2341 (71.3)	3097	2959 (95.5)	3143	2655 (84.5)
PENTA-3	3285	2167 (66.0)	3097	2889 (93.3)	3143	2555 (81.3)
Measles (MR-1)	3285	2554 (77.7)	3097	3018 (97.4)	3143	2724 (86.7)

Prevalence of Main Diseases

Estimating disease burden based on sound epidemiological research provides the foundation for effective public policy. Communicable and non-communicable diseases are still persisting in Bihar and India as major health problems. The information on the main diseases in Bihar is presented in Table 12.8. It is evident from the table that, in 2023-24, dog bite was the most important cause of illness in Bihar, accounting for 244.37 thousand patients. The next dominant category was Acute Diarrhoeal Disease, accounting for 25.64 thousand patients. Other important diseases as per their occurrence in 2023-24 are given in Table 12.8. The total number of patients in 2023-24 was 357.58 thousand. The district-wise figures for the same are provided in Appendix (Table A12.12).

Table 12.8 : Prevalence of Main Diseases in Bihar

(No. of patients in thousand)

Disease	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25 up to Sept., 2024
Acute Diarrhoeal Disease (including acute gastroenteritis)	308.31 (11.2)	21.07 (8.4)	12.32 (8)	22.36 (6.6)	25.64 (7.2)	11.01 (6.3)
Bacillary Dysentery	146.84 (5.3)	11.32 (4.5)	5.97 (3.9)	18.18 (5.4)	22.58 (6.3)	11.48 (6.6)
Viral Hepatitis	24.57 (0.9)	14.41 (5.7)	5.82 (3.8)	1.15 (0.3)	0.6 (0.2)	0.59 (0.3)
Enteric Fever (Typhoid)	130.45 (4.7)	9.32 (3.7)	3.47 (2.3)	26.6 (7.9)	24.43 (6.8)	11.67 (6.7)
Malaria	19.31 (0.7)	2.91 (1.2)	1.85 (1.2)	45.53 (13.4)	22.58 (6.3)	13.91 (7.9)
Acute Respiratory Infection (ARI)/Influenza Like Illness (ILI)	901.6 (32.8)	64.79 (25.8)	49.58 (32.2)	17.67 (5.2)	17.38 (4.9)	12.1 (6.9)
Dog bite	312.63 (11.4)	41.51 (16.5)	28.73 (18.6)	207.18 (61.2)	244.37 (68.3)	114.45 (65.3)
Total	**2748.53 (100)**	**251.45 (100)**	**154.08 (100)**	**338.66 (100)**	**357.58 (100)**	**175.2 (100)**

National Health Mission

The National Health Mission (NHM), launched in 2005, incorporates two Sub-Missions — the National Rural Health Mission (NRHM) and the National Urban Health Mission (NUHM). The main programmatic components include Health System Strengthening, Reproductive-Maternal-Neonatal-Child and Adolescent Health (RMNCH+A), and Communicable and Non-Communicable Diseases. The NHM envisions accomplishment of universal access to equitable, affordable and quality health care services that are accountable and responsive to public needs. The NHM fund sharing pattern is 60:40 between the Central and the State governments. The NHM is a major instrument of financing and supporting the states to strengthen public health systems and healthcare delivery. Financing to the states is based on the state's Programme Implementation Plan (PIP). The State PIPs comprise following major pools — (a) NRHM RCH Flexible Pool, (b) National Urban Health Mission Flexible Pool, (c) Flexible Pool for Communicable Diseases, (d) Flexible Pool for Non-Communicable diseases, and (e) Infrastructure Maintenance. Though, from 2022-23, all pools of NHM have been merged together (Table 12.9). Between 2018-19 and 2023-24, the total fund disbursed to the health societies under NHM increased by 26 percent. Compared to 2022-23, the fund disbursed increased by 43 percent in 2023-24. The details of district-wise fund disbursement are given in Appendix (Table A 12.13).

Table 12.9 : Funds Disbursed to Health Societies

(Rs. lakh)

Year	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24
NRHM A	63628.6	50363	86843	53855.5

Some Notable Achievements of the Health Department

New Referral Policy : A Referral Policy has been framed to stop the practice of referring patients to the hospitals of Patna and other medical colleges and hospitals. Under this Policy, patients will be provided with complete treatment, and then, if needed, they will be referred to other hospitals according to their category of illness. This system will decrease the undue burden on ambulances and secondary and tertiary services.

Establishment of Blood Bank : Blood banks are being established, to have regular supply of blood. Following this aim, a blood bank was established in 2023 at the Guru Govind Singh Hospital, Patna City. Presently, 116 blood centres and 71 blood collection units are operational in the state. Information about all blood centres is available on the e-Raktkosh Portal.

Mukhyamantri Digital Health Yojana (MDHY): Bihar became the pioneering state to launch MDHY in 2022 to offer basic medicinal services through digital technology. Presently, the scheme is operational in 20 districts. Facilities like online OPD appointment, information about nearest hospitals and availability of doctors, facility to make Ayushman Bharat ID card sitting at home, 24X7 emergency medical services, consultation with medical specialists, etc. are provided under the scheme.

12.3 Drinking Water Supply and Sanitation

Better water supply and sanitation services have important externalities in terms of improved public health. To provide every person with adequate safe water for drinking, cooking and other basic domestic needs on a sustainable basis and to achieve universal sanitation coverage, the

government has taken several pragmatic steps. Access to water, sanitation, and hygiene — collectively referred to as WASH — has significant socio-economic effects, especially for women and girls. The inclusion of WASH with specific targets in the Sustainable Development Goals (SDG 6) highlights its essential contribution to public health and sustainable development. Bihar ranked third in the country with a score of 98 in SDG-6 in the SDG India Index 2023-24.

As per NFHS-5, Bihar has seen improvements in drinking water and sanitation facilities over the past five years. The percentage of households with access to an improved drinking water source rose by 0.8 percentage points, increasing from 98.4 percent in 2015-16 to 99.2 percent in 2019-20. Additionally, Bihar has made significant strides in sanitation facilities during this period, with figures ascending from 26.5 percent in 2015-16 to 49.4 percent in 2019-20, reflecting a substantial improvement of 22.9 percentage points.

Drinking Water Supply: Har Ghar Nal Ka Jal (HGNJ)

In order to achieve affordable and sustainable water supply in rural/urban areas, the State government rolled out the Mukhyamantri Peyjal Nishchaya Yojana 'Har Ghar Nal Ka Jal' programme in September 2016. The scheme intends to provide 70 litres per capita per day (LPCD) of potable drinking water to approximately two crore households in the state through state agencies with the concerted cooperation of the people of every village and locality in Bihar.

The Mukhyamantri Peyjal Nishchay Yojana is one of the vows of Saat Nishchay. The Yojana is meant for both rural and urban areas. In the rural areas, three of the schemes are- Mukhyamantri Gramin Peyjal Nishchay Yojana (Quality Affected Areas), Mukhyamantri Gramin Peyjal Nishchay Yojana (Non-quality Area) and Mukhyamantri Gramin Peyjal Nishchay Yojana. The first one covers those areas where the quality of groundwater is contaminated due to excess presence of arsenic, fluoride or iron, and the second covers non-quality affected areas of those Gram Panchayats where piped water supply schemes were commissioned before the launching of the scheme. The third scheme is related to the Panchayati Raj Department (PRD), where the Ward Implementation and Management Committee (WIMC) of Gram Panchayats has been designated as the executive agency to plan and execute the construction work of piped water supply scheme. All schemes executed by the PRD under "Har Ghar Nal ka Jal" have now been transferred to the Public Health Engineering Department (PHED) for operation and maintenance. Accordingly, the schemes executed in 58003 Wards were transferred to the PHED between June 2023 and October 2023 for smooth operation and maintenance. The Mukhyamantri Shahri Peyjal Nishchay Yojana is implemented in urban areas by Nagar Nikay.

After the completion of the ward-level scheme in all the 56447 wards, 10,719 left-out habitations/tolas have been found uncovered under the HGNJ programme. For coverage of these left-out habitations/tolas, a detailed survey has been conducted. After preparing the detailed estimates, the execution process for covering the left-out tolas/habitations with tap water connection is going on (Table A 12.14 (Appendix).

Physical and Financial Progress

Till September 2024, out of 114050 rural wards, 113825 have been covered and about 1.74 crore rural families have received functional Household Tap Connections (FHTC). Equivalently, the total expenditure on the scheme till the period is Rs. 24955.92 crore. Details are given in Table 12.10. The details of the district-wise coverage of "Har Ghar Nal ka Jal" are given in the Appendix (Table A 12.15).

Table 12.10 : Physical and Financial Achievement

Year	Physical Achievement		Financial
	Ward	FHTC	Expenditure in Rs. Crore
2016-17	730	266293	2473.13
2017-18	3027	525338	3343.53
2018-19	18680	599814	3443.31
2019-20	33319	5474207	7009.99
2020-21	54507	5515283	2996.16
2021-22	2990	4029677	2282.34
2022-23	435	266576	1508.78
2023-24	27	4212	1566.19
2024-25 (Up to Sept. 2024)	110	732750	332.49

Sanitation

The State government has launched a comprehensive strategy to realize Swachha Bharat, enhance universal sanitation awareness to make Bihar free of open defecation, and elevate cleanliness standards through effective solid and liquid waste management. To ensure widespread sanitation coverage, the State government has introduced two additional schemes under the notable title of "Shauchalaya Nirmaan Ghar ka Samman". These initiatives are — (i) Lohiya Swachh Bihar Abhiyan and (ii) Shauchalaya Nirmaan (Shahri Kshetra) Yojana. Under the Lohiya Swachhata Yojana, the State government is committed to providing support for all APL families in rural locales, offering an incentive of Rs. 12,000 to both APL and BPL families. In urban areas, the

Central government provides an incentive of Rs. 4000 under the Swachh Bharat Mission (SBM) (Urban). Additionally, the State government contributes a further Rs. 8000 under the Shauchalaya Nirmaan (Shahri Kshetra) Yojana, ensuring that every household in towns receives a total incentive of Rs. 12,000. The responsibility for implementing LSBA was handed over from the PHED to the Rural Development Department in June 2016. Since that time, JEEViKA has been operating in a mission-oriented manner, which promotes a beneficiary-focused and demand-responsive model through changes in behavior. The extensive Self-Help Group (SHG) network of JEEViKA is being harnessed to create the necessary behavioral shifts. The funding distribution for SBM(G) is shared between the Central and State governments at a ratio of 60:40.

Lohiya Swachh Bihar Abhiyan (LSBA)

The Lohiya Swachh Bihar Abhiyan Phase-II and SBM specifically enhance the abilities of individuals and communities in rural Bihar, fostering a people's movement aimed at ensuring the sustainability of Open Defecation Free (ODF) practices. The community members continue to engage in safe and hygienic practices, and every village has established systems for managing solid and liquid waste. Currently, solid and liquid waste management initiatives have commenced in 7764 Gram Panchayats. For 2024-25, specific objectives have been outlined for the Lohiya Swachh Bihar Abhiyan - Phase II, all aimed at fulfilling the overarching aim of "Swachh Gaon-Samriddh Gaon", one of the Saat Nishchay goals:

- To provide new and migrant families access to individual toilets, 6.66 lakh Individual Household Latrines (IHHLs) are proposed to be constructed. Beneficiaries will receive incentive money after completing the construction themselves.
- More Community Sanitary Complexes will be constructed.
- All remaining Gram Panchayats (289) are planned to implement Solid and Liquid Waste Management (SLWM).
- Plastic Waste Management: To address the issue of plastic waste in rural areas, more than 55 Plastic Waste Management Units (PWMU) will be set up in the selected blocks of the state. As of now, 143 PWMUs are functional in all districts.
- Under the GOBAR-dhan scheme, the remaining seven districts are targeted to start bio-gas units at the community or cluster level. This will help manage the agricultural and animal bio-waste generated in villages, Gaushalas, Dairies, etc. As of now, 31 GOBAR-dhan units are completed.

There is a clear connection between hygiene and health. Significant improvements have been observed in the building of IHHL over the past five years. In 2022-23, 8.4 lakh IHHLs and in 2023-24, 8.3 lakh IHHLs have been constructed. With the increase in IHHL availability, the

incidences of water-borne diseases like diarrhoea will decline. Regarding the construction of Community Sanitary Complex, 644 were constructed in 2022-23 and 62 in 2023-24 (Table 12.11). The district-wise distribution of IHHLs under the SBM-G/LSBA Sanitation Programme is detailed in Table A 12.15 (Appendix).

Operation and Maintenance System for Piped Water Supply Schemes

The government has approved the Operation & Maintenance Directives for long-term maintenance of piped water supply schemes. Ten principles of long-term maintenance have been identified, and the following activities have been approved.

1	House Connection to all households in scheme command area
2	Continuous Water Supply on scheduled time
3	Water Supply with adequate pressure
4	Record-keeping by Pump Operator
5	Timely redressal of Users' grievances
6	Monthly meeting at Jal Chaupal
7	Regular payment of Monthly User Charge
8	Regular water quality testing
9	Quarterly Consumers' satisfaction survey
10	Waste water management at consumer level

12.4 Education and Youth

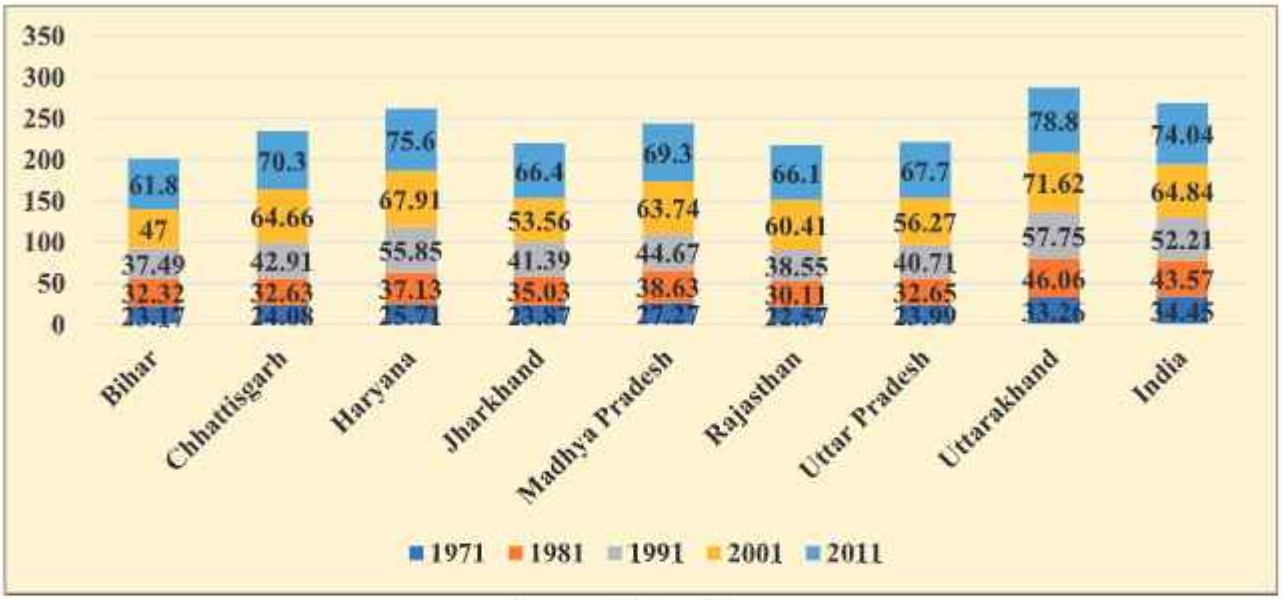
Education is the foundation for equipping and empowering children with the necessary knowledge and skills, enabling them to secure productive job opportunities. The education system faces various challenges such as shifting population dynamics, the need for high-quality education, affordable vocational training, access to higher education, and advancements in innovation and

research. The objective of 'Quality Education', recognized as Goal 4 within the SDGs, seeks to "Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all" by the year 2030. The National Education Policy (NEP), introduced in 2020 and currently in its fourth year of execution, is a strategic framework that not only aligns with the Education SDG Goals but also prepares young individuals to navigate the challenges and opportunities arising from the knowledge-driven economy of the 21st century. This section presents the status of education in Bihar, in terms of literacy rate, enrolment ratio, dropout rate, number of schools and teachers, expenditure on education, PM-POSHAN Scheme, Samagra Shiksha Abhiyan and other relevant schemes.

Literacy Rate

In India, literates in 2011 constituted 74 percent of the total population aged seven years and above, as compared to 65 percent in 2001. While comparing decadal variation in literacy rates of Hindi heartland states, it is seen that during the last decade the literacy rate of Bihar has improved significantly, from 47.0 percent in 2001 to 61.8 percent in 2011. This implies an increase of 14.8 percentage points. It is worthy to note that this decadal increase is not only the highest among all decadal growth rates in Bihar since 1971, it is also the highest among all the states for the decade 2001-11. Chart 12.11 presents the trend of literacy rates in the Hindi heartland states between 1971 and 2011.

Chart 12.11 : Trend of Literacy Rates in Hindi Heartland States



Source : Various Census

Elementary and Secondary Education

The advancement of education in the state relies on simultaneous development in its elementary, secondary, and higher education levels. However, for a densely populated state like Bihar, the elementary education sector is of utmost significance, as it serves as the foundation for students progressing into the secondary sector, which subsequently prepares students for the higher

education level. Improvement in the elementary education sector also indicates an inclusive process, as it is particularly pertinent for a significant number of first-generation learners hailing from underprivileged backgrounds. The status of elementary education is indicated by two crucial indices — enrolment ratio and dropout rate. The performance on these two indicators, in turn, is most influenced by the availability of educational infrastructural facilities (schools, teachers) and pedagogy (theory and practice of education). This is particularly important for Bihar where most of the families reside in rural areas and depend entirely on government schools.

Enrolment at Elementary Level

The status of total enrolment in elementary education during 2019-20 to 2023-24, for both primary and upper primary classes, is presented in Table 12.13. The total enrolment at primary level was 112.09 lakh in 2023-24, of which 58.19 lakh are boys and 53.90 lakh are girls. At the upper primary level, the total enrolment is 56.22 lakh, among which 28.48 lakh are boys and 27.74 lakh are girls. As a whole, the total enrolment, taking primary and upper primary together, stood at 168.31lakh, of which 86.67 lakh are boys and 81.64 lakh are girls. The total enrolment for SC and ST students at the elementary level stood at 33.50 lakh for SC and 3.26 lakh for ST students respectively. The district-wise total enrolment is given in the Appendix Table A 12.17 (All students), A 12.18 (SC) and A 12.19 (ST).

Table 12.13 : Total Enrolment in Primary and Upper Primary Levels

(Numbers in lakh)

Level/ Type of Students	Primary								
	Boys			Girls			All

Dropout Rate

The achievement of high enrollment is significant only if the enrolled children continue their education in school. The reasons for drop-out can generally be grouped into several categories: social, economic, cultural, teaching methods, administrative practices, and infrastructure. In Bihar, all these factors are present to different extents. It is essential to thoughtfully plan preventive actions and intervention strategies that could be implemented to support the students who are at a risk of dropping out. It is observed from Table 12.14 that the drop-out rates have significantly fallen over the years. The decline at the secondary level is 62.25 percentage points between 2019-20 and 2023-24. It is also laudable that in the same period, the decline in the drop-out rate of girls is higher compared to that of the boys.

Table 12.14 : Drop-out Rates for Primary, Upper Primary and Secondary Levels

Year	Primary			Upper Primary			Secondary		
	Girls	Boys	Combined	Girls	Boys	Combined	Girls	Boys	Combined
2019-20	20.4	24.8	22.7	37.3	40.1	38.8	66.7	60.8	63.5
2020-21	2.13	3.39	2.77	3.39	2.13	2.77	22.67	20.01	21.36
2021-22	4.02	5.21	4.62	5.21	4.02	4.62	21.43	19.49	20.46

Table 12.15 presents the drop-out rates of SC and ST students in the primary, upper primary and secondary levels from 2019-20 to 2023-24 in Bihar. The figures in the table clearly indicate that the drop-out rates for SC and ST students have also decreased progressively during this period. The drop-out rate of SC girls has been lower than that of SC boys throughout the period, in both upper primary and secondary levels.

Table 12.15 : Drop-out Rates (SC&ST) in Primary, Upper Primary and Secondary Levels

Year	Primary			Upper Primary			Secondary

Number of Teachers and Schools

According to the National Education Policy 2020, a pupil-teacher ratio (PTR) of under 30:1 will be ensured at the level of each school, and areas having socio-economically disadvantaged students will aim for a PTR of under 25:1. The total number of teachers in primary and upper primary schools of Bihar in 2023-24 was 4,07,331. An important dimension of educational infrastructure is the number of teachers and schools in the state. The total number of primary and upper primary schools in Bihar in 2023-24 was 82,103. The district-wise number of primary and upper primary teachers and schools is presented in Appendix Table A12.20 and Table A 12.21.

Expenditure on Education

Education is an essential component of the social sector which is in concurrent list. It has the potential to alter societal stigmas through the process of education. In Bihar, the level of expenditure on education has steadily increased in the last six years. Chart 12.12 shows the expenditure on elementary, secondary and higher education. The total expenditure on education has increased from Rs. 23618 crore in 2018-19 to Rs. 43224.34 crore in 2023-24. The growth rate of total expenditure on education has been as high as 13.9 percent during this period. It is evident that in all these years, elementary education has the highest share of the total expenditure, compared to other two categories.

Chart 12.12 : Trend of Expenditure in Education Sector

Source : Department of Finance, GoB

Pradhan Mantri Poshan Shakti Nirman (PM POSHAN)

The MDMS was a right-based scheme, which was introduced in 1995 to improve elementary education through higher enrolment of the children in the age group of 6-14 years and, hopefully, their retention in schools. The scheme also has substantial implications for the nutrition status of the children and for social equity. The scheme was extended in October, 2007 to cover the children of upper primary classes and the name of the scheme was changed as National Programme of Mid-Day Meal in Schools. From 2015-16 onwards, the cost-sharing pattern for cooking costs and

honorariums of MDMS is 60:40 for the Central and State governments. In September, 2021, the existing MDMS was renamed as Pradhan Mantri Poshan Shakti Nirman (PM POSHAN) as a modified version of the existing scheme. Under the scheme, the provision of hot cooked meals has been extended to the children of pre-schools or Bal Vatika (before Class I) in primary schools. For other recurring components, the Central government bears the entire cost. The status of funds received and expenditure under PM-POSHAN is given in Table 12.16. It is praiseworthy that the expenditure against the Annual Work Plan & Budget (AWP&B) for PM-POSHAN scheme has been 100 percent or close to 100 percent in all these reporting years.

Table 12.16 : Status of Fund Received and Expenditure under PM Poshan Scheme

(Rs. crore)

Year		Fund Released			Total Expenditure	Expenditure as percentage of AWP & B
	Approved AWP & B	GOI	GOB	Total		
2019-20	1934.25	1093.13	631.65	1724.78	1790.61	99
2020-21	2284.80	1392.48	823.25	2215.73	2203.22	99

Previous year's expenditure of Rs. 608.47 crores is added in the 2023-24 expenditure
Source : PM-POSHAN, GoB

The comprehensive coverage of the scheme is shown in Table 12.17 for the years 2018-19 to 2023-24. Between 2018-19 and 2023-24, the average coverage of PM-POSHAN scheme in primary schools is 62.45 percent, and in upper primary schools it is 62.54 percent. The scheme played a significant role in reducing drop-outs and reducing malnutrition among children. The district-wise coverage of PM-POSHAN at primary and upper primary levels is presented in Appendix (Table A 12.22 and Table A 12.23) respectively.

Table 12.17 : Coverage of PM-POSHAN

Year	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

Kasturba Gandhi Balika Vidyalaya (KGBV)

Enrolment and Retention of children in schools are important for assessing any educational system. The education of girls, especially those belonging to the deprived sections, is a primary concern, and efforts are being made to focus on gender concerns in various Samgra Shiksha activities. The Kasturba Gandhi Balika Vidyalaya (KGBV) scheme is an innovative step to strengthen the education of disadvantaged girls. The scheme of KGBV has played a significant role in narrowing the gender gap in the educationally backward blocks (EBB) of the state. The scheme was launched in July 2004-05 for classes VI to VIII. In the state, all KGBVs are of model I, III and IV type i.e. hostel attached with existing Middle/High schools. In 2010-11, KGBV has been extended to all EBBs with rural female literacy below the national average, as per 2001 census. As per the NEP 2020, all KGBVs are to be upgraded to Class XII up to 2025-26. For this, additional construction in existing KGBV buildings is to be carried out in a phased manner. Three types of KGBVs are operational in the state, the details of which are given in Table 12.18.

Table 12.18 : Types of KGBV with Enrolment

(In number)

Types of KGBV	Class	KGBV	KGBV	Targeted Girls' Enrolment	Present Enrolment
		Sanctioned	Operational		
Type-I	VI to VIII	443	443	44300	43647
Type-III	VI to XII	92	92	13400	12644
Type-IV	IX to XII	192	148	14800	9513

Pradhan Mantri Uchchatar Shiksha Abhiyan (PM-USHA)

Pradhan Mantri Uchchatar Shiksha Abhiyan (PM-USHA) is a centrally sponsored programme which aims to work with 300-plus state universities and their affiliated colleges. Launched in 2013, the PM-USHA aims to provide strategic funding to eligible state higher educational institutions. It is based on central funding norms and is outcome-dependent. Funds flow from the central ministry through the state governments/union territories before reaching the identified institutions. Funding to states is made on the basis of the critical appraisal of State Higher Education Plans, which enlists each state's strategy to address issues of equity, access and excellence in higher education. PM-USHA places greater emphasis on the improvement of the quality of teaching-learning processes in order to produce employable and competitive graduates, post-graduates and Ph.D.

Samagra Shiksha Abhiyan (SSA)

The Samagra Shiksha Abhiyan (SSA) is India's educational program, catering to students from pre-primary to higher secondary levels. Launched in April 2018, this initiative aims to provide equitable and inclusive quality education. Recently, it has been updated to incorporate specific

provisions under the NEP 2020. The financial support for this program is split between the Union and State governments in a ratio of 60:40. SSA serves as a comprehensive development program that integrates the previously existing Centrally Sponsored Schemes of Sarva Shiksha Abhiyan (SSA), Rashtriya Madhyamik Shiksha Abhiyan (RMSA), and Teacher Education (TE) to enhance the management of implementation and coverage at all educational tiers. Key areas of focus for the program include Universal Access, Gender and Equity, Inclusive Education, Digital Initiatives, RTE Entitlements (such as uniforms and textbooks), Pre-school education, Vocational training, Sports and Physical education, among others. Table 12.19 illustrates the funding status received by the Bihar Education Project (BEP) for the years 2022-23 and 2023-24, detailing its distribution under the Samagra Shiksha Abhiyan.

Flagship Schemes under Education

Education is the foundation of development and progress and recognising its vital role in shaping the future of the state, the government is running several commendable schemes to support students across various levels of education. Some of the major State schemes of the Department of Education are mentioned below. Other flagship schemes related to children are mentioned in this Economic Survey's Chapter-13 that is on Child Development.

Mukhyamanrti Balika (Intermediate) Protsaahan Yojana

The state scheme was started in 2018-19 to empower girls and encourage them to enroll for Higher education. Under the scheme, an incentive amount of Rs. 25,000 is given to unmarried girls who have passed intermediate. Previously, an incentive amount of Rs. 10,000 was given, which was enhanced to Rs. 25000 in 2022-23. In the year 2023-24, Rs. 1390.33 crore was distributed among 5.56 lakh girls.

Mukhyamantri Balika (Snatak) Protsaahan Yojana

Under the scheme, Rs. 50,000 is given to the unmarried/married girl students who have cleared their graduation examination. The scheme was started in 2018-19 and previously, an incentive amount of Rs. 25000 was given as encourage amount, but from April 01, 2021 the amount has been revised and now Rs. 50,000 is given to each girl student who has passed her graduation examination. Under this scheme, Rs. 600 crore was distributed among 1.40 lakh unmarried/married girls in 2023-24.

Mukhyamantri Kishori Swasthya Yojana

The scheme was started in 2014-15 to sensitise girls regarding their health needs. Under this scheme, Rs. 300 is being transferred to the account of the girl student studying between class VII and XII. The amount will be transferred to their bank accounts only when they achieve 75 percent attendance in their government schools. In 2023-24, Rs. 28.40 crore was distributed among 9.46 lakh girls.

New Initiatives under Education

Special Classes : For all-round development of students, the Bihar School Education Board (BSEB) has started free residential coaching classes to help the brilliant students in preparing for Engineering (JEE) and Medical (NEET) entrance examinations. Also, country's largest examination complex, Bapu Examination Complex, has been developed by BSEB for conducting various examinations.

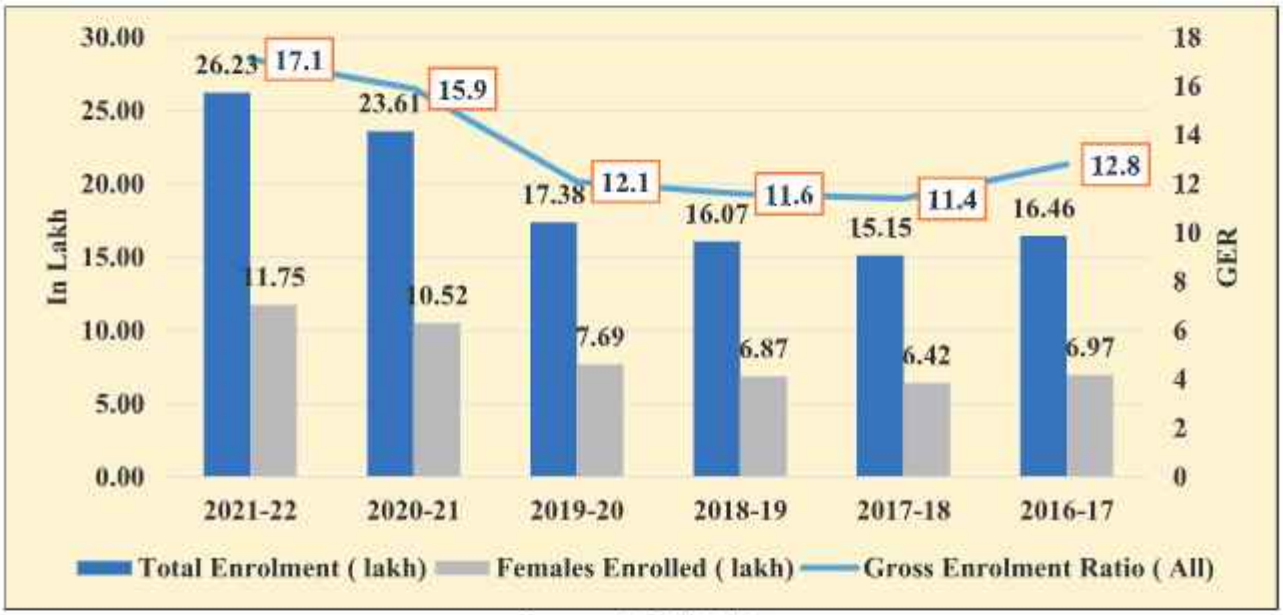
Computer Lab : Computer labs have been established on Build-Own-Operate model. Under this, 10 computers have been established in all middle schools and 20 in all secondary schools. Also, ICT labs have been established to train the students in computer science.

Recruitment of Teachers : In 2023-24 session, 1,77,929 teachers have been recruited for elementary, secondary and higher secondary schools. Also, till date, the State Education Research and Training Council, Patna, with the support of BIPARD and other training institutes, has trained 2,95,594 headmasters/teachers.

Higher Education

The higher education sector in Bihar has witnessed a tremendous expansion in terms of the number of universities, university-level institutions and colleges over the years. The importance of higher education in contributing towards the development of human potential is even more significant for states like Bihar. The progress of higher education in any state is assessed in terms of its institutional capacity and streams. The educational institutional capacity is measured by the number of educational institutions — universities and colleges, number of teachers and number of students seeking higher education. Streams may be of several natures — general, vocational, professional or technical education. Chart 12.13 portrays the status of higher education in Bihar.

Chart 12.13 : Higher Education Status of Bihar at a Glance



Source : AISHE, GoI

Bihar includes college and university education, both for general and technical streams in the higher education sector. In 2023-24, 39 universities are running in the state, of which 19 are state universities, 6 are Institutes of National Importance, 4 are Central Universities, 1 Deemed University, 1 Institute under State Legislative Act, and 1 is Open University, and another 7 are private universities. The details of the higher education institutions of Bihar are given in Table 12.20. The district-wise details of affiliated and constituent colleges are given in Appendix (Tables A 12.24).

The National Assessment and Accreditation Council (NAAC) assesses how well an institution promotes gender equity and sensitivity during its accreditation process. It also encourages the use of digital tools to enhance competencies. This is regarded as an important marker of 'Institutional Values'. In 2023-24, five universities and 74 colleges have received NAAC accreditation (Table 12.21).

Table 12.20 : Institutions of Higher Education

(In number)

Technical Education

Science and technology have always been vital components of our social and behavioural culture, supported through various forms of technical education. To better reflect its mission and activities, the department was renamed as Department of Science, Technology, and Technical Education (DSTTE) in June 2023. It aims to deliver quality education that meets the standards established by the All-India Council of Technical Education (AICTE). In alignment with the state's seven resolves, the department is dedicated to offer high-level technical education to the students of Bihar at a minimal or no cost.

Institutional Arrangements

To meet the needs related to science, technology, and technical education, the Department of Science, Technology, and Technical Education (DSTTE) has established various institutions. Bihar Engineering University (BEU) was established in 2022, and colleges and institutions providing education in Engineering and Technology in the state have been affiliated with this university since March 2023. Additionally, the Bihar Council on Science and Technology (BCST) was created in 1984, while the State Board of Technical Education (SBTE) was established in 1955. BCST focuses on actively promoting science and technology throughout Bihar, whereas SBTE is responsible for the administration, evaluation, and certification of students in government polytechnic institutes. To facilitate decentralized planning and grant greater autonomy to government engineering colleges and polytechnic institutes, the Bihar government has recently approved the formation of an 'Institute Development Society' for all institutions under the Societies Registration Act of 1860. Furthermore, a consultancy policy has also been developed to adopt a self-sustaining ecosystem within these institutions.

Infrastructure

As part of the government's 'Seven Resolves' program and the Yuva Up mission initiative, known as 'Awsar Badhe Aage Padhe,' one engineering college and at least one polytechnic institute have been established in each district of Bihar. Currently, 38 government engineering colleges and 46 government polytechnics are operational across the 38 districts (Appendix Table A 12.25 and A 12.26). These institutions feature modern infrastructure, including administrative and academic blocks, separate hostels for boys and girls, and faculty residences. They have high-quality facilities such as well-equipped classrooms, laboratories, workshops, libraries, auditoriums, and smart classrooms, all designed to provide quality technical education. To meet the growing needs of institutes, students, and faculty, the second phase of construction is currently underway at various engineering colleges and polytechnic institutes. The department has also implemented measures to ensure a 24/7 power supply in all institutions through dedicated feeders and establishing Wi-Fi-enabled campuses.

Recruitment

To ensure quality technical education and uphold transparency in the recruitment process, teachers are appointed through the Bihar Public Service Commission (BPSC). Recently, 2,185 permanent teachers have been recruited across various categories, including 1,458 for government engineering colleges and 727 for government polytechnic institutes. In line with the state government's policy, 35 percent of the seats are reserved for women candidates. As a result, 398 women faculty members have been recruited in government engineering colleges, and 261 in government polytechnic institutes. This recruitment includes principals, professors, associate professors, assistant professors, departmental heads, and lecturers. In addition to the teaching staff, the recruitment process has already been initiated for non-teaching and support staff at the institute level.

Courses in Emerging Technology

The courses in emerging technologies have been introduced across various engineering and polytechnic institutes. These courses aim to boost students' efficiency and productivity in their specialized fields, ensuring they remain relevant and competitive in the job market. In addition to traditional offerings, new courses in cutting-edge areas such as the Internet of Things (IoT), Artificial Intelligence (AI), Machine Learning (ML), Data Science, Cybersecurity, Blockchain Technology, Biomedical Robotic Engineering, Networking, Web Technologies, Image Processing, Geo-Informatics, Geotechnical Engineering, and Transportation Engineering were started from the academic session 2022-23 (Table 12.22 and Table 12.23). Furthermore, in response to service demands within the construction industry, a Bachelor of Architecture (B.Arch.) course has been introduced at the Gaya Engineering College, beginning with the academic session 2023-24.

Table 12.22 : New Courses in Government Engineering Colleges

Engineering Level Course Name	
Artificial Intelligence	Computer science and engineering (Network)
Internet of Things	Biomedical and Robotics Engineering
Data Science	Aeronautical Engineering
Cyber Security	Cyber Security and Blockchain technology
Civil Engineering and Computer Science Application	Machine Learning
VLSI Design Technology	Electronics and Communication (VLSI design)
Robotics and Automation	Mechatronics Engineering
Mechanical and Smart Manufacturing	Artificial Intelligence and Machine Learning

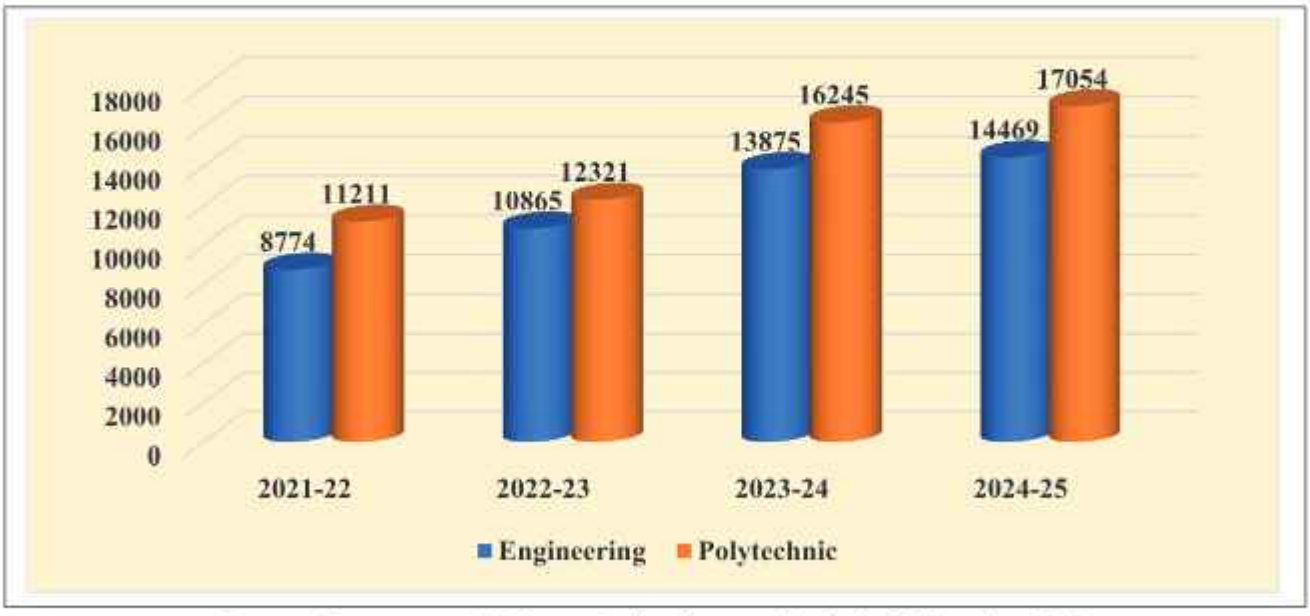
Intake capacity and reservation

The intake capacity for each course is established by the AICTE, considering the available infrastructure and facilities at the institutions. There has been a consistent increase in the intake capacity of engineering and polytechnic institutes each academic session, indicating substantial growth in government engineering colleges and polytechnic institutions. Currently, the approved intake capacity is 17,054 for government polytechnic institutes and 14,469 for government engineering colleges (Chart 12.14). Additionally, the number of M. Tech seats has increased to 612. In line with the Government of Bihar's policy to encourage higher technical education for female students, 33 percent (one-third) of the total seats at the degree-level and above courses are reserved for girls and women in all institutions affiliated with the Bihar Engineering University. In the academic year 2023-24, a total of 11,001 students (8,429 regular and 2,572 lateral) were admitted to government engineering colleges, while 15,178 students (14,017 regular and 1,161 lateral) enrolled in government polytechnic institutes.

Chart 12.14 : Intake Capacity of Engineering Colleges and Polytechnic



Source : Department of Science, Technology and Technical Education, GoB

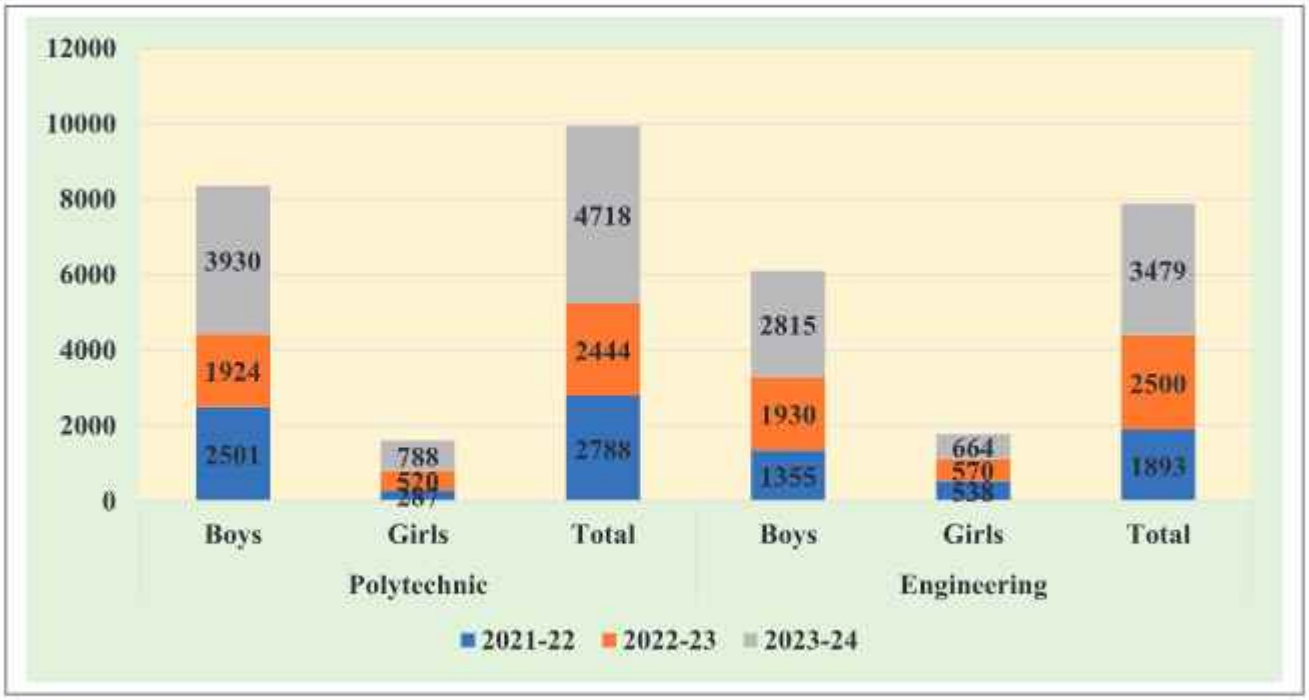
Establishment of Centres of Excellence (CoE)

Centres of Excellence have been established at government polytechnic institutes in collaboration with IIT Patna. Currently, there are 11 hubs and 33 spokes, focused on emerging fields such as drone technology, electric vehicles, artificial intelligence, the Internet of Things, 3D printing, robotics, and industrial automation. In the second phase, 33 additional hubs will be set up with the support of IIT Patna. This phase will introduce two new branches – Transformer Manufacturing and Optical Fiber (including 5G) – alongside the six branches established in the first phase. These centres are expected to become operational before March 2025. Additionally, Centres of Excellence in welding technology have been established at New Government Polytechnic (NGP) Patna, and in solar technology at GP Vaishali and Siwan, with the support from WEB-Tec Corporation and Snyder Technology, respectively.

Placement

A Placement Committee has been established at the department level, and a dedicated placement cell at each institution to facilitate job placements and encourage interaction with industry partners. The department also actively promotes entrepreneurship and supports students pursuing higher studies. In the last three academic sessions, a total of 17822 students have successfully secured placements in reputable industries, 7872 from government engineering colleges and 9950 from government polytechnic institutes (Chart 12.15). These quality placements greatly improve our students' employability.

Chart 12.15 : Details of Placements



Source : Department of Science, Technology and Technical Education, GoB

Capacity building

The department is committed to promoting knowledge transfer both between institutions and from institutions to individuals. This initiative aims to share best practices, lessons learned, and innovative ideas to prepare students in a better way for the demands of industry. Apart from these, the department has signed a Memorandum of Understanding (MoU) with I-Hub Divya Sampark, IIT Roorkee, which aims to train 12,000 students and 3,000 faculty members in emerging technologies such as Machine Learning and its applications, Data Science using Python, and IoT and Embedded Systems over three financial years. Additionally, a spoken tutorial project has been launched in collaboration with IIT Bombay to provide free training in open-source software (FOSS), including Linux, LaTeX, Java, Esim, Git, Open Modelica, Python, QCad, Scilab, and Arduino.

In collaboration with the Bihar Skill Development Mission, the department has launched a skill upgradation training program for final-year students in the Mechanical and Automobile Engineering branches at the Government Polytechnics. This program is being conducted at the Central Institute of Petrochemicals Engineering & Technology (CIPET) in Hajipur and the Tool Room and Training Centre (TRTC) in Patna. The department has signed a Memorandum of Understanding (MoU) with the National Institute of Electronics & Information Technology (NIELIT), Patna to provide residential training program for students from government engineering and polytechnic institutes in Bihar. Moreover, Faculty Development Programs have been organized in collaboration with the National Institute of Technical Teachers' Training and Research (NITTTR) Bhopal, IIT Patna and NIT Patna to enhance faculty skills and expertise.

National Board of Accreditation (NBA)

The department actively facilitates accreditation programs for institutions following the standards set by the National Board of Accreditation (NBA). Currently, Nalanda Engineering College (Chandi) has received accreditation for its Computer Science and Engineering program, while MIT Muzaffarpur has been accredited for its Civil Engineering program. Additionally, Government Polytechnic, Patna has achieved accreditation for its Civil, Electronics, and Mechanical branches.

Promoting Start Up

To encourage the start-up culture and promote innovation and entrepreneurship among students and faculty, start-up cells have been established in all government engineering colleges and polytechnic institutes in line with the AICTE norms. Currently, 35 start-up cells have received funding from the "Bihar Start-Up Fund Trust," and a total of 34 start-ups across 15 government engineering colleges have been supported under the "Seed Grant Scheme" by the Department of Industries.

Internship for students at Government Engineering Colleges

The Government of Bihar has approved an internship policy for seventh-semester students at the government engineering colleges, offering them Rs. 10,000 upon successful completion of their internships. Students will have the opportunity to participate in projects run by the government departments, corporations, societies, and similar organizations. A dedicated portal will be developed to facilitate project allocation and ensure timely disbursement of funds to the successful students.

Co-curricular activities and other activities

Establishment of language lab

To improve communication skills of students, a fully equipped language lab has been set-up at every government engineering college and government polytechnic institute. Apart from English, a foreign language will also be taught in these language labs.

Classes for mental health

To promote mental well-being, improve concentration, and reduce stress, mental health classes are being organized at the institute level to enhance students' overall academic performance. Students and faculty are encouraged to participate in these classes regularly.

Parent-Teacher Meeting

A bi-monthly parent-teacher meeting is organized at the institute level to gather feedback from parents and update them on student's progress. Issues raised during the meeting are consolidated at the department level, and roles and responsibilities are assigned to address these concerns.

Pahal

PAHAL is an initiative to support students, particularly those from government schools, in preparing for competitive exams while also encouraging faculty members to take on social responsibilities. Faculties at the institutes are offering guidance classes in Mathematics, Science and English to the interested students in grades 9 to 12, thus helping them prepare for various competitive exams.

Umang

Various sports and other activities are organized at the institute level to promote students' health and showcase their potential beyond academics. Winners of the institute-level events participate in competitions organized at the divisional level. Those who succeed at the divisional level go on to compete in a state-level fest, which is proposed to be held every February.

Motivational/Promotional activities

Certificate of Merit

Government Engineering Colleges and Polytechnic Institutes have been organizing annual events on Independence Day to recognize the achievements of their meritorious students. Additionally, the department also hosts an annual ceremony on September 15 to award the top performers from each branch in these institutions.

Science Day

The department celebrates Science Day every year to recognize students' talents, promote interest in understanding and learning, address challenges in science, and promote scientific thinking. Each year, a C.V. Raman Talent Search competition in science is organized for students in grades 6 to 12. An award ceremony is held at both district and state levels, where students who achieve first, second, and third place are honoured.

Math Day

The department celebrates Math Day annually to recognize students' talents, promote interest in understanding and learning, address challenges related to mathematics, and promote logical thinking. Each year, the Srinivasa Ramanujan Talent Search competition is held for students in grades 6 to 12. Award ceremonies are held at both district and state levels, honouring students who achieve first, second, and third place.

Other Initiatives

Bihar Student Credit Card Yojana (BSCCY) : The Bihar Student Credit Card Yojana is a transformative initiative designed to enhance educational accessibility and equity in Bihar. It directly contributes to improving the Gross Enrolment Raio in higher education and aligns with the state's broader socio-economic development goals. The scheme was launched on October 2,2016 with an objective to provide financial support to students for pursuing higher education, thereby reducing economic barriers to learning. BSCCY is associated with the "Aarthik Hal, Yuvaon ko Bal" which comes under the Saat Nishchay Programme of the Bihar government. Under this, a loan amount upto Rs. 4 lakh is given for the courses in different Higher education (Undergraduate, Postgraduate, and Professional courses). This also includes Polytechnic courses and Industrial Training Institute (ITI) programmes. The per annum rate of interest for this loan is 4 percent for boys and 1 percent for girls, disabled, and transgender students respectively. Under this scheme, in the initial phase, the loans were disbursed through banks but since April 1,2018, loans are disbursed by the Bihar State Education Financial Corporation Limited (BSEFCL) for streamlined and efficient processing. The scheme emphasizes gender equity and supports marginalized groups like differently-abled and transgender students with significantly lower interest rates. This scheme eases the financial burden on families and supports students to focus on their studies without economic worries. The scheme also provides support for ITI and Polytechnic courses which aligns with the state's vision to enhance vocational skills and employability. The details are given in Table 12.24.

Table 12.24 : Progress of Student Credit Card Yojana

Year		OBC		EBC		SC		ST		Total

Initiatives of Science, Technology and Technical Education

Indira Gandhi Planetarium

The Indira Gandhi Planetarium, also known as the Patna Planetarium, is located in Patna's Indira Gandhi Science Complex. It is equipped with world-class technical features and has a seating capacity of 200 persons. Taramandal is now operational and opened for public after a major revamp and installation of the advanced projection system.

Darbhanga Planetarium

The Darbhanga Planetarium is Bihar's second planetarium and science museum, also known as Taramandal-cum-knowledge and Science Museum. The planetarium is located in the Kadirabad Polytechnic Ground of the Darbhanga city, and has been designed by the US architectural firm Chelsea West Architects. The planetarium features three distinctive shapes: elliptical, spherical, and dome-shaped. Planetarium and Science Museum, Darbhanga is now operational and opened to the public.

Regional Science Centre, Gaya

The Regional Science Centre in Gaya is located in Bodh Gaya and has been developed by the National Council of Science Museums (NCSM). The objective is to promote science not only in Gaya, but also in the nearby districts. The Science Centre includes Fun Science, Science and Technology Heritage, a Children's Gallery, a Science Park, and an Auditorium. Additionally, an Innovation Hub, with a multi-dimensional laboratory with various equipment, has also been constructed.

Youth, Culture and Sports

Youth is the most productive segment of society. The ability and potential for the growth of a country are determined by the size and strength of its youth population. As per the projected figures for 2021, 28.8 percent of the population in Bihar lies in the cohort of 15-29 years and is considered as youth. While all the Sustainable Development Goals are critical for youth development, goals like No Poverty (Goal 1), Health (Goal 3), Education (Goal 4), Gender Equality (Goal 5) and Employment and Decent Work (Goal 8) are explicitly related to the development of youth. For the holistic development of sports and related infrastructure in Bihar, various development schemes are being implemented by the State government, some of which are discussed below:

Sports is an essential subject for the development of youth. With the aim of discovering and developing talents in the field of sports, from January 2024 the Sports Department has been separated from the Department of Art, Culture and Youth. It has been formed as an independent department that is committed to promote the culture of sports and bring the state on par with other

developed states in the field of sports. The Sports Department is focusing on the construction of modern sports infrastructure. Along with this, rigorous efforts are being made to develop the talent of players through better scientific training. The details of important schemes implemented by the department are as follows:

Medal Lao, Naukari Pao : This initiative was started by the State government during the 18th National Inter-District Junior Athletics Competition held in Patna in the year 2010. Under the scheme, it has been decided to provide jobs to the players who win medals in Olympic Games/Asian Games, National Games, Senior National Championship and Junior Championship. The provision of jobs for disabled players has also been included in this scheme. Selected players will get A-category jobs (Bihar Administrative Service and Bihar Police Service) on the basis of their achievement. Under this scheme, in 2023-24, 71 exceptional players of Bihar were given appointment letters in January, 2024.

Khel Samman Programme / Award : Every year, on August 29, on the occasion of Major Dhyan Chand's birth anniversary, the Sports Honour Programme is organized. The programme aims to honour and reward the players and coaches who bring success to the state in various national and international sports competitions. The awards include giving a certificate, memento and honorarium cash prizes on the basis of achievements and medals won by players in various sports competitions. The details are given in Table 12.25.

Table 12.25 : Beneficiaries of Khel Samman Yojana

Year	No. of players awarded General/Disabled (Female/Male)	Amount Paid (Rs. Lakh)
2018-2019	297	350
2019-2020	345	210
2020-2021	11	27
2021-2022	75	27
2022-2023	217	312
2023-2024	411	425
2024-2025	615	701

Source : Department of Sports, GoB

Establishment and operation of Eklavya State Residential Sports Training Centers under Mukhyamantri Khel Vikas Yojana : Sports is one such field in which regular training and practice leads to a marked improvement in the performance of players. Keeping this in mind, the work of establishment and operation of Eklavya State Residential Sports Training Centers is being

done in all the districts under the Mukhyamantri Khel Vikas Yojana. Under the scheme, training programmes are being conducted to prepare children below 17 years of age and studying in rural and urban government schools to become excellent players using the latest technology in sports training. All the expenses related to the payment to trainers during the training of students and provision of accommodation for students have been made under this scheme. So far, 49 Eklavya State Residential Sports Training Centers have been approved in 28 districts of the state, out of which 39 are operational. In 2023-24, 786 trainees (249 girls and 537 boys) have received training in these centers. In 2024-25, 615 trainees (199 girls and 416 boys) are receiving training in these centers at a total cost of Rs. 2500 lakh.

Khiladi Kalyan Kosh : This scheme has been planned to provide training, sports kits or sports equipment and medical assistance to the players in case of an injury during the competition. Also, a 12-month diploma course is offered to the selected players under the Khiladi Kalyan Kosh scheme for training.

Table 12.26 : Status of Player Welfare Fund

Year	Number of players	Amount Paid (Rs. Lakh)
2018-2019	89	16.47
2019-2020	78	21.41
2020-2021	70	21.02
2021-2022	70	20.77
2022-2023	56	14.00
2023-2024	—	—
2024-2025	43	46.69

Source : Department of Sports, GoB

Sports Scholarship Scheme : Approval has been given for Bihar Sports Scholarship Scheme 2024 for the successful implementation of long-term athletic development program for athletes of different age groups of Bihar. For this, an expenditure of Rs. 30.00 crore will be incurred per year.

Installation of Multi Gym, Open Gym Equipment and Sports Equipment : Under the Mukhyamantri Khel Vikas Yojana, installation of multi gym, open gym equipment and sports equipment is being done which will be helpful for the physical and intellectual development of the players. Under this scheme, the work of installation of multi gym, open gym equipment and sports equipment has been completed in 12 districts in 2023-24 at a total cost of Rs. 272.05 lakh. In 2024-25, Rs. 10 crore has been allocated for the purpose.

Construction of Sports Clubs in Nagar/Gram Panchayats : The main role of the sports club is to encourage emerging sports and players and to develop the hidden talent among the village

youths. The Sports Department, through the Bihar State Sports Authority, is taking an important initiative to facilitate the registration of new sports clubs at the Panchayat level in 38 districts of Bihar, which includes 8053 Gram Panchayats and 154 Nagar Panchayats. All the members, 14 to 49 years, of a sports club located in Panchayats shall be the residents of the same Panchayat. As far as possible, the club members shall include a physical teacher, national/international level player and one of the National Institute of Sports (NIS) trainers.

Construction of block-level outdoor stadium under Mukhyamantri Khel Vikas Yojana : Under the scheme, in order to develop sports infrastructure, the administrative approval has been provided for construction of 334 outdoor stadiums at the block level in various districts. Out of these, construction of 229 stadiums has been completed and 77 are under construction. The process is underway to start the construction of the remaining 57 stadiums.

Construction of world-class sports infrastructure in divisional headquarters: The consent has been given for the construction of sports infrastructure in all divisional headquarters, keeping in view the population and popular sports at the local level. Apart from playing grounds for all popular sports, it will have housing and other facilities for players, trainers, team managers and technical officials. Under this plan, proposals have been sought from the district officials of all divisional headquarters.

Construction of State Sports Academy-cum-International Cricket Stadium : The construction work of State Sports Academy-cum-International Cricket Stadium is under progress in Rajgir, on 90 acres of land and at a total cost of Rs. 740 crore. The target is to complete it by June 2025. Recently, the Bihar Sports University and State Sports Academy, Rajgir were formally inaugurated. For the first time in Bihar, the international-level Asian Hockey Champions Trophy (Women) 2024 was organized, in which 6 leading Asian countries participated.

Construction of Sports Bhawan-cum-Gymnasium Building as Regional Office of Sports Department : In 2023-24, the construction of sports building-cum-gymnasium was completed in 25 districts at a cost of Rs. 165.25 crore (Rs. 6.61 crore per district) and the construction work is underway in the remaining 13.

Khelo India Scheme : Under the Khelo India Scheme of the Ministry of Youth Affairs and Sports, Government of India, modern sports infrastructures such as synthetic athletic track, hockey astroturf, multi-purpose indoor hall, swimming pool, football ground, etc. are to be constructed in the states. So far, approval has been given for the construction of 10 such infrastructure. For this, the Bihar State Sports Authority has received a total of Rs. 20.50 crore from the Government of India. Apart from this, a request has been made to the Ministry of Youth Affairs and Sports seeking approval for the construction of 35 sports infrastructures. At present, total four schemes are being operated under this: Khelo India Centre of Accreditation, Khelo India State Level Centre of Excellence, Khelo India Small Level Centre, and Creation of sports infrastructure.

'Mashal' Talent Search Campaign : This scheme was started in November, 2024. Under this scheme, boys and girls of every middle school and high school, whose age is between 14 and 16 years, will be given a chance to play from school-level to state-level competitions. It mainly includes Athletics, Football, Kabaddi, Volleyball and Cycling. Cash prizes and certificates will be given to the players at every level. Under the Bihar Sports Scholarship Scheme, the students selected through 'Mashal' will receive special training, education and accommodation by the Sports Department and the Bihar State Sports Authority.

Initiatives under Art and Culture

Bihar Film Promotion Policy 2024 : The State government has recently framed the Bihar Film Promotion Policy 2024. This policy has been designed to support filmmakers and cinema enthusiasts in the state. An Operational Guideline has been developed to ensure effective implementation on the ground. Under this policy, the following provisions have been introduced to position Bihar as a preferred destination for filmmakers:

1. **Single-Window Clearance System:** There would be a streamlined approval process for hassle-free film production.
2. **Maximum Subsidies across States:** Financial support of up to Rs. 4 crore for film production will be provided.
3. **Grants for OTT Web Series:** Grants up to Rs. 3 crore will be provided for the web series made for OTT platforms.
4. **Support for TV Serials/Shows:** Financial assistance of up to Rs. 1 crore will be provided for TV serials or shows.
5. **Infrastructure Development Grants:** Grant of up to Rs. 1.5 crore will be provided for the establishment of studios and related infrastructure.
6. **Incentives for Regional Films:** Additional grants will be provided to encourage the production of regional cinema.
7. **Scholarship for artists of Bihar :** An annual scholarship will be provided to the regular students from Bihar who are pursuing degree or diploma courses in institutions such as the Film and Television Institute of India (FTII), Pune, Satyajit Ray Film and Television Institute, Kolkata, and the National School of Drama (NSD) campuses in New Delhi, Gangtok, Bangalore, Agartala, and Varanasi.

Establishment of Amrapali Prashikshan Kendra in all districts: The Department of Art, Culture, and Youth has undertaken an initiative to preserve, enhance, and develop Bihar's rich artistic and cultural heritage. As part of this effort, Amrapali Training Centers are being established in all 38 districts of the state. To facilitate these centers, 3,000 sq. ft. of rental space has been acquired in each district. Each training center will employ four teachers, resulting in the engagement of total 152 teachers through outsourcing. This initiative plays a pivotal role in safeguarding the cultural legacy of the state and passing it on to future generations.

The scheme was launched in 2024-25 and will be implemented by 2026-27, with plans for further expansion in the future. Administrative approval has been granted for an expenditure of Rs. 1,086.80 lakh in 2024-25 and Rs. 934.80 lakh annually from 2025-26 onwards.

12.5 Social Welfare

Social welfare is concerned with the well-being of the poor, vulnerable and marginalised sections of society. Such excluded population has fewer opportunities for economic, social, and human development, and remains caught in a vicious cycle of poverty. To ensure that economic growth is inclusive, it is necessary for any State government to implement social welfare programmes. Such welfare programmes in Bihar now cover Dalits, Mahadalits, Backward Classes, Extremely Backward Classes, Minorities, Women and other weaker sections. The details of which are given in this section.

Welfare of Scheduled Castes (SC) and Scheduled Tribes (ST)

For the overall development of scheduled castes and scheduled tribes, the Scheduled Castes and Scheduled Tribes Welfare Department was formed in April 2007. According to the 2011 census, the SC and ST together constitute 17.20 percent of the state's population, of which, 15.91 percent is of SCs and 1.28 percent is of STs. The districts with more than 20 percent share of SC and ST in the total population are Nalanda, Kaimur, Gaya, Arwal, Nawada, Aurangabad, Vaishali, and Sheikhpura. The main schemes being run by the Scheduled Castes and Scheduled Tribes Welfare Department in the state are as follows :

Chief Minister Scheduled Caste and Scheduled Tribe Merit Scholarship Scheme : This scheme was started in 2008-09. Under this, every SC/ST student passing the secondary school examination of the Bihar School Examination Board in first division is given a scholarship of Rs. 10,000. This scheme was revised in 2016-17. Now, a one-time financial assistance of Rs. 8,000 is given to the SC/ST student passing the secondary school examination in second division and Rs. 10,000 to the one passing in first division. In 2016-17, a new scheme was started for the girl students of SC/ST community, passing the twelfth standard examination. Such students are given Rs. 15,000 on passing their examination in the first division and Rs. 10,000 on passing in the second division.

Under this scheme, Rs. 180.00 crore was sanctioned in 2023-24 for SC students who passed their class 10th examination in the first and second divisions and Rs. 20.00 crore for ST students. Similarly, Rs. 90.00 crore was sanctioned for SC girl students and Rs. 15.00 crore for ST girl students who pass their 10+2 examination in the first or second division. In 2024-25, Rs. 150.00 crore has been sanctioned for SC students and Rs. 20.00 crore for ST students who pass their secondary examination. Also, Rs. 50.00 crore has been sanctioned for SC students and Rs. 10.00 crore for ST students of higher secondary level.

Scholarship for children of Musahar and Bhuiyan community : To spread education among Musahar and Bhuiyan communities, a scholarship of Rs. 100 is given to students of classes 1 to 6 per month. In 2023-24, Rs. 13.88 crore was approved as plan expenditure under the scheme and Rs. 0.60 crore for establishment and committed expenditure. In 2024-25, Rs. 13.88 crore was approved as plan expenditure while Rs. 1.50 crore was provisioned under establishment and committed expenditure.

Residential schools : The SC/ST Welfare Department runs 66 residential schools for SC students and 25 for ST students with a capacity of 32,640 SC and 11,600 ST students. The State government provides funds for the basic needs of the students like daily needs, study materials, food, clothing, medicine, etc. The arrangement of food (including refreshments), supply of uniforms, cleaning of school premises and laundry service for the students of all residential schools run under the Department, during the period of accommodation, has been approved to be done through the community organization supported by Jeevika.

The State government has decided to upgrade all residential schools to 10+2 level. Buildings of 10+2 residential schools with a capacity of 720 beds are being constructed. The new building will have residential facilities for teachers and non-teaching staff, a library, playground, etc. There is also a provision for maintenance and furnishings for five years in the model estimate.

School Upgradation : All residential schools are to be upgraded to 10+2 (720 seats) and run in co-education mode with the development of infrastructure. As 10 percent of ST students and 10 percent of SC students are enrolled in residential schools, so residential schools are for both SC and ST categories. Also, a provision of 40 percent reservation for Mushahar/Bhuiya community and 25 percent reservation for children of persons engaged in unhygienic works are provided in the enrolment in residential schools. A budget provision of Rs. 458.42 crore has been made for the construction and furnishing of SC/ST residential schools and hostels in 2024-25.

Hostels : The SC and ST Welfare Department runs 118 hostels for SC/ST students. The hostels are provided with cots, mattresses, RO water, etc. Old hostel buildings are being reconstructed in a phased manner. At present, total 117 hostels are functioning in the state for the convenience of SC and ST students and 47 new ones are being reconstructed.

Chief Minister Scheduled Caste and Scheduled Tribe Civil Service Promotion Scheme : Under this scheme, a one-time incentive of Rs. 50,000 is given to the candidates who pass the BPSC civil services preliminary examination . At the same time, candidates passing the UPSC civil services preliminary examination are given an incentive of Rs. 1.00 lakh for the preparation of the next stages of their examination. Till recent, 144 UPSC and 4136 BPSC, total 4280 candidates have benefitted under this scheme.

Incentives for Other Competitive Examination : Under this scheme, approval has been given to provide incentives to the meritorious students/candidates of SC and ST communities of the state on passing Group-1 competitive examinations other than Civil Services examinations conducted by UPSC or BPSC, such as the Indian Engineering Service Examination, Indian Economic Service Examination, Indian Statistical Service Examination, Joint Geologist, Joint Defence Service, Central Bureau of Investigation, Central Armed Police Force, National Defence Academy, Naval Academy, Bihar Judicial Service, and Civil Services Preliminary Examination of other states, RBI

Grade-B officer Preliminary Examination /Preliminary Examination for becoming Probationary Officer in State Bank of India and other Scheduled Commercial Banks/Preliminary Examination for becoming Assistant Administrative Officer in LIC. A provision has been made to provide incentives to the candidates who pass the preliminary test (PT) of other competitive examinations from 2024. For this, in 2024-25, Rs. 10.00 crore has been provisioned for SC candidates and Rs. 1.00 crore for ST candidates.

Scheduled Castes and Scheduled Tribes (Prevention of Atrocities) Act 1989, Rules 1995 : These aim to provide relief to the members of SC/ST community from harassment by members of other communities. This is a centrally sponsored scheme whose expenditure is shared equally by the Central and State governments. Under this, financial assistance is provided to the families facing harassment. In 2024-25, a budget provision of Rs. 10.03 crore under establishment and committed expenditure and Rs. 100.00 crore jointly as central and state share under plan expenditure has been made.

Hostel Food Grain Scheme : Approval has been given to provide 15 kgs of food grains (9 kgs rice and 6 kgs wheat) per month to students living in SC/ST hostels.

Chief Minister Scheduled Caste and Scheduled Tribe Hostel Grant Scheme: This is a state government scheme under which Rs 1000 cash assistance per month is provided to SC/ST students living in state government hostels.

Pre-Exam Coaching Centres : A total of 10 coaching centres are being run in the state to provide coaching to the candidates belonging to SC/ST communities, appearing in UPSC, BPSC, Banking, Railway and other competitive examinations. These coaching centres are running in the universities of Patna, Darbhanga, Bhagalpur, Gaya, Ara, Chhapra, Muzaffarpur, Saharsa, Purnea and Munger. Besides this, a student guidance centre is running in the Chandragupt Institute of Management, Patna, where coaching is provided for GMAT/CAT examination. At present, there is a provision for coaching of 2460 candidates at various centres.

Tharuhat Area Development : In 2009, the Integrated Tharuhat Development Authority was formed for the development of ST communities (including the Tharu tribe) in West Champaran. A total of Rs. 14989.93 lakh was made available to the Authority for Tharuhat area development from financial year 2010-11 to 2023-24, under which the work was completed in 256 schemes out of total 331. There is a budget provision of Rs. 30.00 crore in the year 2024-25. An amount of Rs. 14989.93 lakh was made available to the Authority in the past years for connectivity path, water supply, library, weavers' building, health sub-centre, stadium, computer laboratory building, common room for girl students, etc. have been constructed in this area. Apart from this, Youth Development and Vocational Training Scheme are being implemented through the Agency. Construction of 5 new residential schools for scheduled tribes has been completed where teaching has started from 2018-19. Approval has been given for the construction of Eklavya Model

Residential School with 720 seats at Belatandi (Ramnagar) of the Tharuhat region at a cost of Rs. 34.83 crore, which is currently operational.

Table 12.27 displays the annual scheme expenditure for SC & ST welfare between 2017-18 and 2024-25. The actual scheme expenditure for SC&ST welfare in these eight years increased by 56 percent. The district-level data on physical and financial progress under major SC&ST welfare schemes in the state in 2021-22 and 2022-23 are presented in Table A 12.27 (Appendix).

Mahadalit Welfare

The State government has launched various specialized initiatives based on the findings of the State Mahadalit Commission, aimed at helping the most marginalized segments of the scheduled castes. The Commission noted that out of the 22 scheduled castes in Bihar, 21 experience severe deprivation concerning their economic, social, cultural, and political conditions. The individuals from these castes have not reaped significant benefits from the affirmative action designed for the SC population. Consequently, the Bihar Mahadalit Vikas Mission was conceived to fulfill the fundamental needs of all Mahadalit communities. This Mission is officially registered under the Societies Registration Act of 1860. The State government's specific focus on the welfare of Mahadalits encompasses:

Vikas Mitra : The Vikas Mitras have been appointed for assisting in proper implementation of programmes in panchayats and wards. To promote empowerment of women, 50 percent of the posts of Vikas Mitra are reserved for women. Presently, out of the total sanctioned posts of 9820 Vikas Mitras, 9648 are working in the state and they are selected from the Mahadalit community itself.

Dashrath Manjhi Kaushal Vikas Yojana : The scheme has been started with an objective to improve the employability of the members of the Mahadalit Community through skill development and training in different trades. The scheme is being executed by the Department of Labour

Resource. Till recent time,ecently 10 batches have completed their training at the Micro, Small and Medium Enterprises Development Insititute in Kolkata. The training of 7 batches at CIPET, Hajipur and 3 batches at CSSPL, Katihar have been completed.

Community Hall-cum-Workshed Scheme : This scheme aims to construct building in the Mahadalit Tolas where marriage, Chhatthi and other ceremonies can be performed. The scheme was started in 2010-11. For 2023-24, a target of 302 has been set, and the budget has been allotted for 302 units of 38 districts.

Sahayata (Call Centre) : The call centre was created in accordance with the SC & ST Prevention of Atrocities Act of 1989 and its Rule from 1995. As part of a centrally sponsored scheme by the Ministry of Social Justice and Empowerment, the National Helpline Centre has been established within the Bihar Mahadalit Vikas Mission to ensure the effective execution of the aforementioned Act.

Welfare of Backward and Extremely Backward Classes

The Backward Classes are those castes/communities that are notified as such by the State or Central government. In Bihar, there are 131 backward castes and they account for about 64 percent of its population. In 2007-08, the State government had constituted the Backward Class and Extremely Backward Class Welfare Department for the welfare and overall development of these communities. The outline of financial progress from 2018-19 to 2024-25 for the welfare of backward and extremely backward population is presented in Table 12.28. In the last seven years, the expenditure for the welfare of backward classes has increased at the rate of 7.3 percent annually. Also, the expenditure under state scheme increased at the rate of 7.1 percent annually.

Table 12.28 : Expenditure Details of BC and EBC Welfare

(Rs. crore)

Year	E&C	State Scheme	CSS	Total
2018-19	13.93	1057.05	111.52	1182.5
2019-20	16.88	1375.07	22.11	1414.06
2020-21	4.46	249.83	88.79	343.08
2021-22	10.79	2713.13	85.19	2809.11
2022-23	32.02	1196.50	154.99	1383.51
2023-24	42.41	1054.05	6.72	1103.18
2024-25 (BE)	110.77	1414.04	162.49	1687.30

Note : E&C = Establishment and Committed Expenditure
CSS = Centrally Sponsored Scheme
Source : Department of Finance, GoB

The targeted efforts implemented by the State government to address the welfare needs of the backward and highly backward classes are outlined below:

Mukhyamantri Pichhada Varg evam Atyant Pichhada Varg Pre-Matric Chhatravritti Yojana: Previously, all the OBC students studying in class I to X were covered under the Centrally Sponsored OBC Pre-Matric Scholarship Scheme. Under the new guideline of PM YASASVI-Pre-Matric Scholarship to OBC Students, only the students of IX and X are to be covered. So, in order to benefit all the students studying in class I to X like before, a new scheme called Mukhyamantri Pichhada Varg evam Atyant Pichhada Varg Pre-Matric Chhatravritti Yojana has been launched from the year 2022-23 under state scheme. Under the scheme, scholarship is being provided at the following rate.

Table 12.29 : Scholarship Distribution Rate

Sl. No.	Class	Scholarship Distribution rate (Annually)
1	I to IV	Rs 600
2	V to VI	Rs 1200
3	VII to X	Rs 1800
4	I to X (Hostelers)	Rs 3000

Source : Department of BC and EBC welfare, GoB

Mukhyamantri Pichhada Varg evam Atyant Pichhada Varg Praveshikottar Chhatravritti Yojana-2023: The rate of scholarship has been reduced under the Centrally Sponsored Scheme of providing Post-Matric Scholarship to OBC students. So, to provide the scholarship in such cases, especially to those pursuing technical courses, a new state scheme called Mukhyamantri Pichhada Varg evam Atyant Pichhada Varg Praveshikottar Chhatravritti Yojna has been launched from 2022-23, under which scholarship amount of upto Rs. 4 lakh is being awarded.

OBC Girls Residential + 2 High School: The OBC Girls Residential +2 High School is being operated in all the 38 districts of Bihar. Two schools in Patna and one each in the rest of the districts i.e. total 39 schools are being operated. Construction of buildings for these 520-bed residential schools is in full swing. Till now, the construction of 520-bed buildings of 38 schools in 37 districts has been sanctioned at the total estimated cost of Rs. 1593.23 crore. Till now Rs. 1300.00 crore has been disbursed. Four Buildings have been completed and 16 more will be completed in this financial year. Computer Laboratory has been sanctioned for the schools being operated in Rohtas, Samastipur, Purnea and Darbhanga districts at the cost of Rs. 31.45 lakh each. Process has been

initiated to establish it in the rest of Schools. Against the sanctioned 1092 teaching posts, 561 has been appointed and the appointment against the rest of the vacant posts is under process.

OBC Hostel: Through this initiative, hostels are built for OBC students either in campus of University/College or nearby. Every district has been covered under this scheme. Currently 23 hostels are being operated in 20 districts.

Jananayak Karpoori Thakur Hostel: Under this scheme, a 100 beded hostel for OBC Students is to be constructed in each district. All the hostels have been constructed out of which currently 36 hostels are operational and the rest of the 2 hostels will be operated soon.

Pre-Examination Training Scheme: Under this scheme, BC and EBC students are being imparted free coaching for the preparation of competitive examinations such as UPSC, BPSC, SSC, Railway, Banking etc. Two batches consisting of 60 students are being operated for each session (6 months). The annual income ceiling under the eligibility criteria has been raised from Rs 1.00 lakh to Rs 3.00 lakh. Total 38 centres have been sanctioned across the state. The Smart Classes have been sanctioned for each centre at the rate of Rs. 2.5 lakh per centre.

Mukhyamatri Vayavsayik Pathyakram Margdarshan evam Utpreran Yojana : To help the students of Backward Classes & Extremely Backward Classes in their preparation for admission in professional courses, like management, law, etc. and for appearing in job-oriented competitions and to increase the participation in higher educational institutions, a new scheme called Mukhyamatri Vayavsayik Pathyakram Margdarshan evam Utpreran Yojana was launched in 2020-21. Under this scheme in 2020-21, centres at Chandragupta Institute of Management, Patna and Chanakya National Law University, Patna have been established where free coaching for such purposes is imparted. In 2022-23, such a centre was established at the Lalit Narayan Mishra Institute of Economic Development and Social Change Patna. In 2022-23, centres in seven universities were sanctioned for the preparation of NET/GATE/Ph. D/M. Phil and for appointment to teaching posts in higher educational institutions. Till now, 10 centres have been sanctioned. The candidate whose family income limit is not more than Rs. 3.00 lakh per annum is eligible to avail the benefit of the scheme.

Jananayak Library and Digital Study Centre : It has been developed in all Jananayak Karpoori Thakur Hostels, OBC Welfare Hostels and OBC Girls Residential +2 High Schools running in the state to facilitate and ensure quality education through digital mode.

Mukhyamantri EBC Civil Seva Protsahan Yojana

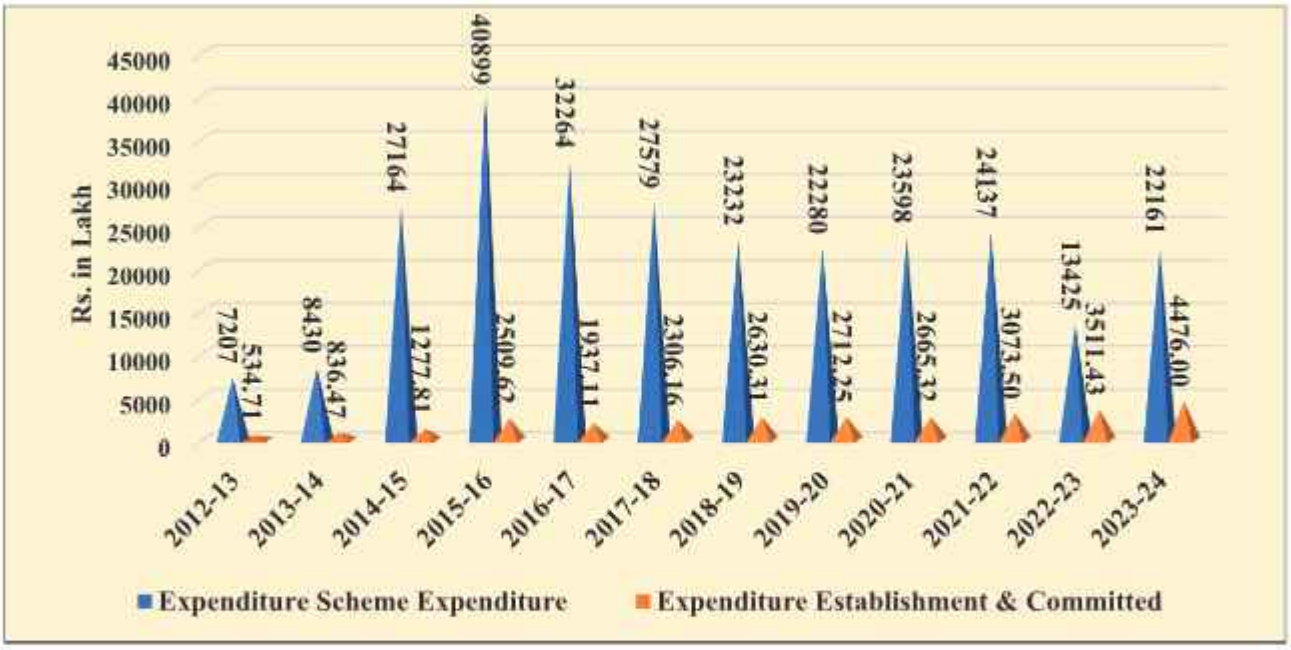
Under this scheme, EBC students qualifying the Preliminary Test of BPSC/UPSC combined civil services examinations are provided with a stipulated amount of assistance. From 2023-24, such students qualifying the PT of other states' civil services examination, RRB, Banking, etc. are also being provided with a stipulated amount of assistance for the preparation of related Mains stage of the respective examinations. The amount provided for different examinations are as follows:

Competitive Exam (PT) Name	Name of Board/Agency Conducting exam	Stipulated Amount (in Rupees)
Combined Civil Service	UPSC	100000
Indian Engineering Service		75000
Indian Economic Service		75000
Indian Statistical Service		75000
Combined Geo-Scientist		75000
CDS, CBI (DY. SP), Central Armed Police Force		50000
NDA And Naval Academy		50000
BPSC Combined Exam	BPSC	50000
Bihar Judiciary Service Exam	BPSC	50000
Other State Civil Service Combined Exam	Related State Service Board	50000
RBI Grade B/SBI and Other Scheduled Commercial Bank P.O/ L.I.C- A.A.O Exam	RBI	30000
Combined Graduate-level Exam	SSC, NEW DELHI	30000
Technical and Graduate Level Exam of RRB	Related Railways Board	30000

Minority Welfare

The Department of Minority Welfare was established in 1991 to empower the minority communities — Muslims, Jains, Parsis, Buddhists, Sikhs, and Christians. The mission of the Department is to improve the socio–economic condition of the members of these minority communities through affirmative action and inclusive development. According to the 2011 census, religious minorities constitute 17.3 percent of the population of Bihar, with 16.9 percent Muslims and 0.4 percent belonging to other religions. Muslims constitute a large part of the population in Kishanganj (68.0 percent), Katihar (44.5 percent), Araria (42.9 percent), and Purnea (38.5 percent). The religious minorities are often socially excluded and, as such, for the welfare of these minorities, focused and concerted efforts are needed. The expenditures of the Department in the last 12 years are shown in Chart 12.16.

Chart 12.16 : Status of Scheme & Establishment and Committed Expenditure of Minority Welfare Department



Source : Department of Finance, GoB

Some of the significant schemes of the Department of Minority Welfare are as follows:

Chief Minister Student Promotion Scheme (Mukhyamantri Vidyarthi Protsahan Yojana) : Under this programme, minority students who got first division in their matriculation examinations receive Rs. 10,000, while Muslim girls who attain a first division in their intermediate examinations are awarded Rs. 15,000 as motivation to pursue further education. Additionally, minority students, who select Bengali as an optional subject in their matric exams and also secure a first division in that subject, are eligible for an incentive of Rs. 10,000. Furthermore, students who complete Fauqania (matric) and Maulvi (intermediate) with a first division under the Bihar State Madarsa Education Board Examination will receive Rs. 10,000 and Rs. 15,000 respectively as incentive amounts. For 2023-24, a budget of Rs. 91.10 crore has been set aside for 69,596 minority students.

Muslim Divorcee/Deserted Women Assistance Programme : The scheme was introduced in 2006-07 to provide financial assistance of Rs. 10,000 to Muslim women who are either divorced or deserted. In 2017-18, this amount was increased to Rs. 25,000. Since 2018-19, the beneficiaries have been availing the facility through the e-welfare portal. In 2023-24, Rs. 1.08 crore has been distributed among 430 Muslim women.

Minority Hostel Yojana (Alpsankhyak Chhatrawas Yojana) : To encourage basic as well as vocational education among minority students, there is a provision of providing free hostel facilities in all district headquarters of the state. To date, 48 hostels have already been constructed and 4 more are under construction. About 4885 students can reside in these hostels. An extra

amount is allocated for maintenance and other additional facilities, like a generator, water purifier, refrigerator, deep freezer, television and computer.

Chief Minister Minority Welfare Hostel Grant / Food Grain Scheme (Mukhyamantri Alpsankhyak Kalyan Chhatrawas Anudan / Khadyann Yojana) : This scheme was started in 2018-19 to promote higher education among the minority students. Under this scheme, students residing in minority hostels are given a grant of Rs. 1000 and 15 kgs. foodgrains per month. In 2023-24, under the Chief Minister Minority Welfare Hostel Grant, Rs. 47.73 lakh was earmarked for 4773 minority students. Similarly, under the Chhatrawas Khadyanna Yojana, 2475 students got the benefit of the scheme in 2023-24.

Mukhyamantri Shram Shakti Yojana : The scheme was started in 2008-09 for encouraging skill, employment and self-employment among the minority youth. Special training is provided to workers and youths of minority community, so that they can get an opportunity for employment. In 2023-24, 288 candidates were provided training in different trades.

Rajya Coaching Yojana : To increase the representation of minority students in state administration and other technical and management jobs, a provision of free coaching has been made since 2006-07. In 2023-24, 565 minority students have received training for different competitive examinations.

Bihar Rajya Waqf Vikas Yojana : For development of property registered under Sunni and Shia Waqf Board, construction and maintenance work is being undertaken for multipurpose buildings, guest house, marriage hall, Waqf office building, market complex, etc. This scheme has been implemented since 2018-19. In 2023-24, an amount of Rs. 55.65 crore was proposed for constructing the multipurpose building, marketing complex and library in Patna, Purnea, Kaimur, Katihar, Kishanganj, Nawada and Siwan, and the approval is under process.

Bihar Rajya Madarsa Sudridhikaran Yojana : Under this scheme, facilities like drinking water, library, equipment, toilets, multipurpose hall, official room, computer, science lab, etc. are provided for strengthening of Madarsa infrastructure and education. The scheme was started in 2018-19. In 2023-24, for the strengthening of one Madarsa in Nalanda, one in East Champaran, two in Purnea, the administrative approval was given to a budget of Rs. 3239.28 lakh, of which Rs. 1260.94 lakh has already been allotted.

Bihar Rajya Alpsankhyak Awasiya Vidyalaya Yojana : In 2018-19, the State government has decided to set up one residential school in each district for the students belonging to the minority

community. Presently, the construction work of residential schools in Darbhanga and Kishanganj has been completed. In 2022-23, land was earmarked in Begusarai and West Champaran for the construction of the school.

12.6 Women Development

Comprehensive development cannot be attained unless women are benefitted equally from the development programmes. Empowerment of women is a process that leads them to claim their rights in economic, cultural, social and political spheres of life and realize their full potential. This advancement has to be accompanied by freedom of choice and the ability to influence the direction of social change. It was during the Eighth Plan (1992-97) when the need for empowerment of women was recognized and accepted as a distinct strategy for the first time. This was further taken forward during the Ninth Plan (1997-2002), with the introduction of the concept of Women's Component Plan, whereby identified ministries were required to indicate the flow of funds to the women's programmes. Later, the Twelfth Plan (2012-17) identified the key indicators for gender equity to be addressed in the planning process through economic, social and cultural empowerment. Since gender equality and women's empowerment are an important agendas, the State government has been publishing its gender budget since 2008-09.

The empowerment indicator primarily consists of three key factors: (a) the involvement of women in household decision-making, (b) the possession of a bank account, and (c) the ownership of a house or land. Data from the National Family and Health Survey (NFHS-5) conducted in 2019-20 reveals that 86.5 percent of the married women, aged 15-49 years, in Bihar engage in household decisions, which represents an increase of 11.3 percentage points from NFHS-4 where it was recorded at 75.2 percent. In terms of women who possess and manage their own bank accounts, NFHS-5 indicates that this figure stands at 76.7 percent, a significant rise from the 26.4 percent reported in NFHS-4, illustrating a notable increase of 50.3 percentage points. However, there has been a slight decline of 3.5 percentage points in the proportion of women owning a house or land, either individually or jointly, decreasing from 58.8 percent in 2015-16 (NFHS-4) to 55.3 percent in 2019-20 (NFHS-5). The Sustainable Development Goal 5 seeks to eliminate all forms of discrimination against women and girls globally, encompassing 36 state indicators across 8 distinct targets.

An overview of the gender budget for five years (2018-19 to 2022-23) is presented in Table 12.30. From the table, it emerges that the total expenditure on women has increased by 90 percent between 2018-19 and 2022-23. In the same period, the expenditure under Category I increased 2.3 times and under Category II, increased 1.7 times. On average, the share of women in the total budget in these five years has been around 18.1 percent and the total outlays for women as percent of GSDP was around 5.6 percent.

Table 12.30 : Total Expenditure for Women

(Amount in Rs. crore)

Year	Bihar Budget	Gender Budget (Actual)			Share of Women-specific schemes in Total Budget (%)	Outlays for Women- specific schemes as percent of GSDP
		Category-I	Category-II	Total		
2018-19	154655	7919.7 (36.1)	14023.8 (63.9)	21944 (100.0)	14.2	4.2
2019-20	146097	8169.9 (35.5)	14868.6 (64.5)	23039 (100.0)	15.8	4.0
2020-21	165697	6019.1 (26.8)	16398.9 (73.2)	22418 (100.0)	13.5	4.0
2021-22	193123	12472.1 (37.0)	21223.5 (63.0)	33697 (100.0)	17.4	5.2
2022-23	231904	18147.7 (43.4)	23716.7 (56.7)	41864 (100.0)	18.1	5.6

Note : 1. Figures in the bracket represent percentage share against the total GB
2. GSDP (at current prices) figures are from MOSPI, published in August 2024

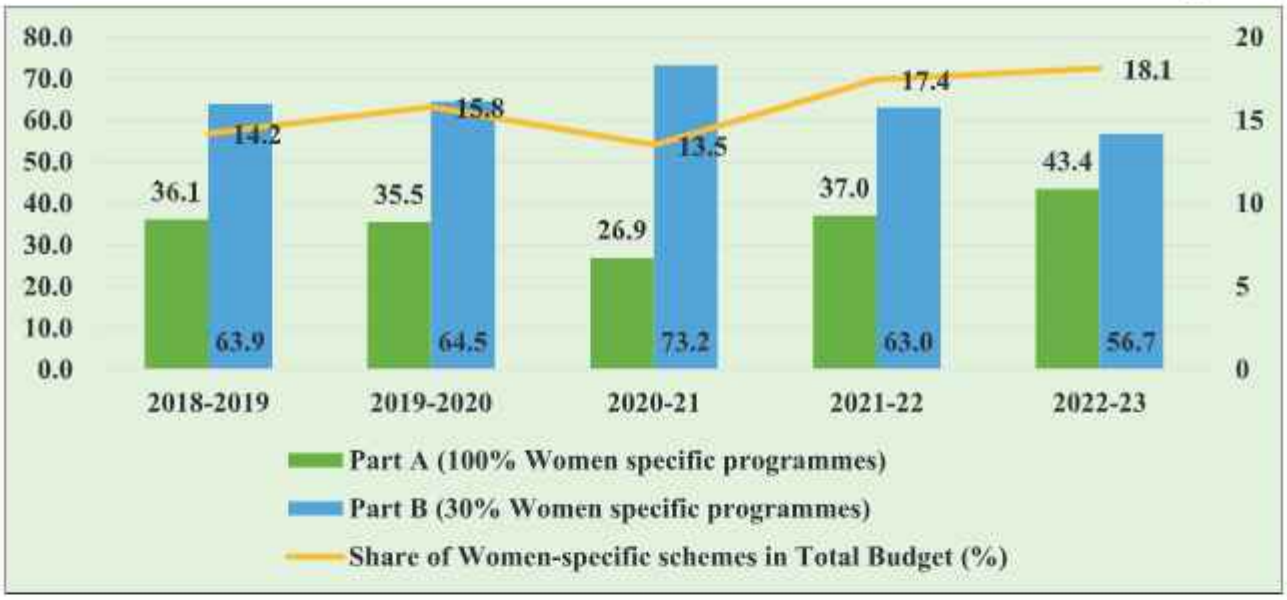
(percent)



Source : Gender Budget, Finance Department, GoB

The foremost objective of Gender Budgeting is to encourage all departments in the State government to become more gender-aware and scrutinize their budgets from a gender perspective. It would gradually lead to an increase in the budgetary priority for programmes designed specifically for women, and efforts towards making public expenditure more responsive to gender concerns. Towards preparing Gender Budgets, schemes which are entirely meant for women are classified under Category I (100 percent women-specific programme). For other programmes, it is assumed that at least 30 percent of the expenditure will benefit women, and they are classified under Category II. Table 12.31 presents the data for the gender budget items under different departments.

The direct interventions by the State government to address gender disparity comprises two main heads: child protection (Kanya Suraksha Yojana to stop female foeticide) and social and economic security (Lakshmibai Social Security Pension Scheme, Mukhyamantri Kanya Vivah Yojana and Mukhyamantri Nari Shakti Yojana) (Table 12.32). The Mukhyamantri Nari Shakti Yojana, launched in 2007-08, aims to empower women through several schemes. Besides this, the scheme also helps women by setting up Helpline Services, Short Stay Homes, Working Women Hostels, and Protection Homes. Mukhyamantri Kanya Vivah Yojana extends the financial support of Rs. 5000 to the girls of BPL families, who get married at the age of 18 and above. The expenditure on flagship schemes has gradually increased between 2019-20 and 2022-23 by 107 percent.

Table 12.32 : Schemes to Address Gender Disparity

The empowerment of women can be assessed by three criteria — economic, social and cultural. The steps of the state government under each of these criteria are listed below :

Economic Empowerment

Aarakshit Rojgar Mahilaon Ka Adhikar : A horizontal reservation of 35 percent has been given to women in all government jobs in the state under the vision "Aarakshit Rojgar Mahilaon Ka Adhikar". Also, a provision of 50 percent reservation has been made for women in Panchayati Raj Institutions and Municipal Bodies, which has augmented their contribution and participation in the political sphere. With the women's reservation policy, a total of 108192 women have got regular government jobs out of total 228256, between April 2023 and February, 2024. This accounts for 47.40 percent of the total regular appointments. This is 12.40 percentage points more than the reserved (35%) share.

Reservation/Incentive for Girls/Women in Higher Education and Technical Education : To encourage female students to pursue higher technical education, 33 percent (one-third) of the total seats at the degree level and higher courses are reserved for girls/women in all the institutions affiliated with the Bihar Engineering University. To incentivise women for pursuing higher education, Rs. 25,000 per student is given to unmarried women who have passed Intermediate or equivalent. So far, 12,42,259 female students have benefited from this scheme. Similarly, Rs. 50,000 per student is given to unmarried female students who have passed their graduate or equivalent examination, and till February 2024, 1,61,513 students have benefited.

Promotion of Women Entrepreneurship : As part of the Mukhyamantri Mahila Udyami Yojana, a special initiative for women entrepreneurs, a cumulative amount of Rs. 451.35 crore was allocated to 7,596 chosen beneficiaries from 2021-22 to 2023-24. Under this Yojana, a bag cluster has been developed in Muzaffarpur with the help of 40 members who have been selected as entrepreneurs. Also, with the support of the Ministry of New and Renewable Energy, Jeevika Didis are running a solar shops after getting training in solar lamp manufacturing. A total of 413 Didis are associated with this venture. J-WIRES Company has been established in the Gaya district to run this enterprise.

Promotion of Livelihood : Jeevika focuses on enhancing skills by offering training programs for young people in various in-demand sectors such as retail, healthcare, construction, automotive,

and electrical services. So far, 422,851 youths have received training and 467,797 got employment or have started their own businesses in the area of skill development.

Civil Seva Protsahan Yojana : Incentive amounts of Rs. 50,000 and 1,00,000 is given to the women candidates clearing the preliminary test of Civil Services Examination conducted by BPSC and UPSC, respectively, for preparation of the Mains stage. Total 1615 women candidates of BPSC and 102 of UPSC have availed the benefit and a total of Rs. 9.95 crore has been paid so far to the beneficiaries under this scheme.

Service Field Training : Women and Child Development Corporation provides training to women and adolescent girls with the aim of vocational training and capacity development to make them skilled/self-reliant in different types of business. There is also a provision for placement and self-employment after successful completion of the training. Under the service sector, women are also provided training in housekeeping, beautician, computer and sales management by different training institutes having specific experience and qualification in the work field. This training is given free of cost to the selected trainees through the guidelines and listed institutions of the Bihar Skill Development Mission.

Skill Training : Women and Child Development Corporation has started a combination of traditional and modern-era courses like sewing machine operators which were prevalent choices for women and the new courses that are essential for health and other services like General Duty Assistant, Emergency Medical Technician, Electrician, Mason, Bar Bander, etc. WCDC, Social Welfare Department has selected 37 job roles and is planning to add more courses like Agriculture Drone Technician and Bakery courses to find employment opportunities and increase employability. The overall status of Skill Training under the Mukhyamantri Nari Shakti Yojna (MNSY) is given in Table 12.33.

Table 12.33 : Status of Skill Training

Financial Year	No of Batches Trained	Enrolled	Trained	Assessed	Certified	Placed
2017-18	59	1593	1593	1067	995	342
2018-19	210	5488	5488	4097	3821	929
2019-20	250	6510	6510	5295	5051	737

Social Empowerment

Poshan Maah Campaign : Poshan Maah 2024 campaign focused on raising awareness about nutrition and maternal-child health through the theme "Poshan Bhi Padhai Bhi." The campaign targeted anaemia awareness, growth monitoring, and complementary feeding practices to address malnutrition's root causes. Coordination with the Integrated Child Development Services (ICDS) and state-level training sessions enhanced the impact, enabling block and village organizations to effectively implement the initiatives.

JEEVIKA Health Help Desk : The JEEVIKA Health Help Desk, partnering with the Health Department, enhances healthcare access in 38 districts, primarily in Sadar hospitals and medical colleges. By September 2024, it has served 1,414,524 patients, including 1,197,709 OPD and 216,815 IPD patients, with 45,102 calls handled by 92 Swasthya Mitra Didis. Operating in two shifts across 45 centres, the Help Desk provides essential support, bridging healthcare gaps in rural Bihar.

HNS Enterprise Development : Through its Health, Nutrition and Sanitation Enterprise Fund, JEEVIKA provides financial support to individual members and groups, enabling them to establish sustainable enterprises. The fund aims to increase the annual income of individual entrepreneurs by at least Rs. 1 lakh. By September 2024, this program has empowered 1,797 women across 22 districts to launch their own businesses. The fund accommodates both individual and group enterprises, creating opportunities that improve livelihoods, enhance community health, and promote sanitation and nutrition. Through this initiative, JEEVIKA not only strengthens local economies but also builds healthier, more self-reliant communities across Bihar.

Mukhyamantri Nari Shakti Yojana : This is an integrated women empowerment scheme and has been operational since 2007-08. Some of the components running under the scheme are as follows :

One-Stop Center : Sakhi One-Stop Centre provides medical facilities, police aid, legal assistance, counselling, and other services to women and adolescent girls who have been victims of domestic violence, human trafficking, or any other form of violence. It is controlled by the District Magistrate in all 38 districts of the state. The status of cases registered and disposed of is given in Table 12.34.

Table 12.34 : Number of Cases Registered and Disposed under Social Empowerment Component

Types of Cases	2022-23		2023-24		2024-25 (Up to Sep 2024)	
	Registered	Disposed	Registered	Disposed	Registered	Disposed
Domestic Violence	5615	4912 (87.5)	5049	4470 (88.5)	3377	2593 (76.8)
Dowry Death	11	7 (63.6)	3	3 (100)	2	0
Dowry Harassment	759	673 (88.7)	837	764 (91.3)	526	345 (65.6)
Second Marriage	71	55 (77.5)	52	56 (107.7)	32	22 (68.6)
Sexual Harassment	147	114 (77.6)	129	101 (78.3)	91	58 (63.7)
Human Trafficking	2	4 (200.0)	9	10 (111.1)	9	6 (66.7)
Sexual Harassment at workplace Cases	23	21 (91.3)	24	22 (91.7)	23	13 (56.5)
Mobile and Cyber Crime related	42	30 (71.4)	142	96 (67.6)	256	188 (73.4)
Child Marriage	48	45 (93.8)	43	38 (88.4)	21	16 (76.2)
Others	1284	1091 (85)	1229	1039 (84.5)	839	693 (82.6)
Total	**8002**	**6952 (86.9)**	**7517**	**6599 (87.8)**	**5176**	**3934 (76.1)**

Note : Figures in parentheses denote the percentage of cases disposed against registered cases
Source : Bihar State Women and Child Development Corporation, GoB

Women's Special Cell : The purpose of the Women's Special Cell is to provide counselling and support to women and adolescent girls in filing First Information Reports (FIRs) and to provide a supportive environment in police stations for women who have been victims of any form of violence. For this, a women's special cell is being operated in 23 police stations in Patna.

181 Women's Helpline : The Union Ministry of Women and Child Development provides 24-hour service to women who are victims of domestic abuse, human trafficking, dowry harassment, molestation, sexual violence, and other forms of harassment. This year, along with (181) women helplines, 1098 child helplines and 112 Emergency Response Support System have been added.

Short-stay Homes : Short-stay Homes have been developed to solve the problems of women and adolescent girls who are harassed in the family and society due to domestic violence, sexual harassment, human trafficking, dowry or other reasons, and to provide socio-psychological counselling, medical and legal assistance, skill and capacity development,. Short-stay Homes are being run to provide short-term shelter until training and rehabilitation are done.

Sexual Harassment of Women at Workplace : The Sexual Harassment of Women at Workplace (Prevention, Prohibition, and Redressal) Act, 2013 has been passed to defend women's rights in the workplace. According to this Act, the employer is responsible for forming an Internal Committee (IC), while the District Officer is responsible for forming a Local Committee (LC) to investigate sexual harassment accusations. According to this Act, local committees were formed in all districts and internal committees were formed in all the departments. In June 2023, 53 departments and directorates of the state was given training on the subject of sexual harassment.

In August 2023, training has been given to the members of the local committee formed in all the districts and to the members of internal committee formed in the office of the District Magistrate. In September 2023, training was given to the members of the internal committee constituted in all the ranges of the Crime Research Department (Weaker Section) and officials and employees of the Police Building Construction Corporation were trained on this subject.

Palna Ghar : Women are increasingly getting involved in employment and services by knowing the importance of contribution to the family income. To support women to carry on their jobs, a crèche facility has been started to care for infants and young children aged 5 years or less while their parents are at work. Creche provides a conducive environment for the all-round development of children, provides group care and a positive environment for their personality development. Presently, in Patna, 3 crèches are running in : (1) Jail Department – Secretariat Patna, (2) Ground Floor – Vishveshwaraiya Bhawan – Patna, and (3) Vikas Bhawan. Under the Chief Minister Nari Shakti Yojana, 100 crèches have been sanctioned. Funds are being transferred for the construction of one crèche each in the headquarters of all 38 districts. Till now, total 62 Palna Ghars have been established and the operation of all 100 crèches will start soon in all 38 districts.

Gender Resource Centre : Gender Resource Centre has been established by the Women and Child Development Corporation for training, study and research, etc. on gender-related topics as well as to provide technical support in the preparation of the gender budget. Gender Resource Center mainly carries out the work of research, analysis, sensitization of all stakeholders towards gender mainstreaming.

Beti Bachao Beti Padhao : This scheme is an initiative to prevent and increase the declining child-sex ratio and encourage girls education. On the occasion of the International Girl Child Day 2023, a state-level program was organized by the Women and Child Development Corporation (WCDC) in Bihar towards increasing the importance of the girl child. All 38 districts have also organised two-day programs such as cycle rally, coffee with the girls students, etc. at district, block and panchayat levels. In the last two months, WCDC organized street plays, tree plantation and speech and painting competitions in schools to honour the immunized girls and their parents.

Menstrual Hygiene Management Roadmap : The Menstrual Hygiene Management Roadmap of Bihar was prepared by the WCDC in June 2022. Under this roadmap, a state task force will be formed under the chairmanship of the development commissioner and a district-level task force under the chairmanship of the district officer. In this, the role of education, health, social welfare, and rural development departments will be prominent. Under the Menstrual Hygiene Management Roadmap, awareness is being spread through media along with radio campaigns at the state level to adopt the right measures and practices on menstrual hygiene management.

Mahila Thana : Sometimes due to the presence of male police personnel, the female victim is not able to properly describe her problems, due to which her issue may not be resolved. With this background, the concept of a Mahila Thana was developed and presently 40 Mahila Thanas are operational in the state. As per the latest data, beginning January 01, 2022 till October 2024, about

48 percent of the cases were disposed off against the total number of crime cases registered against women during aforesaid period.

Cultural Empowerment

Women Entrepreneur Fair : To encourage women entrepreneurs, especially those engaged in marketing of various types of handicrafts, handloom products, food items, art, craft, Madhubani Painting, Tikuli Art and decorations, etc., from rural areas, the Women Entrepreneur Fair is organized by the WCDC. In the financial year 2023-24, 20 stalls were allotted to women entrepreneurs in the Dussehra fair.

International Women's Day : On the occasion of the International Women's Day (March 8), a three-day Film Festival was organized on issues related to women and adolescence. It was organized by the WCDC. Women theme-based movies like Manikarnika, Pink, Saand Ki Aankh, and others were shown in the festival.

Nayika Apne Jeevan Ki : WCDC is publishing a quarterly magazine named 'Nayika Apne Jeevan Ki' to discuss the challenges and success stories of women. The Corporation is also planning to publish a magazine for children, named 'GULLAK- Gyan Ka Pitara'. The objective of this magazine is to enhance knowledge through entertainment.

Surakshit Safar Suvidha

To enhance the safety of women and instill a sense of security among those travelling in Bihar, the "Surakhsit Safar Suvidha" initiative was launched by the Police (Home) Department. This initiative allows for the registration and real-time tracking of journeys through the Emergency Response Support System (ERSS), providing a reliable support system for women traveling alone or with family. The initiative was rolled out across the state in September 2024. Bihar is the third state to implement such a scheme, following Telangana and Haryana.

As of December 2024, the initiative has successfully assisted in all 70 requests received since its launch. By registering for this service, women's travel can be tracked, offering an additional layer of safety and ensuring prompt assistance in case of emergencies. This service is accessible by dialing 112, the ERSS number for Bihar.

12.7 Social Security for Old, Widow and Disabled

Social Security is recognized as a vital component of the development process. A well-functioning welfare state should specifically address various aspects of social security. According to the 2011 Census, the population of senior citizens (those aged 60 and above) in the state stands at 77.07 lakh, representing 7.4 percent of the total population. Additionally, the number of individuals with disabilities in Bihar is 21.31 lakh or 2.2 percent of the population. In collaboration with the Central government, the State government is actively implementing numerous social security programs aimed at supporting the elderly, widows, and people with disabilities. A summary of these welfare schemes, instituted by both Central and State governments, is detailed in Table 12.35.

Table 12.35 : Schemes for Old Age, Widows and Persons with Disabilities

(Rs. in Lakh)

Name of the Scheme	2022-23		2023-24		2024-25 (Till September, 2024)

In addition to the aforementioned schemes, the State government is also implementing many other new initiatives aimed at ensuring social security for senior citizens and promoting the welfare of the disabled as outlined below.

Mukhyamantri Vriddhjan Pension Scheme : The Mukhyamantri Vriddhjan Pension Scheme, a new universal pension initiative for senior citizens, was launched in April 2019. This scheme benefits senior citizens aged 60 and above who have not availed any other pension scheme. The pension amount is Rs. 400 per month for individuals aged 60 to 79 years and Rs. 500 per month for those aged 80 and above. So far, 46.10 lakh senior citizens have availed benefit from this scheme.

Atal Vayo Abhyuday Yojna : This is a Centrally Sponsored Scheme designed to address four critical needs of senior citizens: financial security, nutrition, health care and human interaction to improve the quality and dignity of their life. Additionally, it also encompasses aspects of safety, protection, and general well-being, starting with raising awareness and sensitizing society. In 2022-23, the Union Ministry of Social Justice and Empowerment allocated Rs. 7.58 crore for this scheme. The Annual State Action Plan for 2024-25 has already been submitted to the Ministry.

National Action Plan for Drug Demand Reduction (NAPDDR) : This is a Centrally Sponsored Scheme being carried out by the Union Ministry of Social Justice and Empowerment (MoSJE) for the period 2018 to 2025. The initiative aims to mitigate the negative effects of drug abuse through a comprehensive strategy. Activities under the National Action Plan for Drug Demand Reduction (NAPDDR) include awareness programs in schools, colleges, and universities, workshops and seminars for parents, community-based peer-led interactions, and intervention programs for vulnerable adolescents and youth in the community, provision of treatment facilities and capacity building for service providers. The Ministry has also launched targeted intervention programs in vulnerable districts nationwide through the National Minimum Basic Assistance (NMBA) under the NAPDDR. NMBA is being implemented in all 38 districts of Bihar. The Bihar State Action Plan, with a budget of Rs. 5.90 crore for 2024-25, has been sent for approval to MoSJE.

Mukhyamantri Family Benefit Scheme : This scheme was initiated in 2012-13. Its objective is to provide financial assistance following the unexpected death of a member from a low-income family within the state. In the event of an accidental death of an individual aged 18 to 60 due to a criminal incident, a one-time financial assistance of Rs. 20,000 is provided to their dependents.

Kabir Antyeshti Anudan Yojana : This scheme offers a one-time grant of Rs. 3,000 to Below Poverty Line (BPL) families to assist with the last rites (funeral rituals) in the event of a family member's death. Payments to beneficiaries are now made directly through the e-Suvidha portal. In 2023-24, so far Rs. 1,390.00 lakh has been provided to 50,800 individuals. Additionally, a one-time advance of Rs. 15,000 is provided to each panchayat for 5 beneficiaries, Rs. 30,000 for 10 beneficiaries in Nagar Panchayat, Rs. 60,000 for 20 beneficiaries in Nagar Parishad, and Rs. 90,000 for 30 beneficiaries in Municipal Corporations.

Mukhyamantri Bhikshavritti Nivaran Yojana : The initiative aims to safeguard and enhance the rights of beggars, ensuring their care, protection, and development, as well as socio-economic and cultural empowerment through supportive policies and programs. In 2021, a comprehensive baseline survey was conducted using a mobile app across all 38 districts of Bihar. This survey successfully identified and documented 15,430 beggars. They have been provided with essential services such as Aadhar cards and bank accounts to facilitate their access to various welfare

programs offered by the State government. At present, the scheme is fully operational in ten districts of Bihar, namely Patna, Gaya, Nalanda, Muzaffarpur, Darbhanga, Bhagalpur, Saran, Saharsa, Munger, and Purnea. In addition, 19 Rehabilitation Homes and two Halfway Homes are also being managed in Patna.

Bihar Integrated Social Protection Strengthening Project (BISPS) : The Bihar Integrated Social Protection Strengthening (BISPS) scheme aims to enhance social protection services for vulnerable populations in Bihar, including poor households, persons with disabilities (PwDs) and widows. The scheme includes creation of the basic infrastructure called 'Buniyad Centres' at 101 locations (one centre at each location) and covering 63 sub-divisions and 38 districts of Bihar. As of October 2024, approximately 12.65 lakh beneficiaries have accessed various services provided by these centres. This initiative plays a crucial role in supporting targeted beneficiaries by creating essential infrastructure and facilitating access to vital social care programs.

Directorate of Empowerment of Persons with Disability

According to the 2011 census, there are 23.31 lakh people with disabilities in Bihar, of which, 9.88 lakh are females and 13.43 lakh are males. The state recognizes 21 types of disabilities. Among these, maximum number is of hearing and speech-impaired people (7.43 lakh), followed by visually impaired (5.49 lakh), mobile-disabled (3.70 lakh), and mentally disabled (1.27 lakh).

Chief Minister Divyangjan Empowerment Yojana : This scheme was started in 2017-18. The main objective of the scheme is to work for the welfare of the disabled and increase their awareness in the society, empowering them physically, socially, educationally and economically and ensuring their rights. Under the Chief Minister Disabled Empowerment Scheme "Sambal", operated as an umbrella scheme, facilities are being provided to the disabled people through the following component-wise schemes :

Artificial Limbs And Equipment For Disabled Persons : Under this, artificial limbs and assistive devices like tricycle, hearing aid, crutches, calipers, walking stick, special assistive devices, and in very special cases, assistance grants, etc. are provided to the disabled persons.

Survey And Certification Of Disabled People : Survey and disability certification of disabled people is done from time to time by organizing special camps at panchayat and block levels. In these camps, disability certificate is issued by the medical team after examination.

Battery-operated Tricycle : A provision has been made by the State government to provide battery-operated tricycles to the eligible locomotor-disabled persons under the Chief Minister Divyangjan Empowerment Chhatra Yojana from 2022-23. A target was set to benefit 10,000

mobile-disabled persons in 2022-23, but from 2023-24 this target has been removed, and now the persons who apply for this scheme get the benefit as per eligibility and criteria.

Mentally disabled children, special day school : To provide training and medical facilities through day school, "Chaman" has been started for the mentally disabled children between 5 and 18 years of age. The school is being run through a non-government organization in Patna since 2011-12.

Special School : Under the Directorate of Empowerment of Persons with Disabilities, three blind and five deaf and blind schools are being operated in Patna, Darbhanga, Bhagalpur and Munger. All of these are residential schools. The government provides free accommodation, food, study material, sports material, entertainment, medical treatment, etc. to all the resident children.

Asra Grih : Under the Directorate of Empowerment of Persons with Disabilities, three Asra Grih run as rehabilitation home in Patna for mentally ill women.

Scheme for Implementation of the Rights of Persons with Disabilities Act (SIPDA Scheme) : With the aim of achieving universal accessibility for persons with disabilities, the Government of India is making important public buildings, public transport and government websites accessible for persons with disabilities.

Unique Disability ID for Persons with Disabilities (UDID) : The UDID project is being implemented by the Government of Bihar and the Directorate of Empowerment of Persons with Disabilities, Ministry of Social Justice and Empowerment, with the aim of providing a unique identity card to every disabled person and preparing a national database for the disabled in New Delhi by the Government of India.

CHAPTER - XIII

CHILD DEVELOPMENT

Abstract

The well-being of children is crucial for any society, as they represent the future human resource. According to the 2011 Census, there were about 4.98 crore children (0-18 years) in Bihar. The State accounts for 11 percent of the total child population in India. Almost 90 percent of these children reside in rural areas. It is the responsibility of any state to protect their rights and achieving this requires a comprehensive integration of policies focused on their survival, development, protection and participation. The child welfare budgeting was started in Bihar in 2013-14 to meet these requirements. Since then, there has been a steady increase in the allocation for children. Between 2016-17 and 2023-24, the total expenditure on children rose at an annual rate of 19.4 percent. Throughout this period, the per capita spending on children rose from Rs. 3275 in 2016-17 to Rs. 9131 in 2022-23, more than double. Approximately, 18 percent of the total state budget is dedicated to child development expenditure, though this figure varies from year to year. Similarly, the expenditure as a percentage of the Gross State Domestic Product (GSDP) hovers around 5 percent. The efforts of the State government in the education sector, health sector and welfare have contributed to the decline in IMR, malnutrition and other forms of morbidity. The Integrated Child Development Scheme, Poshan Abhiyan, Mission Vatsalya and other governmental initiatives are significantly enhancing the growth and welfare of children in Bihar.

Child Development is a major component of human development. The well-being of children is indispensable for the country's development, as they constitute the country's future human resource. Bihar is home to 49.8 million children (0–18 years), comprising 48 percent of the State's total population. The Constitution of India accords a special status to children with special provisions and protections to secure and safeguard their entitlements of 'those of tender age'. Biologically, childhood is the span of life from birth to adolescence. The physical, social and emotional growth of children has direct impact on their overall development. Thus, understanding the status of children is of immense importance which may be assessed on the basis of four criteria — (i) Survival, Health and Nutrition, (ii) Education and Development, (iii) Protection, and (iv) Participation. To ensure that every child develops well, adequate investment in early childhood is essential. Every child has a basic right to be born in a safe and non-discriminatory environment and grow through their formative years of life in a healthy and dignified way. Thus, reducing the level of micronutrient deficiency, and increasing the enrolment and retention rates in schools are the focused interventions of child development in Bihar. In this background, this chapter focuses

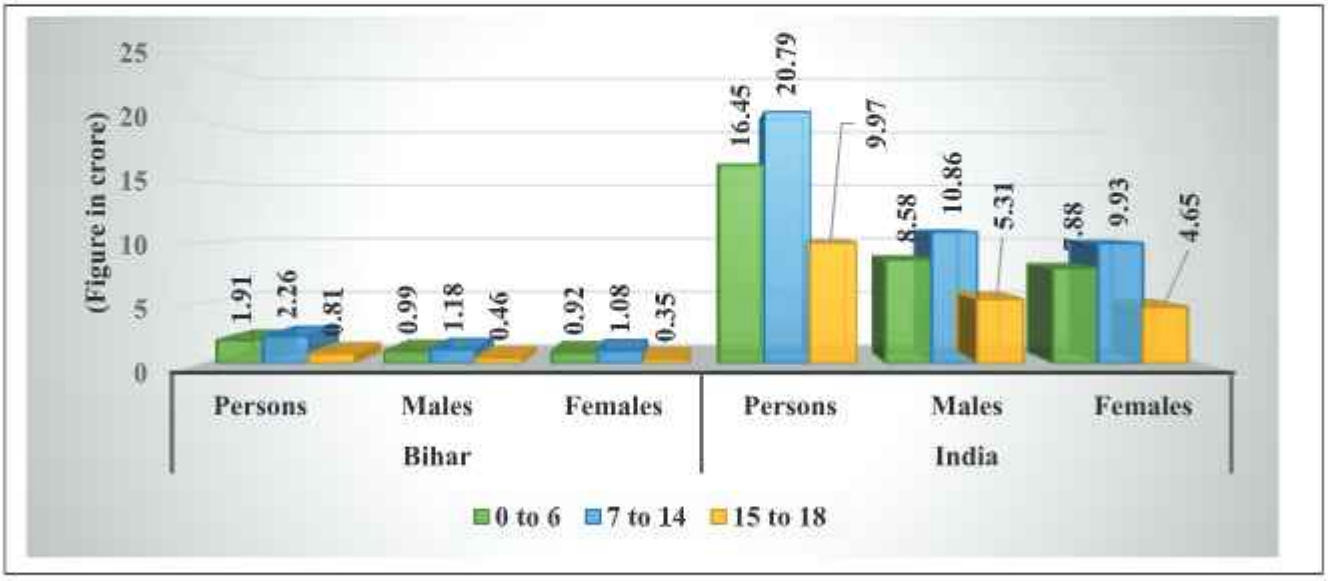
on the demographic, health, nutrition, education, protection and participation status of children in Bihar. Simultaneously, the chapter also presents the details of the initiatives taken by the Central and State governments for the welfare of children.

In 1989, the United Nations Convention on the Rights of the Child (UNCRC) adopted the most widely approved human rights which defines the fundamental human rights of children along the core principles that together cover their civil, political, social, economic and cultural rights. To meet the needs of children, the first major comprehensive initiative taken by the Central Government was the adoption of the National Policy for Children (NPC) in 1974. Another initiative was the framing of the National Policy for Children 2013, which defined a child as a person between 0 and18 years of age. For this stage of life, the Policy underlines the need for a long-term, sustainable, multispectral, and inclusive approach. Thereafter, many reforms were adopted to promote child development. One of those was to prepare separate child budgets. In Bihar, this practice of child budgeting started in 2013-14.

13.1 Demography

India ranks as the second most populous nation globally, with 39 percent of its populations falling within the 0-18 age group, according to the 2011 Census. In Bihar, 48 percent of the population is in this age group. The state contributes to 11 percent of India's overall child population. Bihar has 4.98 crore child population, of which 4.47 crore (89.9 percent) live in rural areas and 0.50 crore (10.1 percent) in urban areas. As per gender details, 2.35 crore are female and 2.62 crore are male in the age bracket of 0-18 years. The distributions of the child population across different age-groups are — 0-6 years (38.4 percent), 7-14 years (45.4 percent) and 15-18 years (16.2 percent) (Chart 13.1). The distribution pattern in different districts of Bihar is presented in Table A13.1 (Appendix). Between 2001 and 2011, the child population in Bihar has increased by 20.3 percent, from 4.14 crore in 2001 to 4.98 crore in 2011.

Chart 13.1 : Child Population in Bihar and India by Various Age Groups



Source : Census 2011, RGI

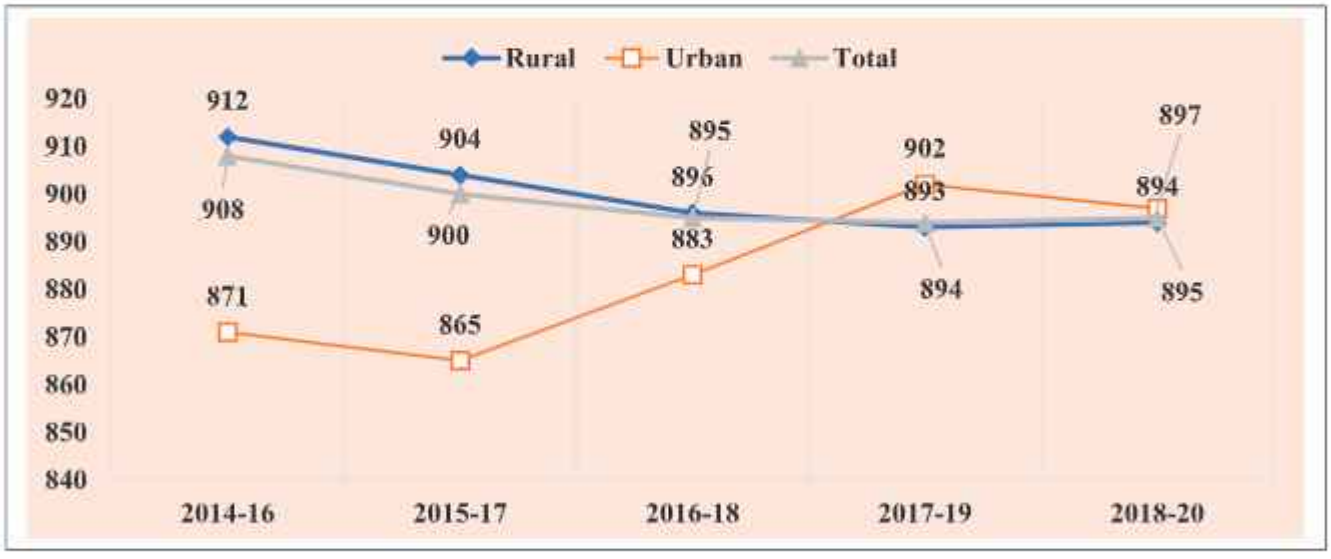
Sex Ratio at Birth (SRB)

Preference for a male child is a deep-rooted cultural phenomenon in many states of India, including Bihar, which results in discriminatory and harmful practices against women and girls. So, to understand the status of girls, the analysis of the Sex Ratio at Birth (SRB) becomes very important. Gender-biased sex selection is measured through the Child Sex Ratio (CSR) and SRB. The differences in SRB is also influenced by several other factors such as under-registration of girls, differential infant and age misreporting. Therefore, the imbalance in SRB cannot be entirely attributed to the practice of gender-biased sex selection. SRB is defined as the number of girls born for every 1000 boys. As per the latest figures of the Sample Registration System, SRB for the state as a whole has gone down by 13 points to 895 in 2018-20 from 908 in 2014-16. The SRB of Bihar is 894 in rural areas and 897 in urban in 2018-20. Chart 13.2 depicts the variation in SRB in rural and urban areas in the consecutive years. The district-wise details of the sex ratio in different age groups in Bihar are given in Appendix (Table A13.2).

Child Sex Ratio (CSR)

The Sex Ratio is an important indicator of the status of women, both for children and adults. The Census 2011 data reveals that the child sex ratio is higher than the overall sex ratio in Bihar. The sex ratio in the age group 0 -6 years is 935 females per 1000 males, 923 for 0-14 years, and 897 for 0-18 years. For all ages, the ratio is 918. Among the districts, Kishanganj (971), Katihar (961) and Gaya (960) have relatively better child sex ratio in the age group of 0-6 years, in comparison to Vaishali (904), Patna (909) and Muzaffarpur (915) which all have a highly adverse ratio. The child sex ratios among the Scheduled Castes (962) and Scheduled Tribes (969) are better than the state average of 935. The district-wise figures in Appendix (Table A13.2) indicate that the child sex ratio for 0-18 years, as per the 2011 census, was above the state average in 20 districts. Out of all districts, the highest sex ratio is recorded in — Gopalganj (959), Kishanganj (958) and Siwan (946).

Chart 13.2 : Trend of Sex ratio at birth (females per 1000 males) in Bihar



Source : Sample Registration System, RGI

Adolescent Population of Bihar

Investing in approximately 2.77 crore (2021 projected figure) adolescents, nearly 23 percent of the state population, is the best way to leverage the Bihar's competitive advantage which is the "demographic dividend". Adolescents comprise a significant proportion of India's population. Despite improvements in various dimensions, this demographic segment continues to face serious socio-economic challenges. Individuals in the age-group of 10-19 years are adolescents, according to the World Health Organisation (WHO). It is a stage of changeover stage from total socio-economic and emotional dependence to relative independence. However, adolescents are also vulnerable to a range of health risks, particularly a dual nutritional burden; malnutrition, anaemia and overweight/ obesity, substance abuse and mental health concerns. Investing in adolescents is vital to achieve the Sustainable Development Goals (SDGs). The total adolescent population in Bihar is projected to increase by 13 percent to 2.64 crore in 2036 from 2.34 crore in 2011. In the same period, the adolescent male population is projected to increase 1.10 times from 1.25 crore in 2011 to 1.38 crore in 2036 and that of females by 1.15 times from 1.09 crore in 2011 to 1.26 crore in 2036 (Chart 13.3). This means that, in future, Bihar will have an advantage of a young population when other states will be suffering from the burden of an ageing population. The district-wise details are given in the Appendix (Table A 13.3).

Chart 13.3 : Scenario of Adolescent population in Bihar (Projected)

Source : Census 2011, RGI

13.2 Expenditure on Children

The child budgeting is not only an accounting exercise. The main objective of the budgeting is to ensure adequate expenditure for child development, so as to address their needs and vulnerabilities in a holistic way. A complete understanding of public expenditure on children can emerge only when one covers its various components. It is an attempt to desegregate those allocations which are made to specifically benefit children. This enables one to assess how far the policy commitments of the State government are translated into financial commitments. With this aim to meet the needs of children, the Government of India introduced Statement 22 in 2008-09 as Budget

Provisions for Schemes for the Welfare of Children. In 2017-18, this statement was renamed as Statement 12.

In Bihar, the process of child budgeting started in 2013-14. The child budget includes all financial details of the schemes which are related to child welfare. These allocations mainly relate to education and health schemes, special schemes for girls, and child security. From Table 13.1, it is visible that there has been a consistent rise in the child budget allocation in Bihar, during the last six years. Between 2016-17 and 2022-23, the expenditure for children has increased at an annual rate of 19.4 percent. In the same period, the per capita expenditure increased 2.8 times from Rs. 3275 in 2016-17 to Rs. 9131 in 2022-23. The average share of expenditure on child development in the total state budget lies at around 18 percent, with some year-to-year variation. Likewise, the share of expenditure as percentage of GSDP is around 5 percent.

Table 13.1 : Overview of Child-Specific Scheme Budget

Year	Actual Expenditure	Per Capita Expenditure	Share of Child Budget in	
	(Rs. Crore)	(Rs.)	State Budget	GSDP
2016-17	16639	3275	13.17	3.95
2017-18	17530	3437	12.85	3.74
2018-19	28553	5575	18.46	5.41
2019-20	27640	5376	18.92	4.75
2020-21	30903	5966	18.65	5.45
2021-22	41453	7956	21.46	6.37
2022-23	47848	9131	20.63	6.41

Note : GSDP figures of MoSPI (at current prices) updated as of August 2024 have been used for calculation.

13.3 Sustainable Development Goals

The main agenda of Sustainable Development Goals (SDGs) is inclusiveness and improving outcomes for all people within society. In particular, the agenda of SDG captures the need of children, youth, persons with disabilities, refugees, migrants and many more. Monitoring a country's average level of progress towards the 17 SDGs, and the 169 targets that underpin them, already poses significant data challenges. Going beyond the average to measure outcomes for different population groups is still harder. Within the National Indicator Framework, 49 indicators of SDG are directly related to children in the scope of survival, development, protection and participation. As per the SDG India Index 2023-24 report, released in July, 2024, out of 113 indicators, 28 indicators across 7 SDGs are directly related to children. The goal-wise scores of these in Bihar are presented in Chart 13.5. Out of 28 indicators, Bihar has scored better than the national average on one-third (9 out of 28) indicators.

Chart 13.5 : Goal-wise Performance of Child-related SDGs in Bihar

13.4 Survival, Health and Nutrition Layout

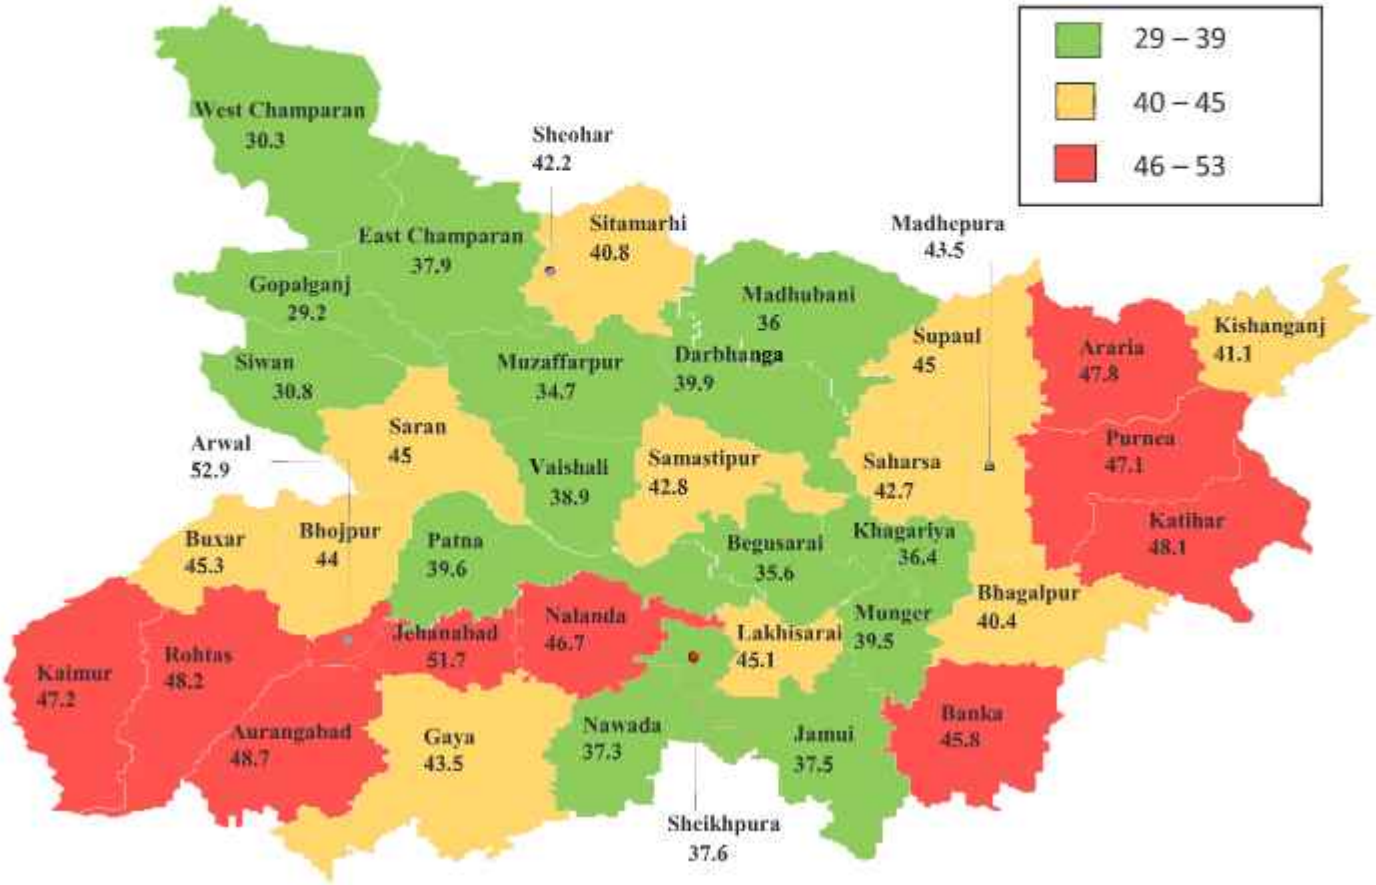
Good nutrition is the base of child survival and development. Healthy and well-nourished children can grow, learn, play and participate in their community activities in a better way. Child health is basic for enhancing the future capabilities of a nation. Thus, it is a great social concern, for which the state has to play a crucial role. To stop child mortality in developing countries, an attempt is

generally made to provide selective primary health care. This health care mainly focusses on the prevention and control of specific infectious diseases, and less effort is directed to improve children's underlying nutritional status. The indicators pertinent for evaluating the health status of children below five years are — Infant Mortality Rate (IMR), Under-Five Mortality Rate (U5MR), Neo-Natal Mortality Rate (NMR), Peri-Natal Mortality Rate (PMR), and Immunisation. These indicators have already been discussed in Chapter 12 on Human Development. There is a strong relationship between malnutrition and mortality; and, as such, child health should be improved through nutritional interventions. Along with other indicators, three main parameters to assess the health and nutrition of a child are — children under 5 years of age who are stunted (height-for-age), wasted (weight-for-height) and underweight (weight-for-age).

Stunting, Wasting and Underweight

Stunting, wasting and underweight are the three indicators of malnutrition. Stunting means children under 5 years of age who are too short for their age and signifies chronic under-nutrition. Wasting is a weight-for-height index, which measures the adequacy of body mass in relation to body height and reflects current nutritional status. Wasting may result due to inadequate food intake or a recent episode of illness causing weight loss. Finally, underweight is the weight-for-age which is a composite index of height-for-age and weight-for-height. It considers both acute and chronic under nutrition. On comparing National Family Health Survey 4 and 5 (NFHS 4 and 5), it is seen that the stunting of children under 5 years in Bihar has come down from 48.3 percent to 42.9 percent, registering a decline of 5.4 percentage points. Also, in the case of underweight children, the figures have come down from 43.9 percent to 41.0 percent, indicating a decrease of 2.9 percentage points. However, for children facing the problem of wasting, there is a slight increase in proportion (Table 13.2). It should be noted here that improvements in Bihar with respect to stunting and underweight is found in both rural and urban areas. Similarly, worsening of condition with respect to wasting is again observed in both rural and urban areas, but more so in rural areas. In case of India, there have been improvements in all three indicators. Regarding, the difference between Bihar and India, the nutritional status is expectedly better in India, particularly in terms of percentage of underweight children. However, with several pragmatic steps taken by the State government to address the nutritional issues, it is expected that, in the coming years, this indicator will also show adequate progress. The prevalence of underweight in different districts of Bihar are presented in the Map 13.1. The district-wise details of Stunted, Wasted and Underweight children are given in Table A13.4 (Appendix).

Map 13.1 : Percentage of Underweight Children Under 5 Years (Low weight for age)



Source : NFHS-5, GoI

Anaemia in Children (6-59 months)

Childhood anaemia remains a major public health problem in India and Bihar, as it adversely affects child development and overall health outcomes. The condition of low levels of haemoglobin in the blood is anaemia. Iron is a key component of haemoglobin, and the leading cause of anaemia is iron deficiency. Other causes of anaemia include malaria, hookworm and other helminths, other nutritional deficiencies, chronic infections, and genetic conditions. Anaemia is a serious concern for children, because it can damage cognitive development, stunt growth, and increases morbidity for infectious diseases. As per the NFHS-5 data, 69.4 percent of children in the age group of 6-59 months in Bihar are suffering from anaemia. On comparing the data for NFHS-4 and 5 for Bihar, it is again seen that there is an increase in the percentage of anaemic children from 63.5 percent in NFHS-4 (2015-16) to 69.4 percent in NFHS-5 (2019-21), an increase of 5.9 percentage points. In the case of India, this gap is even wider at 8.5 percentage points between NFHS-4 (2015-16) (58.6 percent) and NFHS-5 (2019-21) (67.1 percent). The rural and urban figures in Bihar, as well as in India are also showing a rise between the two rounds of NFHS (Table 13.2). The relevant district wise data is presented in Appendix (Table A 13.4).

Table 13.2 : Percentage of Children Suffering from Malnutrition and Anaemia in India and Bihar

Indicators	NFHS-4 (2015-16)			NFHS-5 (2019-20 & 2019-21)

13.5 Development Programme for Children

According to the projected data derived from the 2011 Census, there are 19.9 million children in Bihar aged between 0 and 6 years. Both Central and State governments are implementing various development programmes to improve children's welfare. Some of these programmes include:

Mission Saksham Anganwadi and Poshan 2.0

The Government of India approved Mission Saksham Anganwadi and Poshan 2.0 (also referred to as Mission Poshan 2.0) which is a strategic shift in the mission mode to develop practices that foster health, wellness, and immunity from malnutrition. The objectives of Mission Poshan 2.0 are as follows:

i. To contribute to the human capital development of the country;

ii. Address challenges of malnutrition;

iii. Promote nutrition awareness and good eating habits for sustainable health and well-being; and

iv. Address nutrition-related deficiencies through key strategies.

To address the various gaps and shortcomings in the ongoing nutrition programme and to improve implementation and accelerate improvement in nutrition and child development outcomes, the existing scheme components have been reorganized under Poshan 2.0. The primary pillars of the scheme are:

i. Nutrition Support for Poshan through Supplementary Nutrition Programme (SNP) for children in the age group of 6 months to 6 years, pregnant women and lactating mothers

(PW&LM); and adolescent girls in the age group of 14 to 18 years in Aspirational Districts and North Eastern Region (NER);

ii. Early Childhood Care and Education [3-6 years] and early stimulation for the 0-3 years age group;

iii. Anganwadi Infrastructure, including modern, upgraded Saksham Anganwadis; and,

iv. Poshan Abhiyaan

Anganwadi Services (AS)

The Anganwadi Services, formerly known as the Integrated Child Development Services (ICDS), is one of the flagship programmes of the Government of India and represents one of the world's largest and exclusive programmes for early childhood care and development. It shows the country's commitment to its children and nursing mothers, as a response to the challenge of providing pre-school non-formal education on the one hand and breaking the vicious cycle of malnutrition, morbidity, reduced learning capacity and mortality on the other. The beneficiaries under this scheme are children in the age group of 6 months to 6 years, Pregnant Women and Lactating Mothers and Adolescent Girls in the age group of 14 to 18 years in Aspirational Districts of the States and the North Eastern Region. The ICDS was initiated on October 2, 1975 as a remedial programme aimed at children between the age of 0 and 6 years. The programme aimed to enhance childcare, early stimulation and learning, health, and nutrition in the long term. The ICDS scheme was first introduced to achieve the National Policy for Children in 33 pilot blocks, which included 4,891 Anganwadi Centres (AWCs) across the country, with three of those blocks located in Bihar. The AWCs gradually expanded with 5652 Projects and 6 lakh sanctioned AWCs in the country, by the end of the Ninth Plan. The coverage of Anganwadi Services Scheme, till the Ninth Plan, was not universal. Now, the Mission Saksham Anganwadi and Poshan 2.0 operates through a network of 7075 fully operational Projects and 13.95 lakh operational AWCs.

The ICDS provides a package of six services which are — (i) Supplementary Nutrition Programme (SNP), (ii) Preschool Non-Formal Education (for children between the ages of 3 and 6 years), (iii) Nutrition and Health Education, (iv) Immunization, (v) Health Check-up, and (vi) Referral Services. Three of the six services, viz., Immunization, Health Check-up and Referral Services are related to health and are provided through NHM and Public Health Infrastructure. The target group of ICDS is reached through the Anganwadi Centers (AWC). The personnel for ICDS include Child Development Project Officer (CDPO), Lady Supervisor (LS), Anganwadi Worker (AWW) and Anganwadi Helper (AWH).

The main beneficiaries of the programme comprise children aged 6 months to 6 years. Additionally, this initiative also includes pregnant women, breastfeeding mothers, nursing

infants (up to 6 months), and adolescent girls (14-18 years) who are not attending school. Currently, the ICDS is executing its programme through 544 project offices across all 38 districts of Bihar. Furthermore, all 544 ICDS projects are run through 1,07,894 AWCs, additional AWCs, and 7115 Mini AWCs.

Cost-Sharing Ratio Between Centre and States

The cost-sharing pattern between the Centre and States for the scheme is as follows:

Table 13.3 : Cost-Sharing Norm under Anganwadi Services

States/UTs	Anganwadi Services (AS)	SNP
States/UTs with Legislature	60:40	50:50
NE/Himalayan States/UT of J&K	90:10	90:10
UT Without Legislature	100:0	100:0

Source : Ministry of Women and Child Development, GoI

Revision of Cost Norms for Supplementary Nutrition

In October 2017, the government sanctioned a revision of the cost guidelines for supplementary nutrition within the Anganwadi Services, as detailed below:

Table 13.4 : Revised Cost Norms

(per day per beneficiary)

Categories	Pre-revised rates	Revised rates
Children (6-72 months)	Rs. 6.0	Rs. 8.0
Pregnant Women & Lactating Mothers	Rs. 7.0	Rs. 9.50
Severely Malnourished Children (6-72 months)	Rs. 9.0	Rs. 12.0

Source : Ministry of Women and Child Development, GoI

AS (ICDS) is mainly a service-based programme, its staffing is very vital for its success. Compared to 2020-21, there has been a slight decrease in the number of Child Development Project Officers (CDPO) in the subsequent years. But, inversely, there is an increase in the number of Lady Supervisors and Anganwadi Workers after 2020-21. Regarding Anganwadi Helpers, the number of staffs working against the sanctioned posts, almost remains the same. According to Table13.5, the vacancy ratios in 2023-24 are — CDPO (30.2 percent), LS (40.2 percent), AWW (2.2 percent) and AWH (10.8 percent). AS is one of the important government schemes that directly addresses childhood needs.

Table 13.5 : Staffing Position in AS (ICDS)

Year	Posts	CDPO	Lady Supervisor	Anganwadi Worker	Anganwadi Helper
No. of Sanctioned Posts		544	4,210	1,14,718	1,07,603

Up to Sep-24	Percentage of Vacant Post	25.2	35.8	2.3	10.8

Source : Directorate of ICDS, GoB

The budget provision for ICDS has increased annually at the rate of 12 percent from Rs. 988.70 crore in 2017-18 to Rs. 2064.14 crore in 2023-24. Out of the budget provision of Rs. 2064.14 crore for ICDS in 2023-24, Rs. 1861.08 crore was released by the Government of India. It is also noted that, in 2023-24, 100 percent of funds released have been utilized which reflects the efficient utilization of funds by the State government. One must note here that even in 2024-25, up to September 2024, 98 percent of the funds released have been utilized under the scheme. The details of the scheme are given in Table 13.6 and Chart 13.6.

Table 13.6 : Resource Utilisation in AS (ICDS)

Year	Budget for AS Bihar (Rs. crore)	Funds Released by GoI (Rs. crore)	Expenditure (Rs. crore)	Fund Released as Percentage of Budget	Expenditure as Percentage of Funds Released
2017-18	988.7	1075.2	940.42	108.75	87.46
2018-19	1213.9	1321.5	1119.9	108.86	84.74
2019-20	1735.7	1641.7	1200.96	94.58	73.15

Supplementary Nutrition Programme (SNP)

Based on the provisions in the National Food Security Act 2013, the Supplementary Nutrition (under Integrated Child Development Services Scheme, Rules 2017) came into being in February, 2017. This programme is meant for regulating the entitlement for every pregnant woman and lactating mother till 6 months after child birth, and every child in the age group of 6 months to 6 years (including those suffering from malnutrition). It makes provision for food grains for 300 days in a year. In case of non-supply of the entitled quantities of food grains or meals to the entitled persons, they are entitled to receive a food security allowance from the concerned State government within the specified time, as prescribed by the Central government. Thus, to improve the nutritional status of women and children in Bihar, the SNP was implemented under Anganwadi Services. Under this scheme, nutritional standards for children in the age group of 6 months to 3 years and pregnant women and lactating mothers are required to be met by providing 'Take Home Rations' (THR), or healthy Hot Cooked Meal (HCM). Children aged 3 to 6 years are given Energy-dense Nutritious (EDN) food recipes as HCM for daily requirement. The details of the programme are given in Table 13.7. Hot Cooked meal is also prepared and served to the children attending Anganwadi Centers for Pre-School Education. Along with this, the children are also provided with morning snacks as per the prescribed menu (Table 13.8).

Table 13.7 : Food Items Distributed under SNP (THR)

Category	Rice (kg)	Moong Pulses (kg)	Soya Badi (gm)	Mix Spices (gm)	Salt (gm)	Soyabeen Oil (gm)	Cost Norms (Rs./day)
Children (6 months to 3 years)	1.87	0.75	500	12.5	50	250	8
Children (6 months to 6 years)	2.94	1.33	500	25	75	500	12
Pregnant and lactating women	2.25	1	375	12.5	62.5	375	9.5

Note : THR beneficiaries are provided with 8 eggs who wish to have egg in lieu of Soya Badi
Source : Directorate of ICDS, GoB

Table 13.8 : Current HCM Menu and Morning Snacks for 3 to 6 years under SNP

Day	HCM Menu	Morning Snacks Menu	
	Main Course	Morning Snacks	Additional Morning Snacks (State Scheme)
Monday	Rice Pulao	Roasted peanut and gram nut	—
Tuesday	Rice with Potato Gram nut curry	Banana / Papaya or any seasonal fruit	Milk-100ml
Wednesday	Rice with Soyabean curry	Sprouted Gram Nut with Jaggery	Egg-1/Peanut
Thursday	Sweetened Rice (Rasiav)	Banana / Papaya or any seasonal fruit	Milk-100ml
Friday	Rice with Pulses with Bottle Gourd/ Sag Dal	Banana / Papaya or any seasonal fruit	Egg-1/Peanut
Saturday	Rice & Pulse Khichadi	Banana / Papaya or any seasonal fruit	—

Note : Provided to 3 to 6 years children attending Preschool at Anganwadi Centre
Source : Directorate of ICDS, GoB

State Government Initiative

Sudha Milk : In addition to the breakfast, children receiving pre-school education through Anganwadi Centres between 3 and 6 years of age are provided Sudha Milk Powder two days in a week (Tuesday and Thursday). Twelve Grams of Sudha Milk Powder is mixed with 100 ml of water and given to the children.

Egg : In addition to the breakfast, Hen's Egg is being given to the children of 3-6 years of age receiving pre-school education through Anganwadi Centres and those children who do not eat Egg are provided Roasted Peanuts two days a week (Wednesday and Friday).

Poshan Abhiyaan

The overarching scheme for Holistic Nourishment (earlier known as the National Nutrition Mission) was started to attain the goal of 'Suposhit Bharat' in a mission mode. Mission Poshan

2.0 (Saksham Anganwadi and Poshan 2.0) is as an integrated nutrition support programme to strengthen nutritional content, delivery, outreach and outcomes with a focus on developing and promoting practices that nurture health, wellness and immunity. The Anganwadi Services, Scheme for Adolescent Girls and Poshan Abhiyaan have been reorganized under Mission Saksham Anganwadi and Poshan 2.0 (Mission Poshan 2.0) for maximizing nutritional outcomes. Poshan 2.0 focuses on Maternal Nutrition, Infant and Young Child Feeding Norms, Treatment of Moderately Acute Malnourished/Severely Acute Malnourished and Wellness through AYUSH practices to reduce wasting and under-weight prevalence. The programme makes interventions using technology, behavioural change through convergence, converting the agenda of improving nutrition into a Jan Andolan, with wide public participation and achieving specific targets through different monitoring parameters. In the year 2024-25, a budget provision of Rs. 19893.63 lakh as central share and Rs.2370.97 lakh as state share is proposed.

Jan Andolans (Community-based Event)

Jan Andolan is one of the main components under POSHAN Abhiyaan. Poshan Maah and Poshan Pakhwada are conducted annually in September and designated weeks of March-April, respectively that helps reaching out to the masses through biggest nutrition-centric Jan Andolans. Over the years, various themes have been included in Jan Andolans that cover overall nutrition, hygiene, water and sanitation, anaemia prevention, the importance of breast-feeding, growth monitoring, etc. For the promotion of dietary diversity and complementary feeding among children, ceremonies like Annaprashan cum School Purv Shiksha Praveshotsav Diwas is celebrated on the 19th of every month and God-bharai Diwas cum Suposhan Diwas is celebrated on the 7th of every month at AWCs. Approximately, 86 percent children are getting diversified food in complementary feeding. Mainly, for complementary feeding, the indigenous food is recommended, as it boosts immunity. Also, Yoga practices are organized at the AWCs with the support of AWWs.

POSHAN Tracker

The POSHAN Tracker, known as the ICDS-CAS (Integrated Child Development Services-Common Application Software) in its earlier form, was set up with the aim of tracking and improving various services delivered at Anganwadis and to ensure nutritional management of beneficiaries. It does real-time monitoring and tracking of all AWWs. In Bihar, all the AWWs are using the App which helps them identify Severely Acute Malnourished children who are tracked for treatment. Presently, 1.05 lakh beneficiaries have been connected by Poshan Tracker and 95 percent of them have Aadhaar certification.

Poshan Vatika

Another main plank of the Abhiyaan, to enable the right kind of nourishment, is the Poshan Vatikas or Nutri-gardens that are being set up across the state to provide easy and affordable access to

fruits, vegetables, medicinal plants and herbs. Thus, Poshan Vatikas can play an important role in enhancing dietary diversity by providing micronutrients through a constant supply of fruits and vegetables to children.

Scheme for Adolescent Girls (SAG)

The Scheme for Adolescent Girls (SAG) has been revised and subsumed under Mission Saksham Anganwadi and Poshan from April, 2022. The targeted beneficiaries under this scheme are girls aged 14-18 years in the Aspirational Districts. The SAG is implemented through 178 projects in 13 aspirational districts of Bihar. These districts are Araria, Aurangabad, Banka, Begusarai, Gaya, Jamui, Katihar, Khagaria, Muzaffarpur, Nawada, Purnea, Sheikhpura, and Sitamarhi. The scheme consists of two components, viz., nutrition and non-nutrition. Under the nutrition component, supplementary nutrition containing 600 calories, 18-20 gm of protein and micronutrients is provided in the form of Take-Home Ration (THR) for a maximum of 300 days in a year. The non-nutrition component is based on convergence with different ministries wherein the Iron Folic Acid tablets supplementation, health check-up and referral services, nutrition and health education, skill training etc. is provided.

A. **Cost for Nutrition** : The financial norm for the nutrition component is Rs. 9.50 per beneficiary for 300 days in a year. This includes the cost of micronutrient fortification.

B. **Funding pattern** : The share of the cost of supplementary nutrition between Union and State (Bihar) is in the ratio of 50:50.

In 2023-24, 1.15 lakh girls got the benefit of the scheme. For 2024-25, a budget allocation of Rs. 4198.89 lakh was made, out of which Rs. 3149.16 lakh was the central share and Rs. 1049.73 lakh was the state share.

Financing Nutrition

The inadequate nutritional status is recognized as one of the key factors contributing to distorted health indicators. The issues of underweight, stunting, wasting, and malnutrition have evolved into multifaceted health and developmental challenges. Consequently, the high rates of malnutrition continue to pose a significant problem for society, particularly for the most disadvantaged and vulnerable populations. Implementing nutrition-focused programmes is crucial to alleviate the burden of undernutrition and foster the overall progress in the state. The SDGs for 2030 highlights the importance of proper nutrition. Therefore, evaluating investments in nutrition serves as a highly relevant measure for determining the country's future growth. Table 13.9 illustrates the funding trends of the nutritional component within the ICDS. The overall budget for ICDS in Bihar, including state initiatives, rose from Rs. 3800.18 crore in 2019-20 to Rs. 4611.53 crore in 2023-24, indicating an increase at the rate of 4.3 percent annually. Likewise, the budget allocated for nutrition under ICDS grew at an annual rate of 1.3 percent, increasing from Rs. 1791.89 crore in 2019-20 to Rs. 2064.72 crore in 2023-24.

Table 13.9 : Funding for Nutrition under ICDS (SNP)

Year	Total Budget for All Schemes in ICDS Bihar (CSS+SS) (Rs. crore)	Total Budget for Nutrition under ICDS, Bihar (CSS+SS) (Rs. crore)	Funds Released by GoI (CSS) (Rs. crore)	Funds Released by GoB (SS) (Rs. crore)	Expenditure (CSS+SS) (Rs. crore)	Fund Released as Percentage of Budget (CSS+SS)	Expenditure as Percentage of Funds Released (CSS+SS)
2019-20	3800.18	1791.89	761.01	1013.63	1578.09	99	89
2020-21	4108.98	2053.4	856.08	1253.75	2031.85	103	96
2021-22	4129.51	1896.44	883.69	1040.37	1848.65	101	96
2022-23	4240.48	1767.38	951.94	883.69	1767.37	104	96
2023-24	4611.53	2064.72	897.23	897.23	1862.71	87	104

Note : 1. Fund released by GoI in the 4th installment of the current year is Rs. 388.39 Cr for the SC Component. But, the budget provision for the SC component is less than the amount.
2. Rs.27.61 Cr was released by GoI for reimbursement of excess expenditure of previous years.
3. Rs.68.24 Cr was released by GoI for reimbursement of excess expenditure of previous years.
4. Rs.68.25 Cr was an unutilized balance of 2022-23 which was utilized in 2023-24.

Source : Directorate of ICDS, GoB

Pradhan Mantri Matru Vandana Yojana (PMMVY)

The objectives of the PMMVY is to provide cash incentives for partial compensation for the wage loss so that the woman can take adequate rest before and after the delivery of her first child. Under this component, free meal is provided during pregnancy and six months after the childbirth through the local Anganwadi to meet the nutritional standards; and maternity benefit of Rs. 5000 is given in two installments. The benefit is available to a woman for the first two living children provided the second is a girl. In case of the first child, the amount of Rs. 5000 is given in two installments and for the second, the benefit of Rs. 6000 will be provided in one installment subject to the condition that the second child is a girl child. However, for availing the benefits for the second child, registration during the pregnancy shall be mandatory. This will lead to improvement in the SRB and prevent female foeticide.

Table 13.10 : Cash Transfer Condition

Installment	Condition	Amount (In Rupees)
Scheme Condition for First Child		
First Installment	On registration of pregnancy and at least one Antenatal check-up within six months from the Last Menstrual Period date at the Anganwadi Centre or approved Health Facilities may be identified by the respective administering State or Union Territory	3,000
Second Installment	I. After Childbirth is registered. II. The child has received all due vaccines till the age of fourteen weeks as admissible under the Universal Immunization Programme of the Ministry of Health and Family Welfare.	2,000
Scheme Condition for Second Child (if it is a girl child)		
Single Installment	On registration of pregnancy and at least one Antenatal check-up (ANC) within six months from the Last Menstrual Period date at the Anganwadi Centre (AWC)/approved Health Facilities may be identified by the respective administering State/ Union Territory (UT). The girl childbirth shall be registered under the scheme. The girl child has received all due vaccines till the girl child attains the age of fourteen weeks from the date of birth as admissible under the Universal Immunization Programme of the Ministry of Health and Family Welfare.	6,000

13.6 Drinking Water and Sanitation

Hygiene is the most effective way of controlling diseases and drinking water and sanitation play a major role in this. Thus, a child cannot get hygienic environment until the supply of drinking water and sanitation facilities are adequate in schools. The situation of a school plays a significant role in children's lives, as they acquire many social habits and behaviours within that setting. Children are entitled to a conducive learning environment that includes easy access to safe and sustainable water, sanitation, and hygiene (WASH) services. Consequently, maintaining WASH facilities in schools should be prioritized. As per the latest SDG India Index 2023-24, on the child indicator denoting the percentage of schools with separate toilet facilities for girls, which comes under goal 6 of the SDGs, Bihar's score is 92 percent. Thus, ensuring the availability of adequate safe water and proper sanitation facilities is an essential component of a school infrastructure. Chart 13.7 (A+B) shows the status of functional drinking water facilities and toilets in schools of Bihar in 2021-22. Presently, against the approved 1,15,009 AWCs, 1,02,242 have the facility of drinking water and 96,251 centres have the toilet facility.

Chart 13.7 : Drinking Water Facilities in Schools of Bihar (%)

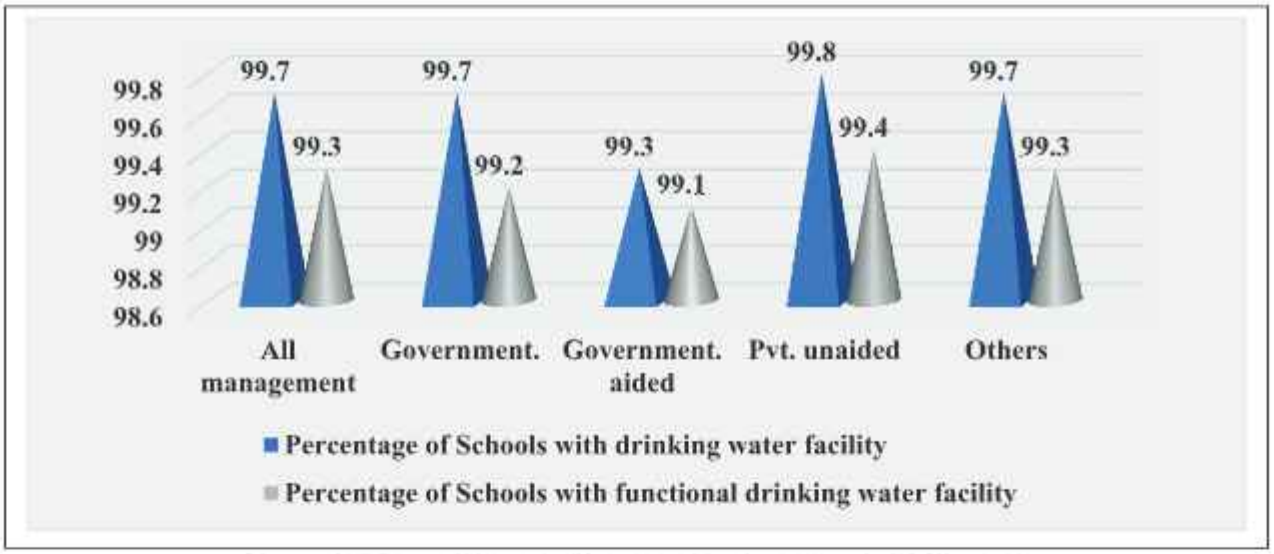

Chart 13.7 A : Toilet Facilities for Girls in Schools of Bihar (%)

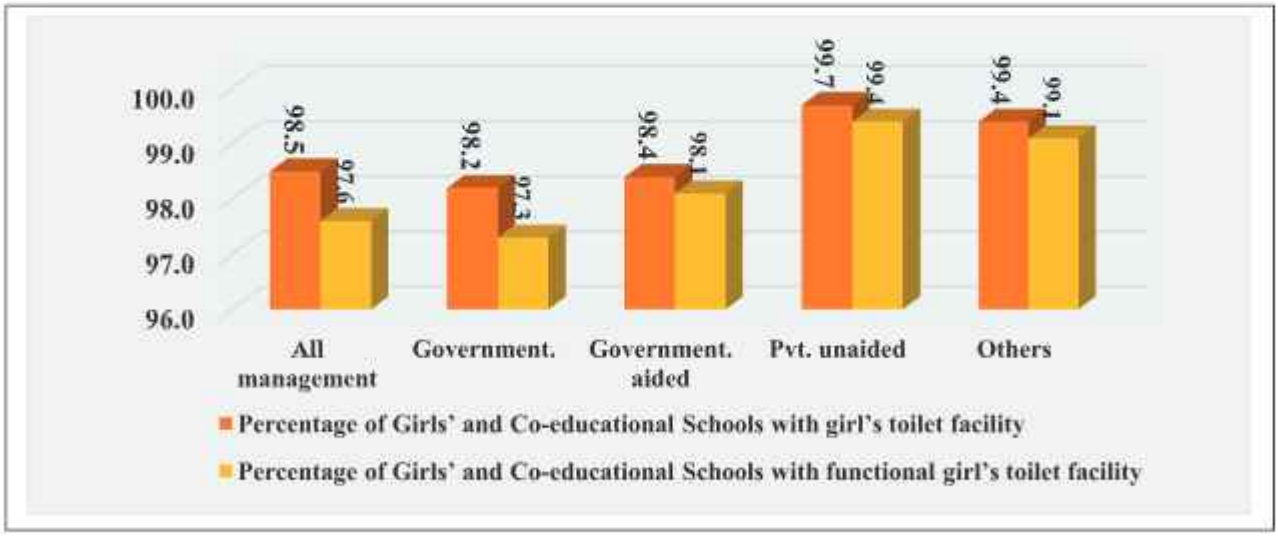

Chart 13.7 B : Toilet Facilities for Boys in Schools of Bihar (%)

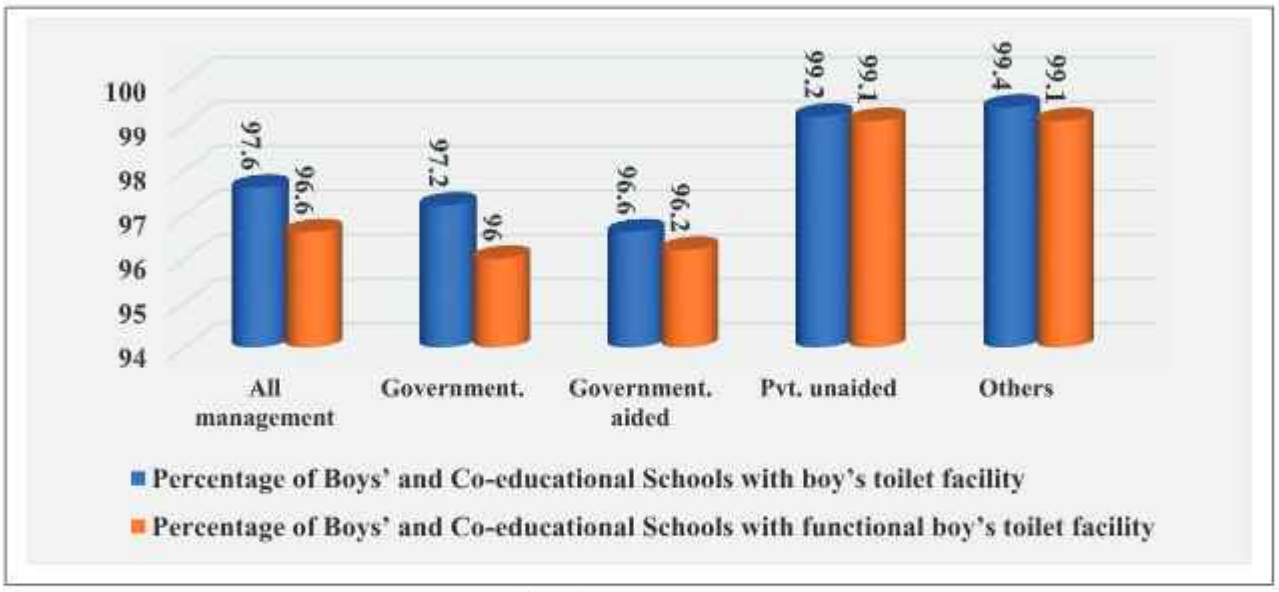

Source : DISE, GoI

13.7 Educational Programme for Young Children

Education increases the capabilities of individuals and becomes a catalyst for the closely interrelated economic, social, cultural, and demographic changes that lead to the overall development of a society. The Indian Education System, according to the National Education Policy (NEP) 2020, now has a 5+3+3+4 of schooling, which includes early childhood education under the domain of formal schooling. Elementary and secondary education have already been discussed in Chapter 12 on Human Development, so the present section will just present the details of Early Childhood Care and Education (ECCE) and other programmes of child development in Bihar.

Pre-School Children

Early childhood experiences play a vital role in the growth and development of children. In these formative years, a child's brain undergoes rapid development, social and personal habits are established swiftly, and a strong foundation is created for the child's comprehensive development throughout life. To improve the educational outcomes of students in elementary education, it is crucial that all children have access to high-quality pre-school experiences. Ensuring quality pre-school education is a key objective of the SDG. Research indicates that more than 85 percent of brain development occurs by the age of six, underscoring the necessity of providing suitable care and stimulation during early childhood to foster healthy brain development and overall growth.

Early Childhood Care and Education (ECCE)

Investing in ECCE will lead to substantial returns on investment. Children engaged in ECCE programmes tend to exhibit enhanced cognitive and socio-emotional development, achieve superior academic performance, and experience improved health outcomes throughout their lives.

These results underscore the importance of ECCE in establishing a robust foundation for lifelong well-being and comprehensive growth and development across various dimensions. ECCE comes under 'Saksham Anganwadi and Poshan 2.0' Mission, a programme initiated by the Ministry of Women and Child Development, Government of India. The mission places significant emphasis on ECCE to address the diverse needs of young children, promoting their cognitive, emotional, social, and intellectual development. Additionally, in 2022, the Ministry of Women and Child Development launched an initiative to refocus on early learning and nutrition through the "Poshan Bhi Pahadi Bhi" programme, which underscores the critical role of education in the comprehensive development of children. The AS (ICDS) initiative in Bihar currently functions through a system of 544 active projects and 115,009 AWCs. It has successfully provided early childhood education to a total of 5.35 million children aged 3 to 6 years, comprising 2.47 million boys and 2.61 million girls in 2024-25. Presently, there are 2,704 supervisors, 112,094 Anganwadi workers, and 103,432 Anganwadi helpers engaged in supporting the beneficiaries who visit the AWCs.

Pre-School Education Programme

The AWCs offer pre-school education to children aged 3 to 6 years. Those enrolled in these centers receive snacks and hot, cooked meals. These meals are prepared in accordance with the caloric, protein, and micronutrient requirements specified by the National Food Security Act of 2013. The typical enrolment in an AWC ranges from approximately 35 to 40 children. The Anganwadi Worker (AWWs) is tasked with conducting the pre-school sessions at the centre. The ECCE curriculum is implemented with the assistance of the Anganwadi Worker and the Anganwadi Helper. As of October 2024, 5.35 million children are enrolled across 115,009 AWCs in Bihar.

Pre-School Education Kit

It is critical to make available teaching kits and ensure its usage to quality teaching learning processes in AWCs. Pre-school kit at the cost of Rs. 3000 per centre is provided to 1,15,009 AWCs of the state. Items for all domains, for example cognitive, socio emotional, foundational literacy and numeracy and cultural and artistic development, are procured for its use in teaching and learning process. Necessary steps have been taken to procure items those are safe to use and long lasting. ECCE curriculum Adharshila is shared with the district to be followed at AWCs which would support AWWs to use locally available materials for classroom transaction. Capacity building programme of Master Trainers is being conducted with the support of National Institute of Public Cooperation and Child Development (NIPCCD) for effective implementation of the Adharshila curriculum in the state. Presently, a total of 1092 master trainers have been trained.

Child Assessment Cards

Child Assessment Cards have been created to evaluate the learning outcomes of children aged 3 to 6 years. The learning indicators have been established following the National Curriculum Framework. To facilitate the implementation of the assessment cards, age-appropriate higher-order skills have been integrated into the Poshan Bhi Padhai Bhi report card.

Provisioning of Uniform

To promote equity in AWCs, the department is facilitating the provision of uniforms for children, the cost of which is Rs.400 per beneficiary. This amount has been deposited into the accounts of the parents of the children, enabling them to purchase the uniforms independently.

Local monitoring and supervision committee

To ensure the effective management of early childhood education across various levels within the state, the local monitoring and supervision committee at the block level comprises the following members: the president from the Child Development Project Office, a lady supervisor serving as coordinator on a rotational basis, the Block Development Officer, the in-charge medical officer, the Block Education Officer, and two members from the Civil Society Organization at the block level. This committee is tasked with overseeing activities conducted at the block level, holding monthly review meetings to identify challenges and necessary corrective actions, and communicating with higher authorities to facilitate required interventions.

Community Engagement

The Poshan Bhi Padhai Bhi initiative aims to transform Anganwadi Centres (AWCs) into dynamic learning hubs. To achieve this, the department has adopted a community-based approach, recognizing the community as a vital stakeholder in the pre-school education programme. Engaging community members is essential for gaining a deeper understanding of both children and their families. During the early developmental years, it is crucial for parents to comprehend and support the activities occurring within the AWC, while Anganwadi Workers (AWWs) must also be aware of the child's home environment. Parents are regularly updated on their child's progress. Consequently, the state has established guidelines for observing a monthly ECCE day in the centres, in accordance with the directives from the Ministry of Women and Child Development. A comprehensive 12-month plan detailing theme-based activity and the roles and responsibilities of stakeholders has been disseminated to all districts. It is recommended that the ECCE day session lasts a minimum of two hours. This plan is synchronized with the academic calendar, from April to March, to facilitate a smooth transition for children entering primary school.

Out-of-School Children (OOSC)

Typically, out-of-school children (OOSC) come from the most disadvantaged segments of society. Kids residing in rundown houses (found in slum areas), at railway stations, on the streets, or in other perilous, life-threatening conditions struggle to attend school regularly. Many of these marginalized youths engage in activities such as begging, vending, scavenging, or assisting in small businesses. However, in line with the goals of Samagra Shiksha Abhiyan (SSA) aimed at

achieving universal elementary education, it is crucial that all out-of-school children are included in the framework of elementary education. To assess the actual burden of out-of-school children, Habitation Mapping has been carried out in the state which collected information regarding the presence of primary and upper primary schooling facilities, conforming to State Right to Education norms. The status of OOSC can be seen in the table below. The State government is implementing a comprehensive and inclusive strategy to integrate Out-of-School Children into the formal education system.

Table 13.11 : Number of Out-of-School Children in Bihar

2022-23						
Category	6-10 years			11-13 years		
	Boys	Girls	Total	Boys	Girls	Total

Sports and Physical Education

An Integrated Scheme on School Education i.e. Samagra Shiksha envisions 'education' in a holistic perspective and as a continuum from Pre-Primary, Primary, Upper Primary, and Secondary to Higher Secondary levels. This is an integrated/composite school system from pre- school to higher secondary level to facilitate the transition of children across various levels of school education and will aid in promoting children to complete school education. The vision of the Scheme is to ensure inclusive and equitable quality education from pre-school to senior secondary stage following the SDG for Education. As per Sports and Physical Education item, there is a budgetary provision of Rs. 5000 per primary school, Rs. 10,000 per middle school and Rs. 25,000 per secondary and higher secondary school for the purchase of sports material at school level. Under this, Rs. 6910.25 lakh was sanctioned by the Bihar government for 75424 schools in 2022-23. By this, quality sports materials have been procured in all 38 districts.

Construction of Playgrounds in Each Gram Panchayat of Bihar

To encourage sports and to promote infrastructure for sports for youth and especially school children including girls in the rural areas of the state, the Rural Development Department has decided to develop playgrounds under Mahatma Gandhi National Rural Employment Guarantee Scheme (Mahatma Gandhi NREGS). With the development of sports facilities in the rural areas, children and youth will get the opportunity to showcase their talent at national and international level. Based on the availability of land for the development of playgrounds under Mahatma Gandhi NREGA, the following three types of playgrounds are being developed in rural areas :

Type-I : Large Ground (Upto 04 acres) Estimated Cost Rs. 9.94 lakhs

Type-II : Medium Ground (1 to 1.5 acres) Estimated Cost Rs. 9.12 lakhs

Type-III : Small field (Less than 1 acre) Estimated Cost Rs. 8.28 lakhs

Under this, the sports facilities like basketball, volleyball, running track, badminton, high jump, long jump, kabaddi, kho-kho are proposed. The target of the scheme is to construct one playground each in all 8053 gram panchayats of Bihar under Mahatma Gandhi NREGA. The budget for the construction of all playgrounds is estimated to be Rs. 804.36 crores by which approximately 52.74 lakh person days will be created. In the first phase of playground construction, the construction of total 6859 playgrounds in 5671 gram panchayats under 533 blocks, involving total expenditure of Rs. 654.50 crores, was inaugurated. The construction of these will approximately create 41.00 lakh person days.

Inclusive Education for Children with Special Needs (CWSN)

The objective of Samagra Shiksha Abhiyan is to provide quality and life skills to CWSN, according to their needs, with the non-disabled children of the age group 6-18 years in schools. It is to make sure that no child is left out from the mainstream educational system. To achieve these objectives, different approaches, substitutes, and strategies have been adopted by the State government, so that CWSN will learn according to their talent. Some of the initiatives include:

i. **Sports Events** : A Khel Mahotsav was held in every district of Bihar between late 2022 and early 2023. The event took place on December 3, 2022 (World Disability Day), and January 4, 2023 (Louis Braille Day). Various activities such as drawing and painting, quiz competitions, and musical performances offered children with special needs a chance to showcase their talents even during the pandemic. The event promoted the inclusion of children with disabilities and encouraged them to foster healthy competition, sportsmanship, teamwork, and leadership skills.

ii. **Braille stationary material** : For the help of CWSN, who are unable to read and write the printed material, the State government has provided Braille printed material, Brallier, Braille Slate, Abacus and teller frame, etc. and helped 813 students. Using these equipments, students learn reading and writing, receive quality education and thereby become better participants in regular class activities.

iii. **Stipend for girls** : Under this, a total of 9737 CWSN girls belonging to class I to XII are getting a stipend. It improves their attendance in classrooms. Due to this support, the drop-out incidences of CWSN girls have reduced.

iv. **Enhancement of Skill ("SPARSH" for Blind CWSN)** : Under this programme, a 90-day Residential Centre is run for visually impaired children, through which different types of skill development (such as daily activities, Braille reading, orientation knowledge and mobility, recognition of posture, recognition of colours) programmes are conducted for visually-impaired children. During 2022-23, 1019 visually impaired children got benefitted from this programme.

v. **Home-based Education** : Under this, rehabilitation professionals working under Inclusive education visit such severe category of CWSN at their door step and provide services to them. Altogether 9,038 CWSN of the said category benefitted from home-based education.

Khelo-India : The Khelo India Programme is a national scheme for the development of sports in India. It was launched in 2018 with the objective of mainstreaming sports as an instrument for national development. The Khelo India Youth Games Programme has been started to take the talent of players to new heights. With this important step, efforts are being made to improve India's ranking in the Olympics as well. It is a Central Sector Scheme which is 100% funded by the Central government. The selected athletes will be entitled to a scholarship amount of Rs.5 lakh for eight consecutive years. To enable sportsmen to pursue both studies and sports, the programme aims to identify and promote 20 universities in the country. The Khelo-India programme is being conducted in all the schools of Bihar.

Availability of National Initiative for Proficiency in Reading with Understanding and Numeracy (NIPUN) Teaching Learning Material (TLM) kit in Schools : All government primary schools have been provided with the TLM Kit for Toy-based pedagogy in the classroom, as stated in the NEP to make classrooms resourceful and empowering the teachers with a 'tool kit' to achieve the targeted learning outcomes of students, to help them understand complex concepts and to develop curiosity towards learning. It consists of Alphabet, Flash Cards & Story Books, Chain Link, 3-D shapes, students' and schools' kits. Five separate sets of school kits for Grade 1 to 5 were provided under the TLM kit. Each set consists of materials for Language and Mathematics, including grade-specific posters and charts. Children Kit is also provided with 4 workbooks of Hindi, English, Maths and Urdu for around 55 lakh students of Grade 1 to 3.

The entire kit underwent vetting process at the State Council of Educational Research and Training (SCERT), Bihar. After the TLM reaches schools, an online orientation is organized to orient district-level officials, block-level officials and head teachers on the use of this Kit. The same kit is now being used in government primary schools of the state.

Tarang : The Bihar Education Project Council organized 'Tarang', a programme where about 500 children participated in different cultural and educational activities, like Crossword, Quiz Competition, Spell-Bee Competition, Essay Competition, Painting Competition and Extempore

speech, etc. Under the 'Tarang Medha Sports Festival – 2022', organised at the block, district, Commissionary and State levels, 1224 students aged 6 -17 years participated in the final state-level competition.

Praveshotsav Programme: A team of Kala Jattha was sent from the state level to districts to create an atmosphere for admission in schools.

13.8 Child Protection

The Constitution of India places the utmost importance on the safety and well-being of children. Policymakers widely acknowledge that sufficient investment is essential for the survival, education, protection, and overall welfare of children in order to promote inclusive growth. Numerous children, in Bihar and beyond, encounter various vulnerabilities in accessing quality nutrition, healthcare, education, and additional services. Moreover, children frequently face new challenges such as online exploitation, climate change, and both natural and man-made disasters. To address these issues concerning the safety and well-being of children, the State Government has already implemented certain initiatives. India is also a signatory to the United Nations Convention on the Rights of the Child (UNCRC) and, as such, has a strong legal framework to protect children. This legal framework includes the Juvenile Justice (Care and Protection of Children) Act 2015. The Government of India established the National Commission for Protection of Child Rights (NCPCR) in accordance with the Commission for Protection of Child Rights (CPCR) Act of 2005, to carry out the responsibilities and powers granted to it under this Act. Some of the initiatives taken by the State government to protect the rights of the children are as follows:

Mission Vatsalya (Integrated Child Protection Scheme)

Mission Vatsalya serves as a strategic framework aimed at fulfilling development and child protection objectives in accordance with the SDG. It underscores the importance of child rights, advocacy, and awareness, while also enhancing the juvenile justice care and protection system, guided by the principle of 'leaving no child behind.' The foundational legal instruments for implementing this Mission are the Juvenile Justice (Care and Protection of Children) Act of 2015 and the Protection of Children from Sexual Offences Act of 2012. Before the fiscal year 2009-10, the Ministry executed three distinct schemes: (i) the Programme for Juvenile Justice for children requiring care and protection, as well as those in conflict with the law; (ii) the Integrated Programme for street children; and (iii) the Scheme for assistance to homes for children (Shishu Grih). These initiatives were subsequently consolidated into a single centrally sponsored initiative known as the Integrated Child Protection Scheme (ICPS), which was operational from 2009-2010. In 2017, the ICPS was rebranded as the "Child Protection Services" Scheme. As of the 2021-22 period, the CPS Scheme has been integrated into Mission Vatsalya.

For this scheme, a memorandum of understanding (MOU) has been executed between the Government of Bihar and the Central government to facilitate the implementation at various levels. The primary goals of this scheme include enhancing the well-being of children facing challenging

circumstances and mitigating their exposure to situations that may result in abuse, neglect, exploitation, abandonment, or separation. In the subsequent fiscal year 2023-24, the allocation has increased to Rs. 5013.00 lakh for the Central share and Rs. 3200.00 lakh for the State share. In the subsequent fiscal year 2024-25, the allocation has increased to Rs. 5461.89 lakh for the Central share and Rs. 3734.74 lakh for the State share.

Parvarish

This programme is designed to assist family-based or kinship care for the following categories: (i) children who are orphans, (ii) minors affected by or living with HIV, (iii) individuals affected by grade-II leprosy, (iv) children whose parents are imprisoned due to any legal verdict, and (v) children whose parents have mental disabilities that prevent them from providing sufficient care. Under this programme, a monthly assistance of Rs. 1000 is provided to each child until they reach the age of 18. In the fiscal year 2023-24, out of a budget allocation of Rs. 1500 lakh, about Rs. 1407 lakh was spent under the scheme.

Track Child and Khoya-Paya

The Track Child portal has been made functional since 2012. This portal facilitates the matching of 'missing' children being reported at Police stations with those 'found' children who are residing in the Child Care Institutions (CCIs). The web address of the Track Child portal is *www.trackthemissingchild.gov.in.* The portal is updated by the concerned stakeholders, namely, Police stations, Child Care Institutions (CCIs), Child Welfare Committees (CWCs), and Juvenile Justice Boards (JJBs), etc.

Child Helpline (1098) Services

Under the Mission Vatsalya scheme, the Child Helpline is run in coordination with the State and District functionaries and integrated with the Emergency Response Support System-112 (ERSS-112) helpline of the Ministry of Home Affairs. Presently, it is operational in 26 districts and child helpdesks are available at 11 railway stations of Bihar.

Juvenile Justice (Care and Protection of Children) Act, 2015

The Government of India amended the Juvenile Justice (Care and Protection of Children) Act in 2021 which is the primary legislation for ensuring the safety, security, dignity and well-being of children. The Act provides for protection of children in need of care and protection, and those in conflict with law by catering to their basic needs through care, protection, development, treatment and social re-integration.

Mukhyamantri School Safety Programme (MSSP)

The Mukhyamantri School Safety Programme has been implemented in every school across the state. An annual calendar has been prepared and every school is following "Safe Saturday"

activities as per the calendar under this programme. In 2022-23, an orientation programme for school safety was organised in which a total of 3,84,611 teachers from elementary and secondary schools have been trained. A "First Aid Kit" was also provided to total 74,934 elementary and secondary schools. A chapter on Disaster Management has been included in the textbooks of the school. In the training module, School safety Programme has also been included to address the disaster-related issues. Even the School Development plan includes the safety and security concerns of school and related stakeholders. 'School Safety' has been defined as the creation of safe environments for children starting from their homes to their schools and back.

13.9 Child Participation

Participation is recognized by UNCRC as one of the important human rights, which emphasizes the right of children to freely express their views, formally or informally. Child participation involves allowing individuals under the age of 18 to play a role in decisions and take action regarding issues that impact their lives. This is achieved by empowering children and fostering positive relationships among children, adults, and communities based on mutual respect and collaboration at various levels—familial, local, national, and international. From an international policy standpoint, Article 12 of the Convention on the Rights of the Child (CRC) establishes child participation as a right, stating that "States shall ensure that the child capable of expressing his or her views has the right to freely express those views in all matters affecting the child." In order to promote participation in matters that concern children within their families, schools, local communities, institutions, government policies, and legal processes, necessary measures must be taken. Currently, both State and Central governments have developed programmes to encourage children's involvement in the decision-making process to guarantee their active participation in all planning efforts. Some of them are:

Kishori Manch

Drop-out of girl students at the secondary level is a major challenge, especially for children belonging to educationally backward Minority/SC/ST communities. Apart from this, there are many social reasons which make it difficult for girl students to stay in school. So, to address this, in 2022-23, the Kishori Manch Programme was implemented in 1300 Secondary/Higher Secondary schools of 13 districts viz. Araria, Banka, Bhagalpur, Darbhanga, Gopalganj, Katihar, Kishanganj, Madhubani, Muzaffarpur, Purnia, Sitamarhi, Siwan and Supaul. The Kishori Manch forum conducted activities as per the guidelines and Module issued by the state. This forum also selected an ambassador from among the students, who leads the programme. For the ambassador, priority was given to those female students, who were hesitant to share their adolescence-related issues with the Manch and teachers. Presently, 57,600 adolescent girls have joined the Kishori Manch and are getting benefited from this programme. The programme helped in the development of social and emotional skills among the adolescent girls and changing of attitude of girl students about themselves, about others and about the school. The programme helped in relieving of social and classroom behavior and emotional distress such as anxiety and depression. Furthermore,

adolescents learned about the services offered by banks, especially loans and the benefits of different government schemes.

Child Cabinet (Bal Sansad)

Currently, every school in Bihar has established a child cabinet referred to as 'Bal Sansad'. These cabinets consist of a committee of 12 students and have been implemented by the State government across all primary schools. Their primary responsibility is to support the school management in promoting greater involvement of children in the educational process. The Bal Sansads aim to foster democratic values among children by developing leadership skills and enhancing communication abilities. These child cabinets are an appropriate forum for discussing issues related to their school, the surrounding community, health and hygiene needs, and their rights as individuals.

Bal Samvad Adalat (Courts of Dialogue with Children)

Juvenile delinquency denotes the socially unacceptable behaviour exhibited by minors with criminal inclinations, a phenomenon observed worldwide. Typically, these young offenders emerge from disadvantaged socio-economic backgrounds and are commonly referred to as CICL, or 'Children in Conflict with Law.' The issue gathered attention during the UN Congress in 1960. Following the tragic events of the 'Nirbhaya Case' in December 2012, the Juvenile Justice Act of 2015 was enacted, subsequently leading to the establishment of the Bihar Juvenile Justice Rules in 2017. This legislation encompasses comprehensive provisions aimed at the rehabilitation of these children, emphasizing reformative rather than punitive measures. It also prioritizes the safety, security, dignity, and overall well-being of the accused minors. Offenders committing minor infractions are effectively addressed through the 'Bal Samvad Adalat,' which has been instituted at the Patna High Court and operates on principles of dialogue and consultation with the children, facilitated by Juvenile Justice Boards at the district level. This innovative approach is unique to Bihar, with the first special Child Dialogue Court already operational at the Civil Court in Patna. Furthermore, a 'Bal Mitra Nyayalaya' is in the process of being established in all districts across Bihar.

Meena Manch

A significant initiative introduced by the State government is the establishment of 'Meena Manch' aimed at girls in upper primary classes. This group comprises 20 girls, including 15 from upper primary schools and five who have either dropped out or have only completed education up to Class V. Within these Meena Manch participants, one girl is chosen as 'Meena Prerak'. Additionally, a female teacher from each model cluster school is appointed as 'Meena Sugamkarta' to facilitate the activities of the Meena Manch in their respective schools. The aim is to raise awareness among girls regarding their rights and responsibilities to foster leadership skills. The Manch is tasked with ensuring that students are admitted to school in a developmentally appropriate manner, monitoring their attendance, supporting their completion of elementary education, and promoting personal growth.

Flagship Schemes for Child Development

Mukhyamantri Balika/Balak Cycle Yojana

To increase the attendance and retention rate of students in higher classes, the Mukhyamantri Balika Cycle Yojana was started in 2007-08 and Mukhyamantri Balak Cycle Yojana was started in 2009-10. Under the schemes, an amount of Rs. 3000 is transferred via DBT mode to the students to purchase a bicycle. This incentive amount is given to the students studying in Class IX and who must have completed 75 percent of their attendance. In 2023-24, Rs. 141.58 crore has been distributed to 4.72 lakh students for purchasing bicycles.

Mukhyamantri Balika /Balak Poshak Yojana

The Mukhyamantri Balika Poshak Yojana was started in 2008-09 for female students studying in elementary schools (Class I to VIII) of the state. Under this scheme, based on 75 percent attendance, the amount is transferred to the students. In 2023-24, with an expenditure of Rs. 282.22 crore, a total of 43.71 lakh girl students were benefitted. The Mukhyamantri Balak Poshak Yojana, a similar scheme, was also started in 2008-09 to encourage the enrolment of boys in elementary schools of the state. Similarly, in 2023-24, Rs. 228.90 crore was spent on distributing uniforms among 37.70 lakh boy students.

Mukhyamantri Balika/Balak Protsahan Evam Chhatravritti Yojana

The scholarship scheme for girls was started in 2009-10 and that for boys in 2015-16. Under this, the girls and boys who pass their Tenth class Board Examination conducted by the Bihar School Education Board in the first division gets an encouragement amount of Rs. 10,000. The benefit of this scheme is availed by the girls of the General and BC (II) categories and boys of the General category, including the Minority. The amount will be transferred to their bank accounts. Under the scheme, students (boys and girls) of Class IX and X belonging to the General category will get an amount of Rs. 1800 as a scholarship per year. In 2023-24, Rs. 90.35 crore was distributed to 0.90 lakh students.

Bihar Shatabdi Mukhyamantri Balika Poshak Yojana

The scheme was started in 2011-12 to promote education among girls and bring them to the mainstream. The benefit of the scheme is availed by girls studying in classes IX to XII. Under this, Rs. 1500 is transferred to the bank account of the students for purchasing school uniform. In 2023-24, Rs. 123.01 crore was distributed among 8.20 lakh girls.

Mukhyamantri Kishori Swasthya Yojana

The scheme was started in 2014-15 to sensitise girls regarding their health needs. Under this, Rs. 300 is transferred to the bank account of the girl students of classes VII and XII. The amount is transferred only when they complete 75 percent of their attendance in government schools. In 2023-24, 9.47 lakh students got the benefit of the scheme and Rs. 28.40 crore was distributed under the scheme.

CHAPTER – XIV

ENVIRONMENT, CLIMATE CHANGE AND DISASTER MANAGEMENT

Abstract

Bihar is one of the fastest-growing economies in the country. The State government is progressing towards development with environmental sustainability. The state has recorded a double-digit growth in the forestry and logging sector's contribution to the Gross State Value Added (GSVA). This sector grew by more than 3 times between 2011-12 and 2023-24. The average annual rainfall in Bihar during 2011-24 was 1004.6 mm, which is substantially contributed by the South-West Monsoon (85 percent). The average annual temperature varied from 21.2^0 Celsius in 2017 to 24.7 ^{0} Celsius in 2023. During the last five years (2020-25), the State government has allocated a budget of Rs. 41,809 crore for several initiatives of sustainable environment. Due to the State government's efforts, forest cover has increased by 687 sq km during 2011-2023. The State government regularly monitors the quality of ambient air by utilizing 35 Continuous Ambient Air Quality Monitoring Stations (CAAQMS) and the water quality of the Ganga river at 34 locations fortnightly, in addition to its tributaries and ponds at 70 locations. Presently, Rs. 4515.70 crore has been allocated for the implementation by the Water Resource Department under the Jal-Jeevan-Hariyali scheme. There are several river-linking projects which will improve water management, agriculture productivity and diversity, employment opportunities, green cover, food security, economic development, command area development, and market facilities. Also, the State government has formed the Bihar State Disaster Management Service cadre for disaster management at the local level.

Introduction

Bihar has a highly versatile ecological system and experiences multiple seasons. The eastern Indian state has an area of 94,163 sq.km. Its geography encompasses the lush Himalayan foothills, fertile Gangetic plains, and mineral-rich southern plateaus. Also, more than dozens of rivers are present in the state, including international rivers. The river Ganga bisects the plains, shaping the North and South Bihar, both enriched by clay, sand, or loamy soil. The location and geophysical conditions of Bihar are susceptible to natural calamities and climate change-induced incidences. Several parts of the state are vulnerable to flood, drought, heat and cold waves, earthquake and also cyclones. The agriculture sector and people at the bottom of the pyramid face disproportionate risk of getting impacted because of climate change. Considering climatic risks and their intended consequences, the state has focused on adaptation and mitigation of climate change issues and brought a separate Green Budget. The State Action Plan on Climate Change (SAPCC) is in an

advance stage. Along with sustainable environmental initiatives, the green cover in the state is gradually increasing.

14.1 Climate Change

Climate change impacts mostly our water (rainfall) and temperature and results in extreme weather events such as floods and droughts. Drought and flood risks and associated damages are projected to further increase with every degree of global warming, as stated by the Intergovernmental Panel on Climate Change (IPCC).

Rainfall Pattern

The economy depends on rainfall. While heavy rainfall causes floods, its scarcity leads to droughts. Therefore, rainfall and its pattern are critical, as it replenishes rivers and lakes and provides the impetus for the growth of agriculture, tourism, construction sectors, etc. Table 14.1 presents the annual rainfall pattern during different seasons in the state. The annual rainfall data reveals fluctuating trends recorded with minimum rainfall (77.0 percent of the annual average) during 2013, while maximum rainfall was registered (140.7 percent of the annual average) during 2021. As per Chart 14.1, the average annual rainfall in Bihar during 2011-24 was 1004.6 mm. Nearly 88 percent of rainfall is recorded during the southwest monsoon. The rainfall is unevenly distributed across the districts, as given in the Appendix (Table A 14.1).

Table 14.1 : Pattern of Season-wise Annual Rainfall in Bihar (in mm)

Year	Winter Rain	Hot-Weather Rain	South-west Monsoon	North-west Monsoon	**Annual**

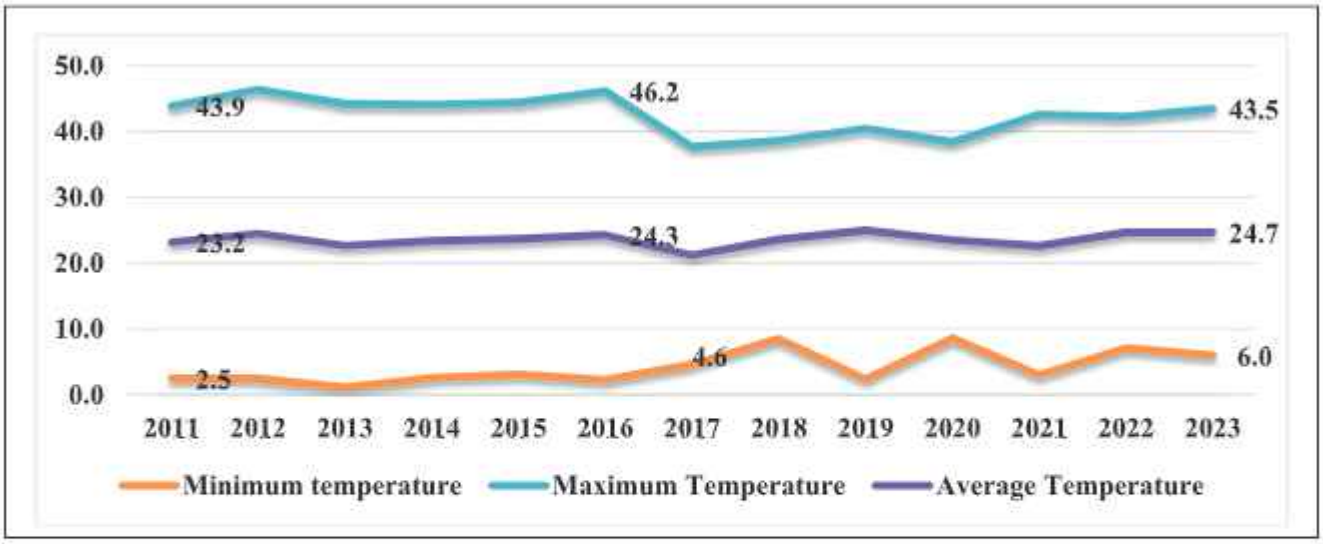
Trends of Temperature

Bihar has a humid sub-tropical climate with hot, humid summer and mild, dry winters. On an average, Bihar's hot summers (40-42°C) and mild winters (7-8°C) define its humid subtropical climate. Chart 14.2 gives the annual minimum, maximum and average temperature data. The maximum temperature (46.4 ^{0} Celsius) was recorded during 2012, while minimum (1.1^{0} Celsius) was registered during 2013. The 13 years annual average is 23.6^{0} Celsius.

Chart 14.2 : Trends in Annual Temperature in Bihar (In degree Celsius)



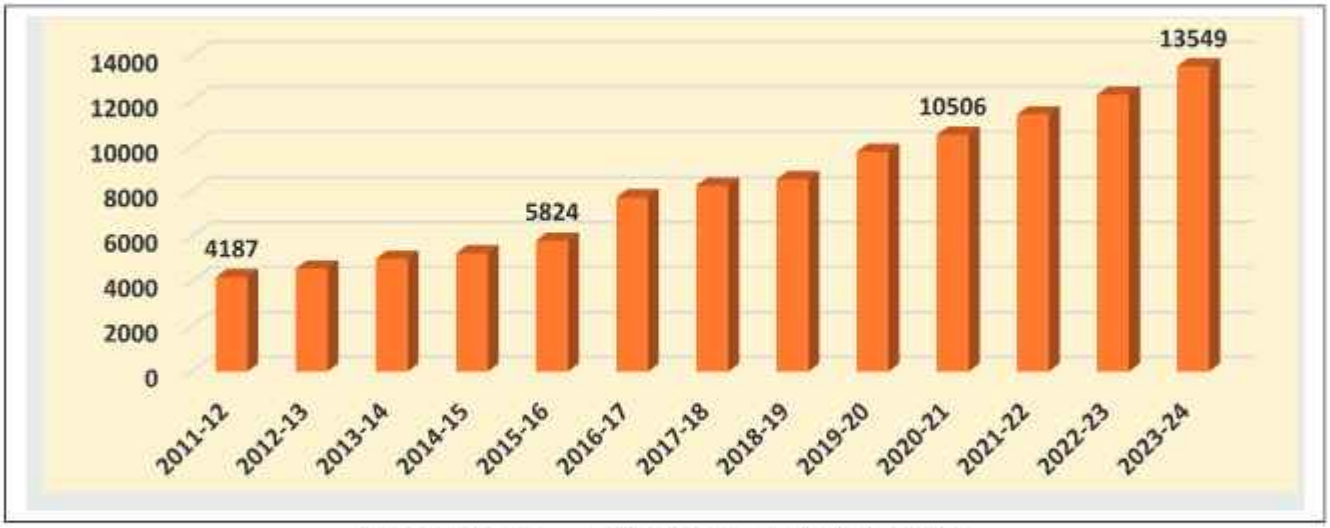
Source : Meteorological Centre, Patna

14.2 Growth of Forestry and Logging

The contribution of the forestry and logging sector in the Gross State Value Added (GSVA) at current (2011-12) prices recorded an annual compounded growth rate (CAGR) of 10.7 percent during 2011-12 to 2023-24. It grew from Rs. 4187 crore in 2011-12 to Rs. 13,549 crore in

2023-24. It contributes nearly 7 percent to the agriculture sector and nearly 2 percent in the overall GSVA in 2023-24 (Chart 14.3).

Chart 14.3 : Growth of Forestry and Logging Sector in Bihar (Rs. crore)



Source : Directorate of Economics and Statistics, GoB

14.3 Public Expenditure on Climate Change-related Issues

Bihar is pioneer state in Green Budgeting. The state has been preparing this since 2020-21. The expenditures on climate-related issues have increased more than four times from Rs. 3308 crore in 2020-21 to Rs. 13,823 crore in 2024-25 (BE). Chart 14.4 gives the trend of such expenditures highlighted in the Green Budget document of Bihar for the last five years.

Chart 14.4 : Trend of expenditure on climate-related issues (Rs. crore)

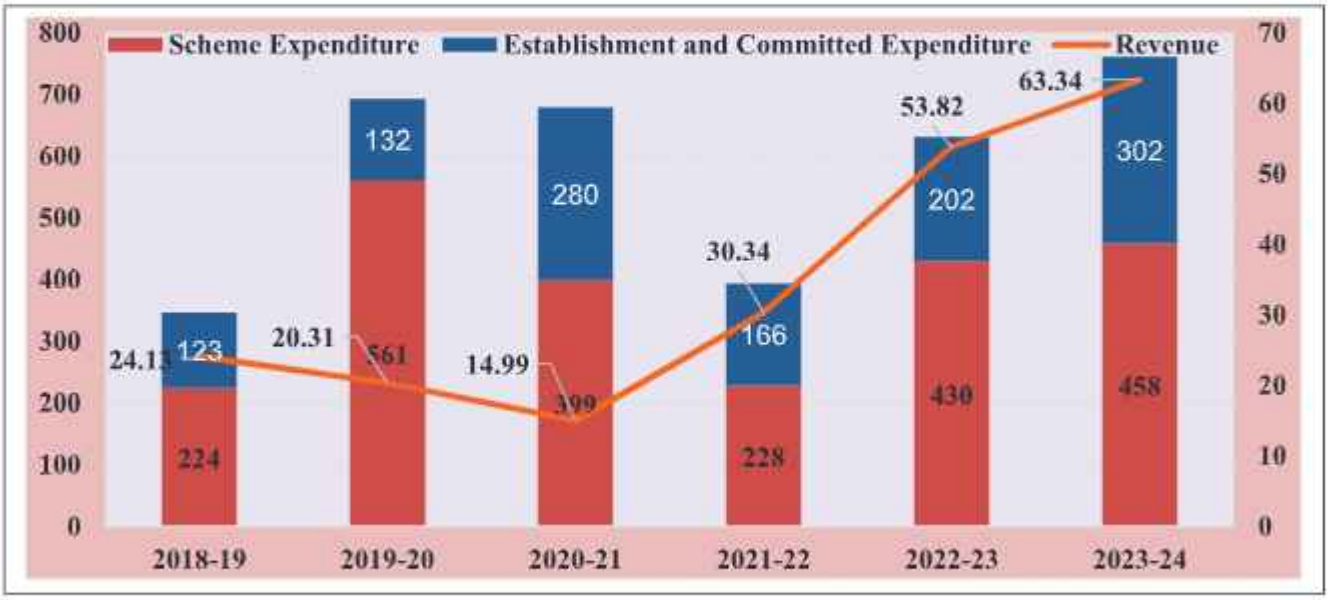
14.4 Forest Resources

Revenue and Expenditure of Environment, Forest, and Climate Change

The expenditure of the Department of Environment, Forest, and Climate Change show a fluctuating trend (Chart 14.5). The line graph presents the revenue trend, which declined during

2019-21; while it grew by more than four times thereafter. Its expenditures have doubled in the last two years, with fluctuating initial trends and higher growth recorded in scheme expenditures.

Chart 14.5 : Revenue and Expenditure of the Department of Forest (Rs. crore)



Source : Department of Environment, Forest and Climate Change, GoB

Forest Cover

Chart 14.6 illustrates the concept of forest, Tree Outside Forest (TOF) and tree cover. As per the India State of Forest Report (2023), the forest cover in Bihar has increased by 687 sq. km. during 2011-2023. Similarly, the total area covered under forest and trees grew by 0.9 percentage point in the share of state's geographical area during the same period (Table 14.2).

Chart 14.6 : Illustration of Concept of Forest, TOF and Tree Cover

2023	9903	7532	8.0	10.7
Increase since 2011	**689**	**687**	**0.7**	**0.9**

Source : State Forest Report, Forest Survey of India, Ministry of Environment, Forest and Climate Change, GoI

The Fourth Agricultural Roadmap (2023-28) reports that the Forest Survey of India estimated the state's total green area to be 13,896 sq km, representing 14.75 percent of its land area in 2019, based on high-resolution satellite imagery (LISS-IV). This figure encompasses both notified forest areas and non-forest tree cover.

Trend and Pattern of Forest Density

In order to create a sustainable environment, the State government took several initiatives to increase areas under forest cover as well as tree cover. Between 2011 and 2023, open forest grew by 527 sq km followed by very dense forest area, which has increased by 156 sq km (Table 14.3). Open forest constitutes more than half of the forest, while moderately dense forest contributes 44 percent (Chart 14.7). The distribution of district-wise forest cover is shown in Appendix Table A14.2.

Table 14.3 : Area under Different Types of Forest in Bihar (Area in sq. km)

Year	Type of Forest			
	Very Dense Forest (VDF)	Moderately Dense Forest (MDF)	Open Forest (OF)	Total
2011	231 (3.4)	3280 (47.9)	3334 (48.7)	6845 (100.0)
2013	247 (3.4)	3380 (46.4)	3664 (50.3)	7291 (100.0)
2015	248 (3.4)	3346 (46.1)	3664 (50.5)	7258 (100.0)
2017	332 (4.5)	3260 (44.7)	3707 (50.8)	7299 (100.0)
2019	333 (4.6)	3280 (44.9)	3693 (50.5)	7306 (100.0)
2021	333 (4.5)	3286 (44.5)	3762 (51.0)	7381 (100.0)
2023	387 (5.1)	3284 (43.6)	3861 (51.3)	7532 (100.0)

Carbon Stock

The Forest Survey of India estimates the carbon stock in forests and from trees outside forests for reporting Green House Gas inventory. The graphical diagram of the carbon stock is presented in Chart 14.8. The carbon stock for 2023 has been estimated to be 58451.0 thousand tonnes. There is an increase of 1570 thousand tonnes of carbon stock between 2021 and 2023. This additional forest carbon pool is substantially contributed by the soil organic carbon (63 percent), followed by above ground biomass (26 percent).

Forest Fire

Forest fires require a holistic approach for mitigation and control and shape the conservation and management of forest ecosystems. As per the India State of Forest Report, persistent hotter and drier weather due to climate change and other human factors such as land conversion for agriculture are the main drivers of increase in forest fires. The forest fires are a major threat to forest ecosystems and human communities around the world. The annual trend of forest fire is fluctuating. The highest incidents (771) have been recorded during 2023-24 (Table 14.5). Nearly half of these incidences happened in VTR (Chart 14.10). These can have consequences for biodiversity, soil erosion and economic damage. Fortunately, half of the Bihar's forests are categorized as less fire-prone (Chart 14.10). The State government is keen to create awareness among the public about fire safety and minimizing instances of crop residue-burning across the state.

Diversion of Forest Land

In recent years, the forest resources in the state are being used to meet the growing demands of population, industrialization, and development activities. A total of 349 projects were carried out

in forest areas, converting 2129 hectares of forest land for non-forest purposes during the last five years (2019-20 to 2023-24), as shown in Table 14.6.

Table 14.6 : Diversion of Forest Land for Different Purposes

Year	2019-20	2020-21	2021-22	2022-23	2023-24
Number of Projects	70	47	78	87	67
Area diverted to non-forest uses (in hectare)	377.7	432.8	329	486.2	502.8

Source : Department of Environment, Forest, and Climate Change, GoB

In order to strengthen the forest resource base of the state, a number of programmes related to forestry, wildlife, biodiversity, and other environmental schemes being run are mentioned below:

(a) **Hariyali Mission**: Under the Hariyali mission, large-scale plantation is being undertaken to increase the green cover of the state. Under the Agro-forestry Scheme, a total of 20.77 lakh plants have been planted with the help of farmers. With the help of JEEViKA SHGs, 494 units of nurseries have been distributed among the farmers and JEEViKA Didis. Total 494 nurseries/ Kisan Nurseries have been established and about 98.80 lakh plants have been raised in them. Under the Mukhyamantri Niji Paudhshala (Poplar) Yojana, total 3.2 lakh ETP stump plants have been planted by farmers in 32 nurseries in 2023-24.

(b) **Bamboo Mission :** Under this project, bamboo is planted on government land/private land and nurseries are developed. The bamboo plants are distributed as per farmers' demand. Under National Bamboo Mission Scheme, for 2024-25, proposal worth Rs. 62.50 lakh has been submitted to the Ministry of Agriculture and Farmers Welfare.

(c) **Agro Forestry- Poplar (ETP) Scheme:** Under the Agro-forestry scheme, the plantation of poplar species has been mainly initiated as a short-duration plant. It has been operational since 2012-13. Poplar saplings are made available to the entrepreneurs/ farmers/ beneficiaries from the local nurseries of the Department of Environment, Forest, and Climate Change at a price of Rs. 10 per sapling during December-January. An incentive amount is also given to the farmers for taking care of the plants. After three years, there is a provision to pay an incentive amount of Rs. 60 per plant and a reserve price of Rs. 10, if the survival rate is 50 percent or more.

Table 14.7 : Status of Agro- Forestry- Poplar (ETP) Scheme in Bihar (in lakh)

(d) **Agro- Forestry- Other Species Scheme:** Under this agro-forestry scheme, other species like Teak, Mahogany, Jamun, Semal, Gamhar, Kadam, Eucalyptus, etc. have been planted on farmer's field. It has been operational since 2012-13. Saplings are made available to the entrepreneurs/farmers/beneficiaries from the local nurseries of the Department of Environment, Forest, and Climate Change at a price of Rs. 10 per sapling during July-September. An incentive amount is also given to the farmers for taking care of the plants. After three years, there is a provision to pay an incentive amount of Rs. 60 per plant and a reserve price of Rs. 10, if the survival rate is 50 percent or more.

Table 14.8 : Status of Agro-Forestry – Other Species Scheme in Bihar (in lakh)

Plants planted (Number)	—	21.53	10.21	11.75	20.32

Source : Department of Environment, Forest, and Climate Change, GoB

(e) **Chief Minister Private 'Poplar Nursery' Scheme**: This scheme was started to ensure the availability of saplings under the Krishi Vaniki Yojana. Poplar cuttings are made available free of cost from the local poplar nurseries of the Department to the selected entrepreneurs/farmers/land owners for setting up poplar nurseries on their land during December-January. The prepared poplar plants are then purchased by the Department at a pre-determined rate. In the current financial year, this rate has been fixed at Rs. 13 to 15 per plant on the basis of survival. In 2023-24, 3.2 lakh ETPs have been planted in 32 nurseries under this scheme.

Table 14.9 : Status of Chief Minister's Private Nursery-Poplar Scheme

Year	2019-20	2020-21	2021-22	2022-23	2023-24
No. of Entrepreneurs/ Farmers	100	20	22	27	32
No. of ETP Stumps (in lakh)	10.0	1.9	2.2	2.7	3.2

Source : Department of Environment, Forest, and Climate Change, GoB

(f) **Chief Minister Private Nursery Scheme for Plants of Other Species**: This scheme is being implemented with the aim of providing plants of other species for distribution. For this purpose, necessary cooperation is provided by the Department to the selected beneficiaries for the establishment of nurseries. The nursery is established in the months of February-March. In this scheme, saplings of different species are prepared, out of which saplings conforming to a standard are purchased at a rate fixed by the Department. Out of the 20,000

saplings prepared, 25-30 percent are used for tree plantations in the same year. The remaining plants are kept safe or maintained for one year, which are planted in the monsoon season of the next year. The average cost of plants is Rs. 24, and it is paid in three instalments — Rs. 7 per plant (first), Rs. 8 per plant (second) and Rs. 9 per plant (third). This rate includes the expenditure of actual production, amount of supervision work and an incentive amount. The target is to achieve about 98.80 lakh plants (494 units) grown by the farmers.

Table 14.10 : Status of Chief Minister Private Nursery (Other Species) Scheme (2019-20 to 2023-24)

Year	2019-20	2020-21	2021-22	2022-23	2023-24

(g) **Jal-Jeevan-Hariyali Abhiyan** : The State government has implemented this scheme in 2019 with the objectives of ensuring water security and afforestation, which boost green cover, minimize pollution, increase public participation, generate farmers' income, and balance environment and development. To conserve water resources through check dams, boulder check dams, water harvesting structures, garland trenching, etc. are being undertaken in the state. The details of progress are given in Table 14.11.

Table 14.11 : Details of Progress of Jal-Jeevan-Hariyali Abhiyan

Year	Dense plantations (Number of plants in lakh)				
	Target	Achievement			
		Forest Department	Rural Development Department (MGNREGA)	Bagwani Mission	Total

Source : Department of Environment, Forest, and Climate Change, GoB

Besides these initiatives, the State and Central governments have taken several other initiatives such as: (i) Compensatory Afforestation Fund Management Planning Authority (CAMPA); (ii) State Action Plan on Climate Change (SAPCC); (iii) Integrated Forest Management Plan; (iv) Development of Natural Forests; (v) Management of Biological Diversity; (vi) Scheme for Garland Trenching; (vii) Bihar Heritage Tree App; (viii) Climate Change Learning Lab; (ix) Plant Tissue Culture Lab; and (x) Development of Eco-tourism and Parks.

14.5 Wetland Conservation and Development in Bihar

Bihar is located at the centre of the Gangetic Plain. Several rivers traverse through the state, many of them originating in Nepal. These rivers in the past have changed their courses several times, leaving natural depressions that are later fed by water from rainfall and river overflows. They often form oxbow lakes, riverine wetlands, cut-off meanders, *manns* and *chaurs*. Besides these natural wetlands, there are several man-made reservoirs/wetlands that are ecologically significant. As per the National Wetland Atlas (NWA) 2010, there are 4416 wetlands in Bihar, each with an area of at least 2.25 hectares. In addition to that, about 17,582 smaller wetlands (with area of less than 2.25 hectares) also exist in Bihar.

The Bihar State Wetland Authority is undertaking various activities for conservation and sustainable management of wetlands in the state, identify wetlands of international importance (RAMSAR site) and cooperate with other local, national and international organizations for the purpose. These actions are taken following the Wetlands (Conservation and Management) Rules, 2017. The Authority has selected 133 wetlands for conservation and development in the first phase with plantation activities. Health card and Brief Documents of 80 wetlands have been prepared and uploaded to the Ministry's website.

14.6 Biodiversity and Wildlife

Biodiversity contributes to a multitude of products and ecosystem services that sustain human well-being, including water and air purification, timber and other wild resource production, provision of oxygen, medicine, and spiritual and cultural benefits. Wild animals are an integral part of biodiversity, and play an important role in ecological processes such as pollination, seed dispersal and decomposition. Wildlife is also important as a source of food and clothing, for recreation, tourism, and cultural uses, and as aesthetic and cultural icons in most areas of the world. Towards protecting bio-diversity and wildlife, the State government has been expanding its agenda continuously across the wildlife and bird sanctuaries in the state (Appendix Table A 14.4). These include the Valmiki Wildlife Sanctuary, Valmiki Tiger Reserve Division-I and II, Kaimur Wildlife Sanctuary, Udaipur Wildlife Sanctuary, Bhimbandh Wildlife Sanctuary, Gautam Buddha Wildlife Sanctuary, Rajgir Wildlife Sanctuary, and Rajauli Wildlife Sanctuary.

The State also has a number of bird sanctuaries — Kusheshwarasthan Bird Sanctuary, Baraila Jheel Bird Sanctuary, Nakti Dam Bird Sanctuary, Nagi Dam Bird Sanctuary, and Kanwar Jheel Bird Sanctuary. Finally, there is the Vikramshila Gangetic Dolphin Sanctuary located in Bhagalpur to protect endangered species of Gangetic Dolphins.

Besides these, conservation reserves in the state include Gogabil Conservation Reserve and Bhaluni Dham Conservation Reserve, located in Purnea and Rohtas, respectively.

Wildlife Protection, Conservation and Management: Wildlife management is important to balance the needs of people as well as that of the wildlife, and is a key component in efforts to ensure conservation, sustainable use and access and management of associated benefits derived from biodiversity. The State government has been increasing the scope of its agenda to protect wildlife and biodiversity, including the establishment of tiger reserves, animal and bird sanctuaries, and community reserves in the state. The details of state and centrally sponsored schemes are given in Tables 14.13 and 14.14.

Table 14.13 : CSS Schemes for Biodiversity & Wildlife Protection in Bihar (Rs. in lakh)

Various such initiatives of the Department of Environment, Forest and Climate Change towards the conservation of wildlife are discussed below:

Vikramshila Gangetic Dolphin Sanctuary: India's only Dolphin Sanctuary is located in the Bhagalpur District of Bihar. The Sanctuary has been notified for the protection and conservation of Gangetic Dolphins in the 60-km stretch of the river from Sultanganj to Kahalgaon in 1991 under the provisions of Wildlife (Protection), Act 1972. It is the only protected area for the endangered Gangetic Dolphins in Asia. Conservation activities for this critically endangered

species have been initiated in Bihar under CSS-IDWH on a regular basis as APOs. The Gangetic Dolphins have been declared as the national aquatic animal of India in 2010.

CSS Project for Tiger and Elephant: Project Tiger and Elephant have been merged as one scheme as per the decision of the Expenditure Finance Committee which was further approved by the Cabinet and named as CSS Project Tiger and Elephant (PT&E) from 2023-24 onwards.

This scheme is implemented in the tiger reserve areas declared by the National Tiger Conservation Authority. Under Valmiki Tiger Reserve, various works for security, conservation and management of reserve like anti-poaching and surveillance, development/construction of wireless information system, establishment of patrolling camps/Anti-poaching camps/buildings/water holes, procurement of night vision devices, uniforms for field personnel, purchase of binoculars, employment of ex-servicemen and Home Guards, employment of local workforce for patrolling, employment of anti-poaching squads, maintenance of existing water holes, employment of workers for Nakas, research activities, purchase of field equipment, etc. are undertaken, some of which are detailed below:-

Habitat improvement and management - development of grassland, cleaning of weeds, monitoring of wild animals, construction of fire lines for fire protection, monitoring of wild animals by tiger trackers, construction and maintenance of waterholes, etc.

Strengthening of infrastructure - upgradation of road network, provision of patrolling and rescue vehicles, establishment of e-surveillance, housing for field personnel, hardware and software for manpower training, etc.

Eco Development - Health camps for local villagers, distribution of solar lights, promotion of tourism, welfare facilities in fringe villages, creating alternative livelihood opportunities for local communities, including tribals, etc.

The goals of Project Elephant in the state are supporting research on ecology and management of elephants, management of elephant rescue and rehabilitation centre inside Valmiki Tiger Reserve, development of anti-poaching infrastructure, capacity building and rehabilitation of wild elephants that have strayed from West Bengal, Jharkhand and Nepal into Bihar. Implementation of various related programmes like control of human-elephant conflict has also been emphasised.

CSS-Integrated Development of Wildlife Habitat (IDWH)/ Wildlife Habitat Development: Integrated Development of Wildlife Habitat (IDWH) is a centrally sponsored scheme. This scheme has three components:

(1) Protection and conservation of wildlife and its habitat in Protected Areas.

(2) Protection and conservation of wildlife outside Protected Areas.

(3) Recovery programme for saving critically endangered species and habitats.

All the above components are being implemented in Bihar. For the protection and conservation of wild animals in Kaimur, Bhimbandh, Rajgir, Udaipur, Rajauli (Nawada) Wildlife Sanctuaries and Gogabeel Conservation and Community Reserve, developmental works and management through scientific techniques are done in order to conserve and enhance the habitat and keep it suitable for wildlife. Provision/construction of resources, facilities and infrastructure, community development (eco-development), publicity, training and execution of other relevant works, etc. are undertaken on a regular basis.

In the areas outside of the wildlife sanctuaries of the state, the works undertaken are - conservation of the endangered Greater Adjutant bird species in the Gangetic riverine tract in Bhagalpur, protection and conservation of Black Buck, Sloth Bear and Ungulates, mitigation of human-bear conflicts, man-wildlife conflict mitigation and conservation of Peafowl in its habitat development in Aran village (Saharsa district).

Under the Component Recovery Programme for saving critically endangered species and habitats, implementation and execution of various activities for the conservation and promotion of Gangetic Dolphins, Crocodiles and bio-diversity in the river basin areas and Gandak river of Gopalganj, Bettiah districts, including the Vikramshila Gangetic Dolphin Sanctuary area, in the eastern part of the Ganga river in Bhagalpur district, the outer areas of the Dolphin sanctuary in the Ganga river of Buxar, Bhojpur, Patna, Munger and Lakhisarai districts, Supaul, Saharsa, Kosi-Mahananda of Araria district are undertaken.

Additionally, Wildlife Habitat Development works are being done inside the Protected Areas and outside the same under the State Scheme – *'Vanyapraniyo Ki Surkasha Sanrakshan and Vikas'*.

Compensation for loss of life due to wild animals attack

Compensation for loss of human life/injuries/properties and crop damage caused by specified wild animals is given as per the provisions contained in Bihar Government's revised resolution 2024. The approximate details of damages caused by wild animals and compensation amount paid are as below:

Table 14.15 : Number of Damages Caused by Wild Animals

Year	Human Death	Human Injured	Death of livestock	House damage	Crop Damage	Compensation Paid (Rs. in lakh)
2023-24	03	49	108	02	0	50.94

Source : Department of Environment, Forest and Climate Change, GoB

Eco-Park at Valmiki Nagar

The Eco-Park, Valmikinagar is located in Bettiah, West Champaran, at a distance of around 110 km from district headquarters, having good connectivity and a hotspot destination at the forefront of Valmiki Tiger Reserve. This park provides an opportunity for recreation and appreciation of natural beauty for tourists visiting Valmiki Tiger Reserve. Spread in an area of 2.64 acres, this

park encompasses beautiful pathways, evenly distributed native species of trees, play section for children including swings, beautiful landscapes, gazebos. It also has a watch tower measuring around 40 feet, which is a sought-after location for tourists in winters to get glimpses of Himalayan peaks like Dhaulagiri, Annapurna and Manaslu. The open frontal of the park towards north has the Gandak river flowing in the lap of the Himalayas. making it a favourite destination for meditation and morning walk. In the west of this park, one can enjoy Giri Darshan (a rendezvous with the Himalayas) through high-end spotting-scope. The pathway in the south of the park takes one towards Triveni Sangam, Koleswar Temple, Jatashankar Temple, Valmiki Ashram and Valmiki Tiger Reserve, thereby creating an amalgamation of destinations for tourists.

Other initiatives

(i) National Dolphin Research Centre, Patna (NDRC) will be India's and Asia's first Dolphin Research Centre. It will be set up on the banks of the Ganga river in the Patna University campus in Patna;

(ii) For protection of Dolphins, the Encouragement-cum-Compensation scheme for fishermen and citizens has been started by the State government, involving a cash compensation/encouragement of up to Rs. 20,000 amount and felicitation on 'Dolphin Day';

(iii) In-principle approval of the State government has been received for setting up a 'Gharial Incubation-cum-Interpretation Centre' at Bettiah, West Champaran in collaboration with the WTI;

(iv) Establishment of a 'Turtle Research & Monitoring Station' in Araria is under consideration;

(v) Signing up of an MoU with (BNHS) in COP 13 and setting up a 'Bird Ringing and Monitoring Station' in Bhagalpur is being undertaken with the technical collaboration of BNHS;

(vi) Annual Waterbird Census has been held regularly with the help of volunteers since 2022, which is the biggest citizen science initiative undertaken by the Department of Forest;

(vii) Use of the BRMS mobile app has been initiated. In AWC 2024, 84 wetlands have been covered, 220 species and 80,246 individuals have been counted;

(viii) In the light of the decision taken in the 9th meeting of the State Wildlife Council in 2020 and the in-principle consent given by the NTCA, action is being taken to declare Kaimur Wildlife Sanctuary as a Tiger Reserve;

(ix) After getting approval from the State Wildlife Board, the establishment of Raniganj Biological Park in Araria as the third zoo of Bihar is under process;

(x) After getting approval from the State Wildlife Board, the establishment of Nawanagar Rescue-cum-Rehabilitation Centre for Black Buck in the Buxar district is under process.

14.7 Environmental Pollution

Environmental pollution is not a new phenomenon, yet it remains the greatest problem for humanity and the leading environmental cause of morbidity and mortality. Human activities

through urbanization, industrialization, mining, and exploration are at the forefront of environmental pollution. Along with this, natural and anthropogenic sources also add to this. Despite giving attention to the pollution, the impact is still being felt due to its severe long-term consequences. This section examines the types of pollution and solutions taken by the state in combating pollution for sustainable environment and health.

Air Pollution

Air quality is closely linked to the climate and ecosystems globally. Air pollution is the result of a complex mix of natural and anthropogenic activities, such as industrial and vehicular emissions, combustion of fossil fuels, construction site dust, domestic fuel burning and open waste burning. Natural occurrences such as forest fires, pollen grains, radioactive elements and biological decay also contribute to air pollution. Another contributor to the rise in particulate matters in air is the 'burning crop residue' in agricultural fields. The details of the annual average of main pollutants and benzene, toluene, and xylene (BTX) parameters in different points in Bihar are presented in Table 14.16. These parameters include primary air pollutants, such as Sulphur dioxide (SO_2), Nitrogen dioxide (NO_2), Particulate matter (PM_{10}) and Fine Particulate matter ($PM_{2.5}$). The observations of the same are presented in the Table 14.16 for 2023-24.

Table 14.16 : Annual Average of Main Pollutants and BTX Parameters in Bihar (2023-24)

Status of Ambient Air Quality	PM_{10} in $\mu g/m^3$	$PM_{2.5}$ in $\mu g/m^3$	CO in mg/m3	SO_2 in $\mu g/m3$	NO_2 in $\mu g/m^3$	NH_3 in $\mu g/m^3$	O_3 in $\mu g/m3$	Benzene in $\mu g/m^3$

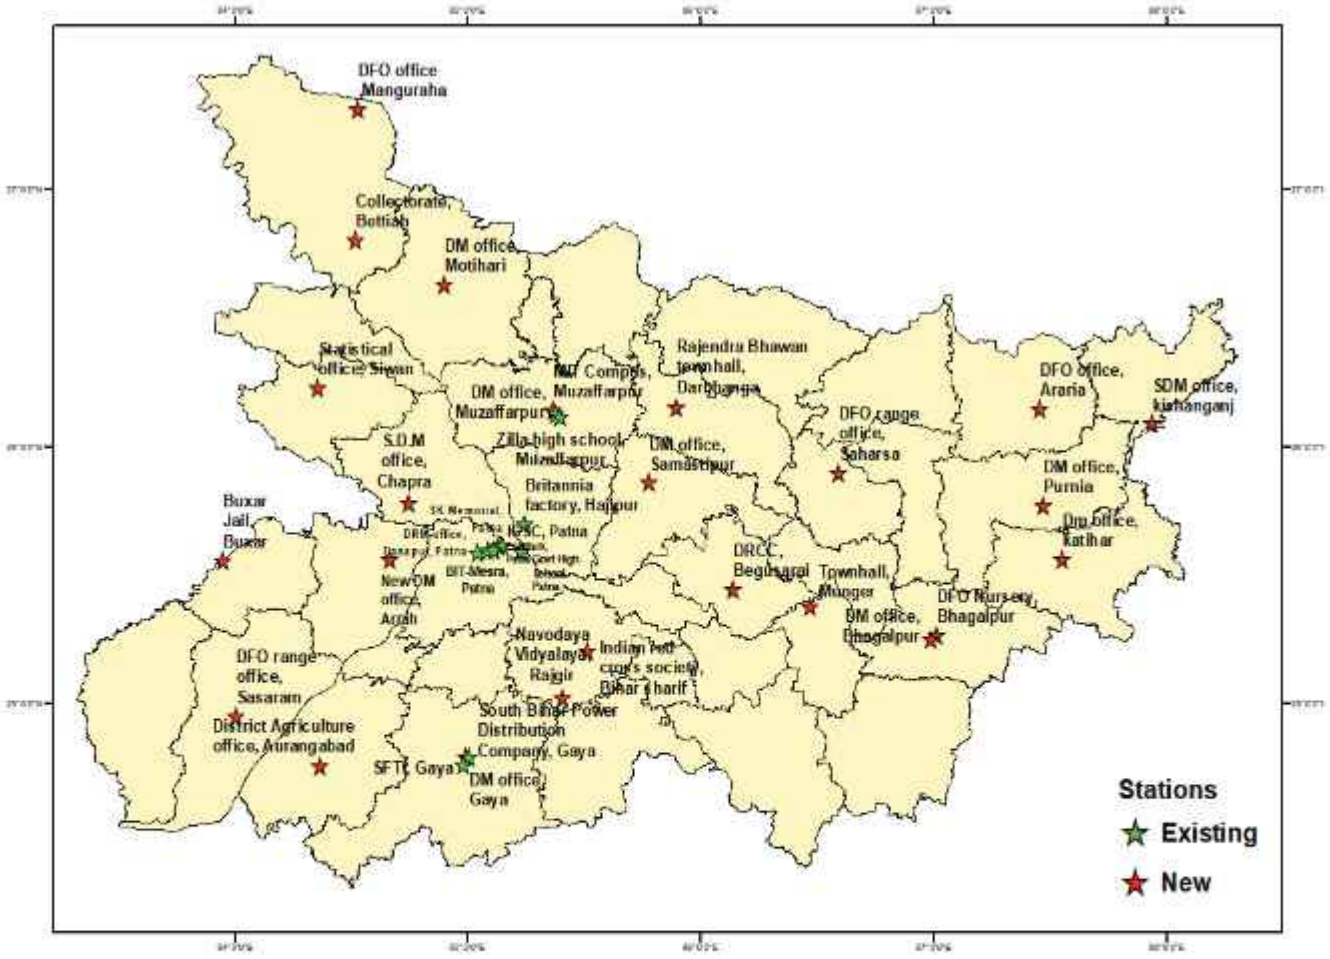
Ambient Air Quality Monitoring

Monitoring in Urban Areas

The Bihar State Pollution Control Board (BSPCB) consistently oversees the quality of ambient air by utilizing 35 Continuous Ambient Air Quality Monitoring Stations (CAAQMS) that are set up across 23 districts within the state. These stations are distributed as follows: Patna has 6, Muzaffarpur has 3, Gaya has 3, Bhagalpur has 2, and there is one stationed in each of the following locations: Hajipur, Araria, Ara, Aurangabad, Begusarai, Bettiah, Biharsharif, Buxar, Chapra, Darbhanga, Katihar, Kishanganj, Motihari, Munger, Purnea, Saharsa, Samstipur, Sasaram, Siwan, Rajgir and Manguraha (West Champaran) (Figure 14.1).

The parameters including PM10, PM2.5, SO2, NO2, CO, O3, NH3, BTX, along with meteorological factors such as AT, RH, WS, WD, and SR, which are observed using CAAQMS. The aforementioned stations are connected to the National Ambient Air Quality Monitoring Network via the Central Pollution Control Board (CPCB) server and are also accessible through the BSPCB website. The Board is also looking to expand Real-Time Monitoring Stations to the remaining 15 districts of Bihar. The averages of key pollutants and BTX parameters for each city can be found in the Appendix (Table A14.5).

Figure 14.1 : Location of CAAQMS in Bihar



Source : Bihar State Pollution Control Board

Monitoring in Rural Areas

The BSPCB has established one CAAQMS at the Forest Rest House, Manguraha in West Champaran which represents rural area. The details are given in Appendix (Table A14.5).

Air Quality Index (AQI)

The BSPCB provides information on ambient air quality and the Air Quality Index (AQI) through an electronic display board and the CPCB/BSPCB websites. The AQI acts as a tool that simplifies complex air quality data from various pollutants into a single numerical value (Index Value), along with a name and colour coding. There are six categories of AQI: Good (0-50), Satisfactory (51-100), Moderate (101-200), Poor (201-300), Very Poor (301-400), and Severe (>401). In winters, air quality deteriorates to very poor and severe levels due to the condensation of fine particulate matter closer to the ground. The levels of particulate matter in the air are influenced by human activities and geographical factors. The observations of the same are presented in Table 14.17 for three cities during 2021-22 to 2023-24.

Table 14.17 : Status of Air Quality Index (AQI) in Patna, Muzaffarpur, Gaya

Cities	Year	Good	Satisfactory	Moderate	Poor	Very Poor	Severe	Total Days
Patna	2021-22	14	125	81	113	31	—	364
	2022-23	4	87	107	85	74	8	365

Noise Monitoring

Bihar's cities and towns are experiencing an increase in noise pollution, owing to construction activities, traffic, loudspeakers, and firecrackers during festivities. The BSPCB is monitoring the noise levels in a number of neighbourhoods in Patna in order to develop monitoring systems and reduce noise pollution. Table 14.18 A presents the annual noise data, for the period 2019-2023, of different locations in Patna across commercial, industrial and residential areas along with noise level in silent zones. The data covers noise levels during both day and night. The details on the permissible decibels are given in Table 14.18 B.

Table 14.18 A : Ambient Noise Monitoring at Different Locations in Patna

(Avg in Leq dB)

Stations	Type	Time	2019	2020	2021	2022	2023

Water Quality Monitoring

The BSPCB regularly monitors water quality of Ganga at 34 locations fortnightly, in addition to its tributaries and ponds at 70 locations on a monthly basis. The water quality of Ganga indicates the presence of a higher value of bacteriological population (Total Coliform and Faecal Coliform). This is mainly due to the discharge of sewage/domestic waste water from cities located on the banks of Ganga and her tributaries. The other parameters viz. pH, Dissolved Oxygen (DO) and Bio-chemical Oxygen Demand (BOD) have been observed within the prescribed limit in the river and her tributaries in Bihar, indicating that the water is fit for aquatic life, wild life propagation, fisheries and irrigation (Table 14.19). The Board is also monitoring the effluent/sewage quality generated from the industrial units as well as STP/sewerage drains. Presently, 2561 water/effluent/sewage samples from different sources have been collected by the Board.

Table 14.19 : Primary Water Quality Criteria for Bathing

pH	6.5 to 8.5
Dissolved Oxygen (DO)	5 mg/L or more
Biochemical Oxygen Demand (BOD)	3 mg/L or less
Fecal Coliform	2500 MPN/100mL

Note : MPN-Most Probable Number
Source : Bihar State Pollution Control Board

14.8 Plastic Waste Management

The State government has notified a complete ban on the manufacture, import, store, transport, sale and use of plastic carry bags (irrespective of their size and thickness) in Bihar since 2018 in all ULBs and Gram Panchayats. The State government has not prohibited carry bags made from compostable plastic materials. According to the amended Plastic Waste Management Rules, 2016, the thickness requirements do not apply to carry bags made of compostable and biodegradable plastics. Carry bags produced from compostable plastic must adhere to the Indian Standard IS 17088:2021.

Furthermore, on August 12, 2021, the Union Ministry of Environment, Forest, and Climate Change (MoEF&CC) issued a notification aimed at regulating single-use plastics, while the State government's Department of Environment, Forest, and Climate Change also put out a similar notice. According to these notifications, the production, import, storage, distribution, sale, and use of certain single-use plastic items, including polystyrene and expanded polystyrene, are prohibited since July 1, 2022:

(a) Ear buds with plastic sticks, plastic sticks for balloons, plastic flags, candy sticks, ice-cream sticks, polystyrene (Thermocol) for decoration.

(b) Plates, cups, glasses, cutlery such as forks, spoons, knives, straw, trays, wrapping or packing films around sweet boxes, invitation cards, and cigarette packets, plastic, or PVC banners less than 100 micron and stirrers.

(c) The above provisions are not applicable to the commodities made of compostable plastic and bio-degradable plastic as per the MoEF&CC notification of July 6, 2022.

14.9 Water Resources

Water is essential for the survival of all life forms on our planet. As the population grows, along with shifts in socio-economic conditions and consumption behaviours, the need for water is continually increasing. Water also plays a crucial role in the development of key economic sectors such as agriculture, fisheries, and manufacturing. Fortunately, Bihar has ample surface water and groundwater resources, which are regularly replenished by various rivers and their tributaries, as well as rainfall, particularly during the southwest monsoon. Being part of the Gangetic Plains,

Bihar benefits from significant rivers like the Ganga and Gandak. Kosi and Gandak rivers can be found in North Bihar, while South Bihar features Sone, Phalgu, Punpun, Sakari, and Chanan. The condition of surface water infrastructure in the state as of 2023 shows that there are 968 canals, 4819 tubewells, 464 tanks (including Ahar pyne, ponds, and check dams), and 26 reservoirs.

Table 14.20 : Status of Surface Water Structures in Bihar (2023)

Type	Canals	Reservoir	Tubewells	Tanks (Ahar Pyne, Pond, Check Dam)	Lift irrigation
Number	968	26	4819	464	45
Area (in hectares)	2764864	217560	52218	68351	3400

Source : Department of Water Resources and Department of Minor water Resources, GoB

Along with the surface water structures, the state is endowed with groundwater resource. The assessment of pre-monsoon and post-monsoon groundwater level across the districts in 2022 is presented in Appendix (Table A14.6).

Water Quality

The Public Health Engineering Department (PHED) has created a Water Quality Monitoring Protocol to assess water and ensure that an effective surveillance system is established. It has been mandated to conduct testing of water sample once in two months for arsenic and fluoride in the areas impacted, once in four months in wards affected by iron, and assessment is done at least twice in a year in wards not affected by quality issues. The condition of water quality in rural wards that are affected is summarized in Table 14.21.

Table 14.21 : Status of Water Quality Affected Rural Wards in Bihar

Chemical Contamination	Affected Wards	Affected hhs. (in lakh)	Wards Completed	FHTC (in lakh)
Arsenic	4709	6.98	4709	6.74
Fluoride	3789	4.67	3784	4.64
Iron	21709	36.03	21286	35.13
Total	**30207**	**47.68**	**29779**	**46.51**

Note: FHTC refers to Functional Household Tap Connection
Source : Public Health Engineering Department (PHED), GoB

Initiatives of the Department of Water Resources

Various environmental measures are being undertaken by the Water Resources Department as mentioned below:

(i) **Ganga Jal Apurti Scheme** : Bihar is experiencing ecological disruptions driven by climate change, unsustainable practices, and the reckless exploitation of resources. The state suffers

from issues like droughts, flooding, and the depletion of groundwater, particularly facing a drinking water shortage in the southern regions. To mitigate the impacts of climate change and restore ecological balance, the Department has launched the Ganga Jal Apurti Yojana. This initiative is designed to pump plentiful surface water from the river Ganga near Maranchi village in the Mokama block under the Patna district during the monsoon months (July to October). The water collected will be directed underground to storage reservoirs through pipeline, which will later be treated and made accessible for drinking and domestic needs in the cities of Gaya, Bodhgaya, Rajgir, and Nawada. Additionally, constructing these storage reservoirs will positively impact the local flora and fauna. By decreasing the demand for domestic water, it is anticipated that the water flow at nearby locations will be restored to its normal level. Groundwater replenishment will take place around the Rajgir and Tetar reservoirs. Furthermore, this programme will provide advantages to the animals and aquatic life in the Zoo Safari and Nature Safari areas of Rajgir. Administrative approval of Rs. 4515.70 crore has been accorded for the implementation of this scheme by the Water Resource Department under the Jal-Jeevan-Hariyali scheme. This scheme has been almost completed. Presently, drinking water is being supplying to Rajgir, Gaya, Bodhgaya and Nawada town. Residents and tourists in these towns are benefiting from this scheme.

Under Ganga Jal Apurti Scheme part II : drinking water will be supplied to Biharsharif town. For this administrative approval of Rs. 1110.21 crore has been provided to construct reservoir in Madhuban in Nawada district.

(ii) **Drinking Water Scheme for Aurangabad, Dehri, and Sasaram Cities under Jal Jeevan Hariyali Mission** : The work of providing drinking water to the cities of Aurangabad, Dehri, and Sasaram using surface water available in the Son River at a cost of Rs. 1347.32 crore is underway under the Jal Jeevan Hariyali Mission. These cities are facing drinking water issues due to the rapid decline in groundwater levels. Provision has been made for the supply and distribution of a total of 206 MLD (Million Liters per Day) of water to these cities, which are important from both tourism and religious perspectives. The scheme has been designed considering the domestic water demand of the projected population of these cities in 2051. Under this scheme, the abandoned anicut (weir) built in 1874 is being modernized to store the required water. With its help, surplus water released from below the Indrapuri Barrage will be stored and used for drinking water. The scheme is expected to be completed by December, 2026.

(iii) **Drinking Water Scheme for Bhabua and Mohania Cities under Jal Jeevan Hariyali Mission :** Under the Jal Jeevan Hariyali Mission, work is in progress to provide drinking water from the Durgawati Reservoir to the cities of Bhabua and Mohania at a cost of Rs. 198.58 crore. Due to climate change, changes in rainfall patterns, and the decline in

groundwater levels, the frequency of droughts and floods in Bihar has increased. There has been a continuous fall in groundwater levels, and its safe reserves are gradually decreasing. As a result, many areas of South Bihar are facing a drinking water crisis. According to data from the Central Ground Water Board, the groundwater levels in Bhabua and Mohania have been steadily decreasing over the years. In this situation, arrangements have been made to transfer surface water from the reservoirs for drinking water after proper treatment. Under this scheme, 13.00 MCM (Million Cubic Meters) of surface water will be lifted annually from the Durgawati Reservoir. After purification, drinking water will be supplied to Bhabua and Mohania cities through pipelines. The distribution of water will be in accordance with the domestic water demand for the projected population of these cities in 2051. The scheme is targeted to be completed by September, 2025.

(iv) **Tal Development Plan :** The Department is determined to make better use and management of water in the Tal area of Patna, Nalanda, Sheikhpura and Lakhisarai at an estimated cost of Rs. 1178.50 crore. An ambitious scheme has been prepared towards the construction of 108 kms. of embankments and 27 weirs, in addition to 15 check dams, base cleaning of 74 pynes, construction of 42 box culverts and construction of 101 parpath. The scheme also envisages to develop fish and aquatic production by deepening the existing reservoirs in the Tal area and make drainage system more effective by desilting the local Pynes. This scheme will benefit Fatuha, Daniyawa, Khusrupur, Bakhtiyarpur, Pandarak, Belchi, Mokama and Ghoswari blocks of Patna; Harnaut, Chandi, Bind and Sarmera blocks of Nalanda; Sheikhpura and Ghat Kusumbha blocks of Sheikhpura; and, Badahiya block of Lakhisarai. Present progress of scheme is 33 percent.

(v) **Gayaji Dam (Rubber Dam) on the Falgu River :** The Gayaji Dam, India's longest rubber dam, has been constructed near the Vishnupad temple of Gaya to address water scarcity in the Falgu river. The dam has been designed to store water during the monsoon season and release it throughout the year so as to provide relief to the devotees performing 'Pind Daan' and also help in conserving the Falgu river's ecosystem. It has been built 360 meters downstream the temple. This is the first of its kind in the state with an estimated cost of Rs. 334 crore. Its length is 411 meters and height is 3 meters, and it comprises 6 spans, each 65 meters in length. The pneumatic tube membrane allows for easy filling and emptying, ensuring that the dam's flow and water level are not disturbed. The dam has minimal mechanical equipment, making it eco-friendly, and has low operation and maintenance costs. The major constituents of the Rubber Dam include:

- Diaphragm wall and sheet piles: To maintain the sufficient level of water and stop the groundwater flow of the river, advanced sheet piles and diaphragm wall are installed near the left and right banks and along the axis of the dam.

- Steel Path Way Bridge of 411 meters length: To connect the left and right banks (from Vishnupad ghat to Sitakund), a steel pathway bridge of 411 meters length has been constructed.
- Ghat construction: For convenience of the devotees, a tile work of 500 meters length has been constructed.
- Mansarwa canal: To dispose the sewerage of Gaya city, an underground canal of 752 meters length has been constructed so that the main flow of the river does not get polluted.
- Maa Sita Path: This has been constructed along the right bank of 690 meters length to provide facilities to devotees and tourists.
- River Front Development on Right Bank : Under this scheme, 5 borewells have been dug in an interval of 50 meters upstream of roadway bridge to store surface and sub-surface water.

(vi) **Rejuvenation of Dead Rivers :** The Department has initiated a scheme to rejuvenate the old Lakhandei river in the Sitamarhi district and the Ganga river in Bakhtiyarpur. The scheme, which began on February 15, 2018, involves the inter-linking of old and new river streams, construction of a 3-km long new channel, and desiltation work of the 18.27-km long old stream of the Lakhandei river. The old Lakhandei river, which spans 170 kms., will be available for irrigation in the blocks of Sonvarsha, Bathnaha, Sitamarhi and Runnisaidpur of the Sitamarhi district by a channel length of 21.27 kms.

(vii) **Flood Management and Shoal Removal** : In recent years, sheet piling has been used as a modern technique for long-term protection of river banks in the field of flood management. Also, for the purposes of flood fighting and anti-erosion, various works such as construction of Dagmara Marginal Dam on the Kosi river have been done. As a new initiative to decrease the water pressure at river embankments, shoal removal work has been done at various points in the river, which can dampen the aggressive nature of the river stream on the embankment.

(viii) **Activities under World Bank financed Bihar Kosi Basin Development Project (BKBDP) :** The objective of the component : *Improving flood risk management under BKBDP* is to increase the capacity of the Water Resources Department (WRD) to manage flood risk and to decrease vulnerability to floods in the Kosi River Basin.

Embankment strengthening : strengthening works such as protection, restoration and construction of new spurs along with embankment protection works of 46 spurs along Eastern Kosi Embankment and 24 spurs along Western Kosi Embankment have been completed. The strengthening of spurs proved to be very effective in mitigating the flood risk along the embankment.

Physical modelling Centre (PMC) at Birpur as Centre of Excellence : With the establishment of this Centre, initially, model testing of various reaches (including embankments and spurs) of Kosi River will be done with the help of experts. These model studies will be beneficial for better flood management and improvement in flood risk management. The construction of PMC is in the final stage. The new technical and specialist posts have been created to make PMC functional and some of the engineers have already been posted at PMC.

Mathematical Modelling Centre (MMC) at Patna as Centre of Excellence : MMC was established as a Centre of Excellence with a vision to have in-house capacity to develop and use mathematical models for solving water related problems in Bihar. Presently at MMC, flood forecasting is done for five river basins namely Gandak, Bagmati-Adhwara, Kosi, Mahananda and Ganga River during Monsoon Period (from June to October).

(ix) **Raising, strengthening and puckkikaran of Kamla Balan Embankment (Left and Right)** : The project involves raising, strengthening, and black topping the left and right embankments of the Kamla Balan river, at an estimated cost of Rs. 877.47 crore. This will benefit about 32.60 lakh people during floods in the districts of Madhubani, Darbhanga, Samastipur, and Saharsa. The details of the different phases of the implementation of the project are discussed below:

a. **Phase – I (Pipraghat to Thengha Bridges)**: The administrative approval for raising, strengthening, and puccikaran of Left Kamla Balan Embankment (L.K.B.E) and Right Kamla Balan Embankment (R.K.B.E.) Phase– I has been granted, costing Rs. 32,512.32 lakh to address flood levels at Jhanjharpur railway bridge No. 88. This project would benefit 12 lakh people in the districts of Madhubani and Darbhanga and protect 0.48 lakh hectares of land from floods.

b. **Phase – II (From Fatki Kutti to Punach of L.K.B.E and Thengha to Palwa of R.K.B.E.)**: The approval for the Phase–II of this project has been granted with an estimated cost of Rs. 29,689.00 lakh. Apart from benefitting the population of the affected districts, it will protect 0.56 lakh hectares of land from floods.

c. **Phase – III (From Jainagar to Kasama, Pirahi to Pipraghat, Punach to Ghoghepur of L.K.B.E. and from Jainagar to Bhatgama and Palwa to Phuhia of R.K.B.E.):** With the initiation of this project, nearly 8.6 lakh people will be benefitted and around 0.55 lakh hectares of land will be insulated from floods. This project will be carried out at an estimated cost of Rs. 25,545.92 lakh.

(x) **Construction of New Embankment from Hasanpur-Baniya to Saguni in length 8.33 km with protection work :** The construction of a new embankment from Hasanpur-Baniya to Saguni, covering 8.33 kms. and requiring protection work, has been approved at an estimated cost of Rs. 5,998.27 lakh. The embankment will be built on the river side between the Madhopur Zamindari Bandh and Saran embankment, providing protection to Panapur and Taraiya blocks in the Saran District and adding an additional layer of safety during river discharges.

(xi) **River Linking of Gandak-Akali Nala (Chhari)-Gandaki-Mahi-Ganga** : The Gandak-Akali Nala (Chhari)-Gandaki-Mahi-Ganga river linking project has been approved for an estimated cost of Rs. 6,989.79 lakh. The project aims to divert logged water through drainage channels to a final outfall in the Ganga river, which can be used for irrigation and agricultural purposes during Kharif and Rabi seasons. The project will span 170 kms., benefiting a population of around 7 lakh and an area of 0.60 lakh hectares by providing proper drainage for excess flood water.

(xii) **Restoration of Saran Embankment from km 80.00 to km 120.28 with Provision of Bituminous Road on the Top of the Embankment** : It has been approved at an estimated cost of Rs. 12411.00 lakh. The project aims to strengthen the Saran embankment in a length of 40.28 km and construction of bituminous road on top of embankment in the above reach. The strengthening of embankment will provide safety from recurring floods of River Gandak. Also the construction of bituminous road on top of embankment will facilitate better inspection of the embankment along with providing better rural connectivity in the Barauli, Sidhwaliya and Baikunthpur blocks of Gopalganj district.

New Schemes of the Department of Water Resources

(i) **Raising, Strengthening, Protection, and Black Topping in between Km 80.00 to Km 152.00 of Saran Embankment and Allied Chharki on the Right Bank of River Gandak in Gopalganj District of Bihar** : It has been approved at an estimated cost of Rs. 35151.00 lakh. The project aims to strengthen the Saran main embankment and allied chharkis lying on the right bank of river Gandak in Gopalganj district, embankment in a length of 40.28 km and construction of bituminous road on top of embankment in the above reach. The strengthening of embankment will provide safety from recurring floods of River Gandak. Also, the construction of bituminous road on top of embankment will facilitate better inspection of the embankment along with providing better rural connectivity in the Barauli, Sidhwaliya and Baikunthpur blocks of Gopalganj district.

(ii) **Construction of Sidhi Ghat and Channel in Old Uttarwahini Dhar at Ajgaibinath Temple** : The administrative approval for construction of sidhi ghat and channel in old Uttarwahini Dhar at right bank of Ganga river at Ajgaibinath temple in Sultanganj in Bhagalpur district has been accorded for an estimated cost of Rs 164.57 crore. After completion of the project, it will prevent possibility of erosion at this site during excessive flow of current in Ganga. Also, Devotees will get facilities during various festivals and religious rituals.

(iii) **Construction of Right Sikrahana Embankment** : The Sikrahana right embankment, spanning 56.22 kms., will be constructed in West Champaran and East Champaran, covering 25.87 kms. and 30.34 kms. respectively. The estimated cost is Rs. 239.63 crore, and will benefit an area of 69,606 hectares. The construction will benefit around 2,35,000 people in Chanpatia, Bettiah, Majhaulia block of West Champaran, and Sugauli, Banjaria and Motihari block of East Champaran.

(iv) **Bagmati-Shantidhar-Burhi Gandak link project in Samastipur District**: The Bagmati-Shantidhar-Burhi Gandak link project in Samastipur district has been approved for an estimated cost of Rs. 12,096.11 lakh. The main goal is to divert excess flood water from the Bagmati river to the Burhi Gandak river, thereby creating an irrigation potential of 0.39 lakh hectares.

(v) **Construction of New Embankment on Left and Right bank of Sugarway river (New and Old):** The administrative approval for the construction of a new embankment on the left and right bank of the Sugarway river has been granted, costing Rs. 7,308.53 lakh. The scheme will protect a population of 0.35 lakh in Jhanjharpur block in Madhubani district from floods and provide transportation facilities, benefiting the entire Madhubani district.

(vi) **Bagmati-Budhi Gandak river-linking project (Belwa-Minapur link channel) :** The Bagmati river in the Sheohar district is being connected to the Budhi Gandak river in Minapur to divert excess flood discharge. The project, approved for Rs. 13,088.57 lakh, will benefit over 30 lakh people in three districts: Sheohar, Muzaffarpur, and East Champaran. It will increase irrigation potential and improve the socio-economic conditions of people in these areas. The irrigation facility will be available to 1,35,000 hectares in four districts such as Sheohar, Muzaffarpur, East Champaran, and Samastipur, providing flood control in Sheohar and Muzaffarpur. Other benefits include sustainable water management, improved agriculture, employment opportunities, green cover, food security, economic development, command area development, and improved market facilities.

(vii) **Pucca Protection and Anti-erosion Work near Sidhi Ghat** : The administrative approval for pucca protection and anti-erosion work near Sidhi Ghat on the right bank of the Ganga channel under the Bakhtiyarpur block in the Patna district has been accorded for an estimated cost of Rs. 5,606.00 lakh. After completion of this project, it will prevent the possibility of erosion at this site during excessive flow of current in Ganga. It will provide additional protection to the Bakhtiyarpur city from floods. Also, devotees will get facilities during various festivals and religious rituals.

Initiatives of the Department of Minor Water Resources

This section outlines the specifics of the physical and financial objectives and accomplishments of different initiatives under the Department of Minor Water Resources aimed at managing water systems in the state (Table 14.22).

Table 14.22 : Physical & Financial Targets & Achievements of Various Schemes

Sl. No.	Name of the Plan	2022-23				2023-24

Some of the initiatives for environmental protection and water conservation are mentioned below:

(i) **Jal-Jeevan-Hariyali Abhiyan (JJHA):** This flagship programme of the State government was launched on October 26, 2019 with the objective of conserving water and restoring the irrigation potential of traditional schemes. Under this, total 2377 schemes have been approved till 2023-24, out of which 2182 have been completed. The completed schemes have created 2,22,639 hectares of irrigation capacity and 992 lakh cubic meters of water storage capacity. An amount of Rs. 269.66 crore has been spent on these schemes in the financial year 2023-24.

(ii) **Installation of Telemetry Systems:** For monitoring ground water, 504 telemetry systems (Automatic Water Level Recorders) have been installed in each block and district headquarters. The groundwater level data obtained from these systems over different periods are shared with various government and related non-government institutions.

14.10 Disaster Management

Bihar faces a high risk of natural disasters because of its geographical position and the instability of the hydro-meteorological system. In the past few decades, the occurrence and severity of climate-related disasters have risen significantly. In 2023-24, floods affected 3.16 lakh persons of 6 districts (Table 14.23).

Table 14.23 : Loss and Damage to Life and Property during Natural Disasters (2023-24)

Type of natural calamity	Districts affected	People affected (in lakh)	Crop Area affected (lakh ha)	Crop Production Loss (Rs. Lakh)	Livestock Affected (lakh)
Flood	6	3.16	0	0	0.43
Drought	0	0	0	0	0

Source : Department of Disaster Management, GoB

Table 14.24 displays the districts affected by flooding during 2019 to 2023. In 2023, nearly 0.90 lakh families and 737 house dwellings were affected due to floods in 6 districts of the state. Figure 14.2 provides the flood prone district through map.

Table 14.24 : Assessment of Flood Vulnerability in Bihar

Year	Districts	No.of Families Affected (in lakh)	Houses affected
2019	Sheohar, Sitamarhi, East Champaran, Madhubani, Araria, Kishanganj, Supaul, Darbhanga, Muzaffarpur, Saharsa, Katihar, Purnea, West Champaran, Buxar, Bhojpur, Bhagalpur, Khagaria, Samastipur, Lakhisarai, Begusarai, Munger, Patna, Nalanda, Nawada, Jehanabad, Arwal, Madhepura	37.36	45161
2020	Madhubani, Khagaria, Supaul, West Champarn, Kishanganj, Bhagalpur, Sheohar, Muzaffarpur, Darbhanga, East Champaran, Samastipur, Saharsa, Begusarai, Gopalganj, Vaishali, Sitamarhi, Siwan, Saran, Madhepura	25.06	18775

Figure 14.2 : Mapping of Flood-prone Areas in Bihar

Source : Department of Disaster Management, GoB

The geographical complexion of Bihar, its boundary, its land, its water bodies, the climate and, above all, its location makes it the Home State of Hazards. Almost all the districts are prone to most of the major hazards: earthquake, floods, cyclone, drought and fire. Sometimes two of the major hazards visit different parts of the state during the same period. This constitutes the multi - hazard profile of the state in the true sense of the term. The severity of disaster losses depends on a number of factors, including the type of disaster, its magnitude, and the vulnerability of the affected population. The lives lost and injured casualties in the state due to various natural disasters and accidents are presented in Table 14.25. In 2023-24, the total deaths were 2107, of which, the highest number of deaths occurred due to drowning (1560), followed by lightning (242) and fire (120). Also, 151 persons died of snakebite in the state during the same year. In addition to flooding, the state frequently experiences thunderstorms, particularly in the south-central and south-eastern regions. Appendix (Table A 14.7) presents the district-wise incidence of thunderstorm-related deaths.

The prevention, mitigation, preparedness and response measures are very important to develop a comprehensive and effective plan which helps in reducing the loss of life and property. Given the scope and diversity of the disasters in the state ranging from floods, drought, thunderstorms, lightning, cyclones etc., the State government is devoted to managing the calamities and helping the impacted families. The details of funds allocated for management of floods and cyclones in the state during 2021-22 to 2024-25 (September) are given in Table 14.26. The total fund allocated for management of disasters in 2023-24 was Rs. 574.29 crore. Also, a set of guidelines for disaster risk reduction and risk management has been developed.

Table 14.26 : Funds allotted for Floods and Cyclones in Bihar

(Rs. crore)

Programmes	2021-22	2022-23	2023-24	2024-25 Up to Sept 24)
Rescue Equipment	0.0411	0.03	0	0
Community Kitchen	122.2694	12.54	8.75	7.1
Distribution of Gratuitous Relief (GR)	999.9754	3.88	42.0397	0
Repair of Roads and Bridges	160.43	35.16	149.3874	0
Evacuation and Relief Operation	111.2541	75.08	20.419	15.6422
Repair of Public Buildings	1.3219	2.56	1.1952	0
Agricultural Input Subsidy	1001.07	0	0	0
Repair of Boats	0.679	0.49	0.4635	0.4788
Repair of Embankments and Irrigation system	510.71	6.84	127.6342	0
Ex-Gratia Payment (For Flood Victims)	6.34	0.24	0	0
Ex-Gratia Payment (For other natural calamities)	8.24	8.88	12.535	12.76
Local Disaster (Lightning, Drowning and others)	309.7853	285.22	211.8614	76.8229
Total	**3232.116**	**430.92**	**574.29**	**112.80**

Note : Data of 2024-25 is as of September 30, 2024.

New Initiatives for Managing Disasters

(i) **Formation of Bihar State Disaster Management Service Cadre** : Disaster management is one of the top priorities of the State government. Similarly, disaster management at the local level is very important for the state. Now, disaster management is not only relief and rehabilitation, but also reconstruction and rapid restoration of infrastructure. Therefore, for the successful conduct of activities, dedicated officers are needed at the district, division and state levels. To tackle this need, a total of 57 posts have been created under the "Bihar State Disaster Management Services'' cadre, in which 43 posts are for Assistant Disaster Management Officer, 11 posts for Deputy Disaster Management Officer and 3 posts for Disaster Management Officers.

(ii) **Creation of Standard Operating Procedures (SOP)** : SOPs have been formulated by the Disaster Management Department to deal with different types of disasters. SOPs for disaster management during flood, drought and drinking water crisis management have been prepared. Apart from this, action is being taken to formulate SOP for earthquake disaster management.

(iii) **Modernization of State Emergency Operation Center (SEOC)** : To reduce the damage caused by natural and man-made disasters and conduct relief and rescue operations in an

effective and prompt manner in case of a disaster, the State Emergency Operation Center (SEOC) and District Emergency Operation Centers (DEOC) have been established in all the districts of Bihar. The SEOC is functional from the month of January, 2019 at the Sardar Patel Bhawan on the Nehru Path (Bailey Road) in Patna. In view of the need to strengthen the SEOC to make proper arrangements for new technology-based communication system, action for its modernization has been taken. Also, for the purpose of real-time reporting during disasters, app-based monitoring, tracking of facilities and resources, assessment of disaster situation in GIS map, inter-departmental coordination, etc. have been implemented by the department. Further, the Decision Support System in SEOC has been established in January, 2024.

Initiatives from JEEVIKA towards Management of Disasters

This segment details the measures taken by JEEVIKA in relation to disaster management, which are aligned with the Disaster Risk Reduction Roadmap. The advancements of these measures are presented in Table 14.27. By leveraging JEEVIKA's network and working alongside other organizations in the state, initiatives have been implemented to enhance public awareness and safeguard communities from disasters.

Table 14.27 : Progress of different activities under Disaster Management

Activities by JEEVIKA	Progress till September 2024
JEEVIKA Master Trainers trained in Natural Disaster Management (Module 1) in convergence with BSDMA	800
JEEVIKA Trainers trained in Natural Disaster Management (Module 1)	4,567
Total number of trained JEEVIKA cadres in Natural Disaster Management (Module 1)	30,132
Number of JEEVIKA Didis trained on two or more components of Natural Disaster Management	42,18,108
Number of active JEEVIKA Disaster-Health Help Desk Centres (in public hospitals and medical college hospitals)	45
Number of active JEEVIKA Disaster-Health Assistants (Swasthya Mitra)	192
Number of identified volunteers	1,28,163
Number of "JEEVIKA Didi Nurseries" developed for low-cost tree plantation	947
Number of saplings planted under the "Harit Jeevika Harit Bihar" initiative (in crore)	4.25

Source : JEEVIKA, Government of Bihar

(i) **Flood Preparedness and Management**: In alignment with the "Risk Reduction Roadmap 2015-2031," JEEVIKA has been tasked to create livelihood opportunities while mitigating disaster risks. In collaboration with UNICEF, JEEVIKA conducted training on "Flood Preparedness and Management" in 28 districts of Bihar. Master Trainers have provided

training to the members of all Cluster-Level Federations in these districts. As of September 2024, more than 42,18,108 JEEVIKA staff, community professionals, and community members have been trained at the Cluster and Block levels.

(ii) **Disaster Risk Reduction**: In coordination with the Bihar State Disaster Management Authority, JEEVIKA organized a three-day residential training on Module-1 of Disaster Risk Management and Mitigation for Master Trainers. A total of 800 Master Trainers were trained in disaster risk management. After training, these Master Trainers train community members, project staff, and Community-Based Organizations (CBOs) in their respective blocks and districts. Also, 800 JEEVIKA trainers have completed Module-2 training in seven batches across all 38 districts.
